PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Thursday, March 24, 1977*

The House met at 11 o'clock a.m.

The Very Reverend Sviatoslaw Kous, St. Cyril of Turov Byelorussian Orthodox Church, Richmond Hill, N.Y., offered the following prayer:

O God Almighty. In a day of creation You gave to humankind the likelihood of Yourself. Among all spiritual treasures of such likelihood, You gave us freedom. From the beginning of time, men and women cherished this precious gift. For the people of this United States of America, freedom became an inseparable part of life as Your greatest blessing. Keep in Your grace our great American Nation and our freedom for endless time.

Look with Thy gracious eye on my Byelorussian people and let them perceive the way of Your freedom. Let come to pass the longing of Byelorussian people to be part of the free world and they will open the gates of their churches, locked today by godless government, and they shall exalt Your holy name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Is there objection to the approval of the Journal?

Mr. ASHBROOK. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. WRIGHT. Mr. Speaker, I move that the Journal be approved.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. WRIGHT).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 386, nays 3, answered "present" 4, not voting 39, as follows:

[Roll No. 99]

Flippo	Pritchard	Young, Tex.

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

THE REVEREND SVIATOSLAW KOUS

(Mr. ADDABBO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADDABBO. Mr. Speaker, once more the House of Representatives has been honored to have the Reverend Sviatoslaw Kous, rector of the American-Byelorussian St. Cyril of Turov In-

dependent Greek Orthodox Church, deliver the opening prayer.

Reverend Kous, whose church is in Richmond Hill in Queens, N.Y., a part of the Seventh Congressional District, is here for his second visit, having delivered the opening prayer 4 years ago.

It is particularly appropriate that Reverend Kous be with us today since on tomorrow, March 25, Byelorussians celebrate their independence day. Reverend Kous was born in Byelorussia, graduated from the Stephen Batory University in Wilno.

After coming to the United States in 1949, he was ordained to be a priest by the Metropolitan Germanos of the Greek Orthodox Church on February 9, 1969.

On behalf of my House colleagues, I would like to pay tribute to tomorrow's 59th anniversary of the proclamation of the independence of the Byelorussian Democratic Republic.

The people of Queens are proud of Reverend Kous and St. Cyril of Turov Independent Greek Orthodox Church, and I thank Reverend Kous for being with us today. And I know his wife, son, daughter-in-law, and their beautiful grandchildren, Antole and Danny, are all as proud as we are.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I have asked for this time to inquire of the distinguished acting majority leader as to the program for the balance of the week and next week.

Mr. ROSTENKOWSKI. Mr. Speaker, will the distinguished minority leader yield?

Mr. RHODES. I am happy to yield to the gentleman.

Mr. ROSTENKOWSKI. Mr. Speaker, the program for Thursday, today, and the balance of the week, is as follows: the House will be working on H.R. 3965, FAA research and development authorization; H.R. 4991, National Science Foundation authorization for the fiscal year 1978, and H.R. 5040, State Department supplemental authorization.

It is the intention of the leadership to ask that if we finish the schedule by 5:30 today, that the House adjourn to meet on Monday noon of next week.

The schedule for Monday and next week is as follows:

On Monday, the House will meet at noon. There are no District bills and no suspensions.

We will consider House Resolution 420, to establish a Select Committee on Congressional Operations.

On Tuesday the House will meet at noon. There will be three suspensions:

H.R. 2992, the CETA extension; H.R. 2521, rabbit meat inspection; and H.R. 3416 flue-cured tobacco quotas.

We will also consider H.R. 5045, to extend Presidential authority to submit Government reorganization plans to Congress. I believe that the Committee on Rules has given a 1-hour debate under the rule.

On Wednesday, the House will meet at 3 p.m. There will be a series of House committee funding resolutions.

The House will also consider on Wednesday next reconstituting the Assassinations Committee.

On Thursday and the balance of the week the House will meet at 11 a.m. to consider H.R. 4895, Strategic Materials Stockpile Act, subject to a rule being granted; H.R. 4974, health planning, services, research, libraries extension, subject to a rule being granted; H.R. 4975, Biomedical Extension Act, also subject to a rule being granted; and H.R. 4976, Health Services Extension Act, subject to a rule being granted.

It is the intention, of course, for the House to continue its deliberation of the scheduled legislation until 5:30 today.

Mr. RHODES. Mr. Speaker, may I ask the distinguished acting majority leader to clarify the situation for today and tomorrow? It was my understanding that if we finish the schedule for today by 5:30, that there will be no session tomorrow.

Mr. ROSTENKOWSKI. That is the intention, yes.

Mr. RHODES. If we do not finish, will there be a session tomorrow?

Mr. ROSTENKOWSKI. We will be in session. The House will meet at 11 o'clock.

Mr. RHODES. Could the gentleman inform the House as to the possibilities of a Friday session next week? The schedule has been such that the chances will be very good of completing the schedule by Thursday evening.

Mr. ROSTENKOWSKI. Of course, I cannot make that prediction. However, I am sure that if we do complete our business, it will be the position of the leadership to avoid a Friday session if at all possible.

Mr. RHODES. I thank the gentleman.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Illinois?

There was no objection.

REQUEST FOR ADJOURNMENT OVER TO MONDAY, MARCH 28, 1977

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that if we finish the scheduled business for today by 5:30 p.m., we adjourn over until noon on Monday. If the schedule is not completed, we will reconvene at 11 a.m. tomorrow morning.

The SPEAKER pro tempore. The Chair would suggest that the announcement made by the acting majority leader previously accurately describes the intention of the leadership.

Mr. ROSTENKOWSKI. Mr. Speaker, I withdraw my unanimous-consent request.

The SPEAKER pro tempore. At a later time the Chair believes that a unanimous-consent request will be in order.

PERSONAL STATEMENT

(Mr. TRAXLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAXLER. Mr. Speaker, on Tuesday, March 15, 1977, the House took under consideration and passed H.R. 4876, the Economic Stimulus Appropriations Act for 1977. During floor action that day, I did not have with me my electronic voting card, and I was thus voting in the well, rather than by electronic device.

My voting record on four out of the five votes that occurred that day appeared accurately recorded in the CONGRESSIONAL RECORD of March 15. Unfortunately, however, for some reason I am listed as being absent for the vote on final passage. In reviewing the CONGRESSIONAL RECORD, I found this to be very baffling to me, as I distinctly recall voting "yea" on final passage before leaving the House floor.

I would like the RECORD to indicate my support for this important measure that my intention to vote affirmatively on final passage of H.R. 4876 be recorded in the permanent record.

PRESERVE OUR NEIGHBORHOOD SCHOOLS

(Mr. MOTTL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOTTL. Mr. Speaker, like most of us in Congress, I have felt many frustrating moments during my tenure in the U.S. House.

But nothing has been as personally frustrating to me—and perhaps to you also—as our efforts to have debated publicly on the floor of the U.S. House or in committee the important issue of preserving our neighborhood schools by amending the Constitution to allow every child the right to attend his neighborhood school and give every child the right to a quality education.

If you feel strongly about one of the major issues of the day and think as I do that we should have an opportunity to debate it either in committee or on the House floor, please walk up to the Journal clerk's desk and sign our discharge petition. The petition is discharge petition No. 1, a fitting number for so vital an issue.

REMEMBER BYELORUSSIA

(Mrs. FENWICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. FENWICK. Mr. Speaker, tomorrow, March 25, is the 59th anniversary of the proclamation of independence of the Byelorussian Democratic Republic, in 1918. It was a valiant but short-lived trust of independence and freedom. On January 1, 1919 it became the Byelo-

russian Soviet Socialist Republic and since then—although it has a vote in the United Nations—it is neither independent nor free. Those of us who are free to speak surely have a duty to remember, to say to the sons and daughters of Byelorussia—here and abroad in the world—that they will not be forgotten on this day.

REPORT ON SENATE CONCURRENT RESOLUTION AUTHORIZING THE PRINTING OF COMMITTEE PRINT TITLED "THE ACCOUNTING ESTABLISHMENT"

Mr. ROSE, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–113) on the Senate concurrent resolution (S. Con. Res. 8) authorizing the printing of the committee print entitled "the Accounting Establishment" as a Senate document, which was referred to the House calendar and ordered to be printed.

REPORT ON RESOLUTION TO CONTINUE WORK OF JOINT COMMITTEE ON CONGRESSIONAL OPERATIONS

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 95–114) on the resolution (H. Res. 420) to continue the work of the Joint Committee on Congressional Operations by establishing a select committee of the House to perform the functions of such joint committee for the House, which was referred to the House Calendar and ordered to be printed.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 106. An act to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes.

The message also announced that the President pro tempore, pursuant to Public Law 94–118, appointed Mr. JAVITS to be a member, on the part of the Senate, of the Japan-United States Friendship Commission.

And that the Vice President, pursuant to Public Law 86–380, appointed Mr. ROTH to be a member, on the part of the Senate, of the Advisory Commission on Intergovernmental Relations.

PROVIDING FOR CONSIDERATION OF H.R. 3965, AUTHORIZING APPROPRIATIONS TO THE FEDERAL AVIATION ADMINISTRATION FOR RESEARCH AND DEVELOPMENT

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 430 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 430

Resolved, That upon the adoption of this resolution it shall be in order to move, clause 2(1)(2)(B) of rule XI to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3965) to authorize research, development, and demonstration projects relating to aviation, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the Committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from Illinois (Mr. ANDERSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 430 provides for the consideration of H.R. 3965, a bill authorizing appropriations to the Federal Aviation Administration for Research and Development.

The resolution provides for an open rule with 1 hour of debate to be controlled by the chairman and ranking minority member of the Committee on Science and Technology.

This rule also grants a waiver against points of order for a failure to include the committee's rollcall vote in their report. Furthermore, the rule provides that the committee substitute be considered as an original bill for the purpose of amendment.

H.R. 3965 authorizes $85 million for fiscal year 1978 from the Airport and Airway Trust Fund for research and development projects.

Four major areas would be funded under this authorization: First. Air Traffic Control—$67,942,000—provides for improving the airways system by applying existing technology to air traffic control problems to keep the current system operating safely with maximum efficiency and by providing system improvements to increase the capacity of the current system.

Second. Navigation—$10,682,000—provides for modernization, expansion and improvement of the common navigation system facilities in the United States and in overseas areas where international agreements require U.S. participation.

Third. Aviation Weather—$5,193,000—provides for a program coordinated with the Departments of Commerce, Defense and NASA to increase the safety and efficiency of the National Airspace System by providing weather information tailored for use by pilots and controllers.

Fourth. Aviation Medicine—$1,183,-00—provides for analysis, determination and improvement of the role of the human operator as part of the air traffic control system in order to increase the efficiency, reliability and safety of this system.

Under section 2 of the bill, funds may be transferred from one program to another, but if the FAA wishes to transfer funds it must first notify the appropriate House and Senate committees, the Speaker and the President of the Senate. Congress would have a 30-day period in which to object to the proposed action.

Mr. Speaker, I urge the adoption of House Resolution 430 so that we might debate and vote on H.R. 3965.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a 1-hour open rule making in order the consideration of H.R. 3965 which authorizes $85 million in R. & D. funds for the Federal Aviation Administration in fiscal 1978 from the Airport and Airway Trust Fund. This rule waives clause 2(L)(2)(B) of House rule XI which requires that the rollcall vote totals on reporting a bill be included in the committee report. The rollcall total was not included in the report, though you will note on page 54 of the report the following:

A quorum being present; the Committee unanimously approved the bill by roll call vote of those present.

So in fairness to the Science Committee, their report did conform in spirit if not the letter to clause 2(L)(2)(B). The rollcall vote was unanimous, and I am informed it was 29 to 0.

I might insert a plug for an amendment to this House rule which I have introduced as House Resolution 172 in this Congress, along with 77 House cosponsors. That rule would permit any Member on a committee to demand a rollcall vote on any question, and would also require a rollcall vote on every motion to report as well as the publication in the report of the names, not just the numbers, of those voting for and against reporting.

Mr. Speaker, I know of no objection to this rule and urge its adoption.

Mr. PEPPER. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 4991, AUTHORIZING APPROPRIATIONS TO THE NATIONAL SCIENCE FOUNDATION

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 431 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 431

Resolved, That upon the adoption of this resolution it shall be in order to move that

the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4991) to authorize appropriations for activities of the National Science Foundation, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted. The previous question shall be considered as ordered on the bill and amendments thereto without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 431 provides for an open rule with 1 hour general debate on H.R. 4991, the fiscal year 1978 authorization bill for the National Science Foundation.

H.R. 4991 authorizes a total of $868 million for such departments as mathematical and physical sciences and engineering, astronomical, atmospheric, earth and ocean sciences, biological, behavioral, and social sciences, science education, the U.S. Antarctic program, research applied to national needs, scientific, technological, and international affairs, program development and management, and the special foreign currency program.

Mr. Speaker, I urge the adoption of House Resolution 431 in order that we may consider and adopt H.R. 4991.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 431 provides 1 hour of general debate for the consideration of H.R. 4991, authorizing appropriations for the National Science Foundation. The bill will be open to germane amendments. There are no waivers of points of order in the rule.

Mr. Speaker, this bill authorizes a total of $868,000,000 for fiscal year 1978. By way of comparison, the amount appropriated to the National Science Foundation for fiscal year 1977 was $776,100,000.

Mr. Speaker, there is only one subject to which I would like to make reference in this bill.

Over the years there has been, I think, an undue concentration on the NSF funds for contract awards and grants in primarily one area of the country rather than evenly distributed around the country. A few Members have always raised this question, either in the committee or on the floor. However, the National Science Foundation continues to over-concentrate these awards in just a couple of places.

I understand that there was an amendment offered in committee this time which would attempt to go halfway toward dealing with that problem.

It should be an objective of the committee, among other things, to avoid undue concentration of awards and grants.

I think that is important; and if the NSF does not care to take action to avoid this kind of thing or if the Congress does not take action wherever possible across the country, I am sure that in years to come there is going to be a specific amendment directing that to be done.

Therefore, Mr. Speaker, I hope that the Members will watch very closely where these NSF awards are going in the future. Let us make sure that we all take this opportunity to see to it that the NSF takes a proper position in this respect and does not concentrate on any one particular area in making awards and grants.

Mr. Speaker, I am not aware of any objection to the rule, and I urge its adoption.

Mr. PEPPER. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 5040, AUTHORIZING ADDITIONAL APPROPRIATIONS FOR DEPARTMENT OF STATE FOR FISCAL YEAR 1977

Mr. DODD. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 424 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 424

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5040) to authorize additional appropriations for the Department of State for fiscal year 1977. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Connecticut (Mr. DODD) is recognized for 1 hour.

Mr. DODD. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from California (Mr. DEL CLAWSON) for the purpose of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 424 provides for the consideration of H.R. 5040, an act authorizing additional appropriations of some $89.6 million for the Department of State for fiscal 1977.

This is an open rule which would permit 1 hour of general debate, with amendments to follow under the 5-minute rule. It would waive points of order against the bill for failure to comply with provisions of section 402(a) of the Congressional Budget Act of 1974, the section providing it shall not be in order, without a waiver, to consider any bill authorizing new budget authority for a fiscal year which is reported after the May 15 preceding that fiscal year.

House Resolution 424 also allows one motion to recommit, with or without instructions.

Mr. Speaker, H.R. 5040 provides additional authorization in four areas:

First, $60 million to pay this country's dues to the United Nations Educational, Scientific, and Cultural Organization—UNESCO—for calendar years 1975, 1976, and part of 1977;

Second, $11.3 million to assist Soviet and Eastern European refugees not settling in Israel; and $7.4 million for the Indochinese refugee program administered by the United Nations High Commissioner for Refugees;

Third, $10.7 million for construction of housing in Cairo, Egypt, for personnel administering the U.S. assistance program there; and

Fourth, $150,000 for emergency medical and dietary assistance to Americans incarcerated abroad, primarily in Mexico.

The bill also amends four laws authorizing U.S. participation in the NATO, Canadian, and Mexican Interparliamentary Groups and in the Interparliamentary Union. It provides that the House delegations to the NATO and Interparliamentary Union conferences be increased from 9 to 12 members.

Mr. Speaker, the distinguished chairman of the House International Relations International Operations Subcommittee (Mr. FASCELL) informed the Committee on Rules earlier this week that none of the supplemental funding requests could have been made in time to meet the May 15, 1976, reporting deadline.

The request for UNESCO payments, the largest portion of this bill, could only be made by the State Department, under the 1974 Foreign Assistance Act, after the President certified UNESCO had adopted policies consistent with its nonpolitical objectives and had taken steps to correct certain actions taken in 1974 against Israel.

The past administration provided this certification last December, and the new administration reaffirmed this. According to reports, there was some progress at the last UNESCO conference, in 1976.

The International Relations Committee apparently feels these U.S. payments now will be interpreted by other UNESCO member nations as a substantial indication of this country's good faith and as a demonstration of our concern that UNESCO must make even greater progress toward removing this political cloud from their shoulders.

I hope this proves to be the case, Mr.

Speaker, because there still remain on UNESCO's books two resolutions condemning Israel. And a Soviet Union-sponsored resolution aimed at legitimizing state control of the free press in many countries is pending before UNESCO in 2 years.

I know many of our colleagues in the House share my opposition to such UNESCO pronouncements, and I further hope this country will exercise the increased leverage it may achieve through these payments in H.R. 5040 to successfully press for removal of these ill-considered UNESCO actions.

In closing, I would note that my honorable colleague in the House from my own State of Connecticut, the chairman of the Budget Committee (Mr. GIAIMO), has informed the Committee on Rules that the additional funds authorized in this bill have been ocntained in the third concurrent budget resolution for fiscal 1977, and that he does not object to the waiver of section 402(a) of the Budget Act.

Mr. Speaker, I urge adoption of the rule in order that this legislation be considered.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 424 provides an open rule with 1 hour of general debate for the consideration of H.R. 5040, which authorizes additional appropriations for 1977. The rule waives any points of order against the bill for failure to comply with the provisions of section 402(a) of the Budget Act since the bill was not reported in time to meet the May 15 reporting deadline. The rule also provides for one motion to recommit with or without instructions.

Mr. Speaker, the primary purpose of H.R. 5040 is to authorize $89,650,000 in supplemental appropriations for the Department of State for fiscal year 1977. The bill provides authorizations in four areas: First, payment of calendar years 1975–76 UNESCO arrearages and part of the calendar year 1977 assessment; second, supplemental requests for Soviet refugee assistance and for Indochinese refugees in Asia; third, emergency assistance to American citizens incarcerated abroad; and fourth, funds under the special foreign currency program for purchases of land and construction of three 36 unit staff apartment buildings in Cairo, Egypt. The bill also amends four laws authorizing U.S. participation in the NATO, Canadian, and Mexican Interparliamentary Groups and in the Interparliamentary Union to make certain changes with respect to the House delegations to these groups.

Mr. Speaker, I support this rule and would urge the House to adopt it and debate the merits of this bill in the allotted time.

Mr. Speaker, I have no requests for time, and I reserve the remainder of my time.

Mr. DODD. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill H.R. 3965 on which a rule has just been agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

AUTHORIZING APPROPRIATIONS TO THE FEDERAL AVIATION ADMINISTRATION FOR RESEARCH AND DEVELOPMENT

Mr. FUQUA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3965) to authorize research, development, and demonstration projects relating to aviation, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. FUQUA).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 3965, with Mr. MCKAY in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. FUQUA) will be recognized for 30 minutes, and the gentleman from New York (Mr. WYDLER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the bill H.R. 3965 to authorize appropriations to the Federal Aviation Administration for research and development. This subcommittee has been chaired by the able gentleman from Texas (Mr. MILFORD). We regret that Mr. MILFORD is confined to the hospital now. He is recovering well and we hope to have him back on the floor very soon. But the subcommittee has held numerous hearings with the officials from the agencies and others and reports the bill to the committee and recommends its passage.

At this time I should like to yield to the ranking member on the subcommittee, the gentleman from California (Mr. LLOYD) who is filling in for the gentleman from Texas (Mr. MILFORD). The gentleman from California (Mr. LLOYD) has been doing a very oustanding job. We are very proud of the work that Mr. LLOYD has been doing on short notice. He has done a very, very fine job, and I yield such time as he may consume to him at this time.

Mr. LLOYD of California. Mr. Chairman, when the House reorganized in 1974, all civil aviation R. & D. matters were placed under the jurisdiction of the Committee in Science and Technology. Having had experience with NASA for 15 years prior to that time, the committee had long realized the necessity for continuous and thorough scrutiny of aeronautical R. & D. programs.

For that reason, the committee recommended, and the House overwhelmingly approved, that FAA R. & D. programs receive a similar annual authorization.

The bill now before us, H.R. 3965, is the result of the committee's efforts to carry out the intent of the House.

The vision and leadership of the gentleman from Texas (Mr. TEAGUE), chairman of the Committee on Science and Technology, has given strength and direction to the committee in these efforts.

The chairman of the Subcommittee on Transportation, Aviation, and Weather, Hon. DALE MILFORD, could not be here today. However, he asked me to thank all the members of the subcommittee for their diligent and thoughtful efforts in developing the bill before us today. Each Member of both sides of the aisle has made a significant contribution. Particularly, Mr. MILFORD wished to recognize the contributions of the gentleman from New York (Mr. WYDLER), the ranking minority member of the subcommittee. His knowledge and personal insight into these complex programs continue to be of immeasurable help in establishing a sound bill and strong FAA R. & D. program.

In carrying out its responsibilities, the subcommittee held four hearings and conducted numerous field trips to better understand the FAA R. & D. programs.

Time does not permit me to detail the information and knowledge that the subcommittee gained as a result of these trips and hearings.

However, I would like to make one major observation. And that is, that largely due to many years of lack of consistent and thorough congressional scrutiny, several important FAA R. & D. programs have had rather ill-starred careers.

This has often resulted in some increased cost to the taxpayer, deferment of important programs, or general neglect or confusion on the part of the Congress. Passage of this bill will greatly help rectify this situation. It is the result of a thorough examination and offers firm congressional guidance in the place of neglect and confusion.

This brings me to a discussion of the funding level contained in H.R. 3965.

The committee approved a total of $85 million for FAA R. & D. programs. Of this total, $67,942,000 is for air traffic control purposes, $1,183,000 for aviation medicine purposes, $10,682,000 for navigation purposes, and $5,193,000 for aviation weather purposes.

While this approves the total requested by the FAA, it does not approve all the requested R. & D. programs.

The committee deleted funding for the full Aerosat program, and author-

ized $1,500,000 for a feasibility study of Aerosat.

This was done in order that other R. &. D. programs, with a higher priority than Aerosat, would not be deferred.

In lieu of Aerosat, the committee recommended that the following programs be implemented or accelerated:

First, $5,000,000 for major system development, to include improvements in the flight service station modernization program and terminal information processing system and to fulfill FAA commitments in the microwave landing system (MLS) program.

Second, $5,000,000 for the airport/airway technology to improve the aviation weather programs, to accelerate, and to launch a major effort to assess future communication needs of the entire FAA organization.

Third, $5,000,000 for advanced systems development and system engineering to improve ATC computers, accelerate efforts in human factors research including airborne traffic situation displays, and accelerate efforts in studying and simulating future airport systems configuration and capacity limitations.

In addition, the committee expressed a view in its report concerning the microwave landing system—MLS. In this view, the committee urges the FAA to structure the MLS program according to international guidelines and to assure that proliferation of alternative systems is minimized.

On behalf of Mr. MILFORD, I urge adoption of the bill as recommended by your committee.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. LLOYD of California. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I thank the gentleman for yielding.

First of all, let me congratulate both the chairman of the full committee, the gentleman from Texas (Mr. TEAGUE) and the gentleman from Florida (Mr. FUQUA) for their fine work. We know the gentleman from California (Mr. LLOYD) is one of the true experts in this House on aviation.

My concern is the microwave landing system, the MLS. Can the gentleman from California give me some idea of the direction the committee is taking with respect to the development of the microwave landing system for the FAA?

Mr. LLOYD of California. Indeed I can. The MLS, as the gentleman from New York knows, had some rocky going in that the international organization has had some difficulty in selecting an international standard. As the gentleman knows the marines have a system called MRAALS. What we are doing in the committee is to bring the whole thing together and focus it into one system so we do not have a situation where we find an aircraft has to have two and maybe three or four systems merely to navigate as it moves around the world. This is the situation in the world today.

We have the ILS/DME, which gives us the same capability at a different electronic band, a different frequency as it were, than the TACAN system which the military uses.

What we really want to do is to get everybody into the same boat and heading in the same direction and using the same equipment so that not only the military but also the general and commercial aviation will all be doing the same thing.

Mr. DOWNEY. So that it is likely that the FAA will follow Doppler and the recommendations of the ICAO, the International Organization for Civilian Aircraft, with respect to the development of one system or the other; is that correct?

Mr. LLOYD of California. The committee recommended that the FAA structure its MLS development program in accordance with ICAO proceedings, but that the Agency also take steps to assure that proliferation of alternative systems is minimized.

Mr. DOWNEY. Would the gentleman think it advisable if the ICAO cannot reach a conclusion as to which system they would like to use that the FAA could go ahead and appoint its own system?

Mr. LLOYD of California. Absolutely, and the reason for that is that we are now getting down to the point where we are beginning to replace systems that are older, the ILS systems, for instance.

Mr. DOWNEY. The gentleman might state for the record what ILS is.

Mr. LLOYD of California. ILS means instrument landing system and it is a fixed approach azimuth and elevation which has already been set.

Mr. DOWNEY. The gentleman has just lost, I believe, those who might be reading this RECORD

Mr. LLOYD of California. What I am saying, it is on a fixed direction and at a fixed angle above the Earth's surface. That system has become old and does not provide the flexibility that the MLS system would provide, would provide some bending in the precision approach; but the most important part of all this is that we have run out of frequencies for ILS. For instance, in New York, in the gentleman's own area, Kennedy Airport is already limited in the number of frequencies that can be used in the New York area, thereby restricting the number of commercial aircraft that can land, much less general and military aviation.

Mr. DOWNEY. The gentleman also serves on the House Armed Services Committee, as I do, and the Army is interested in developing the microwave landing system as well. Can the gentleman offer an opinion with respect to whether or not it will be advisable for the Army to wait for the FAA, given the delay that the FAA has had with the ICAO?

Mr. LLOYD of California. I would strongly urge at the present moment that the Army does not proceed, as did the Navy and the Marines, on their own. The reason for that is that we buy a whole bunch of systems, when one will do.

What is going to happen if we get this system, and we think we will, is that we will have to go back to the Marines and say that the MRAAL system, which is another system, will now have to be accommodated to these frequencies so that all aircraft can use it.

I think we can go forward and coordinate the two efforts and the gentleman from New York knows because we are both serving on the same committee.

Mr. DOWNEY. The gentleman has been very helpful. I hope that the committee approves the ICAO and the MLS.

Mr. WINN. Mr. Chairman, I rise in support of H.R. 3965 .

Mr. Chairman, I am representing the gentleman from New York (Mr. WYDLER), who is detained at the present time.

I want to congratulate the acting chairman of the full committee, the gentleman from Florida (Mr. FUQUA) for the work that the gentleman has done on this bill and for the work the gentleman from California (Mr. LLOYD) has done on the majority side.

I, along with the gentleman from New York (Mr. WYDLER) want to take the opportunity to compliment the chairman of the Subcommittee on Transportation, Aviation, and Weather of the Committee on Science and Technology, the gentleman from Texas (Mr. MILFORD) for the gentleman's diligence in pursuing important improvements in aviation. We all join in expressing regret that the gentleman could not be here today, with the hope that the gentleman can return very soon with a clean bill of health.

Mr. Chairman, as I said before, I rise in support of H.R. 3965.

Mr. Chairman, this bill would provide for the first time, annual authorization jurisdiction for Federal Aviation Administration R. & D. appropriations. At the present time such authority does not exist within the Congress. Of course, R. & D. is the cornerstone for the implementation of all technological improvements.

Unfortunately, FAA progress in aviation as well as related broader public issues has been less than desired. In considerable measure I believe, this lack of progress can be traced to the absence of the close scrutiny of R. & D. programs which only a legislative committee can provide. While the appropriations committees of both Houses have performed admirably in reviewing FAA R. & D. funding proposals, they can hardly be expected to provide the depth of technical analysis and direction required of such complex aeronautical programs as the aeronautical communications satellite—Aerostat—and MLS, the microwave landing system which is currently under international consideration as a replacement for instrument landing systems—ILS.

It may be instructive I think, to show analogy between H.R. 3965 and H.R. 4088, the NASA fiscal year 1978 authorization bill which passed this House last week with an overwhelming majority. Having been privileged to serve on the Committee on Science and Technology and its predecessors since coming to Congress, I feel somewhat qualified to comment on differences between the NASA and FAA approaches to R. & D. activity and particularly their relevance to national needs and priorities as established by Congress.

This year, the committee felt it was timely to demonstrate the need for such annual authorizing jurisdiction and used the vehicle of H.R. 3965 for markup. We

had been advised by the Committee on Public Works and Transportation that there was no objection to the establishment of such jurisdiction within the Committee on Science and Technology. The R. & D. portion of the FAA total appropriation proposal is only $85 million, amounting to less than 3 percent of the total of $2.7 billion.

Since the Committee on Science and Technology has existing jurisdiction over NASA, including its civil aeronautical R. & D. programs and having been assigned in 1974, jurisdiction without annual authorizing responsibility for FAA R. & D., it is now necessary to close the authorization gap. The Congress had decided in 1974 that jurisdiction over all civil aeronautical R. & D. programs should reside with one committee.

Before closing, I would like also to point out that in recent years Congress has become increasingly concerned with the slow pace of FAA action in the development and implementation of safety, environmental and energy conservation measures for our air transportation system. In the closing paragraph of his decision for the majority in Burbank, Mr. Justice Douglas wrote in connection with potential institutional deficiencies of the FAA that "if that change is to be made, Congress alone must do it." I concur. While certainly more basic changes will undoubtedly be required to enable the United States to maintain its leadership in aviation, this bill is a small step in that direction.

Mr. Chairman, I want to commend the gentleman from New York (Mr. WYDLER), who is the ranking minority member of the full committee and the ranking minority member on the subcommittee involved.

Mr. FUQUA. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, in the course of the reading of the report and some of the backup material to it, it has been brought to my attention that there may be some question of the health hazard effects of the microwaves that are utilized in the landing system.

I wonder if the gentleman can tell me whether or not the problem has been addressed, whether there has been any study on this.

As the gentleman knows, in some other instances there have been some very serious questions raised.

Mr. FUQUA. Mr. Chairman, I yield to the gentleman from California (Mr. LLOYD), the acting chairman of the subcommittee, to answer that question.

Mr. LLOYD of California. Mr. Chairman, in response to the question of the gentleman from New York, I would point out it has a 20-watt output. That, of course, is less, by a long way, than the output of a lightbulb in the home. This is not a major hazard. Furthermore, the Office of Telecommunications Policy did conduct a study of the MLS radiation effect and concluded that there are no hazardous radiation effects associated with MLS.

Mr. WEISS. Mr. Chairman, I appreciate the gentleman's remarks. The only reason I raise the question is that I do understand that there have been some very serious questions raised about the hazards inherent in the utilization of microwaves. I know there have been some articles written about it. Although there is perhaps insufficient evidence at this point to draw any kind of conclusions about its use in the microwave landing system I would feel happier if we could have studies done in this area, so that the FAA would be subject to the same kind of studies and scrutiny that are being made of commercial utilization and other utilizations of the microwave. I urge that the FAA be directed to undertake such studies.

I thank the gentleman for yielding.

Mr. TEAGUE. Mr. Chairman, since 1974, all civil aviation R. & D. matters have been under the jurisdiction of the Committee on Science and Technology. Essentially, this jurisdiction includes the aeronautics efforts of the National Aeronautics and Space Administration and the R. & D. efforts of the Federal Aviation Administration.

In exercising this jurisdiction, the committee has long been aware of the necessity for continuous and thorough congressional scrutiny of aviation's R. & D. programs. Only with such scrutiny can the dynamic and technologically complex programs of aviation R. & D. be fully appreciated by Congress. And, only with such appreciation can Congress act in providing effective and responsible guidance in this Nation's aviation R. & D. efforts.

Recognizing this fact, the committee has consistently pursued a policy of annual authorization for the NASA aeronautical programs. I firmly believe that this policy has helped keep this program on a firm footing and, in turn, aided in the great progress that America has made in aviation.

When the committee gained jurisdiction over the R. & D. efforts of the FAA, it quickly realized that the same policy—annual authorization—was demanded in order to exercise its jurisdictional responsibility.

The committee noted that lack of such a policy has often resulted in some increased cost to the taxpayer, deferment of important programs, or general neglect or confusion on the part of the Congress.

Therefore, the committee recommended last year, and the House overwhelmingly approved, an annual authorization for the FAA R. & D. program.

In order to carry out this intent of the House, the committee has reported the bill H.R. 3965.

This bill is the result of many hearings, field trips, and deliberations of the committee and, specifically, its Subcommittee on Transportation, Aviation, and Weather.

It represents a thorough and careful examination of all the FAA R. & D. programs.

This authorization reflects domestic and international requirements to make air travel safer; to increase the efficiency of air traffic control systems and to reduce the costs of providing services to the aviation community. It also reflects the financial resources required to conduct three basic, long-term programs: First, continuation of such major grams as discrete address beacon systems/intermittent positive control (DABS/IPC); second, continuation of Microwave Landing Systems (MLS) development; and third, enhancement of a nationwide complex of automated weather and flight service stations. Funds are also included in this authorization to continue development of wake vortex/wind shear detection systems and to evaluate the effectiveness of Loran C and Omega for aircraft navigation.

It is my firm belief that legislation such as H.R. 3965, a detailed ongoing examination of the FAA R. & D. programs, will greatly enhance the air transportation system in America.

Mr. GOLDWATER. Mr. Chairman, I want to commend my colleagues on the Science and Technology Committee who have worked to fashion a more effective congressional oversight of FAA programs for research, development, and demonstration. The chairman of our subcommittee, Mr. MILFORD, and the ranking minority member, Mr. WYDLER, have taken the leadership in carefully examining each phase of the FAA's R. & D. effort.

From the vantage point of serving on both the Committees on Science and Technology and Public Works and Transportation, I have long believed it was essential that Congress exercise more diligent oversight over FAA R. & D. programs and other activities.

Since R. & D. is the basis upon which all technology implementation must be built, Congress must adopt a more active role in the establishment of aviation priorities in the broadest public interest. Congress is the bridge across which the whole public interest in aviation must be expressed. The primary device by which Congress traditionally exercises its responsibility is the annual appropriation authorization. H.R. 3965 would close the current jurisdictional gap.

One area that the subcommittee will explore in greater depth is the problem of aircraft midair collisions, and the chairman has indicated that hearings will be held on this subject in the near future.

As I pointed out in additional views to the report which accompanied this bill, the FAA must inform Congress of various actions that impact on the midair collision question.

Aircraft separation assurance, or collision avoidance is a complex subject, but solutions do exist. History has shown that the FAA places emphasis on a ground derived solution to midair collision avoidance. But, a number of delays in implementing such a system has resulted in some confusion among the aviation users, especially general aviation.

What we need to find out is whether an integrated approach using both airborne and ground-based solutions can be achieved. At present, the collision avoidance development does call for both a discrete address beacon system, or DABS, which is a ground derived method and a beacon CAS, or BCAS, system that utilizes existing transponders in the cockpit.

Congress and the flying public need to be kept informed of the separation assurance program progress and hopefully a solution. Collision avoidance hearings will help, and in the next couple of months we should have a comprehensive report ready for you.

Mr. FUQUA. Mr. Chairman, I yield back the balance of my time.

Mr. WINN. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 3965

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, there is authorized to be appropriated out of the Airport and Airway Trust Fund (established by section 208 of the Airport and Airway Revenue Act of 1970) to the Secretary of Transportation for the fiscal year ending September 30, 1978, for research, development, and demonstration projects under section 312(c) of the Federal Aviation Act of 1958 (49 U.S.C. 1353), and section 14(d) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1714):

(1) $67,942,000 for air traffic control purposes,

(2) $1,183,000 for aviation medicine purposes,

(3) $10,682,000 for navigation purposes,

(4) $5,193,000 for aviation weather purposes, and

(5) such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law.

Funds authorized by this Act shall remain available until expended.

SEC. 2. Nothwithstanding the purposes for which funds are authorized in paragraphs (1)–(4) of the first section of this Act, funds authorized by such paragraphs may be used for any other program or project not excluded by section 4 of this Act for research, development, or demonstration under section 312(c) of the Federal Aviation Act of 1958 or section 14(d) of the Airport and Airway Development Act of 1970 if notice of such program or project has been given to the Speaker of the House of Representatives, the House Committee on Science and Technology, the President of the Senate and the Senate Commerce Committee in a manner containing a full and complete statement of the proposed program or project and the facts and circumstances relied on in support of such program or project and (a) a period of thirty days has passed after the date such notice was received, or (b) each such committee before the expiration of such period has transmitted to the Secretary written notice to the effect that such committee has no objection to the proposed action.

SEC. 3. The second sentence of section 14 (d) of the Airport and Airways Development Act of 1970 is amended by striking out "$85,400,000 for the fiscal year 1977, and not less than $50,000,000 per fiscal year for fiscal years 1978 through 1980," and inserting in lieu thereof "and $85,400,000 for fiscal year 1977,".

SEC. 4. No part of the funds authorized in section 1 of this Act shall be expended for the Aerosat program except that not more than $1,500,000 of such amount may be expended for a feasibility study of such program.

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. DODD

Mr. DODD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DODD: On page 5, after line 10 add the following new section:

"SUNSHINE IN GOVERNMENT

"SEC. 5. Each officer or employee of the Administrator who—

"(1) performs any function or duty under this Act; and

"(2) has any known financial interest in any person who applies for or receives financial assistance under this Act;

"Shall, beginning on February 1, 1978, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

"(b) The Administrator shall—

"(1) act within ninety days after the date of enactment of this Act—

"(A) to defined the term 'known financial interest' for purposes of subsection (a) of this section; and

"(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provision for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and

"(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

"(c) In the rules prescribed in subsection (b) of this section, the Administrator may identify specific positions of a nonpolicymaking nature within the Administration and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

"(d) Any officer or employee who is subject to, and knowingly violates, this section, shall be fined not more than $2,500 or imprisoned not more than one year, or both."

Mr. DODD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. DODD. Mr. Chairman, very briefly, this amendment, "sunshine in government," without reading all of it, is an amendment that we have adopted in the previous Congress in several pieces of legislation dealing with NASA, and the Energy, Research and Development Administration. Very simply, what it does is to require financial disclosure of known interests that any of the top policymakers have within the FAA. It does not require divestiture of those interests, merely the financial disclosure of the interest, in an effort to minimize potential conflicts of interest between those people holding key policy and decisionmaking positions and people or organizations who come before the FAA.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Chairman, we have had a chance on this side to examine the gentleman's amendment. It is similar to other amendments that have been offered relating to conflict of interest and financial disclosure of those in policymaking positions, and we have no objection to the amendment.

Mr. DODD. Mr. Chairman, I would urge the adoption of the amendment. I feel it is meritorious, one which we have adopted in the past.

Mr. WINN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise just for a further explanation of the amendment, if the gentleman from Connectciut (Mr. DODD) will respond. I wonder if the gentleman would go through his amendment for us step by step.

It is my understanding that the gentleman from California (Mr. GOLDWATER) has some questions, too. I do not think the gentleman from Connecticut (Mr. DODD) had a chance to finish the explanation of his amendment. The gentleman did not go through it completely; is that not correct?

Mr. DODD. Mr. Chairman, will the gentleman yield?

Mr. WINN. I will be glad to yield.

Mr. DODD. No; I did not finish my explanation.

Mr. WINN. Mr. Chairman, the amendment is very short, and I think the Members of the House should hear the full amendment read or receive an explanation of it.

Mr. DODD. Mr. Chairman, if the gentleman will yield and if the gentleman will bear with me, very simply, the amendment requires that each officer or employee of the Administrator who: First, performs any function or duty under this act; and second, has any known financial interest in any person who applies for or receives financial assistance under this act shall, beginning on February 1, 1978, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

The amendment also provides as follows: Under paragraph (b) the Administrator shall first act within 90 days after the date of enactment of this Act to define the term, "known financial interest," for purposes of subsection (a) of this section.

And under paragraph (B) the Administrator shall act to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provision for the filing by such officers and employees of such statements

and the review by the Administrator of such statements.

Second, it requires the report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto by the Administrator.

Third, or under paragraph (c) it provides as follows:

> In the rules prescribed in subsection (b) of this section the Administrator may identify specific positions of a nonpolicymaking nature within the Administration and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

The purpose of this subsection is to make it clear that the intent of Congress is not to overly burden the Administrators of the FAA.

The last provision is the penalty subsection. It says:

> Any officer or employee who is subject to, and knowingly violates, this section, shall be fined not more than $2,500 or imprisoned not more than 1 year, or both.

Mr. Chairman, that is the amendment. What it does is allow the Administrator some leeway so that we are not placing this burden on everyone within the Administration, but rather placing it only on the top policymakers.

Mr. WINN. Mr. Chairman, I appreciate the gentleman's clarifying his amendment. Too often we have a tendency to want to cut off explanations of these amendments before they are clarified to the other Members of the House.

Mr. GOLDWATER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to ask the gentleman from Connecticut (Mr. DODD) for some clarification concerning this particular amendment. Let me ask the gentleman this question:

Is this basically the same language that appeared and was adopted last year in the 1977 ERDA authorization?

Mr. DODD. Mr. Chairman, will the gentleman yield?

Mr. GOLDWATER. I yield to the gentleman from Connecticut.

Mr. DODD. As I understand it, it is the same language.

Mr. GOLDWATER. And is it to the gentleman's knowledge the same language that is contained in the NASA authorization?

Mr. DODD. Mr. Chairman, it is, to the best of my knowledge, I will say to the gentleman.

Mr. GOLDWATER. This particular language does give some discretion to the Administrator or to the Secretary to determine various levels of employees for the purpose of disclosure?

Mr. DODD. Mr. Chairman, if the gentleman will yield further, that is absolutely correct.

Mr. GOLDWATER. Mr. Chairman, I commend the gentleman for offering his amendment. I think it is especially significant because it does conform with the requirements of other agencies of the Government, and I think that is important so that we can get all agencies of the Government doing somewhat the same sort of thing in this particular area.

Mr. DODD. Mr. Chairman, will the gentleman yield further?

Mr. GOLDWATER. I yield to the gentleman from Connecticut.

Mr. DODD. Mr. Chairman, I would also like to point out to my colleagues here in the House that the gentleman from California (Mr. GOLDWATER) has been an ardent supporter of these kinds of provisions. Certainly the gentleman is to be recognized for his efforts in this particular area.

Mr. GOLDWATER. Mr. Chairman, I thank the gentleman and I urge support for this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. DODD).

The amendment was agreed to.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. MCKAY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3965) to authorize research, development, and demonstration projects relating to aviation, and for other purposes, pursuant to House Resolution 430, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken.

Mr. WYDLER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 402, nays 6, not voting 24, as follows:

NOT VOTING—24

Badham	Johnson, Colo.	Sisk
Beilenson	Long, Md.	Staggers
Clay	Milford	Symms
Diggs	Moss	Taylor
Flippo	Murphy, N.Y.	Teague
Hall	Pettis	Wilson, Tex.
Harsha	Quayle	Young, Alaska
Holland	Roe	Young, Tex.

The Clerk announced the following pairs:

Mr. Teague with Mr. Brademas.
Mr. Milford with Mr. Harsha.
Mr. Clay with Mrs. Pettis.
Mr. Hall with Mr. Quayle.
Mr. Beilenson with Mr. Symms.
Mr. Diggs with Mr. Young of Alaska.
Mr. Murphy of New York with Mr. Charles Wilson of Texas.
Mr. Sisk with Mr. Johnson of Colorado.
Mr. Staggers with Mr. Long of Maryland.
Mr. Roe with Mr. Taylor.
Mr. Moss with Mr. Young of Texas.
Mr. Flippo with Mr. Holland.

Mr. JONES of Oklahoma and Mr. FOLEY changed their vote from "nay" to "yea".

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the bill H.R. 4991, authorizing appropriations to the National Science Foundation, on which the rule has been passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

AUTHORIZING APPROPRIATIONS TO THE NATIONAL SCIENCE FOUNDATION

Mr. FUQUA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4991) to authorize appropriations for activities of the National Science Foundation, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Commitee of the Whole House on the State of the Union for the consideration of the bill H.R. 4991, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Arkansas (Mr. THORNTON) will be recognized for 30 minutes, and the gentleman from New Jersey (Mr. HOLLENBECK) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Arkansas (Mr. THORNTON).

Mr. THORNTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the bill (H.R. 4991). Before I begin to describe this bill which we are going to consider today, I want to first express my personal appreciation for the leadership of the Committee on Science and Technology. The gentleman from Texas (Mr. TEAGUE), who is not with us today, has provided leadership, fine judgement, fairness and integrity to the considerations of this committee. I deeply regret that the gentleman from Texas is not here with us today. The gentleman is a strong supporter of the work of the National Science Foundation and of the bill before the House at this time.

The gentleman from Texas has submitted a statement in support of the bill.

It is my hope that the research findings of this Foundation will at some future date lead to the elimination of the kind of ailments which prevent the chairman, the gentleman from Texas (Mr. TEAGUE) from being with us at this time.

I also want to thank my colleague, the gentleman from Florida (Mr. FUQUA) who has so capably acted as chairman of the committee in the absence of our Chairman, Mr. TEAGUE; the ranking minority Member, the gentleman from New York (Mr. WYDLER), and the ranking minority Member of the subcommittee, the gentleman from New Jersey (Mr. HOLLENBECK), for bringing this bill to the floor. As I have mentioned, these gentleman have all done great service to the committee and to the House in making it possible to bring this bill to the floor with a vote of the committee of 28 to 1. Their assistance and support has been invaluable.

The Committee on Science and Technology held hearings beginning on February 1, 1976, and ending on February 23, 1976, to review NSF fiscal year 1977 performance and its fiscal year 1978 budget authorization request. Testimony was taken from Foundation officials as well as from a number of individuals representing outside organizations. The hearings covered all aspects of the Foundation's budget request with particular emphasis on programs of science education. Attention was devoted to three nonbudgetary matters, too; namely NSF-industry relationships, peer review, and indirect costs of research.

In addition, extensive oversight hearings and investigations were carried out on subjects related to the management and operation of the Foundation. Certain of these investigations are still in progress. Numerous staff reviews were made of various NSF facilities and programs. Several General Accounting Office investigations and Congressional Research Service studies have been completed for the subcommittee.

Both the Subcommittee on Science, Research and Technology and the full committee had lengthy markups of the bill submitted by the administration. Committee members devoted careful attention to the bill. Nevertheless, the final vote on H.R. 4991, the clean bill, was nearly unanimous, the final count being 28 to 1.

THE BUDGET

The President's budget included a request for $885 million for the National Science Foundation in fiscal year 1978. The appropriation made to NSF for fiscal year 1977 was $776.1 million. Thus the request for 1978 exceeds the 1977 appropriation by $108.9 million.

The Committee on Science and Technology recommends that the amount of $868 million, $17 million less than the authorization request, be authorized. H.R. 4991 authorizes this amount and makes certain adjustments within the categories requested by the National Science Foundation. These actions are summarized on the table attached.

The committee recommends an increase in only one budget category, science education. Because of the importance of science education the committee recommends a total authorization of $83.3 million. This represents an increase of $7.6 million in science education over the request of $75.7 million. The increase is intended to reverse a downward trend in the science education budget, which has generally been declining for many years.

The committee recommends decreases which total $24.6 million in six categories:

One. Mathematical and physical sciences and engineering—The request was reduced by $5.4 million to $243.8 million. This is an increase of $21.2 million over the fiscal year 1977 appropriation.

Two. Astronomical, atmospheric, earth, and ocean sciences—The request was reduced by $5.8 million to $207.6 million. This is an increase of $18.9 million over the fiscal year 1977 appropriation.

Three. Biological, behavioral, and social sciences—The request was reduced by $5.6 million to $139.2 million. This is an increase of $12.7 million over the fiscal year 1977 appropriation.

Four. Research applied to national needs—The request was reduced by $5.3 million to $72.7 million. This is an increase of $8.8 million over the fiscal year 1977 appropriation.

Five. Scientific, technological, and international affairs—The request was reduced by $1.4 million to $21.2 million. This is an increase of $1.2 million over the fiscal year 1977 appropriation.

Six. Special foreign currency—The request was reduced by $1.1 million to $4.9 million. This is an increase of $0.3 million over the fiscal year 1977 appropriation.

No changes were made in the Antarctic program or in the program development and management categories.

Ceilings—Of the appropriations made pursuant to the authorization of H.R. 4991, the committee recommends that—

Not more than $1,000,000 shall be expended for minority centers for graduate education;

Not more than $600,000 shall be expended for continuing education for scientists and engineers; and

Not more than $100,000 shall be expended for the science for citizens program.

Floors—Of the appropriations made pursuant to the authorization of H.R. 4991, the committee recommends that—

Not less than $1,500,000 be made available for a program of minority graduate scholars;

Not less than $23,000,000 be made available for applied social research and for policy-related scientific research in the program of research applied to national needs; and

Not less than $4,500,000 be made available for policy research and analysis in the program of scientific, technological, and international affairs.

Other than budgetary matters, only two provisions were added to the bill by the committee. One amends the NSF organic act to emphasize the importance of geographical distribution, and the other is intended to protect precollege students from any undesirable effects of the testing of curriculums supported by NSF.

BASIC RESEARCH SUPPORT

For fiscal year 1978 the NSF has requested increases in the budgets of its three large basic—or "project"—research directorates—mathematical and physical sciences and engineering; astronomical, atmospheric, earth, and ocean sciences; and biological, behavioral and social sciences—totaling $69.6 million over the fiscal year 1977 appropriation—about 13 percent. In view of the need to economize in the Federal budget where possible, the committee has recommended that the overall budget be cut. The project research directorates have been cut by a total of $16.8 million, which still allows for a 10 percent, $52.8 million increase from the fiscal year 1977 appropriation.

The NSF-requested budget increase for project research was based on a governmentwide policy determination of the administration that total Federal basic research support should increase at a rate—9 percent—sufficient to allow for real growth at the same rate as long-term real growth of the gross national product—3 percent—taking inflation into account at the rate of 6 percent. Because the budget requests of other Federal agencies included basic research components that—while large—averaged less than the desired 9-percent increase, NSF was used as a "balance wheel" and was permitted a budget request containing a basic research increase of 13 percent—enough to bring the governmentwide average increase up to 9 percent.

The committee is sympathetic to this argument because it believes a strong national effort in basic research is necessary for the well-being of the country. However, the committee adopted a different approach to the Foundation's project research budget in order to produce the desired budget reduction. The committee's recommended figures allow for a 10-percent increase in NSF project research support consisting of a 7-percent allowance for inflation and 3-percent real growth. The 7-percent rate was used because the most recent authoritative estimate is that the 1976 inflation rate for services, which comprise the major component of NSF project research obligations, will be nearly 7.5 percent. The total project research amount of $590.6 million allowed by the committee, moreover, is nearly identical to the $587.4 million originally requested as its base budget by NSF from OMB during the budget process.

SCIENCE EDUCATION

The NSF requested a fiscal year 1978 science education program of $75.7 million, all of which would be new obligational authority. The committee recommends a net addition of $7.6 million and various adjustments within science education, thereby making a recommended total of $83.3 million for fiscal year 1978. Specific adjustments are discussed in detail in the committee report.

For the first 10 years of its existence NSF funded its two major mission areas—basic research and science education—almost equally. Since 1970, however, the budget importance of science education has been declining absolutely as well as proportionately to the research budget. The recommended increase of 10 percent over the NSF request for fiscal year 1978 would bring the program up from the requested 8.6 percent of the overall budget to almost 10 percent.

Testimony was presented which indicated a clear need for additional information and evaluation of activities related to continuing education for scientists and engineers. The committee believes that the following recommended actions are in order before any larger efforts in this area should be considered either by the NSF or by the Congress: First, that the NSF's request of $1.2 million for this program be reduced such that no more than $0.6 million be authorized for fiscal year 1978; second, that present government and private sector efforts be fully evaluated; and third, that more research and development be conducted to accumulate the needed information. The committee notes that HEW has a new $120 million program in the general area of continuing education.

The widely recognized problem of increasing the participation of minority individuals in science leads the committee to recommend that the programs specifically directed to this problem be increased by 25 percent over the request for fiscal year 1978. Since the Minority Graduate Centers program is in the planning grant phase and the program's relative merits are under evaluation at present, the committee recommends that the NSF proceed with no more than it requested for this program in fiscal year 1978—$1 million. However, the committee recommends that the Minority Institutions Graduate Traineeships program be increased from the request of $1 million to $3 million, with $1.5 million of that amount to be used for minority graduate students in science to attend graduate schools of their choice.

Because of the serious implications of the Science for Citizens program for the future direction of the entire NSF, and because of the inherent difficulty of evaluating activities of this type, the committee recommends that this program be authorized at a level no greater than $0.1 million for fiscal year 1978. This reduction—from the request of $1.2 million—will still permit a thorough evaluation of all fiscal year 1977 Science for Citizens activities. The committee also recommends that an embargo be placed on funding intervenors and those required to register under Federal or State lobbying laws. It is the committee view, however, that those who must register under any State lobbying act, solely on the basis of giving testimony to a State legislature, should not be barred from participation in the program for that reason alone.

The committee, in the bill, directs the National Science Foundation to take particular care in protecting precollege students from any undesirable effects of educational research and development, pilot testing, evaluation, or revision of experimental or innovative precollege curriculum projects funded by the Foundation. The Foundation is enjoined to assure that its grantees work closely with school boards or other appropriate authority at the local levels, as well as with parents, in carrying out such programs.

Mr. Chairman, the committee's consideration of the fiscal year 1978 NSF authorization was careful and, I believe, responsible. The budget authorized will help insure this Nation's strength in all the sciences, and I urge its support.

Mr. HOLLENBECK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 4991, the authorization bill for the National Science Foundation for fiscal year 1978.

Before turning to the programmatic elements of the NSF budget, I would like to express my appreciation to the subcommittee chairman, Mr. THORNTON, for his generous cooperation in our actions on this legislation and to Mr. WYDLER for his support. His positive attitude has helped to make this a good bill and has helped to accelerate understanding of the issues.

H.R. 4991 authorizes $868 million for the NSF's programs in fiscal year 1978. This figure represents a $17 million—or 1.9 percent—reduction below the President's request. I should point out to my colleagues that President Carter did not submit any modifications to the NSF budget submitted by President Ford in January. I believe this action is typical of the bipartisan approach

which we have taken in evaluating the foundation's programs.

The NSF provides the bulk of the Federal support for basic scientific research in our colleges and universities. Its programs serve the dual purpose of advancing the frontiers of scientific knowledge while also training many of our future scientists. NSF programs have helped further the education of virtually every practicing scientist at some point in their careers.

The $243.8 million in the bill for mathematical and physical sciences and engineering will support research in advanced programs ranging from theoretical mathematics to complex studies of thermal energy storage materials. Investigations of synthetic compounds may build a foundation for improved chemicals. Metallurgy research will be sponsored to improve our understanding of the corrosion and fatigue problem in metals. Success in this programmatic subelement would result in considerable future savings in the economy.

The $207.6 million devoted to astronomical, atmospheric, earth, and ocean sciences will sponsor programs to study our planet from deep in the Earth's crust to beyond the upper atmosphere. Studies on global atmospherics and climate dynamics can make important contributions to our understanding of the world's weather patterns. This past winter is dramatic evidence of the fact that our knowledge in this area needs improvement. NSF programs will investigate the physics of the atmosphere which influence our everyday weather as well as long-term global changes. Studies of the atmosphere not only improve our knowledge of the weather but enhance our ability to predict the dispersion of pollutants released into the atmosphere. Ocean science studies will assist our increased use of the seas as a source of food and minerals in such a way that we do not inadvertently dispoil this global treasure. The projections of increased offshore oil and gas recovery makes it imperative that we fully understand the subtleties of the marine environment.

NSF programs in traditional natural and physical sciences are complemented by programs in science education and selected applied research projects. The $83.3 million in H.R. 4991 devoted to science education will fund programs in manpower improvement, resource improvement, and research and development related to teaching science. Despite the popular cynicism about the machine replacing man, our human resources remain the most valuable global resources. The science education programs seek to cultivate the human resources without which further progress would be impossible.

Applied research efforts are embodied in the NSF's Research Applied to National Needs—RANN. The $72.7 million for RANN will investigate special applied problem areas such as the environment, resources, and productivity. For example, the environmental effort works to improve our knowledge of natural disasters and hazards. Here RANN will investigate the causes of earthquakes; how to predict them and how to respond to them. Productivity research aims at such practical goals as improving the delivery of public services; excavation technology; and low-cost medical equipment for clinical diagnosis.

Mr. Chairman, I do not profess to be an expert in the technical features of the many programs which the NSF sponsors. But I am confident that its programs are essential for the Nation to maintain its superiority in science and for the economic growth and high standard of living which it brings.

H.R. 4991 will provide the means for the NSF to sustain its record of scientific excellence. In addition, the committee has structured the bill so that this goal may be achieved within, and even slightly below, the budget request to Congress. I urge my colleagues to join me in supporting H.R. 4991.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. HOLLENBECK. I yield to the gentleman from New York (Mr. WYDLER).

Mr. WYDLER. I thank the gentleman for yielding.

Mr. Chairman, I wish to point out to the Members of the House the outstanding contribution that the gentleman from New Jersey (Mr. HOLLENBECK) has made to the passage of this bill through the subcommittee, through the full Committee on Science and Technology, and the contribution he is making today on the floor of the House. He is a freshman, a new man in the House of Representatives, and yet he has undertaken responsibilities which generally are not undertaken by people who have just started their service in Congress. He has handled it like a veteran member of the congressional system.

Mr. Chairman, I have only the highest respect and regard for his performance in that connection.

Mr. Chairman, I rise in support of H.R. 4991, the Authorization Act for the National Science Foundation for fiscal year 1978.

The NSF has proven itself to be a strong and effective Federal catalyst for basic scientific research. Its support of research programs in the natural and physical sciences throughout our academic system has succeeded in establishing an impressive record of performance. The knowledge and the scientists resulting from NSF's programs have found their way into every facet of our society and economy.

The committee's action on H.R. 4991 is typical of the bipartisan consensus which exists on the value of NSF's programs. The committee's adjustment to the administration's request to Congress were minimal. H.R. 4991 will permit the NSF to continue its support of science in a responsible manner. The $868 million authorized for fiscal year 1978 is 1.9 percent—$17 million—below the request to Congress and about 6.5 percent above the authorization for fiscal year 1977. The long lead times in bringing a promising new scientific development from the laboratory into the general economy make it important to plan research programs with vision to the future. The NSF's foresight in funding projects which will pay dividends to the Nation many years later is a quality often overlooked. The pace of scientific progress is difficult to accelerate indefinitely by the mere increase of funding. The steady, continued support which the NSF has provided to science is far more effective than an erratic funding pattern of the same cumulative amount would be.

NSF research programs in engineering will concentrate on improving our ability to extract valuable metals from lean ones, recycling of wastes, and the development of substitute materials possessing better energy and environmental qualities than current materials. Studies on superconducting materials seek to develop a comprehensive technology base on this phenomenon such that the Nation will be able to use superconducting transmission lines to distribute electricity with superior efficiency in the future.

Ocean science programs seek to improve our understanding of marine organisms; the transfer of pollutants in the marine environment; and the distribution of pollutants in the ocean. Such investigations will help us address marine problems in the deep sea and along our coasts. Deep sea research is necessary to assist us in the mining of minerals and energy resources. Coastal marine research is essential to understanding how to cope with the beach-fouling problem which plagues many fine beach areas, including the shores along Long Island.

Mr. Chairman, these are just a few examples of the worthwhile research which H.R. 4991 will permit to take place. Almost everything in the NSF's programs will eventually contribute to a beneficial result touching the lives of every citizen. There are too few pieces of legislation which can claim this distinction.

I urge my colleagues to join me in supporting H.R. 4991.

Mr. THORNTON. Mr. Chairman, I yield 3 minutes to the gentleman from Washington (Mr. MCCORMACK).

Mr. MCCORMACK. Mr. Chairman, I rise in support of H.R. 4991.

I would like to congratulate the chairman, the gentleman from Arkansas (Mr. THORNTON), and the ranking minority member, the gentleman from New Jersey (Mr. HOLLENBECK), for the outstanding job they and the staff have done in assembling this bill.

Over the years, the National Science Foundation has made an outstanding contribution to this Nation's understanding in a broad spectrum of subject areas ranging all the way from mathematics to applied physics to biological sciences and to the social sciences.

This legislation before us today continues these programs in a most responsible manner. In view of the fact that we have been doing so well and that this is so important, I encourage my colleagues to support this legislation.

Mr. Chairman, the 1976 NSF Authorization Act included the mandate that the NSF prepare a comprehensive plan with full public participation for a "science for citizens" program to be presented to Congress. The objectives to which the program was to be addressed were—

First, to improve public understanding of public policy issues involving science and technology;

Second, to facilitate the participation of experienced scientists and engineers as well as graduate and undergraduate students in public activities, aimed at the resolution of public policy issues having significant scientific and technical aspects;

Third, to enable nonprofit citizens public interest groups to acquire necessary technical expertise to assist them in dealing with the scientific and technical aspects of public policy issues; and

Fourth, to provide grants and contracts to academic and other nonprofit organizations for the conduct of applied research designed to improve the effectiveness of the above programs.

The NSF prepared such a plan, and also commissioned a study on the "Provision of Federal Assistance to Nonprofit Citizens Groups Dealing with Scientific and Technical Aspects of Public Policy Issues." The fiscal year 1977 budget request was for $300,000 to set up an experimental program to test three of the nine "options" developed by the NSF which it believed were appropriate for an agency with NSF's capabilities and resources.

After having examined these plans, the committee was convinced that a serious need existed in the areas addressed by the SFC objectives. But, as stated in last year's authorization report, "the committee questions whether the Federal Government is capable of satisfying these needs without creating serious new problems; and whether the NSF is in fact the appropriate agency to take on this task." The pros and cons of SFC as perceived by the committee were outlined in the report, and led the committee to recommend that "the NSF should remain as far away as possible from direct assistance to citizens' groups;" that "the NSF should 'concentrate on provision of educational and informational materials,' and not become involved with 'citizen litigation or direct intervention in administrative proceedings.' "

The Senate was not in complete agreement with this committee, as evidenced by its authorization of $3,000,000 for Science for Citizens—including an augmented public understanding of science program—and by its recommendation that the NSF provide support for "groups which serve important public purposes to acquire necessary technical expertise relating to the scientific and technical aspects of public policy issues and to enable such groups to bring together in appropriate forums experts whose research has been directed to the resolution of such issues."

This difference between the House and the Senate views was the major reason behind a protracted and difficult conference—the conference report was submitted on September 27, 1976, 3 days before the beginning of the fiscal year, and less than a week before the Congress went into recess.

Authorization for the program of $1,200,000 stipulated that: "no grant or other arrangement shall be made—without the prior approval of the National Science Board"; the NSF was "directed to prepare a comprehensive analysis and assessment of such activities to be submitted—by March 1, 1977"; and "no contract, grant, or other arrangement is to be made—to any person who is required to comply with the registration requirement—of the Federal Regulation of Lobbying Act."

For fiscal year 1978 the NSF requested $1.2 million for Science for Citizens to continue the two activities begun in fiscal year 1977.

Also available to the committee for its consideration this year was the report requested in the fiscal year 1977 joint statement of managers of the committee of conference, "concerning the implications of NSF assistance to nonprofit citizen organizations" both for the NSF itself and for public participation in govmental processes. This report, "Policy Implications of NSF Assistance to Nonprofit Citizen Organizations," is known as the Boasberg report.

The committee devoted a day of hearings to the Office of Science and Society, mostly on the science for citizens program. Primarily because of the committee's position on the science for citizens program during the fiscal year 1977 authorization conference, the committee selected witnesses who were in favor of the science for citizens program in order to get their views and arguments presented. Mr. Boasberg was present to discuss his report and offer his personal opinion of the program. Two additional statements were requested, one from the National Legal Center for the Public Interest, and one from the National Association of Electric Companies.

In weighing all the diverse opinions concerning the fiscal year 1978 science for citizens effort, the committee concluded that, because of the serious implications of the science for citizens program for the future directions of the entire foundation, and because of the inherent difficulty of evaluating activities of this type, this program should be authorized at a level no greater than $100,000. This amount will provide for a thorough evaluation of all fiscal year 1977 science for citizens activities. Most of the awards for these activities are not expected to be made until September 1977, nearly the end of the fiscal year, and it is for this reason that the cessation for the entire fiscal year 1978 is believed to be necessary.

The committee does not believe that this action will be detrimental to the projects undertaken in fiscal year 1977. The forums, conferences, and workshops are all short-term projects, and the maximum tenure for public service science residencies and internships is 12 months. During that time it is hoped that the Science for Citizens Advisory Committee will closely monitor the progress of these activities.

The cutback in fiscal year 1978 science for citizens activity recommended by the committee should not be interpreted as opposition to the science for citizens program per se or the underlying rationale of the program—that is, increasing public understanding of the scientific and technical aspects of public policy issues. The committee has traditionally supported the NSF's public understanding of science program which supports informal adult education in science and technology, especially as these deal with important issues of public policy, and the ethics and values in science and technology program which, among other activities, examines alternatives for resolving conflicts between scientists and the public. The NSF requested a total of $4.0 million for these two programs for fiscal year 1978—and the committee concurs with this request.

The committee also wishes to acknowledge that the management of the science for citizens program so far by the NSF seems to be a reasonable approach, and it recognizes that the delay in making fiscal year 1977 awards has resulted from the careful development of guidelines for the program, as well as from the congressionally imposed requirement that all actions be approved by the National Science Board.

In the joint statement of managers of the committee of conference it was stipulated that "no contract, grant or other arrangement is to be made under the science for citizens program to any person who is required to comply with the registration requirement of section 308(a) of the Federal Regulation of Lobbying Act (2 U.S.C. 267a)." The committee recommends that this stipulation be broadened to include those required to register under State lobbying acts, with the exception that those who must register under State acts solely on the basis of giving testimony to a State legislature not be barred from participation in the program.

The committee would also bar "intervenors" from eligibility in the science for citizens program—although, admittedly, "intervenors" may be a somewhat elusive term.

Nonetheless, both the committee and the NSF are concerned about the possible use of NSF funds in this program to encourage the promulgation by special interest groups of their already-determined positions, either by presentations to the public or by interventions in the processes of government. Both recognize the difficulty of establishing criteria for grants and awards which will distinguish such activities from those that will desirably enhance the public understanding of policy issues involving science and technology or contribute to the effective resolution of such issues.

Thus it is proposed that the science for citizens program not support proposals for which the manifest purpose is to assist in the development of only one side of any controversial issue in any presentation to the public, or to any judicial or administrative proceeding before courts of law, or to other official Federal, State, or local instrumentalities.

It is further proposed that the NSF make public the names and pertinent activities of all persons and organizations receiving grants and awards from the science for citizens program, and ensure the rapid and effective public dissemination of all reports and other documents resulting from activities supported by program funds.

Mr. Chairman, I am entirely in support of this position. Experience has shown that extremely controversial programs in the National Science Foundation can cause problems in terms of the perceptions of the NSF by the outside world. This bill was put together carefully and with a great deal of consideration of issues such as these, and I urge you to support it.

Mr. HOLLENBECK. Mr. Chairman, I yield 5 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I thank my freshman colleague, the gentleman from New Jersey (Mr. HOLLENBECK), for yielding this time to me. I would also like to thank the acting committee chairman, the gentleman from Florida (Mr. DON FUQUA) for the courtesy he granted me as a freshman to make extensive inquiries in committee on areas which are of interest and concern to me.

I would extend my thanks also to the gentleman from Arkansas (Mr. RAY THORNTON), the subcommittee chairman, who acted in the same vein and encouraged me to make the inquiries that I felt necessary to try to dispel some of the doubts I had about the original request in the budget when it came in. In that regard I want also to thank the ranking minority member of the committee, the gentleman from New York (Mr. WYDLER).

Mr. Chairman, it was necessary for me to vote against this $868 million fiscal year 1978 authorization for the National Science Foundation when the bill was reported by the House Committee on Science and Technology.

Increases amounting to $20.5 million were made in the various budget activities of the Foundation by the full committee—after the bill had been reported from subcommittee with a $656.2 million mark for basic research.

The bill now authorizes a total of $671.3 million for basic research—an amount that is much too high in terms of NSF's recent budget history.

Mr. Chairman, I have spent many hours so far this year studying NSF budget trends and the current authorization proposal. It is reluctantly that I will have to vote "no" on this bill, because many of NSF's basic programs are good—and I support the bill's provision requiring protections and proper procedures for involving precollege students in NSF-funded education projects.

But the NSF authorization is unacceptably high—and I strongly believe that there is no justification for the 171 percent overall increase that this bill will bring in the Foundation's basic research budget just since 1969.

Mr. Chairman, my concerns and important statistical evidence about NSF budget trends requiring my "no" vote on this bill were included in the committee's report as dissenting views.

I include those brief views at this point in the RECORD—and I hope that this data wil be utilized by the Congres to stop these unjustified skyrocketing budget increases:

[From H. Rept. 95-98 accompanying H.R. 4991 authorizing appropriations to the National Science Foundation, Mar. 18, 1977]

DISSENTING VIEWS OF REPRESENTATIVE ELDON RUDD

This bill authorizes $868 million for the National Science Foundation—almost 92 million more than the fiscal year 1977 program funded by Congress. That is an extremely large increase—about 12.2 percent more than the previous year amount of $776.1 million—at a time when the goal is "a balanced Federal budget."

The Subcommittee mark was $847.9 million, of which $656.2 million was authorized for basic research project support. This was more than ample, considering the staggering 147 percent increase in NSF's basic research budget just since fiscal year 1969.

Despite this increase, the full Committee added yet $15.1 million more to the Foundation's three major basic research budget activities, bringing fiscal year 1978 authority for basic research project support to $671.3 million.

This is a 10 percent increase over NSF's fiscal year 1977 basic research budget, and was given on the premise that the Subcommittee had insufficiently considered the supposed enormous impact of inflation upon NSF's real basic research budget needs.

This is a highly questionable assumption, in light of NSF basic research budget trends since 1969. The Foundation's basic research project support has increased an average of 18.4 percent per year since fiscal year 1969, and will have increased a total of 171 percent in just 10 years if this bill is approved at its current proposed level.

In constant (1969) dollars, using a Consumer Price Index deflator to adjust for inflation, NSF basic research project support has had a real increase between fiscal year 1969 and fiscal year 1977 of more than 8.4 percent above what is necessary to account for inflation.

The following table accurately summarizes NSF basic research budget trends since fiscal year 1969:

NATIONAL SCIENCE FOUNDATION, BASIC RESEARCH BUDGET INCREASES, FISCAL YEARS 1969-78

[Dollar amounts in millions]

	Amount	Dollar increase	Percent increase	Increase since fiscal year 1969	
				Total	Percent
Fiscal year:					
1969	[1] $247.6				
1977	[2] 612.0	+$364.4	+147	+$364.4	+147
1978:					
Subcommittee mark	656.2	+44.2	+7	+408.6	+165
Full committee mark	671.3	+59.3	+10	+423.7	+171

[1] NSF fiscal year 1971 budget to Congress (fiscal year 1969 actual column).
[2] NSF fiscal year 1978 budget to Congress ("Budget in Brief," p. 12).

The tremendous increase in NSF basic research support since 1969 is underscored by the fact that, since that year, NSF has reduced its science education programs by more than $50 million, and has totally eliminated institutional science support programs amounting to more than $70 million. Moreover, creation of the Energy Research and Development Administration (ERDA) in 1975 resulted in the transfer of about $52 million of NSF energy research support to that agency.

All of these adjustments have been more than offset by the large increases in NSF basic research support. Consequently, the Foundation's applied research (RANN) has dropped from about 18 percent of the NSF budget, to less than 9 percent. Science education has dropped by almost 50 percent. And institutional programs have been eliminated altogether.

These trends in no way suggest constraints on NSF basic research support. To the contrary, they clearly demonstrate that basic research has grown dramatically over the past decade at the expense of other NSF programs—and at a rate that cannot be justified.

NSF "RECOVERIES"

Based on a careful analysis of Federal R&D trends (such as the report prepared last year for the House Appropriations Committee by the Congressional Research Service of the Library of Congress), NSF carryovers from year to year, and the manner in which NSF handles millions of dollars annually in "recoveries," there is further reason to question the large fiscal year 1978 NSF basic research budget proposed in this authorization bill.

NSF has for a number of years had an annual minimum of $5 million—and as much as $13 million—in "recoveries," which amount to a Foundation "slush fund." These are monies that are awarded by the Foundation, but unused and returned for a variety of reasons to be re-programmed by NSF out of a central fund.

Some of the "recoveries" occur when a researcher moves from one institution to another. But the amount that is realized for other reasons is still quite substantial—amounting to several million dollars annually.

The Foundation should know on the basis of past trends and experience what the anticipated "recoveries" are each year. I believe that the Foundation should be required to treat those "recoveries" as a source of funds, and to include them in the budget process each year so that Congress can get a true picture of NSF funding.

NONSUPPORT FOR BASIC RESEARCH IN PRIVATE INDUSTRY BY NSF

Production of Ph. D.'s is up substantially, and increasing every year. There are reportedly more than 30,000 Ph. D.'s in the pipeline right now. Yet university faculties are not growing to accommodate the tens of thousands of young, brilliant scientists and engineers, who are seeking employment in private firms rather than in academic institutions.

This vast and increasing pool of scientific talent in the private sector is a great national resource that NSF should encourage and support. Yet the Foundation maintains a very parochial attitude about the purported need to concentrate Federal research support in academic institutions, to the practical exclusion of scientists and engineers in private industry who should also be encouraged to develop their ideas.

The NSF policy in effect today states that only in exceptional cases will unsolicited proposals for basic research be considered from industrial organizations. This is not in the national interest, and appears to violate the intent of the National Science Foundation Act, which gives NSF the authority to support basic research on a best-performer basis.

This implies competition for available Federal research dollars. I believe that Con-

gress should make certain that public policy on this issue is made clear, so that participation in federally funded basic research activities by scientists in industrial laboratories is encouraged.

Such participation should be on an equal, non-discriminatory footing, so that all scientific talent in the academic world and in the private industrial sector can compete according to merit for available Federal research support.

In this way, both Congress and the taxpaying public can be more confident that adequate and appropriate priorities will be set for the expenditure of NSF research funds, that the Foundation is supporting the best research by the most capable performers, as well as uplifting science generally in other areas, and that the nation is getting the best value for every expended Federal research dollar.

ELDON RUDD.

My dissenting views include concerns that I have raised about the discriminatory policy of the National Science Foundation with respect to support of basic research by scientists in the industrial sector.

Under current NSF policy, these scientists do not have a fair opportunity—they have really no opportunity at all—to apply for NSF basic research funds to pursue their own projects.

NSF allocates 99 percent of its research funds in support of scientists in the academic, nonprofit sector. I believe that this discrimination against the thousands of good scientists in the industrial sector is hurting our Nation's potential technological and other advances.

At the appropriate time, I will offer an amendment to this bill to require the Foundation to change its discriminatory policy. My amendment will require NSF to increase cooperative basic research projects involving researchers from both the academic and industrial sectors. It will also require the Foundation to permit researchers in the industrial sector to compete for NSF basic research funds on an equal basis with researchers in the academic sector.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I thank the gentleman for yielding.

I want to commend the gentleman from Arizona (Mr. RUDD) for his fine statement. The gentleman has pointed out a number of problems that we have had with these grants, and I would like to go on record in support of the statement of the gentleman from Arizona.

I will state further that I, too, will be voting against this bill because the people in my district have had it when it comes to the money we are spending on redesigning toilet seats and studying the aerodynamics of the frisbee.

Mr. RUDD. Mr. Chairman, I thank the gentleman for his remarks.

Mr. THORNTON. Mr. Chairman, I yield 1 minute to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Chairman, I rise in general support of H.R. 4991. The Science Research and Technology Subcommittee worked diligently under the very able leadership of my colleague from Arkansas, Mr. THORNTON, to present, with one exception I believe, a budget which provides for the continued strong support of basic and applied research, science education and the other important activities of the NSF.

However, I must respectfully take exception with the action of our committee in cutting the science for citizens program from the $1.2 million requested by NSF to a mere $100,000. This program was initiated by Congress in the fiscal year 1977 authorization legislation and provided with $1 million appropriations for the current fiscal year.

The science for citizens program is intended to make it possible for both experienced and student scientists and engineers to help the public understand science, engineering and technology and their impact on public policies. During fiscal year 1977 NSF will make a limited number of awards to individuals who have proposed to provide scientific and technical input to any of a wide range of groups, institutions, and organizations that deal with issues having a high science content. These proposals must come from individuals, not groups, and must be approved by the National Science Board. A second aspect of the program is the funding of forums, conferences and workshops sponsored by nationally recognized professional societies and groups. The first awards for these two parts of the program will be made by the end of the current fiscal year.

On February 18, the Subcommittee on Science, Research and Technology heard testimony from four witnesses: Dr. Harvey Averch—Assistant Director for Science Education, NSF—Mr. Tersh Boasberg—Boasberg, Hewes, Finkelstein & Klores, attorneys-at-law—Dr. Frank von Hippel—Center for Environmental Studies, Princeton University—and Dr. James Sullivan—codirector, Center for Science in the Public Interest. All four witnesses spoke favorably of the science for citizens program, and the only suggestions for funding changes, from Drs. von Hippel and Sullivan, dealt with increases in the budget requested by NSF.

Many of the decisions that are being made on issues of science and technology drastically affect the lives of every citizen in this country. Those citizens should be provided the scientific and technical data to investigate and explore and bring these issues into the forum of open public discussion and debate. Citizens are not going to be able to understand these issues unless they are given the proper information, and that is what the science for citizens program is all about. Many citizens' groups, quite frankly, oppose something for one reason or another without a scientific basis to support their arguments; with good scientific input they might be able to avoid going out on a limb and taking the rest of the public with them. When I first came to Congress in 1975 I was opposed to certain projects, but after further study, and obtaining input from scientists and engineers and visiting scientific laboratories, I have changed my thinking in several cases because I learned my previous opinions were not based on good scientific data.

The science for citizens program is an attempt to do for the general citizenry what these experiences did for me. The $1.2 million requested by NSF would have continued the program for 1 additional year, essentially without change. This would be a modest effort that I believe should be maintained while we see how the program works in practice. It is a promising program and should not be terminated prematurely.

While I do not intend to offer an amendment to restore these cuts, I am confident that the Senate version of the NSF authorization will provide this program with the support it deserves. I hope my colleagues in the House will support the Senate version in this respect.

U.S. ANTARCTIC PROGRAM

The United States has a reputation for leadership in antarctic affairs and has extensive rights—based on exploration, discovery, and carrying out the U.S. antarctic program.

Let me emphasize the importance of antarctic research to this country. The Antarctic exerts a major influence upon world weather and climate. It contains potentially valuable minerals and petroleum. It is the world's richest area in terms of marine protein production.

NSF-supported research in the Antarctic includes weather, climate, and other environmental research as well as research related to mineral and marine resources.

The Antarctic is a hostile climate for man. The weather is so bad, in fact, that the largest native land animal is a spider.

Because of the arduous climate and the absence of development in Antarctica, all forms of support and services needed to conduct research must be imported. Research stations and other facilities must be constructed and maintained with imported materials. These factors, combined with the remote location, mean that costs of support services are substantial and that central management of these services is necessary for effective operation.

In many respects, accomplishing research on the Antarctic Continent is not unlike doing research in space. H.R. 4991 authorizes $47,475,000 for U.S. efforts in Antarctica. The major part of this authorization covers the cost of placing and maintaining scientists at locations on the continent.

The support services are provided primarily by the Departments of Defense and Transportation on a cost-reimbursable basis. The primary support force is provided by the U.S. Navy which operates the main logistic supply complex in support of field work and the inland stations. The Navy also operates a ski equipped aircraft squadron. NSF reimburses the Navy for the personnel and other costs for these services on a year-round basis. The Department of Transportation provides ice-breaker support on a reimbursable basis.

The bill, H.R. 4991 allows for a 17-percent increase in Antarctic research but

only a 3-percent increase for operations support, which reflects a determined effort on the part of NSF to accomplish Antarctic research on a cost-effective basis.

Mr. Chairman, I support the Foundation's authorization as reported by the committee. I urge approval of H.R. 4991 which authorizes the full amount requested for the U.S. Antarctic program.

Mr. HOLLENBECK. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. FORSYTHE).

Mr. FORSYTHE. Mr. Chairman, I rise in support of this legislation. I think it is good legislation and will support it. However, I rise, even more importantly, in a kind of unique situation, a situation in which I find myself as the senior Republican of our great New Jersey delegation of four Republicans.

Mr. Chairman, I take pride that my ranking member on my subcommittee is the gentleman from New Jersey (Mr. HOLLENBECK); and I want to highly compliment him in the handling of this legislation and for the great work that he is doing today as a freshman from the State of New Jersey.

Mr. THORNTON. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Chairman, I want to add my tribute to the leadership of this committee on both sides of the aisle for the fine work that they have done, not only in bringing this bill to the floor in a form which I think is highly acceptable to the Members, but for their continuing ongoing work with the National Science Foundation in helping to resolve some of the problems which crop up in any of our institutions of Government from time to time.

Mr. Chairman, we have had problems with the National Science Foundation. Sometimes these have been brought to the floor, and I am thoroughly satisfied that we have achieved great progress in solving these problems as they do occur and in continuing to refine the operation there.

The number of policy difficulties, conflicts, or controversies in this bill have been at a minimum this year. Some of them have been resolved by some adjustment in the funding priorities, which is reflected in the numbers that we have in the legislation before us. There have been some modest reductions in a number of the programs in order to allow for some increase in the programs which we thought should have higher priority, the science education programs; and this has been done within an overall framework of reduction, as has been pointed out, in the budget request submitted by both the Ford and the Carter administrations.

Mr. Chairman, I might point out in connection with the remarks of the gentleman from Arizona (Mr. RUDD), who did subject these budget figures to a very keen scrutiny, a deserved scrutiny, that possibly one factor might have been overlooked in that scrutiny. That was the role which the National Science Foundation plays as a sort of instrument to take up the slack in the Nation's science programs.

Over the past several years, since 1969, in fact, many of the mission-oriented agencies of Government have had to drastically cut their research and development programs. It was on the initiative of President Ford himself, who is well acquainted with the National Science Foundation and the importance of the research efforts which it pursues, that an additional $50 million, if I recall correctly, was added to last year's budget for the National Science Foundation so that they could take up some of the slack resulting from cutbacks in the programs for the other agencies.

Mr. Chairman, it was this additional funding, which had the personal support of President Ford, that caused some of the increases which the gentleman from Arizona (Mr. RUDD) pointed out.

There is just one additional point I wish to make. There are a couple of programs within the National Science Foundation authorization which will be brought back to the floor later on in this session. They were referred to by one or more of the speakers peripherally. They are the programs involving climate research and earthquake research. Obviously, many people, both in the Congress and in the executive branch, recognize the extreme importance of making breakthroughs in research in these two areas because of their great impact upon this Nation's economy and welfare.

Mr. Chairman, we have seen through this past winter the dramatic impact upon the gross national product of weather conditions which we had not adequately forecast or made provisions for. Work has been going on for several years in an effort to develop even stronger programs in these two areas. The executive branch, to its credit, has recommended increases in the National Science Foundation budget in these two particular areas.

The Science Committee hopes to bring back to the floor later on this year a more detailed program authorizing expanded programs in both of these areas and the scope of these programs has already been reflected in estimates made to the Congressional Budget Committee.

I merely wanted to point out that we do hope to have an additional congressional voice in structuring some of this work, which has already been initiated, later on in the year through our own legislative action.

The CHAIRMAN. The time of the gentleman has expired.

Mr. THORNTON. Mr. Chairman, I yield 2 additional minutes to the gentleman from California.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I would be happy to yield to the gentleman from New York.

Mr. WYDLER. Mr. Chairman, I want to compliment the gentleman from California on the statement he has made.

I also feel very much as the gentleman from Arizona (Mr. RUDD) has stated, that we have to look at all of our Federal budget most carefully, and I think that includes the spending we do under the National Science Foundation bill.

Mr. Chairman, I would be hopeful that next year this bill could be held pretty much at the level at which it now is and that the agency would work very hard now and at the time that they submit their budget for next year so as to do just that, so that we can really try to get a handle to some extent on our Federal spending programs and start working toward that goal that everybody has been talking about, the balanced Federal budget.

I know that the gentleman from New Jersey (Mr. HOLLENBECK) and myself will be very interested in seeing the National Science Foundation try hard to hold to the line in the budget for the next fiscal year.

Mr. BROWN of California. Mr. Chairman, I thank the gentleman from New York for those comments. Let me say that I believe his hope probably can be achieved if it is possible to restore some of the funds that had been previously cut from the mission-oriented research programs of some of the other agencies. I am hopeful it can be done.

Mr. WINN. Mr. Chairman, I rise in support of H.R. 4991, the National Science Foundation authorization for fiscal year 1978. This bill authorizes the support for projects which are related to some of our most important national concerns.

Most of the NSF's budget is used to support basic research, which many might perceive to be unrelated to the solution of our pressing national problems. This is seen to be clearly incorrect when you look at some specific cases from the past.

For instance, take the area of solar energy. Before the transfer of this responsibility to ERDA, the NSF had engaged in the support of solar energy research for more than 20 years—long before there was any hint of the present energy problems concerning fossil fuels. At first the NSF's efforts were concentrated solely on basic research—in physics, chemistry, engineering, and materials sciences. Then when the research applied to national needs program was started in 1971, energy research was identified as a national need and the NSF was given lead agency responsibility for coordinating the Federal research on solar energy.

The NSF's solar energy program was a broad-gage research effort, which ranged from the most basic types of research to applied research. It even included the support, in cooperation with industrial contractors, of four heating augmentation experiments at public schools in Maryland, Minnesota, Massachusetts, and Virginia. The results of all these experiments have played a significant role in the Nation's development of solar energy for future use.

As we now know, the future does not seem so far off when it comes to the use of solar energy, however. The results obtained in the NSF-supported heating and cooling program, for example, prompted several industries to move toward the commercialization of solar components and systems. One major company now offers solar collectors for sale in commercial quantities. Also, a number of companies now offer complete systems design and contracting

support for solar heating and cooling systems. I think it is safe to say that we would not be as close to these applications today without the long-term research support of the NSF in areas related to solar energy.

Mr. Chairman, in order to minimize the severity of future problems, we need the knowledge which is generated today in the conduct of basic research. H.R. 4991 provides for a small real growth in basic research support, reflecting among other things that our problems—such as those of diminishing resources—become greater, not fewer, over time. I urge my colleagues to support this bill.

Mr. TEAGUE. Mr. Chairman, the National Science Foundation uses most of the funds appropriated to it for the support of basic research. Basic research is carried out principally through three large project research arms of the NSF. At this time I would like to highlight some aspects of these programs.

The mathematical and physical sciences and engineering directorate provides funds for research in the math-mathematical sciences, computer sciences, physics, chemistry, engineering, and materials research.

The objectives of the mathematical sciences research program are to create new mathematical knowledge, and to apply mathematical knowledge to the better understanding of phenomena of the physical and social milieus of mankind. The first of these objectives is achieved by the creation of new mathematical structures and techniques and the analysis and study of relations which exist between them. The second objective is achieved by translating phenomena of the physical, engineering, biological, environmental, and social sciences into mathematical problems, and then, by the application of existing mathematics, or the creation of new mathematics, finding solutions of the mathematical problems so formulated.

The objective of the physics research program is to advance knowledge and understanding of the fundamental laws governing matter and energy, over the complete range of natural phenomena. This effort starts with studies of the properties, interactions, and possible internal structure of the elementary particles—from which all other matter is built, and progresses through studies of the basic laws which govern matter of increasingly more complex levels of aggregation—atoms, molecules, gases, plasmas, and so on to cosmological systems.

The objective of the chemistry program is to advance the detailed understanding of chemical bonds—that is, those electronic forces which bind atoms together into molecules—and of the forces between molecules. Chemists who practice synthesis seek to comprehend chemical bonding to the extent that they can cleave chemical bonds, almost at will, at specified locations, make new bonds, and construct molecules of desired composition and configuration. All stable atomic species in the periodic table constitute the molecular construction elements in chemical synthesis. Other chemists explore the dynamic aspects of chemical bond cleavage and reformation. Through knowledge of the dynamics of a chemical reaction, chemists can control the rate of a chemical reaction and, consequently, the detailed mechanism—that is, the sequence of elementary steps by which reactants are transformed to products—can be clearly understood. Analytical chemists use a variety of methods to identify the chemical composition of matter and measure quantitatively the chemical components.

The objective of the engineering program is to increase understanding of fundamental engineering principles and thereby increase man's ability to manage and use his physical resources. Research projects supported by this program address a class of problems, provide new design principles, or represent a completely new approach to an important problem.

The objective of the materials research program is to advance knowledge and understanding of the fundamental principles and concepts which underlie the physical, chemical, and mechanical properties of a wide variety of materials. These materials include solid state semiconductors, liquid crystals, superconductors, organic polymer fibers, ultrahard ceramics, and high strength structural metals.

The astronomical, atmospheric, Earth and ocean sciences directorate provides funds for astronomy, atmospheric sciences, Earth sciences, ocean sciences, and arctic research. The Antarctic research program is administratively included in the directorate, although it is a separate item of authorization.

The astronomical sciences program is aimed at increasing man's knowledge of the universe. Fields of research range from the properties of atomic and molecular systems in astrophysical environments to the overall structure of the universe. The constituents of the solar system, stars, interstellar matter, and galaxies are observed and described.

Support for both theoretical and observational research and for instrument development is accomplished through basic research grants made primarily to universities. In addition, four national astronomical research facilities are supported through NSF contracts.

Atmospheric Sciences is a discipline in which knowledge of physics, chemistry, biology, and other sciences is combined in different ways to improve our understanding of the atmosphere. The research that is supported may contribute to the solution or alleviation of atmospheric problems such as those associated with pollution from major industries, growing populations, and other societal actions that affect the atmosphere in various and subtle ways. There also is much to be learned about the origin of droughts and severe storms such as tornadoes and hailstorms, and how their economic and human impacts might be ameliorated.

Research in the Earth sciences is designed to increase man's understanding of the solid Earth. Geology is currently undergoing a major revolution. Terms such as "sea-floor spreading," "global tectonics," or "plate tectonics," are now established. They refer to the components in a working model which accounts for most of the Earth's major features, and which provide the means to focus on concepts which result in efficient study of the forces that slowly but continually change our planet. These forces result in earthquakes, volcanoes, mineral deposits, and sources of energy.

The overall objective of the ocean science program is to improve man's understanding of the nature of the ocean, its influence on man's activities, and man's impact on the marine environment. This is accomplished through three major programs: Two basic research programs—one to support projects of individual scientists at the oceanographic institutions, the other to support a limited number of large, managed projects—and a program which provides for the acquisition and operating costs of the ships and other oceanographic facilities needed to carry out these research programs.

The objectives of the arctic research program are to develop a better understanding of the dynamic processes governing the formation, movement, and deformation of sea ice; to complete deep ice core drilling in Greenland; to study the arctic tundra to develop information on the impact of increasing human activity; and to initiate studies of the resources of the Bering Sea Shelf for a better understanding of the factors which influence that productive marine ecosystem.

The U.S. antarctic research program supports a multidisciplinary research program on the Antarctic Continent and in the adjacent oceans. The research is focused to increase scientific knowledge through environmental and resource-related programs. The research is conducted at four antarctic stations, from remote temporary field sites, and aboard two research ships. Remote sensing techniques using satellites, aircraft, rockets, balloons, and unmanned stations, are utilized in the conduct of the research. Cooperative research programs with scientists of other nations are commonplace.

The biological, behavioral, and social sciences directorate provides funds for research in physiology, cellular biology, molecular biology, behavioral sciences, neural sciences, environmental biology, and social sciences.

The objectives of the physiology, cellular, and molecular biology program are: To understand the properties, interactions, and specializations of cell types, from plants, animals, and microbes; and to understand the physiochemical basis of biological function in cells, organ systems, and whole organisms.

The behavioral and neural sciences include the disciplines of anthropology, linguistics, and psychology and the newer interdiscipline of neuroscience.

The major goals of the behavioral and neural sciences program are to advance man's understanding of behavior in both its simplest and its most complex manifestations; and to comprehend better the biological, psychological, and cultural mechanisms underlying behavior.

The objective of the foundation's research support program in environmental biology is to increase understanding of the relationships among species of animals, plants, and microbes as they exist in their natural environment. This includes the classification of organisms and the understanding of the relationships that connect present-day forms with their ancestors in past geological periods. It includes research into the functional interactions among organisms of terrestrial and freshwater ecosystems within the context of their physiochemical environment.

The objective of the social sciences program is to accelerate the process of discovering objective and reliable knowledge about how human beings interact, and how social organizations and institutions function and change.

The National Science Foundation is the only agency of the Federal Government with a broad mission to support the development of basic research in the social sciences, and this activity supports a wide range of social science research—from explorations of how personal experiences affect responses to institutional arrangements to an examination of how the economic system is affected by market conditions; from descriptions of how scientific specialty groups form and affect scientific progress, to analyses of major demographic trends. The focus of these varied research endeavors is on developing a basic understanding of social institutions. Such understanding contributes to our comprehension of the institutional context of everyday life as it changes with shifting circumstances, and contributes also to an informed appreciation of the issues and interests that influence the design of public policies.

H.R. 4991 provides authorization for funds to support the basic research programs I have just described. I urge its favorable consideration and adoption by the House.

Mr. FLIPPO. Mr. Chairman, the National Science Foundation is a principal Federal agency for the support of basic research. The program authorized by H.R. 4991 is responsive to U.S. science needs and opportunities and will provide for strong national basic research efforts in fiscal year 1978. I support the bill as proposed by the Science and Technology Committee.

Basic research is important to the future of this Nation. In spite of the great advancements in science and technology over the past 50 years, there is still much to be learned about the universe, about why things behave as they do, about natural laws and phenomena, and about man, himself. We must not stop our quest for new knowledge.

Industrial might and technological preeminence of the United States is testimony to the significance and importance of the advancement of science. The economic and social problems of our cities and States and, indeed, of our Nation serve to remind us that we must gain expertise in the understanding and use of the social sciences as well as continuing programs in the physical, biological, and environmental sciences.

I know that, from time to time, basic research titles are cited which sound strange and, in some instances, even silly. This naturally raises questions as to the soundness of research activities supported by the Federal Government. But, in the overwhelming majority of cases, when you investigate and look at the underlying reasons for these research efforts, you find that they are valid attempts to learn more about some process or phenomenon. The knowledge to be gained may, in time, be of benefit and use to mankind or may extend our scientific understanding so that we can better deal with more complex problems.

As in any endeavor, mistakes will be made. Some research, indeed, will show that a particular line of investigation is fruitless. But even knowledge that a certain avenue of research is fruitless can be important, since it may help direct us toward avenues that will pay off.

The NSF is the only agency of the Government charged with the responsibility of maintaining overall U.S. scientific strength. It provides support for all fields of science and in a number of areas supports research that would not otherwise be supported, because of its fundamental nature and lack of relevancy to a specific Federal mission objective.

Some of the research supported by NSF is in seemingly mundane areas and goes unnoticed. Other research, such as studies of black holes in space, research on brain function, and earthquake research, is exciting and captures national attention. But whether obscure or exciting, the research programs supported by the NSF are a key element in maintaining a strong United States.

Basic research provides the underpinning for new and better technologies, and basic research results hold out hope that we may find ways to maintain a high standard of living, improve environmental quality, and realize a better quality of life for all of us.

H.R. 4991 authorizes increases for the Foundation's basic research efforts. I believe these increases are in order and I urge support of the bill.

Mr. HOLLENBECK. Mr. Chairman, I have no further requests for time and I reserve the balance of my time.

Mr. THORNTON. I have no further requests for time and I reserve the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 4991

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. There is hereby authorized to be appropriated to the National Science Foundation for the fiscal year ending September 30, 1978, for the following categories:

(a) Mathematical and Physical Sciences and Engineering, $243,800,000.

(b) Astronomical, Atmospheric, Earth, and Ocean Sciences, $207,600,000.

(c) Biological, Behavioral, and Social Sciences, $139,200,000.

(d) United States Antarctic Research Program, $47,475,000.

(e) Science Education Programs, $83,300,000.

(f) Research Applied to National Needs, $72,700,000.

(g) Scientific, Technological, and International Affairs, $21,200,000.

(h) Program Development and Management, $47,825,000.

SEC. 2. Notwithstanding any other provision of this or any other Act—

(a) of the appropriations made pursuant to section 1(e)—

(1) not more than $1,000,000 shall be expended for Minority Centers for Graduate Education;

(2) not more than $600,000 shall be expended for Continuing Education for Scientists and Engineers;

(3) not more than $100,000 shall be expended for the Science for Citizens Program; and

(4) not less than $1,500,000 of the amount provided for Minority Institution Trainees shall be made available to Minority Graduate Scholars to continue their education in science or engineering at institutions of their choice;

(b) of the appropriations made pursuant to section 1(f), not less than $23,000,000 shall be available for "Applied Social Research" and for "Policy-related Scientific Research" directed toward increasing the cost-effectiveness of policies and programs dealing with urban and human service problems at the Federal, State, and local government levels, with such funds being used to identify, analyze, and contribute knowledge to improve productivity in the public sector, to identify, analyze, and evaluate more effective, efficient, and equitable ways of delivering human services, and to develop the data base and analytical techniques required for improving applied research on municipal systems and human service delivery; and

(c) of the appropriations made pursuant to section 1(g), not less than $4,500,000 shall be available for Policy Research and Analysis.

SEC. 3. Appropriations made pursuant to authority provided in sections 1 and 5 shall remain available for obligation, for expenditure, or for obligation and expenditure, for such period or periods as may be specified in the Acts making such appropriations.

SEC. 4. Appropriations made pursuant to this Act may be used, but not to exceed $5,000, for official consultation, representation, or other extraordinary expenses upon the approval or authority of the Director of the National Science Foundation, and his determination shall be final and conclusive upon the accounting officers of the Government.

SEC. 5. In addition to such sums as are authorized by section 1, not to exceed $4,900,000 is authorized to be appropriated for the fiscal year ending September 30, 1978, for expenses of the National Science Foundation incurred outside the United States to be paid for in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States.

SEC. 6. No funds may be transferred from any particular category listed in section 1 to any other category or categories listed in such section if the total of the funds so transferred from that particular category would exceed 10 per centum thereof, and no funds may be transferred to any particular category listed in section 1 from any other category or categories listed in such section if the total of the funds so transferred to that particular category would exceed 10 per centum thereof, unless—

(A) a period of thirty legislative days has passed after the Director of the National Science Foundation or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and to the Committee on Science and Technology of the House of Representatives and to the Committee on Human Resources of the Senate a written report containing a full and complete statement concerning the

nature of the transfer and the reason therefor, or

(B) each such committee before the expiration of such period has transmitted to the Director written notice to the effect that such committee has no objection to the proposed action.

SEC. 7. Section 4 of the National Science Foundation Act of 1950 (42 U.S.C. 1863) is amended by adding at the end thereof the following new subsection:

"(j) The Board shall render an annual report to the President, for submission to the Congress on or before March 31 in each year. Such report shall deal essentially, though not necessarily exclusively, with policy issues or matters which affect the Foundation or with which the Board in its official role as the policymaking body of the Foundation is concerned.".

SEC. 8. Section 3(e) of the National Science Foundation Act of 1950 (42 U.S.C. 1862(e)) is amended by striking out "one of the objectives" and inserting in lieu thereof "an objective".

SEC. 9. The National Science Foundation is directed to issue instructions to grantees covering the protection of students and procedures for involving students in precollege education research and development, pilot-testing, evaluation, and revision of experimental and innovative precollege curriculum projects funded by the Foundation. These instructions shall, as a minimum, require the grantee to obtain written approval of the school board or comparable authority responsible for the schools. The Foundation shall further require that the grantee provide to the school board or comparable authority, and to other interested school officials, in advance of any such grant of approval, information concerning the need for and the purposes of the particular education project, the proposed content of the material to be used, the expected benefits to be derived, and the steps taken to insure that students will not be placed "at risk" with respect to their psychological, mental, and emotional well-being in keeping with the established Federal guidelines on the protection of human subjects. The Foundation shall also require grantees to provide information and materials to assist the school board or comparable authority in carrying out its own established procedures in regard to securing parental consent for involvement of students in such projects. The Foundation shall report periodically to the Committee on Science and Technology of the House of Representatives, and the Committee on Human Resources of the Senate, on the actions taken by the Foundation to comply with this section.

SEC. 10. Notwithstanding any other provision of this or any other Act, the Director of the National Science Foundation shall keep the Committee on Science and Technology of the House of Representatives and the Committee on Human Resources of the Senate fully and currently informed with respect to all of the activities of the National Science Foundation.

SEC. 11. This Act may be cited as the "National Science Foundation Authorization Act, Fiscal Year 1978".

Mr. THORNTON (during the reading). Mr. Chairman, I ask unainmous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

AMENDMENT OFFERED BY MR. GARY A. MYERS

Mr. GARY A. MYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARY A. MYERS: On Page 6 after line 24 add the following new section:

"SUNSHINE IN GOVERNMENT

"SEC. 10 (a)(1) Each employee of the Foundation who performs a decision-making function in the handling of any application or proposal for Foundation funding shall provide a written statement for the record identifying any significant financial interest he has in the person submitting the application or proposal and any academic affiliation he has with that person. If the application or proposal results in an award, the statement shall be made available to the public.

"(2) The Director shall remove or take other appropriate disciplinary action against any employee who knowingly violates the requirements of this subsection.

"(b)(1) Within ninety days after enactment of this section, the Director shall publish implemening regulations. The regulations shall define 'significant financial interest,' 'academic affiliation,' and 'decision-making function' as used in this section.

"(2) The regulations shall also deal in an appropriate manner with conflicts of interests of peer reviewers.

"(3) The Director shall report annually to the Congress on the administration and enforcement of this section.

"(c) If the President issues an Executive Order that requires financial disclosure by employees across Federal agencies, only so much of this section as relates to peer reviewers and to academic affiliations of employees shall remain effective."

Renumber the following sections.

Mr. GARY A. MYERS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GARY A. MYERS. Mr. Chairman, this is a provision which I have discussed with the chairman of the subcommittee, as well as the ranking member of the subcommittee. It is similar to a conflict-of-interest provision that I have offered to a number of authorization bills and is similar to the ones that our former colleague, the gentleman from West Virginia, Congressman Hechler, and I were offering last year.

One of the reasons I was not prepared to offer it in the committee is simply because of the unique situation with regard to the National Science Foundation in that there is not only the possibility of conflict of interest with respect to financial holdings but in the National Science Foundation there can also be a conflict of interest through academic associations. Those two provisions are encompassed here. There is one provision that is not specifically spelled out and that is with regard to the penalty clause. It is my understanding that if this amendment is adopted and passed, that the United States Code, 18 U.S.C. 1001 will be cross-referenced as a penalty clause for this.

I ask support from the Committee on this amendment.

Mr. THORNTON. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Arkansas.

Mr. THORNTON. I thank the gentleman for yielding.

We have agreed to the amendment proposed by the gentleman. While I should have preferred to have had it come forward in the committee, we have no objection on this side.

Mr. GARY A. MYERS. I certainly thank the gentleman. I appreciate the fact that he would like to have had it in committee, and I apologize for that.

Mr. HOLLENBECK. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from New Jersey.

Mr. HOLLENBECK. I thank the gentleman for yielding.

I want to point out, Mr. Chairman, that this amendment is acceptable to the minority as well. I wish to clarify the point just made which is not spelled out as introduced in the RECORD of March 23, 1977. Will the existence of either a financial conflict or academic conflict bar that person from reviewing the project?

Mr. GARY A. MYERS. The whole provision behind financial conflicts of interest, and also this conflict-of-interest provision we have offered, simply does not prevent anyone from doing anything. What it does is simply require that there be disclosure. I would suspect that the director would be interested in knowing what those disclosures are, and it is the director's responsibility to follow up on it. What I think is important is that we have knowledge of what it is. It also protects working it out with the National Science Foundation.

We made an attempt here to provide them the opportunity to protect the integrity of the peer review group in that only those grants which become finalized and appropriated will be subject to the public disclosure aspect of it. So we have tried to give the agency a tool to work with. They will be reporting back to us what the guidelines are going to be. I think at that point we will be able to evaluate this.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Maine.

Mr. COHEN. I thank the gentleman for yielding. The thrust of his amendment, then, is to file full disclosure without prohibiting those individuals from passing final judgment. If there is full disclosure, then consideration would be left to the director?

Mr. GARY A. MYERS. I in no way tried to prevent the director from utilizing anyone. I think it is obvious that some association will lead to criticism, and some will lead to rejection of people in some capacities, but this amendment will not force that rejection.

Mr. COHEN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GARY A. MYERS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. RUDD

Mr. RUDD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RUDD: Page 5, between lines 7 and 8, add the following new section which reads as follows:

"SEC. 7. From funds authorized under section 1 (a), (b), and (c) the National Science Foundation is authorized and directed to increase support for cooperative research projects involving researchers from the industrial and academic sectors. The National Science Foundation is further authorized and directed to ensure that researchers in the industrial sector are permitted to compete for funds available under section 1 (a), (b), and (c) on an equal basis with researchers in the academic sector."

Page 5, line 8, redesignate section 7 as section 8, and redesignate succeeding sections accordingly.

Mr. RUDD. Mr. Chairman, my amendment requires the National Science Foundation to do two things:

First, it requires NSF to increase cooperative basic research projects involving researchers from both the academic sector—universities and colleges—and the industrial sector laboratories.

Second, the amendment requires NSF to permit researchers in the industrial sector to compete for NSF funds on an equal basis with researchers in the academic sector.

My amendment is identical with a provision included in the Senate authorization bill for the National Science Foundation—S. 855—by the NSF subcommittee chaired by Senator EDWARD KENNEDY.

The NSF Act of 1950 gives the Foundation the authority to support basic research on the basis of merit and the best performer. But NSF policy almost totally excludes grant awards to scientists who are employed by industrial labs—who in their spare time want to conduct basic research in an area eligible for NSF support.

NSF would probably fund the same grant proposal from a university scientist. But only in very limited, exceptional cases amounting to less than 1 percent of all NSF basic research funds awarded each year are scientists employed in the industrial sector even considered to do NSF-funded basic research work.

Mr. Chairman, there is no legislative basis for NSF's discriminatory policy that makes a large element of U.S. scientists second-class citizens in the grant award process.

The NSF Act was purposely written to give the Foundation broad and flexible authority to meet changing science conditions. Today we are faced with a unique situation. Universities and college faculties are in a no-growth standstill—which means that thousands of young, brilliant Ph. D. scientists and engineers are obtaining employment in industrial research laboratores and firms.

These young scientists represent a tremendous national resource. Like academic scientists, these young researchers have good ideas for basic research that are separate from the specific work of their companies.

Many of these industrial lab scientists would like to develop their basic research ideas with the help of NSF support. The results of their research would be made universally available for the benefit of the entire Nation, under current NSF policy.

Many of their companies are willing to free their time for this purpose—and to allow them to use the company's research facilities for their projects. The incentive for the company is to better industry-university relations and to help their scientists stay in the forefront of their field in all areas—including those outside the immediate purvue of company interests.

My amendment simply requires a change in NSF policy to reflect recommendations recently made by an internal national science foundation task force on NSF/industry relationships.

The task force recommendations are included in an NSF publication entitled, "A Report on Research in Industry: Roles of the Government and the National Science Foundation."

I include that brief task force report at this point in the RECORD:

ATTACHMENT A

[From "A Report on Research in Industry: Roles of the Government and the National Science Foundation," December 1976, National Science Foundation]

NSF–INDUSTRY TASK FORCE PRELIMINARY REPORT

I. INTRODUCTION

There is current concern with the strength of R and D in industry and in the Nation as a whole. Particular concern has been raised regarding the health of basic research. These lead to the broader question of the role of Federal R and D in support of the economy.

Because of such considerations the NSF-Industry Task Force was established by the Director on July 14, 1976, to examine the question of the interaction between NSF and industry and by September 30, 1976, to prepare a preliminary report which would:

1. Define present NSF policy and practices in this area;

2. Identify options for future Federal action and areas of opportunity for NSF involvement;

3. Develop recommendations for specific NSF actions, new programs, or policies in this area, if appropriate; and

4. If new initiatives are recommended, work with appropriate NSF program staff and OPRM to develop option papers for discussion with OMB and the Congress; and

5. Provide policy recommendations to the National Science Board for the establishment of the Office of Small R and D Business in NSF.

The Task Force was made up of one member from each of the seven directorates. Additional members were added where particular expertise was desired. The membership is listed in Appendix 1.

The work of the Task Force was made easier by the availability of a large amount of background material. Of particular importance is the report of the NSF-Industry Relationships Committee formed in the spring of 1971 at the request of the Director and chaired by J. E. Goldman of the Xerox Corporation. The report of the Goldman Committee, issued in March of 1972, is attached as Appendix 2. The Task Force also benefitted from "Industry Views of the Role of the Federal Government in Industrial Innovation" by Knight, Kozmetsky, and Baca (funded by the Office of National R. and D. Assessment of NSF) and "Basic Research Needs of Industry" undertaken by the Division of Science Resources Studies of STIA. Of particular use were several draft papers on the NSF-industry interface by Dr. Joel Snow.

The extent to which NSF should support research performed in industrial laboratories has been a continuing concern of the National Science Board. A summary of the recent deliberations of the Board on this subject is given in Appendix 3 and the most recent policy statement on this subject is attached as Appendix 4. This statement concludes that in maintaining the health of science the NSF should continue to place major emphasis on the health of academic science while broadening the performer base.

It was also of importance to the Task Force to understand the extent to which persons affiliated with industry were members of formally constituted advisory panels and committees and the amount of support the Federal government, and specifically the NSF, is currently providing to performers in industry. These data are summarized in Appendices 5 and 6, respectively.

Although a number of recommendations concerning possible NSF actions toward industry were on hand in the Goldman Report and in other studies, it was important that the currently held views of a broad selection of industrial leaders be obtained. Accordingly, a group of consultants, primarily from industry was convened at NSF on September 10 and 11, 1976. A list of attendees is attached as Appendix 7.

The discussion of the two-day meeting ranged over a variety of topics and a variety of opinions. These concerns and opinions were a function of the size of the company as well as the type of industry represented. As expected, the problems seen by a person from a large, multinational company in a high-technology industry were sometimes quite different from the concerns voiced by an individual concerned with making a success of a small business. In spite of these understandable differences in point of view, there were many areas of essential agreement.

The summary of the discussions with the consultants from industry was prepared by the NSF staff after opportunity for comments and criticisms of a previous draft by the consultants as well as by several other persons who did not attend the meeting. In addition a draft of the preliminary report of the Task Force was distributed to the consultants and other individuals from industry for comment. These comments are collected in Appendix 8.

A recent article by the Comptroller General of the United States comments on many of the same problems which were of concern to the consultants; particular attention was paid to the matter of disincentives. A copy of this article is included as Appendix 9.

II. SUMMARY OF DISCUSSION WITH CONSULTANTS FROM INDUSTRY

A. Major concerns

The consultants uniformily emphasized the central position NSF occupies in the support of basic research. They emphasized that NSF must be committed to a funding philosophy which rewards excellence and promotes the highest standards of basic research: emphasis should be on identifying and sustaining effective researchers rather than supporting institutions.

The NSF should undertake a major effort to analyze and disseminate as widely as possible knowledge about the deleterious effects on industrial R and D of perceived disincentives. These include complex paper work, aspects of the antitrust laws, property rights, and patent regulations as well as the need for incentives which could occur from changes in tax rules and accounting practices.

There is a tendency to use the terms "innovation" and "basic research" interchangeably. It is important to distinguish clearly between the two. Technological innovation encompasses the entire process from basic

research (invention) through the marketing process.

B. The status of the national R and D effort

Overall status is reasonably good, but disturbing trends are:

Declining overall investment in R and D relative to the GNP, inflation and some other countries.

Continued shift from basic to applied research.

Some specific concerns include:

Distribution of effort across fields of technology may not correspond to national needs.

Basic research opportunities are not accessible to small and medium-sized firms.

A more than adequate supply of manpower seems to be available at the senior and mid-career levels, thus creating underemployment and reduced opportunities for younger scientists and engineers.

There are direct effects of economic cycles on industrial R and D which inhibit a firm's ability to sustain a critical level of R and D effort over sufficient time to capture the economic benefits.

The increasing magnitude of social problems where there is little incentive for industrial research.

Formation of new, highly innovative, small firms may be inadequate to guarantee future world leadership by American industry in high technology.

Available technology is not applied and new, improved technology is not created in areas of national need where industry or markets are highly fragmented, e.g., housing industry, machine tools, textiles.

There is insufficient interaction between industry, the universities and government in the basic research area.

Universities usually can not or are unwilling to perform adequately on "national needs" research. The question of interdepartmental cooperation frequently inhibits the interdisciplinary team approach to research.

Government disincentives for industrial R and D are a serious problem.

Incentives for U.S. industrial firms to engage in R and D are not comparable to those provided to firms by other industrial countries.

Inadequate "fountainhead" research is being performed in industry.

C. Possible response to issues

Funding practices:

Direct NSF funding of basic research in universities remains crucial to the health of industry and, hence, the Nation. Major emphasis should be placed on identifying and maintaining the continuity of support for outstanding individuals and groups working in "fountainhead" areas of research. Constraints are detailed accountability and short-term funding (requiring new proposals every one or two years) encouraging only work on "safe projects with short-term scales.

Direct NSF funding for basic research in large industrial firms generally is not needed or desired; removal of "disincentives" is much more important.

More joint research involving individuals from both industry, and universities should be funded to bring university researchers closer to the real world. Funded sabbaticals between industrial and academic environments (both ways) are needed.

Increased research through such mechanisms as loan guarantees or pay-back arrangements may be called for to encourage technological innovation in small firms.

Incentives for increased industrial R and D which should be considered are:

Changes in tax rules and accounting practices to permit creation of contingent reserves for R and D.

Tax incentives for increased direct funding of university-based research by industrial firms.

Moderate the effect of disincentives such as complex paper work, antitrust laws, property rights, patent regulations.

A mechanism is needed to provide increased participation by industry in NSF policy formation and planning.

In areas where it is directed to conduct applied research, NSF should seek to enlarge the role of industry in identifying research needs, technology transfer mechanisms, and technology utilization.

European-style institutes where the research staff hold joint university-industrial appointments may facilitate technology transfer and industry-university cooperation.

NSF should concentrate on the advancement of science and leave the resolution of manpower supply and demand problems to the market places. No Federal retaining program should be established for persons currently employed; this should be left to industry.

III. RECOMMENDATIONS OF NSF TASK FORCE

Over the past 10 years, Federal responsibility for the support of basic research has increasingly shifted away from other agencies toward NSF. This increasing concentration of responsibility for the Nation's basic science capability carries with it an increasing need to understand the mechanisms by which basic science contributes to economic growth and national well-being. The deliberations of the industrial consultants reflect a concern for both of these trends, and many of their preliminary suggestions for action understandably extend beyond the concept of basic research and speak to the general topic of technological innovation and change. The Industry Task Force recognizes the likelihood that, in the long run, NSF will continue to be involved in the formulation of national policies for science and technology as well as in the funding of basic and applied research. Thus, the Task Force has chosen to propose a broad set of tentative recommendations which appear to capture the concerns of the industrial consultants, even though the main problems of R and D incentives and disincentives and the fruitful coupling between industry and academic institutions are ones in which NSF cannot play a direct role. It can, however, bring these issues to the attention of OSTP, OMB, and the Congress and work cooperatively with them to develop appropriate solutions.

The primary concerns of the consultants, as well as those expressed by all other groups who have worried about the vitality of the R and D enterprise in the United States, may be grouped into three categories, to which the recommendations are addressed: (1) Incentives and disincentives for industrial research; (2) NSF funding practices; and (3) the institutional structure of the R and D establishment. Within each category the internal task force considered three types of recommendations: (a) Recommendations for programmatic action by NSF; (b) Recommendaions for additional analysis of options and potential problem areas; (c) Recommendations for broader dissemination of results of prior research. The most significant recommendaions which have emerged to date are discussed below.

A. Incentives and disincentives for industrial research

The need to eliminate disincentives and provide incentives for industrial R and D has been a major recommendation by every group that has studied the problem. This was emphasized recently by the Subcommittee on Domestic and International Scientific Planning and Anaysis of the House of Representatives Committee on Science and Technology.

NSF has sponsored a number of studies of these incentives and disincentives through the Office of National R and D Assessment (now part of STIA) and the Experimental R and D Incentives Program (now housed in RANN/ISTP). The present Task Force agrees that disincentives, and the possibility of incentives, are real and recommends that the exploratory studies and experimental opportunities resulting from prior studies be inventoried and evaluated for possible future actions and recommendations.

NSF should play a lead role in communicating to the President's Science Advisor, Congress, and the general public the effects these *perceived* incentives and disincentives have on industrial R and D and, hence, the economy of the Nation.

B. NSF funding practices

The internal NSF Task Force has four recommendations relating to the funding policies of the Foundation.

1. Continue to place major emphasis on providing adequate, long-term support to the most creative research workers.

The support of the most creative individuals has always been the policy of the Foundation. This recommendation is made to emphasize the concern that current funding patterns and policies are making it difficult for the truly innovative person to work on important, long-term problems.

2. Expand the support of cooperatives research projects in both basic and applied research among researchers in industrial laboratories and universities.

3. Develop a sabbatical or fellowship program to allow faculty members to spend one or two years working in an industrial environment and industrial research workers to work in a university for similar lengths of time.

Recommendations 2 and 3 are directed toward improving the interaction between the industrial and academic research sectors to their mutual benefit.

Discussion of the means by which these recommendations might be implemented may be facilitated by focussing on two aspects of the question, which have somewhat different character and are best handled with different approaches. The first approach is primarily concerned with institutions, and the second with individuals, and individual-oriented, project research. The two approaches are:

Cooperative industry-academic directed research and innovation. Particular attention should be paid to small business and regional needs; and

Industry-academic interaction in the basic (as distinct from innovation) research area, with particular attention paid to the exchange of personnel and the tapping of industrial capabilities in basic research.

The first approach is being actively pursued by the Division of Intergovernmental Science and Public Technology of RANN. The creation of new institutional partnerships has been a major emphasis for this division for several years. A comprehensive experiment on cooperative industry-university research with multiple centers and an independent evaluation was originated by Experimental R&D Incentives (RDI) Program in 1973 and will mature in 1978. This RDI experiment is a major element in the ISPT Industrial Program. Additional studies are now being implemented to extend the concept to an expanded thrust, called Regional Research Centers, which will focus on small business and regional needs using a spectrum of organizational arrangements. These ongoing efforts are being strengthened and require no change in NSF policy or organization. The main question here is whether, and by how much, to increase the allocation of resources for this activity.

A possible approach to the second aspect of the problem would involve making two kinds of awards:

To industry-university cooperative partners in basic research in response to unsolicited proposals; and

To individuals to spend a year at the organization of his or her choice, with the requirement that individuals from industry choose a university and vice versa.

These could readily be accommodated within the framework of present NSF policy. It is felt that special, expanded programs should be announced to give visibility to the new initiative but that proposals for cooperative research projects should be handled by the appropriate existing programs.

To provide an incentive in the first instance for the program officers to encourage cooperative research, funds should be segregated and be made available only *in response* to individual proposals. The proposals would be subject to the usual peer review process, the statutory requirement for cost-sharing and open publication of research results.

Awards to individuals to spend sabbatical years in the opposite sector could be handled by the research directorates under this program, or by the Science Education Directorate in a program similar to the existing postdoctoral program.

Either funding program would provide a mechanism for the renewal and updating of the individual's scientific capabilities and increasing the awareness of technological problems. To ensure that the industrial firms are committed to this program some significant amount of cost-sharing may be required.

4. Allow researchers in industry to compete on an equal basis with other researchers for basic resarch funds.

This recommendation proposes opening to the profit-making sector the competition for basic research funds under the same criteria as those required of the academic community. The special criteria which currently must be met by unsolicited proposals for support of basic research by industrial organizations are:

(a) The project is of special concern from a national point of view and shows promise of solving an important scientific problem;

(b) Unique resources are available in industry for the work; or

(c) The project proposed is outstandingly meritorious.

Implementation of this recommendation requires only that the above criteria be deleted.

It should be noted that the criteria for selection of basic research projects are those established by the NSB for Scientific Research Project Support. The primary emphasis is "overwhelmingly upon the criteria of intrinsic scientific merit." Opening the competition to researchers from profit-seeking organizations would require their adherence to the other criteria and policies detailed in "Grants for Scientific Research" (NSF 73-12).

Implementation of this recommendation would help to determine whether there is unused potential for doing high quality basic research in other than the academic sector. It is to be stressed that what is contemplated here is the support of basic research, not technological innovation which is the concern of most small R and D firms. However, those small businesses with the ability and capacity to compete for basic research funds might find the NSF a source of support.

It should be emphasized that industry is diverse. One must differentiate between product-oriented industries, contract R and D firms, natural-science based industries; and social-science based industries. The need for, and ability to use, funds for technical innovation or basic research will depend upon the type of industry as well as upon the individual researchers in the particular firm.

C. Institutional structure of the R and D establishment

There are two recommendations which have to do with the institutional structure of the R and D community.

5. Increased industrial input to the Foundation's policy formulation and planning should be provided, as part of, or in addition to, the projected advisory council.

Because we do most of our business with the academic community, the staff of the Foundation is closely attuned to that sector. The equivalent situation does not exist with industry. Although our disciplinary advisory panels have significant membership by industrial scientists these persons are chosen for their technical expertise rather than their organizational viewpoint. It is only at the level of the National Science Board where an "industrial viewpoint" can currently be brought to bear on NSF policy. It is suggested that this input of industrial perceptions be augmented by an industrial advisory committee reporting directly to the Director.

6. A detailed study should be undertaken of the advisability of expanding cooperative industry-university research centers.

Technology transfer from university scientists to those in industry probably would be maximized through long-term working relationships. Such arrangements seem to work well in Europe and Japan. Any large-scale expansion of such research centers would mean a change in the funding of research that could have a serious impact on the universities. The Task Force feels that it cannot assess this impact in the time available and, therefore, urges that a separate, detailed study be undertaken.

IV. CONCLUDING COMMENTS

The Federal role in the research interface between industry and academic institutions has received a great deal of attention over the years and has been the primary concern of a number of committees, panels, task forces, etc. With some variation in detail, all of these studies have concluded that this topic is real, important, a proper area for Federal action, and have recommended roughly the same set of actions. The present task force agrees, not only in general, but in many of the specific details, and believes it is time to implement more rapidly some of the alternatives available to NSF.

These recommendations of the Task Force represent a high degree of consensus, but are preliminary in nature. There are differences of opinion as to relative emphasis, the desirability of establishing special programs in contrast to merely opening up the competition to existing programs, etc. We have not attempted to resolve all differences prior to receiving the reaction of the Director and the members of the National Science Board to this preliminary report.

NSF-INDUSTRY TASK FORCE MEMBERS

Chairman: Dr. M. Kent Wilson (MPE).
Vice Chairman: Dr. Vaughn Blankenship (OPRM).
Members:
Dr. Joel Snow (STIA).
Dr. Alden Bean (STIA).
Dr. Charles Polk (MPE).
Mr. Richard Green (RANN).
Dr. William Wetmore (RANN).
Mr. Roland Tibbets (RANN).
Dr. William Benson (AAEO).
Dr. Robert Davidson (SE).
Dr. Robert Newton (A).
Mr. Roy Dillon (BBSS).
Mr. John Raubitschek (OGC).

Mr. Chairman, the NSF task force recommendations for more cooperative industry-university research projects to be supported by the Foundation, and to permit industry researchers to compete for available NSF basic research funds on an equal footing with academic researchers, have received wide praise from both sectors throughout the country.

The same NSF report that includes the task force recommendations also includes letters from industrial scientists, university research administrators, and members of the National Science Board—the Foundation's policymaking body—who extended praise and support for what my amendment will implement as law and policy for the Foundation.

I include some brief excerpts from these letters at this point in the RECORD:

ATTACHMENT B

[Included in NSF publication "A Report on Industry: Roles of the Government and the National Science Foundation"]

COMMENTS ON NSF/INDUSTRY TASK FORCE PRELIMINARY REPORT

Clark C. Abt, President, Abt Associates, Inc., Cambridge, Massachusetts:

"On page eight the report suggests that more joint research involving individuals in both industry and universities should be funded. We emphatically agree, and many of our organizations are already doing this. . . . We were delighted to see the report's recommendations on page nineteen that the Foundation should 'allow researchers in industry to compete on an equal basis with other researchers for basic research funds.' However, *we do not see any specific recommendations for effective implementation of this reform* of funding policy. On the contrary, on page eleven the report states that 'implementation of this recommendation requires only that the above criteria (discriminating against the profit-making sector) be deleted.' I must strongly disagree with this statement. Prompt and effective implementation of the report's recommendation to allow the profit-making sector to compete on an equal basis for basic research funds also requires a change in either the attitudes or the membership of proposal review committees, and evaluation follow-up to assure compliance with the reform policy. Given the almost exclusively university-based membership of the grant proposal review panels, it is extremely unlikely that simple deletion of the traditional criteria discriminating against the profit-making sector will result in significantly changed selection behavior. . . . As the report itself states on page thirteen, 'Because we do most of our business with the academic community, the staff of the Foundation is closely attuned to that sector. An equivalent situation does not exist with industry.'" (Oct. 27, 1976) [Emphasis in original]

Dr. Herbert D. Doan, Doan Associates, Midland, Michigan (Member, National Science Board):

"1. *Allow researchers in industry to compete on an equal basis with others for basic research funds. . .* As a matter of principle, merit should be the only criterion.

"2. *Expand the support of cooperative research projects in both basic and applied research among researchers in industry and universities.* Good idea to help bring industry and education together in areas that are natural to both." (Oct. 27, 1976) [Emphasis in original]

E. L. Ginzton, Edward L. Ginzton, Chairman of the Board, Varian Associates, Palo Alto, California:

"There are times when cooperative programs between a university and an industrial institution are helpful or even indispensable. For example, Varian is now engaged in a cooperative program with Stanford wherein advanced physics research instrumentation developed and maintained at Varian in its Vacuum Division is made available for semiconductor interface research (in this case, sponsored by N[ational] B[ureau of] S[tandards]). Such cooperation should be encouraged whenever it is applicable, and mechanisms for subcontracting portions of NSF work at the universities should be allowed and encouraged. (This does not imply that the industry should seek such support directly from NSF or others.)" (Oct. 15, 1976)

T. Marshall Hahn, Jr., Executive Vice President, Georgia Pacific Corporation, Portland, Oregon (Member, National Science Board):

"Any programs to promote increased interaction and association among industrial and academic researchers clearly are worthwhile." (Nov. 10, 1976)

Margery E. Hoppin, Director, Division of Sponsored Programs, Office of the Vice President for Educational Development and Research, the University of Iowa, Iowa City, Iowa:

"Offering incentives to strengthen the basic research endeavors of industry, particularly small industry, is, of course, laudable for many reasons as your many study commissions have already reiterated. However, given the fact that NSF is at present able to support academic research at only a very limited level, one wonders about the wisdom of this new thrust that will further reduce the amount of funding available for basic research in the academic institutions, unless, of course, there is a significant infusion of new money in the Foundation specifically earmarked for this purpose." (Dec. 8, 1976)

Earnest J. Johnson, A. Lempicki, Electro-Optics Laboratory, GTE Laboratories, Waltham, Massachusetts:

"Researchers in industry should not only be 'allowed' but indeed encouraged to compete for funds. Many industrial laboratories have facilities and personnel that cannot be duplicated elsewhere. Industrial corporations are a national resource important to the present and future economy of the country. . . .

"It is our fundamental contention that the present scenario where research is to be conducted exclusively at universities and industry is to provide only applied work is an artificial dichotomy, inevitably leading to a general decline of overall technological innovation and progress. In our opinion, the effects of these policies are already clearly apparent. . . .

"If a closer interaction between universities and industry is a recognized goal, then removal of the present exclusion of industrial labs is mandatory. None of the proposed sabbatical exchanges, etc., will achieve as much as a broadening of the support base. NSF could do a lot to eradicate a snobbish attitude often encountered in university circles. . . . The interaction and cooperation of all scientists should be encouraged regardless of affiliation." (Nov. 19, 1976) [Emphasis in original]

Harry E. Petschek, President, Avco Everett Laboratory, Inc., Everett, Massachusetts:

"Greater participation by industry in the formulation of policy would further broaden the Foundation's position as a national center of initiative for research.

"Of primary importance, in my opinion, is the recommendation allowing industrial research investigators to compete on an equal basis with other investigators for basic research funding (Recommendation 4 in the Revised Report). . . .

"If the Task Force recommendation are formally adopted, this would be a major and highly beneficial change in policy. . . . The policy changes would, if adopted, represent an important step toward enhancing the national scientific enterprise." (Nov. 22, 1976)

Fred J. Shelton, Vice President, Reichhold Chemicals, Inc., Tacoma, Washington:

"I am in agreement with the five recommendations presented in the summary [of the preliminary report of the NSF-Industry Task Force]. I feel that No. 1—*Allow researchers in industry to compete on an equal basis with others for basic research funds*—is particularly important." (Oct. 29, 1976) [Emphasis in original]

Mr. Chairman, Senator KENNEDY'S subcommittee had a full day of hearings on these NSF/industry proposals. As the result of those hearings, the exact language of this amendment was included in S. 855—the Senate version of this bill.

For that reason—and because this bill increases NSF basic research funds 10 percent above last year's appropriated amount—I believe NSF should be made to end its discriminatory policy against industrial scientists—to make them equally eligible for support of their own individual meritorious research projects.

Current NSF policy amounts to discrimination against tens of thousands of young Ph.D. scientists whose only sin is that they elected to go to work for private industrial laboratories—instead of for a university research lab.

This is certainly not in the best interests of our country's technological, economic, medical, and social progress.

We can correct this injustice and at the same time provide NSF research support to encourage a great and needed national resource for the benefit of all the people.

I urge passage of my amendment.

Mr. THORNTON. Mr. Chairman, I rise in opposition to the amendment.

At the outset, I would like to commend the gentleman from Arizona (Mr. RUDD) for the gentleman's attention to the matters before our committee and for the gentleman's contributions to our reflections and study of this bill. Indeed, the objectives which the gentleman is seeking to obtain by this amendment insofar as they relate to cooperation between industry and the private and public educational institutions have been reflected by language which is now included in the report which accompanies this bill. That report suggests that such things as tax incentives might be appropriate in order to encourage the closer relationship between industrial research and that of the colleges and universities.

However, Mr. Chairman, I think it is vital for us to realize that the programs of the National Science Foundation are intended to promote science research in the universities and colleges of our country, and that NSF should support basic research at industrial organizations only in exceptional cases. The funds which are expended by the Federal Government for science research and development in total are already heavily weighed toward the industrial sector. In fact, 60 percent of all Federal R. & D. funds, some $16 billion, goes to private institutions which apply those funds not only in basic research, but also in applied research and in the development of products.

As contrasted with this figure of $16 billion, only $3 billion is funded by all Federal sources to the colleges and the universities and of that amount something less than $700 million is available through the NSF programs.

The National Science Foundation has had a strong and effective program of promoting basic research in this country. I think it is vital that we continue that effort by approving the bill as it is submitted by the subcommittee and by voting against the amendment offered.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona (Mr. RUDD).

The question was taken; and on a division (demanded by Mr. ROUSSELOT) there were—ayes 16, noes 32.

So the amendment was rejected.

The CHAIRMAN. Are there further amendments? There being none, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4991) to authorize appropriations for activities of the National Science Foundation, and for other purposes, pursuant to House Resolution 431, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read a third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WYDLER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 378, nays 29, not voting 25, as follows:

[Roll No. 101]

The Clerk announced the following pairs:

Mr. Teague with Mr. Badham.
Mr. Hall with Mr. McEwen.
Mr. Murphy of New York with Mr. Holland.
Mr. Staggers with Mr. Symms.
Mr. Sisk with Mr. Pepper.
Mr. Diggs with Mr. Long of Maryland.
Mr. Bellenson with Mr. Taylor.
Mr. Clay with Mr. Young of Alaska.
Mr. Roe with Mr. Charles Wilson of Texas.
Mr. Dodd with Mr. Quayle.
Mr. Milford with Mr. Young of Texas.

Mr. LATTA changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

TWO NEW DEFERRALS UNDER IMPOUNDMENT CONTROL ACT OF 1974—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-111)

The SPEAKER pro tempore (Mr. WRIGHT) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report two new deferrals of funds totaling $12.6 million. The deferred funds were provided for water resources projects in the Corps of Engineers and the Department of the Interior. Only one of the deferrals—related to the Corps of Engineers' Meramec Park Lake project—is now in effect. This deferral will be maintained, at least until the completion of a review of Federal water resources projects currently in progress.

The details of each deferral are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, *March 24, 1977.*

AUTHORIZING ADDITIONAL APPROPRIATIONS FOR DEPARTMENT OF STATE FOR FISCAL YEAR 1977

Mr. FASCELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5040) to authorize additional appropriations for the Department of State for fiscal year 1977.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. FASCELL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5040, with Mr. ALEXANDER in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. FASCELL) will be recognized for 30 minutes, and the gentleman from Alabama (Mr. BUCHANAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to say a few words about the contents of this bill. The committee voted unanimously to report the bill to the floor.

The bill provides a total of $89,650,000, in supplemental authority which includes $60 million to pay U.S. arrearages to UNESCO, $11,325,000 for assistance to Soviet refugees not settling in Israel, $7,400,000 for the Indochinese refugee program administered by the United Nations High Commissioner for Refugees, $10,775,000 for construction of apartment buildings in Cairo for U.S. aid personnel, and $150,000 for emergency assistance to Americans incarcerated abroad.

Section 1 of the bill provides funds for payment of U.S. obligations to UNESCO. The administration has requested full funding in the amount of $69.3 million for payment of U.S. arrearages for calendar years 1975 and 1976 and the U.S. assessment for calendar year 1977. The committee recommends a level of $60 million, which will cover U.S. arrearages plus approximately one-half of our calendar 1977 dues. The committee feels that this level will demonstrate our good faith, enable UNESCO to maintain its program levels and pay its debts, raise morale among U.S. employees at UNESCO, and avoid a call for a special conference to discuss UNESCO's financial problems. Payment of one-half of our 1977 dues acknowledges UNESCO's progress toward greater organizational responsibility, as evidenced in the action taken at the 1976 Nairobi General Conference, while allowing us to retain leverage on the organization to insure that this progress continues. This progress included the tabling for 2 years of a Soviet-

inspired mass media declaration which would have put UNESCO on record as suporting the concept of state control of the media. Due to the help of the Director General of UNESCO and the African nations generally, the major obstacle to Israel's participation in UNESCO was removed and Israel was permitted to join the European regional group.

As a result of these actions, President Ford, on December 29, 1976, certified that UNESCO had substantially met the requirements of Public Law 93–359 which precluded further funding of UNESCO until such certification. The Carter administration supported this certification.

The committee feels that full payment of our arrearages and partial payment of our 1977 assessment is important both to our ability to fight at UNESCO for our concerns and to prevent UNESCO from contracting a larger debt to other nations prompted by our arrears. UNESCO must pay a $22 million debt to the Arab countries this year, as well as $14 million from internal borrowing. Beyond these debt repayments, UNESCO needs funds to continue its programs.

Section 1 also contains $8,325,000 requested by the administration for assistance to Soviet refugees not resettling in Israel and $3 million added by the committee for resettlement assistance within the United States. This administration request was made because the Congress last June restricted the funds authorized under the migration and refugee assistance program to assistance for refugees settling in Israel only. Since only one-half the number of Soviet refugees settle in Israel, the State Department made a supplemental request for $8,325,000. The International Relations Committee added an additional $3 million for resettlement assistance in the United States for those refugees who wish to resettle in this country.

Also included in section 1 is an additional $7,400,000 requested by the executive branch as a contribution by the United States to the Indochinese refugee program administered by the U.N. High Commissioner for Refugees. This program was begun in 1975 as a result of the large influx into Thailand of refugees from Vietnam, Cambodia, and Laos. The Thai Government requested help from the U.N. High Commissioner for Refugees and he set up a joint program to which the United States has agreed to contribute. The program totaled $25 million in 1975–76, of which $12 million was the U.S. contribution. The U.N. High Commissioner for Refugees has estimated a need for an additional $27 million in 1977 to continue the program. The United States will contribute $10 million of that amount, of which $7,400,000 needs authorization.

Section 2 contains an authorization for $150,000 to begin humanitarian assistance immediately to Americans incarcerated abroad. This assistance will be provided where minimum humanitarian needs such as emergency medical and supplementary dietary needs cannot or will not be met by relatives of the prisoners or by the foreign state. The need for emergency assistance to Americans incarcerated abroad has been documented by Secretary of State Vance in a March 4, 1977 report to the Speaker of the House concerning the status of American prisoners in Mexico. While the administration has requested funds in fiscal year 1978 for these purposes, the committee feels that this program is vital and should be funded immediately.

Section 3 provides authorization in the amount of $10,775,000 for purchase of land and construction of three 36-unit apartment buildings in Cairo necessitated by our increased aid program in Egypt, which is authorized in the International Security Assistance and Arms Export Control Act of 1976. This authorization falls under the special foreign currency program and thus is a simple bookkeeping operation enabling the State Department to make use of excess Egyptian pounds already in the Treasury. The total program involves $24.7 million, but the difference results from decreases in the building program elsewhere in the world and a corresponding increase in the building program for the Near East and South Asia.

Section 4 of the bill amends four laws authorizing U.S. participation in the NATO, Canadian, and Mexican interparliamentary groups and in the Interparliamentary Union. It provides that the chairman or vice chairman of the House delegations to these groups be members of the Committee on International Relations. It provides further that the House delegations to the NATO conference and to the Interparliamentary Union be increased from 9 to 12 members, at least 4 of whom must be members, at least Committee on International Relations.

The committee feels that these changes will strengthen the existing jurisdiction oft he committee over interparliamentary conferences and insure that other Members of the House will be eligible for leadership roles at these conferences.

Mr. Chairman, I urge that Members support this bill, as the authorizations in it are necessary to the operation of vital programs at the State Department.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, I find it interesting that the committee comes before the House and describes as a routine matter the reversal of a major policy decision that this House made with regard to UNESCO. I seem to remember that there was a vast majority of the Members of the House who voted on the record to reduce the money to UNESCO because of the employment of that agency for propaganda attacks against Israel on several occasions. Have they changed their policy? Have they withdrawn their resolutions? Have they made amendments for what we considered to be a wrong position?

Mr. FASCELL. Mr. Chairman, let me say to the gentleman from Maryland that the gentleman raises a very good question. I can assure the gentleman that this matter was thoroughly considered in the subcommittee and in the full committee. It is predicated primarily on the certification that came from President Ford, meeting the requirements of the legislative act to which the gentleman from Maryland so eloquently refers. He is absolutely accurate on that. That Presidential certification lifted the prohibition that existed in the law at that time. Notwithstanding that, we gave very close scrutiny to the very questions which the gentleman asked. The answer specifically is that the UNESCO resolution, which sought to change the whole concept of freedom of the press, was deferred after a long fight in Nairobi.

Israel was specifically put back into the regional grouping so that it could participate in UNESCO's programs. The other two Israeli resolutions which we also found rather obnoxious were not deferred, so we still have that fight in front of us. It was for that reason that the subcommittee and the full committee felt that we should not go beyond the payment of the arrearages that are indicated in this supplemental, notwithstanding the fact that the administration took the position that we ought to go for full funding and make the fight in the organization as we have in the past on the resolutions which we still do not like.

Mr. BAUMAN. I appreciate the gentleman's explanation. I think that does answer my concern to some degree.

May I also ask why the resolution includes provisions for an increase in the Interparliamentary Union delegation, an increase of Members of Congress from 18 to 24? What is the justification? Do we not have enough people junketing around the world?

Mr. FASCELL. I will be delighted to answer that. We went into that very thoroughly, on a matter which concerns all of the other statutory delegations which are covered in the bill, as the gentleman knows. What we did was to put them all on the same basis for the first time. By doing that, we dealt with one of the problems that has arisen with respect to the IPU delegation—namely, that some concern has been expressed in the past that we are not able to get a broad enough spectrum in the House for enough Members to go to the IPU meetings. Therefore, we felt it would be useful to make a small increase in the delegation, which will, one, answer that argument; two, put the IPU delegation on the same numerical basis as the other delegations, which are Canadian, Mexican, and NATO; and, three, really have no or very little additional cost, because it is a paper appropriation. That appropriation is fixed, regardless of the number of Members. As the gentleman knows, so long as they have got the space available and the Members are willing to go, there is no additional cost.

Mr. BAUMAN. Is the gentleman saying you have not been able to get enough Members to attend the Interparliamentary Union conferences, so it is, therefore, necessary to increase the number you are going to authorize to go?

Mr. FASCELL. No. I just say that there had been some concern expressed by other delegations that they would like to see more U.S. representation. That was one argument. But basically, as far as

the committee is concerned, we felt it would be helpful to put all the delegations on the same basic numerically with other delegations, and that is the reason they are in this bill. That was worked out very carefully with the Speaker and with the other body and all the other people. We felt it was a useful thing to do and at no increased cost or, at least, a very minimal increase in cost, and it might be useful to help out. That is the only thing.

Mr. BAUMAN. If the gentleman will yield further, did his committee consider instead of increasing all the delegations to a higher level of numbers that can go junketing, to reduce them all to a smaller number?

Mr. FASCELL. I know how the gentleman feels about that, and I must say I respect his views. There are, I am sorry to say, some people who feel that no Member of Congress ought to travel.

Mr. BAUMAN. I do not share that view. I think there are occasions on which travel is necessary.

Mr. FASCELL. I am glad that the gentleman does not share the view that no one should travel, because I do think it is essential for us to travel. The answer to the gentleman is no, we did not have anybody either in subcommittee or full committee who expressed the view that we ought to reduce the number. As a matter of fact, the general concern that I have had expressed to me personally in the House is that more people ought to have the opportunity to go on these official delegations which are created by statute.

Mr. BAUMAN. Mr. Chairman, I appreciate the gentleman's response. I just direct the attention of the gentleman to the CONGRESSIONAL RECORD for last Tuesday in which travel records of the Members of the House were listed for the last session, according to our rules. One of the Members has been to 20 or more countries in the last year at considerable expense and several others have been around the world several times. I do not notice, without getting into any personalities specifically, any difference in the quality of their debate or proposals regarding foreign affairs as a result of this travel. So my question is: Is this trip necessary? And is this money necessary? Each of us has to make his own judgment of course.

Mr. FASCELL. Absolutely. I do not know to whom the gentleman refers but I must say if he has done all that research he must be one of the most learned Members of the House.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, let me say that in my opinion the Interparliamentary Union is one of the most useful and vital organizations in which we have membership and in which the Members of this House and of the other body take part.

I have been privileged myself for the last 10 or 12 years to have been one of our designated delegates to the Interparliamentary Union Conferences. I have served principally on the Committee on Education, Science, and Culture of that organization including service as chairman of that Committee for a period of 4 years. The Interparliamentary Union is an extremely valuable organization. It provides an excellent opportunity for our country to make major contributions to our international relations. Also, we derive major benefits from the exchange of views and information made possible by our participation in the activities of the IPU.

I know, for instance, that in some of the conferences that preceded the Helsinki charter we had opportunities to discuss face to face with the Soviets some of the provisions that went into the final draft of the Helsinki charter. The State Department has confirmed to me that some of the provisions we agreed upon in our IPU resolutions contributed to the end result achieved in the language of the Helsinki charter.

The question I would like to ask the gentleman from Florida is this: I serve currently as a vice chairman of our delegation. I was thinking possibly I might have the opportunity to serve as chairman of our delegation at some future time. However, I am not a member of the International Relations Committee. I serve as a member of the House Judiciary Committee. I do speak several foreign languages and I have been able to communicate with many of the other delegates from other countries. I think I have made as much of a contribution to the work of our delegations as most of those who have represented our country. This is my only involvement in foreign affairs, I might say, but it is an important one. I am just wondering whether, for one thing, I will be barred from serving as vice chairman or whether I will be barred from serving as chairman at some future time because I am not a member of the International Relations Committee?

Mr. FASCELL. No, the gentleman would not be barred from serving as chairman or vice chairman. That is a good question the gentleman raises. We decided that either the chairman or the vice chairman should come from the committee so that would give plenty of flexibility. The Speaker concurred. We think that amply protects the gentleman. We would certainly want to use his broad background and experience on these matters. He has been a most useful member of the Interparliamentary Union. I know that. We have tried to standardize these things and resolve these questions as they arise from time to time.

Mr. McCLORY. I thank the gentleman.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, the gentleman from Illinois referred several times to the Committee on International Affairs. Apparently he does not know that as a result of our reorganization we have only relations and no longer have affairs.

Mr. BUCHANAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the distinguished subcommittee chairman has once again demonstrated why he is renowned for his ability to explain complex and even occasionally controversial legislation. I join him in urging support for H.R. 5040, a fiscal year 1977 supplemental authorization for the Department of State.

The most expensive and controversial item in the legislation before us is a $60 million authorization to enable the United States to pay arrearages and a good part of our 1977 assessment to the United Nations Educational, Scientific, and Cultural Organization. Many of my colleagues on the floor will recall that in 1974 UNESCO was seized by a spasm of bitter partisan debate and a tendency to pass punishing, unworkable resolutions that made a mockery of UNESCO's mandate. The State of Israel was effectively ostracized from the organization, denied a spot in one of UNESCO's regional groupings, and constantly condemned for its policies in Jerusalem and the occupied territories. There was a real prospect that UNESCO might accept the preposterous Zionism-racism link, and perhaps even accede to a Soviet initiative severely curtailing freedom of the press.

As a result of these actions and attitudes, Congress mandated that the United States withhold its payments to UNESCO. I believe the outcome of the 1976 UNESCO General Conference in Nairobi demonstrates that the organization has at least made a beginning toward greater moderation and more responsible attitudes. The Nairobi Conference was a step back from confrontation. Israel was granted membership in the European grouping; Zionism was not equated with racism; action on the Soviet initiative to assert host government control over foreign press was deferred.

I do not contend that UNESCO has solved all its problems or completely forsaken partisan politics. But it is apparent that the organization is gradually moving away from the chaos and infighting of 1974. Moreover, the letter from Acting Assistant Secretary Toussaint contained in the committee report provides concrete assurances that the United States will work actively within UNESCO to redress the excesses of the past and to foster a respect for the traditional values and objectives of the organization.

The question of UNESCO arrearages presents a full range of policy options, all of which have been carefully considered by the committee. There are those who argue that we should continue with a tough stance toward the organization, paying only the dues necessary to maintain our vote. Others, including the administration, feel that our strategy has worked and the time has come to make full payment, through 1977, to UNESCO. In recommending a $60 million authorization, the committee has adopted the carrot and stick approach. Sixty million dollars will pay our dues for 1975, 1976, and a substantial portion of our 1977 assessment. It will relieve UNESCO's immediate financial crisis and forestall the possibility of a special session. To deal with that crisis, which could in turn prove a very negative experience in which we might well lose the gains we have made to date toward depoliticization. At the same time, partial rather than full funding at this time will enable

the United States to retain some leverage over the organization as part of our effort to work for a more effective, responsible UNESCO.

In addition to the question of UNESCO arrearages, H.R. 5040 provides $7.4 million for relief of Indochinese refugees, most of whom are in Thailand, through a program administered by the United Nations High Commissioner on Refugees; it makes an additional $11.325 million available for the resettlement of Soviet and Eastern European refugees settling in countries other than Israel. This initiative is clearly consistent with the principles of the Helsinki Agreement and our concern with human rights. The committee has also recommended approval of $150,000 for emergency humanitarian assistance to Americans incarcerated abroad and an additional $10.775 million in excess foreign currencies to purchase land and build three 36-unit apartment buildings for our increased staff in Cairo, Egypt.

Mr. Chairman, the Subcommittee on International Operations and the Committee on International Affairs have carefully examined each of these requests, and I am convinced that H.R. 5040 merits the support of Congress.

Mr. FASCELL. Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin (Mr. ZABLOCKI), the distinguished chairman of the full committee.

Mr. ZABLOCKI. Mr. Chairman, I rise in support of H.R. 5040.

This bill is the result of a lot of hard work on the part of the Subcommittee on International Operations and the able chairman of that subcommittee, our colleague DANTE FASCELL. I congratulate him on his efforts.

The purposes and background of H.R. 5040 have already been explained so I will not repeat what has already been said.

I do want to point out that although this is a supplemental authorization the funds authorized to be appropriated in this bill have been included in the third resolution on the budget and the chairman of the Budget Committee has no objection to consideration of this measure by the House.

The supplemental authorizations provided in this bill are needed to support important U.S. activities and operations abroad and I urge its passage. I urge the adoption of H.R. 5040.

Mr. STARK. Mr. Chairman, I want to express strong support for the provision in this bill which authorizes funds for emergency medical services for American citizens incarcerated abroad, especially in Mexico.

While the amount of the money is small—$150,000 for the rest of this fiscal year—the concept is healthy and long overdue. For the first time, the U.S. Government is accepting some responsibility for the rights of its citizens in a foreign country. This concept is not unprecedented, in that the State Department does have a similar fund they use to deport indigent U.S. citizens from a foreign country back to the United States; this new provision, however, is the first example of the United States affirmatively helping indigent citizens abroad.

While the intent of the fund is to provide only emergency aid, mostly on a reimbursable basis, at least now a prisoner suffering from appendicitis will not have to risk his life trying to find funds when he should be having the appendectomy. This fund will serve as a guarantee of sorts, to insure emergency treatment.

While Americans in Mexican jails have suffered many abuses, from torture upon arrest to forced confessions, one of the most common and continuing problems is their health. With a poor diet, poor facilities, and little financial means, most prisoners suffer numerous maladies. I know of many cases of hepatitis, at least one of tuberculosis, and another of cancer. Everyone suffers dental problems.

One prisoner died—supposedly of a heart attack after trying without success to get treatment for his severe liver problems.

Another, a woman, has ulcers, allergies and a tumor in her wrist but is unable to get a private doctor's attention.

One man whose fingers were broken by Mexican authorities during interrogation could not get adequate treatment in the prison infirmary—since this would have entailed an admission by the Mexicans of physical abuse—but had no resources for a private doctor.

A woman with an RH factor and other pregnancy complications, who rightly refused to let the prison infirmary perform the operation necessary to deliver her baby by caesarean section, would have been saved much stress and concern if she had known funds would be available for her operation.

Obviously this provision alone will not solve the many problems faced by prisoners in Mexico and elsewhere around the world. I hope, for instance, that the Senate will soon begin consideration of the proposed United States-Mexico treaty which would provide for a prisoner exchange. Much more needs to be done, and policy needs to be changed for the future to protect the legal and human rights of arrested citizens. But this is a step in the right direction.

Mr. FASCELL. Mr. Chairman, I have no further requests for time.

Mr. BUCHANAN. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. Under the rule the Clerk will read.

The Clerk read as follows:

H.R. 5040

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ADDITIONAL AUTHORIZATION FOR INTERNATIONAL ORGANIZATIONS AND CONFERENCES AND FOR MIGRATION AND REFUGEE ASSISTANCE

SECTION 1. Section 101(a) of the Foreign Relations Authorization Act, Fiscal Year 1977, is amended—

(1) Paragraph (2) by striking out "$342,460,453" and inserting in lieu thereof "$402,460,453"; and

(2) in paragraph (5) by striking out "$10,000,000" and inserting in lieu thereof "$28,725,000".

ASSISTANCE FOR AMERICANS INCARCERATED ABROAD

SEC. 2. In addition to amounts otherwise available for such purpose, there is authorized to be appropriated to the Secretary of State for fiscal year 1977 $150,000 for use in providing assistance, on such terms and conditions as the Secretary may determine, to United States citizens incarcerated abroad. Amounts appropriated under this section are authorized to remain available until expended.

ADDITIONAL AUTHORIZATION FOR FOREIGN SERVICE BUILDINGS ACT

SEC. 3. Section 4(h)(1) of the Foreign Service Buildings Act, 1926, is amended by striking out subparagraphs (A) through (G) and inserting in lieu thereof the following:

"(A) for use in Europe, not to exceed $225,000 for fiscal year 1977;

"(B) for use in the Near East and South Asia, not to exceed $12,885,000, of which not to exceed $3,985,000 may be appropriated for fiscal year 1976;

"(C) for facilities for the United States Information Agency, not to exceed $3,400,000, of which not to exceed $2,800,000 may be appropriated for fiscal year 1976;

"(D) for facilities for agricultural and defense attaché housing, not to exceed $150,000 for fiscal year 1977; and

"(E) for facilities for the United States Agency for International Development, not to exceed $17,200,000 for fiscal year 1977; and".

DELEGATIONS TO CERTAIN INTERPARLIAMENTARY GROUPS

SEC. 4. (a) The first section of the joint resolution entitled "Joint resolution to authorize participation by the United States in parliamentary conferences with Canada", approved June 11, 1959 (22 U.S.C. 276d), is amended—

(1) in the second sentence of the first paragraph, by striking out "Foreign Affairs" and inserting in lieu thereof "International Relations";

(2) in the second paragraph, by striking out "Foreign Affairs" and inserting in lieu thereof "International Relations"; and

(3) by adding at the end thereof the following new paragraph:

"The Chairman or Vice Chairman of the House delegation shall be a Member from the International Relations Committee.".

(b) The first section of the joint resolution entitled "Joint resolution to authorize participation by the United States in parliamentary conferences with Mexico", approved April 9, 1960 (22 U.S.C. 276h), is amended—

(1) in the second sentence, by striking out "Foreign Affairs" and inserting in lieu thereof "International Relations";

(2) in the third sentence, by striking out "Foreign Affairs" and inserting in lieu thereof "International Relations"; and

(3) by adding at the end thereof the following new sentence: "The Chairman or Vice Chairman of the House delegation shall be a Member from the International Relations Committee.".

(c) The first section of the joint resolution entitled "Joint Resolution to authorize participation by the United States in parliamentary conferences of the North Atlantic Treaty Organization", approved July 11, 1956 (22 U.S.C. 1928a), is amended—

(1) in the first sentence, by striking out "eighteen" and inserting in lieu thereof "twenty-four";

(2) in the second sentence, by inserting "(not less than four of whom shall be from the Committee on International Relations)" immediately after "Members of the House";

(3) by striking out the third sentence; and

(4) by adding the following new sentence at the end of the section: "The Chairman or Vice Chairman of the House delegation shall be a Member from the Committee on International Relations.".

(d)(1) The second sentence of the first section of the Act entitled "An Act to authorize participation by the United States in the Interparliamentary Union", approved June 28, 1935 (22 U.S.C. 276), is amended by striking out "president" and inserting in lieu thereof "Chairman of the House dele-

gation in the case of delegates from the House of Representatives or the Chairman of the Senate delegation in the case of Senate delegates,".

(2) Section 3 of such Act (22 U.S.C. 276a-1) is amended to read as follows:

"SEC. 3. There shall be not to exceed twelve delegates from the House of Representatives (at least four of whom shall be from the Committee on International Relations) to each Conference of the Interparliamentary Union, such delegates to be appointed by the Speaker of the House of Representatives. The Chairman or Vice Chairman of the House delegation shall be a member from the Committee on International Relations. The Speaker shall designate the Chairman and the Vice Chairman of the House delegation for each such Conference.".

(3) The undesignated paragraph under the heading "MISSIONS TO INTERNATIONAL ORGANIZATIONS" under the general heading "INTERNATIONAL ORGANIZATIONS AND CONFERENCES" of the Department of State Appropriation Act of 1959 (22 U.S.C. 276c) is amended by adding at the end thereof the following new sentence: "The Presiding Officer of the Senate shall designate one Senate delegate as Chairman of the Senate delegation for each such Conference.".

(4) The nineteenth undesignated paragraph under the general heading "DEPARTMENT OF STATE" in title I of the Third Deficiency Appropriation Act, fiscal year 1937 (22 U.S.C. 276b) is amended to read as follows:

"The certificate of the Chairman of the respective delegation and the executive secretary of the American Group to the Interparliamentary Union shall be final and conclusive upon the accounting officers in the auditing of all accounts of the House and Senate delegations to the Interparliamentary Union.".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. SAWYER

Mr. SAWYER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAWYER: Page 4, lines 16 and 17, strike out paragraph (1); and redesignate paragraphs (2) through (4) of section 4(c) as paragraphs (1) through (3), respectively.

Page 5, line 13, strike out "twelve" and insert in lieu thereof "nine".

Page 6, immediately after line 17, insert the following new subsection.

(e) The requirement contained in the amendment made by subsection (c)(1) that not less than four members of the House delegation to the North Atlantic Assembly shall be from the Committee on International Relations, and the requirement contained in the amendment made by subsection (d)(2) that not less than four members of the House delegation to the Interparliamentary Union shall be from the Committee on International Relations, shall not become effective until January 3, 1979.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment. I certainly would not characterize the efforts and the excellent work that has been done by those Members of both bodies who have attended these conferences as any kind of junket. We can make of these things individually what we want.

But I know, having specifically served on the Canadian-American delegation, that we have performed very substantive and useful work. I am sure, as the gentleman from Illinois has already said, that those who have been on NATO and the Mexican delegations can make the same statement. I think the argument about being cautious, prudent and reasonable is of some value. I think we have done that with respect to the rules and requirements that we have put around individual travel in the Congress.

These are official, authorized delegations, and produce very important results; they perform useful work in the exchange of parliamentary views. I do not think that they ought to be denigrated as some kind of junket.

As far as Congress is concerned, I suppose we could make a reasonable case that by adding some more Members from both the House and the Senate, we could have some increase in cost. However, since most of this travel is by Government aircraft on a space-available basis, I do not think the cost increase would be that significant. But, nevertheless, we are going to work within the sums which have already been appropriated. We do not attack that there. What we have done here—and we think it is useful—is to meet the argument many of us on the committee have received, that other Members ought to have an opportunity to participate in these very useful delegations. But, in doing that, we also standardize the size of the delegations, which we think is useful in terms of appropriations available, and also fix the rules concerning accountability and the way in which these appointments for chairman and vice chairman are made.

So, we think everything is in good order, and we can wrap around it whatever restraints or protections the House feels would be essential. We believe all of those are there, and they are laid down in the law. So, I would hope that we would not now backtrack after the careful consideration by both bodies, and the leadership of both sides being in agreement. The adoption of this amendment essentially puts us back where we were, and we make absolutely no progress. So, I ask for a no vote on the amendment.

Mr. BUCHANAN. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I would point out that this is an authorization, not an appropriation bill. As the distinguished chairman of the subcommittee has pointed out, it will be necessary to live within the budget. This does not change that. We are not here appropriating money. Indeed we are not authorizing any additional funds for this purpose. We are authorizing a larger delegation within the confines of the appropriation already made and the budget as it does exist.

In the second place, I would point out that this has been a knotty problem which has been worked out, involving a good deal of consultation and compromise with the leadership of the House, of the Committee on International Relations, and with the U.S. Senate.

I would underline what the subcommittee chairman has said, that other delegations, such as the Mexican delegation and the Canadian delegation, are composed of this same number, 24—12 from each House. We are simply setting this delegation at what I believe to be the normal and rightful number; that is, to give 12 Members of each House an opportunity to serve officially on this delegation. We are dealing here with the membership of an official delegation within a budget already prescribed and within funds already appropriated.

One thing more: This provision guarantees that this very important parliamentary delegation will have the presence of members of the committee that has primary responsibility in international relations in this House and in the other body, but especially in this House.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. I yield to the distinguished chairman of the Committee on International Relations.

Mr. ZABLOCKI. Mr. Chairman, the gentleman from Michigan made a point that the proposal in this bill to make this reform as I call it, would permit greater participation among Members of Congress. It is necessary also to deal with this matter expeditiously so that an additional number would be able to participate in the IPU meeting next month.

Mr. BUCHANAN. The chairman is exactly right.

I would point out it is not unusual for an authorizing committee to include this kind of provision in an authorization bill.

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from California (Mr. BOB WILSON).

Mr. BOB WILSON. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Alabama. I have been a delegate to these meetings. I think we are outmanned at times. We need more representation. We are talking about some very vital matters that affect the security of the world and that affect the United States, for sure, and I think a few additional voices, which will not really add to the expense of the total delegation, is very important.

I urge a no vote on the amendment.

(By unanimous consent, Mr. SAWYER was allowed to proceed for 5 additional minutes.)

Mr. SAWYER. Mr. Chairman, the distinguished chairman of the subcommittee would acknowledge that had this provision been inserted into this supplemental appropriation bill on the floor, as opposed to the committee, it would be subject to a point of order as to the lack of germaneness. This is a clear effort to solve some internal problems over an appointment of a chairman of that committee by adding at public expense six people to the delegation.

I think we have gotten along fine with 18. I certainly concur in the worthwhileness of the delegation, and so forth; but I see no excuse, from the public interest point of view, of adding an additional six, at public expense, when certainly 18 would seem to be enough.

I also checked with the committee counsel and with the Budget Committee.

This is not covered by the budget estimate at all in the report of the committee, because that was based on 4619, the earlier version of the bill, which was supplanted by this one. This will cost additional money. There is no appropriation for it.

The answer was given: "Well, we will get it from the State Department, or somewhere."

That may be fine, but it is still the public's money.

(By unanimous consent, Mr. FASCELL was allowed to proceed for 5 additional minutes.)

Mr. FASCELL. Mr. Chairman, first of all, on the budget matter, the Budget Committee does not even get involved because the matter has no budget impact. There is no authorization involved at all for those items. The appropriations bill takes care of the appropriation, which is in the budget. So that is the answer on the budget issue.

On the matter of germaneness, I can assure the Committee that all of this legislation deals with subjects that are under jurisdiction of our committee and thus is germane.

Mr. BAUMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I do not know how Members can stand up here and tell us that more junketing is progress. That was the word that was used by one of the Members who defended this situation.

The gentleman from Michigan (Mr. SAWYER) is making a very valid point, which has been made repeatedly in the public press and in the minds of our constituents, that there are certain activities in which Congress engages that may in and of themselves have some merit, but in which Congress has overindulged itself. Foreign travel is certainly in that category.

I invite the Members to look at the record, which I referred to earlier, of March 22, where we have the case of one Member who last year during the Easter recess went to Turkey, Greece, Cyprus, back to Greece, Belgium, Ireland, Sweden, and Italy. Then he waited until the 4th of July recess, and went to South Africa, Mozambique, Rhodesia, back to South Africa, Zambia, Tanzania, and the United Kingdom. During the Labor Day recess he went to China, Philippines, Thailand, Bangladesh, and India.

And then at the Christmas recess, not to be outdone, he went back to Israel, Jordan, Iraq, Egypt, Saudi Arabia, Syria, Jordan, and then for New Year's Eve to Italy.

I do not know whether all that travel was productive or not. Maybe it was. It certainly cost the taxpayers money.

These trips on the part of the House may have some justification, but there is no reason for increasing the delegation of the IPU conference from 18 to 24 or increasing any delegation at such meetings. These groups do serve purposes, but this is a small area where self-restraint could add a great deal to the luster of this body which has so recently been improved by our new ethics code.

I think the gentleman from Michigan (Mr. SAWYER) deserves our support and our gratitude, and certainly the taxpayers ought to feel that way about his amendment.

Mr. BUCHANAN. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Alabama.

Mr. BUCHANAN. Mr. Chairman, my friend, the gentleman from Maryland, is certainly a great and consistent defender of the rights of the American people and of the American taxpayers.

Mr. BAUMAN. As is the gentleman from Alabama.

Mr. BUCHANAN. However, I really believe—and I think the gentleman knows this—that we should remember this is an authorization and not an appropriation. The gentleman knows further that they can load up that airplane with Members of Congress and get it chock full regardless of the number of delegates. That happens many times.

There are such things as junkets, and they should not be defended. We know there are junkets; we have heard that from the trips the gentleman has mentioned in reading from the RECORD. But the size of the delegation does not necessarily save the taxpayer one dime. What we will be doing is creating a problem for ourselves in terms of official representation and further problems for ourselves in the House. I do not really think the gentleman saves a dime of the taxpayers' money with this amendment by not permitting the authorizing committee that has the power to do so to take this action.

Mr. BAUMAN. Mr. Chairman, the House should act on this amendment and limit the number of Members traveling abroad. If we adopt the amendment, we would not be creating any harm but saving some money.

Mr. BUCHANAN. Mr. Chairman, this is not in the budget, and the gentleman knows it. By taking this action we are not adding to the budget, we are not adding to the appropriation.

I will agree, just from what the gentleman has read from the RECORD, that we have had many Members traveling to many different places for many different reasons or excuses away from the jurisdiction of their own committees, but in this matter I do not think we are going to save a dime. All we are going to do is upset something that has been carefully worked out in terms of our own representation in these conferences.

Mr. BAUMAN. Mr. Chairman, the gentleman from Alabama (Mr. BUCHANAN) is as unconvincing, as far as this gentleman is concerned, as he usually is when it comes to matters of international import. I suggest that this is a good amendment, and it ought to be supported.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding.

It seems to me that this augmentation of the authorized delegation is a top limit, and it is true that some of the Interparliamentary Union conferences do attract large delegations. We have six subcommittees in the IPU so if we talk about 12 members, that means two members to represent us on each of the subcommittees, and that does not seem to be excessive.

One of the problems, though, is that sometimes we name a large delegation and then, because of legislative activities, we have a falling off or an attrition of the membership. For instance, last year, at the Interparliamentary Union conference in Madrid, although we had named nine members to go, only two members attended and only one stayed for the whole conference.

Mr. BAUMAN. Mr. Chairman, does the gentleman mean to tell me that they would rather be here legislating?

The CHAIRMAN. The time of the gentleman from Maryland (Mr. BAUMAN) has expired.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would just like to conclude my statement by saying that it is important that we have as full a delegation as possible. It seems to me that this increase to 12 members, which is a top limit, gives us a delegation on which we can rely in order to have adequate representation when we get to the conference.

It is true that legislative business does require that we be here. We do not like to be in a foreign country attending a conference if legislation from our committee is being considered in the House or before our committee. That was the situation last year when so many members of our delegation canceled out. At the last minute I decided I should not attend the Madrid conference, and so I did not go. Six or seven of the other members faced the same situation and felt obliged to remain behind.

So, as I say, when the conference took place, we had only two members over there, which is inadequate representation. In fact, at the plenary sessions of the IPU it requires that five members be there just so we can exercise our voting strength under the IPU rules. It seems to me that this number of 12 is not excessive, and I hope that the amendment will be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. SAWYER).

The question was taken; and on a division (demanded by Mr. BAUMAN) there were—ayes 15, noes 29.

Mr. BAUMAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Maryland (Mr. BAUMAN) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT BY MR. FASCELL

Mr. FASCELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FASCELL: Page 5, strike out line 3 and all that follows through line 17 on page 6 and insert in lieu thereof the following:

(d)(1) The second sentence of the first section of the Act entitled "An Act to authorize participation by the United States in the Interparliamentary Union", approved June 28, 1935 (22 U.S.C. 276), is amended by striking out "president and the executive secretary of the American group" and inserting in lieu thereof "Chairman of the House delegation in the case of delegates from the House of Representatives or the Chairman of the Senate delegation in the case of delegates from the Senate, except that either such Chairman may authorize the executive secretary of the American group to approve such vouchers on his behalf".

(2) Section 3 of such Act (22 U.S.C. 276a–1) is amended to read as follows:

"SEC. 3. There shall be not to exceed twelve delegates from the House of Representatives (at least four of whom shall be from the Committee on International Relations) to each Conference of the Interparliamentary Union, such delegates to be appointed by the Speaker of the House of Representatives. The Chairman or Vice Chairman of the House delegation shall be a member from the Committee on International Relations. The Speaker shall designate the Chairman and the Vice Chairman of the House delegation for each such Conference.".

(3) Such Act is further amended by adding at the end thereof the following new section:

"SEC. 4. The executive secretary of the American group of the Interparliamentary Union shall be appointed—

"(1) by the Chairman of the Senate delegation for service during odd numbered Congresses; and

"(2) by the Chairman of the House delegation for service during even numbered Congresses.".

(4) The undesignated paragraph under the heading "Missions to International Organizations" under the general heading "International Organizations and Conferences" of the Department of State Appropriation Act of 1959 (22 U.S.C. 276c) is amended by adding at the end thereof the following new sentence: "The Presiding Officer of the Senate shall designate one Senate delegate as Chairman of the Senate delegation for each such Conference.".

(5) The second sentence of the nineteenth undesignated paragraph under the general heading "DEPARTMENT OF STATE" in title I of the Third Deficiency Appropriation Act, fiscal year 1937 (22 U.S.C. 276b) is amended to read as follows: "The certificate of the Chairman of the respective delegation to the Interparliamentary Union (or the certificate of the executive secretary of the American group if the Chairman delegates such authority to him) shall be final and conclusive upon the accounting officers in the auditing of all accounts of the House and Senate delegations to the Interparliamentary Union.".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD. I can explain it very briefly.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FASCELL. Mr. Chairman, the amendment that I have offered is technical in nature. It establishes the procedures for the appointment of the Executive Secretary of the Interparliamentary Union by providing that during the odd-numbered Congresses he shall be appointed by the chairman of the Senate delegate and by the chairman of the House delegation during the even-numbered Congresses. It gives to the chairman of each group the exclusive authority to sign all vouchers and certificates of account, whereas under the present law the Executive Secretary would have to be involved, but it does give each chairman of the delegation the right to allow the Secretary to sign if in his judgment it is necessary. That is all the amendment does.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FASCELL).

The amendment was agreed to.

The CHAIRMAN. There being no further amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5040) to authorize additional appropriations for the Department of State for fiscal year 1977, pursuant to House Resolution 424, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. GOODLING

Mr. GOODLING. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. GOODLING. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. GOODLING moves to recommit the bill H.R. 5040 to the Committee on International Relations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 292, nays 114, not voting 26, as follows:

[Roll No. 102]

Hall	Roe	Young, Tex.
Holland	Sikes	

The Clerk announced the following pairs:

On this vote:

Mr. Boland for, with Mr. Teague against.

Mr. Murphy of New York for, with Mr. Hall against.

Mr. Staggers for, with Mr. Badham against.

Mr. Fish for, with Mr. Symms against.

Mr. Sisk for, with Mr. Taylor against.

Mr. Diggs for, with Mr. Young of Alaska against.

Mr. Clay for, with Mr. Sikes against.

Until further notice:

Mr. Bellenson with Mr. Milford.

Mr. Holland with Mr. Fuqua.

Mr. Roe with Mr. Charles Wilson of Texas.

Mr. Pepper with Mr. Lundine.

Messrs. BARNARD, WAGGONNER, and JOHN L. BURTON changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 5040, the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I have asked for this time for the purpose of inquiring of the distinguished majority leader if there are any additions to the program or deletions from the program for next week as previously announced.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, there has been one addition made to the program.

On Tuesday we will consider under suspension of the rules a joint resolution, House Joint Resolution 351, providing for further continuing appropiratations. That is the only change that has occurred, and I am sure that that will hold true.

After our colloquy it will be my purpose to ask unanimous consent that when we adjourn today, we adjourn to meet on Monday next.

Mr. MICHEL. Mr. Speaker, could the gentleman advise me as to whether or not that joint resolution for continuing appropriations would be the first order of business under those suspensions listed for March 29?

Mr. WRIGHT. Mr. Speaker, it is our plan that this would be the first order of business. It would become the first suspension on the 29th.

Mr. MICHEL. Mr. Speaker, I thank the majority leader.

ADJOURNMENT TO MONDAY, MARCH 28, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL EXPLANATION

Mr. HARKIN. Mr. Speaker, due to illness, I was unable to be present and vote on the floor yesterday, March 23, 1977, for a number of votes that were taken later in the day.

If I had been present, I would have voted "no" on rollcall vote No. 95; I would have voted "no" on rollcall vote No. 96; I would have voted "aye" on rollcall vote No. 97; and I would have voted "nay" on rollcall vote No. 98.

PERMISSION FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO HAVE UNTIL MIDNIGHT, SATURDAY, MARCH 26, 1977, TO FILE REPORTS ON H.R. 4974, H.R. 4975, AND H.R. 4976

Mr. PANETTA. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may have until midnight Saturday, March 26, 1977, to file reports on the following: H.R. 4974, the Health Planning and Health Services Research and Statistics Extension Act of 1977, H.R. 4975, the Biomedical Research Extension Act of 1977, and H.R. 4976, the Health Services Extension Act of 1977.

Mr. Speaker, I understand that this has been cleared with the minority.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

THE LATE BOOTH MOONEY

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DE LA GARZA. Mr. Speaker, there were sad hearts in the de la Garza office with the death of a longtime and valued staff member—Booth Mooney—a native Texan and longtime assistant to our late President Lyndon Johnson when he served in the Senate as minority leader and majority leader—an author—a raconteur of note—and a wonderful guy.

The Congress was Booth's love—he wrote a number of splendid treatises on the operation of the House and the role of the Speaker.

Formerly a newspaperman, Booth brought to his job not only devoted efforts but an expertise that will be hard to duplicate. There is a saying that nobody is indispensable—Booth was.

There will be a memorial service for Booth Saturday, March 26, at 3 p.m., in the Bethlehem Chapel of the National Cathedral—a fit setting for a gentle man.

This morning's Washington Post carried an excellent article on Booth which I submit for your interest:

AUTHOR, HILL SPEECH WRITER: BOOTH MOONEY, LBJ BIOGRAPHER, DIES

Booth Mooney, 64, a close friend and biographer of the late President Johnson and author of a number of other books, died of cancer Tuesday at his home in Sumner, Md.

In 1953, Johnson, who was then serving in the Senate, called Mr. Mooney to Washington to be his executive assistant and speech writer. Mr. Mooney served in that position until 1958. During that period, Johnson was Senate minority and then majority leader.

While working for Johnson, Mr. Mooney wrote the biography, "The Lyndon Johnson Story."

A slightly revised edition of it was published shortly after the assassination of President Kennedy in 1963, and was translated into more than 40 languages.

It was considered then to be the best immediate source of information on the life and character of the new President.

Born in Wise County, Tex., Mr. Mooney started writing for newspapers at the age of

13, when he covered county courthouse matters in Decatur.

During World War II, he was a captain in the Army Air Force. After the war, he opened a public relations firm in Dallas under the name of Mooney and Cullinan. The firm represented former Gov. Coke Stevenson in a hotly contested campaign for the Senate seat held by Johnson.

Johnson retained his seat but won by a margin of only 74 votes. He was so impressed, however, by Mr. Mooney's handling of his opposition's campaign that he asked him to come to Washington.

After leaving Johnson's office in 1958, Mr. Mooney worked as a freelance public relations man. His clients included the late Texas oil magnate H.L. Hunt.

He wrote other books, "Roosevelt and Rayburn: A Political Partnership," and "The Politicians: 1945 to 1960."

He also published two paperback novels, "Here Is My Body" and "The Insiders," a story based on Washington influence peddlers.

Mr. Mooney was the author of a pioneer work on food additives, "The Hidden Assassins," His last book, "LBJ: An Irreverent Chronicle," an appraisal of the late President, is currently on the stands.

Mr. Mooney was a member of the Metropolitan Club and the Kenwood Country Club and a former member of the National Press Club.

He is survived by his wife, Elizabeth Comstock Mooney, and a daughter, Joan, of the home; a son, Edward, of New York City, and three brothers, Orus, of Austin, Tex.; Dan, of Decatur, Tex., and Fred, of Duke, Okla.

The family suggests that expressions of sympathy be in the form of contributions to the Veterans Administration Oncology Branch at the National Cancer Institute.

STATEMENT OF CONGRESSMAN BILL NICHOLS RELATIVE TO RECENT ACTS OF HOSTAGE TERRORISM

(Mr. NICHOLS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. NICHOLS. Mr. Speaker, many of my constituents in Alabama have written me and have spoken with me personally concerning the recent handling of the Islamic terrorists, many of who were released without bail. While it is my understanding all of these terrorists with the exception of the leader are presently incarcerated awaiting trial, it is impossible for me to understand the rationale of the Justice Department who seems to have capitulated to the most violent elements of crime in this country in releasing the leader of this group who should certainly be held responsible for the murder of one individual, the pistol whipping of other innocent parties and the holding as hostage many totally innocent citizens of this city.

I am inserting in today's RECORD a letter from my constituent who has expressed his displeasure in the manner in which the Justice Department has defended the release of this group and I am hearing this dissatisfaction expressed from many other constituents in my State of Alabama.

Mr. Speaker, I believe that if we are ever going to stop a group such as this who openly flaunt the laws of this country that we are going to have to deal with them strongly and let them know that the courts of these United States will not tolerate such forms of violence.

The letter follows:

GUY SPARKS,
Anniston, Ala., March 14, 1977.

Hon. BILL NICHOLS,
U.S. House of Representatives,
Washington, D.C.

DEAR BILL: Dealings by the Justice Department with Hanafi terrorists are quite disturbing. The problem was approached almost as if these criminals constituted a sovereign state, so powerful its leaders were beyond even a war crimes trial.

Attorney General Bell defends release of the leaders without bail, providing police transportation to their homes and allowing them to maintain at least one of their homes as an armed fortress. He defends on assertion promises of such treatment were necessary to protect hostages, and promises made must be kept to avoid future harm to hostages from other terrorists. He reasons terrorists otherwise will have no faith in government and hostages are more likely to be harmed. In short, present treatment of terrorists is asserted as being policy most likely to prevent future injury.

The very opposite is true. Of course, it is common sense to promise virtually anything to save the life of another from actions of terrorists. To carry out promises exacted from a gun is something else. This indicates terrorists may secure what they want, even from the United States Government, by seizure of citizens. Far from discouraging such terror, keeping such extorted promises induces it.

Two recent prior events illustrate this. Two weeks ago, an individual kidnapped the manager of a company. Holding shotgun to victim's head, he made various demands, including non-prosecution, as condition for safe release. Local authorities promised to meet his demands, but arrested him when the hostage was released. Attorney General Bell criticized failure of local authorities to keep their promises! He criticized on the same ground he now defends his contrary policy. A few days later another individual held another hostage, demanding the President of the United States make a personal telephone call to him as condition for safe release of the hostage. The promise was made. President Carter made the call.

I suggest these episodes did not go unnoticed by the Hanafis. I suggest, too, that what Hanafis noticed and took advantage of will not go unnoticed by others of similar bent. Pre-announced capitulation to the threat of terrorism is no protection against it. It is the exact contrary.

It is my hope you will use your influence to secure law enforcement policies better calculated to prevent terrorism and a return to the law of the jungle.

Sincerely,

GUY SPARKS.

DRUG PUSHER ELIMINATION ACT

(Mr. FREY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. FREY. Mr. Speaker, I am today asking for cosponsorships on my Drug Pusher Elimination Act.

This legislation, first proposed during the 93d Congress and referred to in the interim report of the Select Committee on Narcotics Abuse and Control, comes down on the underworld businessman who makes a profit on hard drugs.

It calls for minimum mandatory sentences, stiff fines, speedy trials and no bond for nonaddict pushers of hard drugs.

Consider these drug abuse statistics:

The number of heroin addicts has fluctuated from 250,000 in 1970 to the present day 800,000.

Drug abuse costs the Nation at least $27 billion a year.

Nearly 40 percent of this cost is the result of crimes committed by approximately 400,000 untreated, daily heroin users.

Between 30 and 40 percent of all property crimes are drug related.

Last year this Nation sustained 5,000 drug overdose deaths.

And then consider the results of a U.S. court's administrative office study which reveals:

In 1975 one out of every three individuals sentenced in Federal courts for narcotics violations received probation.

Of those sentenced approximately one-third received 3 years or less.

Thus, in 1975, over one-half of those pushers violating Federal narcotics laws were back on the streets immediately or were eligible to go back on the streets in 1 year.

Other studies have shown that many important violators are arrested two and three times and repeatedly released on low bail before being tried on the original charge or have their sentence suspended or are released on probation. DEA reports 2,400 fugitive from Federal narcotics violations—800 of those skipped bond.

What we are talking about are businessmen who turn a profit on other people's addiction. But we are also talking about people who have the financial means to post any bond, and the ability to jump any bail.

If the answer isn't quick due process with stiff sentencing, I do not know what is.

The reintroduction of this legislation is particularly timely, given the rumors circulating around the President's Office of Drug Abuse.

If you believe the newspapers, the head of the office, who helped set up England's heroin maintenance program, favors decriminalization of cocaine—and maybe heroin.

"The Carter administration," and I am quoting our afternoon paper, "has said it is carefully reexamining its position on penalties for possession of cocaine."

Dr. Peter Bourne, representing the administration at the select committee's marijuana decriminalization hearings, said the Office of Drug Abuse is looking into all laws concerning narcotics.

We can only wonder what the recommendations will be.

On top of these rumors, we have a judge in Illinois ruling the State's prohibition of cocaine unconstitutional, and the head of the New York Medical College's division of drug abuse research and treatment saying coke does not produce harmful effects for the social snorter.

It is time we drew the line. First we decriminalize marijuana, then we legalize it. Then we set up heroin maintenance centers, then we permit possession of cocaine. Where does it stop? It must stop now.

I would urge you to contact my office if you are interested in cosponsoring this

legislation. I plan to reintroduce this bill early in April.

CONGRESS SHOULD HAVE AN OPPORTUNITY TO HOLD HEARINGS BEFORE FDA IMPOSES SACCHARIN BAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. DUNCAN), is recognized for 5 minutes.

Mr. DUNCAN of Tennessee. Mr. Speaker, I am today, March 24, introducing a resolution expressing the sense of the House of Representatives that the Food and Drug Administration's proposed ban on saccharin should not go into effect until the Congress has had the opportunity to hold comprehensive hearings to determine whether or not saccharin, consumed in normal quantities, is safe.

In this day and age, one could undoubtedly make a good argument to the effect that any substance, consumed in grossly large quantities, would be capable of inducing cancer. Further, one could probably support such a claim with valid scientific research. However, there has to be some standard of rationality, and to say that a product, such as saccharin, could cause cancer if consumed in doses equal to 800 or so cans of diet soda per day is not being rational.

I am not a medical research professional, but I am told that bladder cancer is quite rare. Further, the Canadian tests did not show that saccharin induces bladder cancer in humans, only in force fed rats. However, diabetes, and obesity, afflict millions of American human beings. To deprive these people of a substance that can prevent untold suffering and possibly even death in order to protect a few people who might, by some wild stretch of the imagination, consume 800 diet drinks a day is ludicrous.

This is an issue which demands a full and open discussion, and that is why I am offering this resolution. We must have an opportunity to strike some kind of balance between the absurd and reality.

U.S. SALT PROPOSALS JEOPARDIZE NATIONAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 5 minutes.

Mr. KEMP. Mr. Speaker, tomorrow, Secretary of State Cyrus Vance will be taking a set of proposals to Moscow on the limitation of strategic arms which assumes grave risks with respect to future American national security. President Carter has received dangerously unsound advice on the subject of our strategic arms limitation posture that may compromise the ability of future Presidents to guarantee the security of the United States against nuclear blackmail or to deter direct attack.

First, let me describe what the new U.S. proposals do not do:

They will not prevent the Soviets from maintaining their current lead in land-based ballistic missiles, including their vast advantage in ICBM payload. This enables the Soviets to retain a capability to threaten the survival of U.S. ICBM's in fixed silos, U.S. nuclear-powered submarines in port—normally at least one-third of the 41 missile-launching submarines in our inventory—and U.S. strategic bombers not on alert status, the vast majority of the force.

Though the U.S. proposals will have the effect of aborting the promising advantages the United States may gain from the deployment of long-range cruise missiles by the imposition of unverifiable restraints on the range of these weapons, Soviet cruise missile deployments—they have built more than 5,000 of all types since 1955—will not be affected.

What the U.S. proposals will do is to offer to the Soviets a grab bag of alternatives that would weaken the long-term defense capability of the United States without diminishing the right of the Soviet Union to maintain and improve those forces which threaten the stability of deterrence. The Carter-Vance proposals include:

A plan to defer consideration of the matter of how to count U.S. cruise missiles and the Soviet Tu–26 Backfire bomber in the strategic nuclear delivery ceiling negotiated by President Ford at Vladisostok in 1974;

A proposal to reduce the Vladivostok ceiling from 2,400 to 2,000 strategic nuclear delivery vehicles;

A set of proposals on cruise missiles that would provide for alternative range limitations for air launched and sea/ground launched systems. Range limits from a few hundred to a few thousand kilometers are proposed. Because of the manner in which the cruise missile proposals are structured—those types with the greatest range potential are those most severely restricted—will sharply curtail the military usefulness of the cruise missile to the United States, even though Soviet compliance with these terms cannot be verified by national technical means of verification.

The United States will propose a moratorium on underground nuclear tests, despite the fact that our security directly depends on the technological advantage we gain from nuclear testing where the Soviets are far less dependent on testing. Moreover, such an agreement cannot be verified by any currently known technique if nuclear explosions do not exceed a low, but militarily significant yield.

In short, the United States is proposing a set of limitations on strategic arms which fail to do what is necessary; namely, to cut back on the most threatening Soviet systems such as the SS–18 and SS–19 while imposing a set of controls which are neither verifiable nor symmetric. The Carter SALT proposals will, if accepted by the Soviet Union, serve to weaken deterrence and thereby, undermine long-term American security interests. We can no longer afford the luxury of making agreements at any price; we simply have nothing left to give away save our national security.

TRIBLE HOMEMAKER RETIREMENT BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. TRIBLE) is recognized for 30 minutes.

Mr. TRIBLE. Mr. Speaker, recently passed laws permit wage earners to add to their financial security by establishing personal retirement plans. Unfortunately, these laws have done little to help the largest group of workers in America—the homemaker.

I have introduced a bill, H.R. 4649, which will end this discrimination against homemakers and allow these individuals to establish individual retirement accounts—commonly known as IRA's.

Before I outline the specifics of my bill, I would first like to give you some background information on IRA's.

The most commonly asked question is: "What is an individual retirement account and how does it work?"

An IRA is a personal, tax-sheltered retirement plan. Any wage earner who is not currently a participant in any other retirement plan may establish an IRA.

Establishing an IRA is relatively simple. Almost any bank, savings and loan association, mutual fund, insurance company, or other financial institution can complete the paperwork. There are a wide variety of plans available, but they are all subject to the same legal restrictions.

Once a person establishes an account, he or she can make annual contributions to the account up to $1,500 or 15 percent of his or her income, whichever is less. For Federal income tax purposes, contributions to an IRA are fully deductible from the gross income of the wage-earner. In the long run, this can mean considerable savings for the taxpayer.

The earnings of an IRA are, likewise, tax-free until retirement. In fact, the owner of an IRA does not pay any taxes on the account until retirement when the proceeds are taxed as ordinary income. These taxes are generally lower because a retired employee will usually receive less income and pay taxes at a lower rate than he or she did while working. In addition, all persons 65 or older qualify for a double tax exemption on the Federal income tax return.

Under the present law, a homemaker may have an IRA in only two limited situations. First, a homemaker can own an IRA if he or she is employed and not participating in any other retirement plan. Specifically, a homemaker is treated as other workers as long as he or she is earning wages. Second, a homemaker may participate in an IRA if his or her spouse is eligible for an IRA. However, participation in this plan is limited to a maximum of $875 each year for each spouse, instead of the $1,500 ceiling for all other accounts. Homemakers, who are not members of one of these two narrow groups, cannot now participate in an IRA.

Mr. Speaker, many people have recently been asking me a second question: "How will the Trible homemaker retirement bill change the present law?"

The answer is fairly simple.

My bill would allow each and every American homemaker to own an IRA, regardless of whether their spouse participates in an IRA, Keogh, corporate, government, union, or other retirement plan.

Relatively minor changes in the law are needed to allow all homemakers to have an IRA. In fact, there is only one reason why homemakers who want an IRA cannot get one today: homemakers are not paid for their work in the home. The law now requires earned income before anyone can have an IRA. Consequently, homemakers cannot participate because the law defines their labor as being economically worthless.

Mr. Speaker, I think this is an irrational provision in the law which should be eliminated. You and I are both well aware of the great worth of the American homemaker's work. Yet, in spite of our common agreement, homemakers cannot own an IRA because they do not draw a paycheck for their work in the home.

My bill would amend the present law and allow homemakers to count as their own income the compensation of their spouse. In other words, the bill recognizes the economic value of a homemaker's work.

Let me give you three examples and compare how a homemaker would fare under my bill as contrasted with the present law.

First, let us consider the situation of Tom and Sally Jackson. Tom works as a lineman for the telephone company. He earns $10,102 per year. The telephone company deducts 5 percent of Tom's annual salary as his contribution to the company's retirement plan. Sally keeps their apartment in order and attends afternoon classes at the local college. Under the present law, Sally cannot have an IRA because she has no earned income.

If my bill is enacted, Sally would be able to put away for her retirement $1,500 per year in her IRA. If Tom earned less than $10,000, she would be limited to 15 percent of his income. For example, if Tom earned $9,000 per year, Sally could put a maximum of $1,350 per year into her account.

Jennifer Wright, Bill Stark, and Betty Herman could also establish their own IRA's although none of them earn any wages. Like Sally, each of their respective spouses is covered by a retirement plan at work. However, they no longer need to be concerned that they cannot get an IRA because their spouses cannot. My bill would allow each of them, as well as all other homemakers without retirement plans, to own an IRA regardless of what type of retirement plan their spouses have. As with all IRA plans under my bill, their annual IRA contributions would be limited to a maximum of $1,500 or 15 percent of their spouse's annual income, whichever is less.

Second, compare with me the opportunities for Jim and Sharon Cram. Jim is a substitute teacher at the local elementary school. His wages average $240 per month. When he is not teaching, Jim takes care of their 3-year-old son, Jason. Sharon is the family's prime wage earner. As the assistant to the city manager, she earns $12,317 per year and participates in the city's retirement system. Jim is not eligible to participate in the teacher's retirement system because he is a part-time employee. Instead, he owns an IRA but can contribute only 15 percent of his annual wages of $2,300 to the account. Jim would like to put more than this $345 in his IRA each year but he cannot. The present law permits homemakers who earn wages to invest only 15 percent of their annual wages in an IRA.

My bill would allow Jim to put away $1,500 in his IRA every year. This would be possible because the bill allows homemakers to count their spouse's income as their own in determining the maximum amount they can put in their IRA. In short, Jim would have the same opportunity and be subject to the same limits as any other homemaker. He would not be penalized for working.

Finally, the Trible homemaker retirement bill will also help Donald and Louise Parker, who face an entirely different situation. Donald is a self-employed newspaper columnist. From his work, he earns an average of $18,000 per year. In March of 1976, he established an IRA for himself and contributed $1,500 to it. Last year's action by Congress has forced Donald into a difficult position. Louise is now eligible to have an IRA because she earns no wages and because Donald now has an IRA. However, if Louise opens an IRA, Donald must reduce the annual contributions to his IRA from $1,500 to $875. Likewise, Louise cannot invest more than $875 per year in her account.

Donald and Louise would both be able to contribute up to $1,500 per year to their individual accounts if my bill became law. Donald would not have to limit contributions to his own account to permit Louise to have an IRA. They can both look forward to retirement with security.

Mr. Speaker, at this point, you are probably ready to ask me: "In dollars and cents, how much is an IRA worth?" The answer to this question will vary from person to person and from plan to plan. However, I can give you some examples.

For purposes of illustration, let me discuss what would happen if a homemaker invested the same amount of money in IRA, tax-sheltered certificates of deposit as contrasted with investment in the same certificates of deposit without the benefits of an IRA. In the examples that follow, I will assume that the certificates of deposit earn 7¾ percent interest, compounded quarterly.

If Sally Jackson, the spouse of the telephone lineman, contributes $750 per year to her IRA for 40 years, she will have paid in a total of $30,000. During that 40 years, her investment will earn $172,719 in interest, giving her IRA a total value for her retirement of $202,719. When she retires at the end of this 40 years, she will have an annual net income after taxes of $18,482.

If the law is not amended and Sally invests the same $750 in the same certificates of deposit for each of the next 40 years, she will set aside the same total amount of her income for retirement, $30,000. However, her retirement income will be substantially less. Because she has to pay taxes on the annual interest from the certificates of deposit, her savings will be worth only $88,936 at the end of the 40 years. When she retires, she can expect to draw only $9,560 in annual net income after taxes.

If the law is not changed, Sally's annual after tax income will be $8,922 per year less than it could be if my bill became law. In short, Sally will receive about one-half of the retirement income she would get if she could own an IRA.

Jim Cram, the substitute school teacher-homemaker would fare no better under the present law. If he invested $1,000 per year for each of 40 years in nonsheltered certificates of deposit, he would receive only $12,744 per year when he retires. If, instead, he was able to put the same money in an IRA for 40 years, his investment would be worth $247,317 and he could depend on an annual after tax income of $23,625. Not having an IRA would cost Jim $10,881 per year in lost retirement income.

Finally, consider the advantages of an IRA for Louise Parker, the wife of the newspaper columnist. My bill would let Louise pay up to $1,500 per year into her own IRA. At the end of 40 years, her investment of $60,000 would have earned interest of $345,438 to make the total value of her IRA $405,438. Her after tax retirement income would be $32,405 per year.

Without the protection of an IRA, her investment would accrue a total value of only $177,872. Her annual after tax retirement income would be $19,116. If the law is not changed, Louise will lose $13,289 in annual retirement income.

The future experience of these three couples with and without an IRA can be summarized easily.

RETIREMENT INCOME WITH AND WITHOUT THE TRIBLE HOMEMAKER RETIREMENT BILL

Annual amount invested for retirement for each of 40 yr	Annual net retirement income after taxes		
	With an IRA (Trible bill)	Without an IRA (present law)	Lost income without an IRA
(A) Sally Jackson—$750	$18,482	$9,560	$8,922
(B) Jim Cram—$1,000	23,625	12,744	10,881
(C) Louise Parker—$1,500	32,405	19,116	13,289

This table makes clear that the present IRA law discriminates against the American homemaker. By enacting my bill, the Congress would permit Sally, Jim, Louise, and millions of other homemakers to have the same retirement opportunities as other self-employed workers. No longer will homemakers face the unenviable dilemma of having to choose between no retirement protection and leaving the home to find a job where he or she can acquire pension rights.

Mr. Speaker, there is one more question that should be answered: "Does the Trible homemaker retirement bill have any spillover benefits for the public as a whole?"

The answer is yes.

My bill would encourage people to commit their money to long-range savings. The dollars placed in an IRA would increase the supply of money and the formation of private capital. As a result, interest rates should lower and, eventually, become more stable. Ultimately, the money invested in IRA's should stimulate the economy, cut unemployment, and reduce dependence on Government.

In conclusion, I urge the House to take speedy action on the Trible homemaker retirement bill, H.R. 4649. The time has come to end discrimination against the American homemaker and to recognize the economic value of this work. American homemakers should have an equal opportunity to plan for their retirement.

REBUTTING DEBUTTS—WHALEN COMMENTS ON TELECOMMUNICATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, I read in Tuesday morning's newspaper that the Bell Telephone Co. is again attempting to convince the Congress and the public that any semblance of competition in the telecommunications industry will somehow cost the average residential customer more. And, once again, I must say that I am mystified by these assertions.

In the business section of Tuesday's Washington Post there was an article about testimony that was delivered before a Senate subcommittee on March 21 by Mr. John D. deButts, chairman of the American Telephone & Telegraph Co. The article described the key element of Mr. deButts' statement as follows:

> Specifically, deButts said AT&T would have to reduce long-distance rates to meet increased competition from companies that go after large volume business users of communications services—firms that don't have the same requirement as AT&T to serve unprofitable rural and residential telephones.
>
> "That means, too, that in every state jurisdiction, we will have to file for further increased rates for basic . . . service" because revenues from long-distance calls subsidize local service by $3 billion a year, deButts told the subcommittee.

Now, Mr. Speaker, there are several examples of questionable reasoning contained in that passage. The following is an attempt to untangle and examine them.

First, the Bell System's method of accounting is unfathomable that they have yet to show to anyone's complete satisfaction exactly what the true costs are for any of their various operations. But to the extent that we have been able partially to unravel their accounting methods, all of the evidence thus far seems to indicate exactly the opposite of what Mr. deButts suggests.

In the aforementioned testimony there is a confusion between "large volume business users" and "long-distance calls." Indeed, there is a growing competition, albeit still rather fledgling, with Bell for certain portions of the large volume commercial market for telecommunications services. But there is no real competition, either now or for the immediately foreseeable future, in the area of long-distance calls made for residential phones by private citizens. The significance of this lies in the fact that if there is in fact a $3 billion profit—three-quarters of AT&T's total annual profit—it most likely is being generated from tolls collected from private residential phones and not from those charged to large commercial users.

Last year the Federal Communications Commission concluded a full-scale investigation into the validity of the pricing arrangements Bell uses in billing its commercial subscribers for bulk long-distance rates. The FCC determined that these rates were set unreasonably low, and ordered Bell to proceed to increase rates charged large commercial users.

FCC Docket No. 18128 was issued by Chairman Richard E. Wiley on October 1, 1976. The Commission concluded its review of "The Lawfulness of Bell's Private Line Rate Levels" with this statement:

> With respect to Bell's other services (excepting TELPAC which is discussed below), we note that for the year ending September 30, 1975, the return levels . . . range from −3.5 per cent for the private line in telegraph service to 5.5 per cent for private line telephone. Likewise [using an alternative method of computation] results range from −0.6 per cent, also for private line telegraph, to 7.2 per cent for private line telephone. Compared to the overall system level of return, 8.5 percent, we find present return levels for Bell's private line telegraph, private line telephone, audio/radio, television and "other" service classifications to be deficient since the rates for these services do not cover all relevant costs of furnishing service. . . . It thus appears that the low levels of return on these services are maintained through cross-subsidization. This we hold unlawful in the absence of express statutory authorization or compelling policy considerations. Accordingly, we conclude that the rate levels associated with these services are unjust and unreasonable, and therefore, unlawful within the meaning of section 201(b) of the [Communications Act of 1934 as amended].

So, what does this all mean? Well, the Commission's key words were, "The low levels of return are maintained through cross-subsidization." That is, prices now being charged for bulk commercial use of certain Bell System long-distance services are so low that it appears to be the large commercial users who are being subsidized, not the other way around.

Why is Bell being so nice to the major users of their key commercial services? One might speculate that the purpose may be to discourage competitors from entering the market, because they are not able to make up the difference in lost profits by juggling the rates charged other users.

But Bell did not put forward this argument. Instead they told the FCC that the rates they were charging were strictly a function of the accounting system they were using. The FCC then told them to change their accounting system by this coming June.

Then there is the case of TELPAC, which is referred to somewhat cryptically in the first line of the above-cited quote from the Federal Communications Commission. In simplest terms, TELPAC is a system of wholesale pricing or quantity discounting for large users of certain commercial long-distance lines.

Here, again, the FCC found that Bell had set an unnecessarily low price for their service to industrial users, thus causing other subscriber services to have to pick up the slack. FCC ordered Bell to come up with a new pricing scheme that more accurately reflects the costs of TELPAC or else they must abandon that offering.

A.T. & T. had argued before the Commission that the prices they had set for TELPAC were necessary in order to meet competition in that market. As stated by Chairman Wiley in docket 18128, the primary test customarily applied by the FCC in order to assess the merits of such a claim is as follows:

> That those benefiting from the discriminatory pricing have an alternative of satisfying their communications requirements from a substitute source of supply and that they will shift to the substitute source unless the discrimination is maintained.

Here is how the Commission viewed the A.T. & T. claim in light of this test.

> Even if such a shift were to occur it could never justify the blanket nationwide discrimination inherent in the TELPAC rates. Accordingly, we conclude that under current circumstances the TELPAC discrimination was not justified by competitive necessity.

So, this appears to be another case of a service provided by A.T. & T. to big commercial users which diminishes, rather than enhances, Bell's profits. Where, then is the $3 billion profit in the long-distance lines coming from?

If we had to guess, and that really is all that we can do under the circumstances, I would guess that this profit is mainly coming from private long-distance calls. Because the FCC has pretty well established that the Bell System has been depressing the profitability of a large portion of its commercial long-distance services.

I am sure that each of us in the Congress has heard by now the allegation that any conceivable competition in the telephone industry will somehow automatically result in increases in the home subscriber rates charged that proverbial little old lady. Well, from what I can see, it looks more like that little old lady today probably is paying higher rates when she calls her grandchildren long distance because the Bell System's current pricing structure seems to be giving a sort of hidden subsidy to the big corporate users of their long-distance lines.

Mr. Speaker, the testimony given by Mr. deButts was intended to help convince the Congress to pass legislation that would severely restrict, if not eliminate altogether, potential competition to A.T. & T. in certain areas of the telecommunications industry. I have been studying this issue for about 6 months now, and I must say that the conclusion I have reached is that we must reject Bell's argument. Instead we must act to assure a favorable legislative and regulatory climate for competition in the telecommunications industry. This is the course of action that will truly be in the best interests of consumers and the Na-

tion, and this is why I am opposing Bell's efforts to curtail competition.

GOVERNMENT REGULATIONS ARE STRANGLING THE TUNA INDUSTRY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BOB WILSON) is recognized for 5 minutes.

Mr. BOB WILSON. Mr. Speaker, America's tuna fishing industry is—right now—in deep, serious trouble and we in Government are the ones who caused this problem to exist. We spend billions of dollars for make-work projects, much of it going to people who either cannot or will not work, then turn right around and steal jobs from those who can and are working. Why is this? Can't we encourage production of new jobs without forcing a very productive element of our society to live off the public dole?

I do not understand how in the world we can stand by and let our tuna fishing industry die. This is an industry that has been embattled for at least three decades. We talk about jobs, about full employment and yet we ignore the plight of a billion dollar industry whose demise will rob 30,000 people of their means of livelihood and skyrocket the cost of a high protein food.

We are standing by while governmental regulations slowly strangle this valuable industry. We passed the laws, saw the subsequent regulations come into effect and now we equivocate while the courts twist the meaning of our very words.

Our tuna fishermen have been pushed from pillar to post. First, we tell them that they have our permission to fish, so they put to sea to do just that. Next, when they are under way, we tell them that, no, they cannot fish. They obey and return—empty. Finally, we tell them that there has been yet another change, that they can fish, but only in the manner prescribed by the Government. Is it any wonder that these good people are confused, angry, and frustrated? That they want to take their boats to foreign countries where they will be allowed to fish—to pursue their way of making a living—in peace?

These are dedicated U.S. citizens we are talking about. These are men who annually absent themselves from their loved ones for months on end to ply their trade. These are men who risk their lives daily upon the sea in search of food to place on America's tables.

But what of the porpoise? For decades, the porpoise has been the fisherman's friend. These men follow the porpoise in search of fish. The last thing in the world that they would want is the demise of the porpoise. Saving the porpoise is not a new issue brought on by environmental pressures or governmental regulation. Our tuna fishermen have been dedicated to porpoise conservation long before porpoise conservation became a fashionable cause.

These men need the porpoise. The porpoise is part and parcel of their livelihood. By erasing the porpoise population, the fisherman would be cutting off his nose to spite his face.

Remarkable progress has and is being made in reducing the present levels of porpoise mortality. This point has been made time after time after time, in hearings, in the courts and in discussions before this body. But by restricting the fisherman in his fishing, all research, all practice with new gear and new techniques to save the porpoise must stop.

One must remember that foreign fishing interests have no such restrictions as we have imposed upon our own fishermen. They do not have to conform to a quota. They will not be penalized if one or a dozen or a hundred or a thousand porpoise die during the catching of tuna. The U.S. fishermen are the only ones in the world who must abide by a strict set of rules or be stiffly penalized. And the U.S. fishermen are the only ones in the world taking any action to reduce the porpoise mortality rate by improving their fishing methods.

If we continue to impose these regulations, to enforce the law as it presently stands, it is the American tuna fisherman who will become extinct instead of the porpoise. That is a very real possibility. And along with the fishermen will go cannery workers, ship chandlers, food provisioners and all the other businesses—large and small—and all the jobs that depend on the fisherman for their existence. This problem is not an isolated one but in fact is a problem that will affect every household in the United States of America. Instead of an inexpensive staple food, tuna could become a gourmet item on the grocer's shelves, priced right out of the reach of most Americans.

Just a few days ago, score upon score of these good and decent people journeyed from San Diego to Washington to present their case, a case that has been debated for weeks before an administrative law judge, that has bound up the judiciary, that has produced over 3,000 pages of testimony, that means literally thousands of jobs and millions of dollars.

We are told that the administration wants to put America back to work. If this is so, then why is the administration, and why are we standing about with our hands in our pockets, while an enormous number of working men and women see their lives and their fortunes go down the drain? I cannot understand it. I cannot believe that we are actually allowing such a thing to happen.

We seem to be tremendously accommodating to other fishing interests. Our negotiations with foreign countries to allow them to fish within our new 200-mile economic zone bear this out. Why do we not accommodate U.S. fishing interests first? Our fishermen are also our countrymen, a fact that tends to be overlooked.

We will be coming up on our Easter recess shortly, the time when we honor the resurrection of Christ. Let us not go home without assuring ourselves that we did all we possibly could to keep America's tuna fishermen employed, at sea and continuing to supply our Nation with a healthful source of food.

SUGAR EMERGING AS STICKY MESS IN CARTER ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY) is recognized for 5 minutes.

Mr. FINDLEY. Mr. Speaker, sugar is emerging as a sticky mess in the Carter administration.

Testimony today before the House Agriculture Committee disclosed that the general counsel of the Department of Agriculture has issued an opinion contending that statutory authority exists under which the Secreary of Agriculture can make payments to U.S. processors of cane and beet sugar.

Payments were made to producers for years under the now-expired Sugar Act. Payments have never been made to sugar processors, although in the 1960's the administration sought authority from Congress for such payments. The proposal was not adopted.

The Agriculture Act of 1949, as amended, cited by the General Counsel recently in regard to payments to sugar processors has been used only once to support payments to processors—as distinguished from producers—and that lone exception permitted payments to processors of cotton. But that lone exception was authorized in advance by amendment to the law.

Lobbyists for sugar interests probably see the ruling of USDA's General Counsel as a clever end-run way of supporting sugar prices never intended by Congress.

If payments to sugar processors are desired by the administration a request for authority should be made to the Congress.

I have no reason to believe Secretary Bergland had knowledge of this sticky affair until today, and I hope he will prohibit payments unless Congress gives its specific approval.

In fact, Secretary Bergland stated to the committee today that he could not foresee any circumstances in which he would authorize such payment.

WOULD CEQ ORDER A BAN ON SNOWMOBILES?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND), is recognized for 5 minutes.

Mr. CLEVELAND. Mr. Speaker, it has come to my attention that the Council on Environmental Quality is considering an amendment to an existing Executive order which might severely impact the use of our national forests and other public lands by snowmobiles.

Obviously there is a need to take action to protect our public lands from what has been reported as extensive misuse by off-road vehicles in certain parts of the country.

However, in my State of New Hampshire, the White Mountain National Forest has done an excellent job of planning and zoning in order to provide recreational use with a minimum of adverse impact on the forest and with a minimum impact on competing recreational uses.

I understand that there is serious con-

cern that the National Forest Service would react to the proposed Executive order amendment by banning snowmobiles from our national forests. Based on my knowledge of the White Mountain National Forest, this would be most inappropriate.

I have today written to the Council on Environmental Quality asking them to clarify this issue in advance of any amendments to the Executive order, so that continued use of the White Mountain National Forest under the present regulated conditions will not be interrupted by an excess of administrative zeal or a court suit by some special interest group.

UNDERSTANDING CONSUMER CREDIT LAWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I want to take the opportunity today to state that I strongly feel that the time has now come for this great body to learn how to give itself credit. Furthermore, Mr. Speaker, I feel that the time has also come for all Americans across this great land, to stand and be aware in the ways of giving themselves credit.

It is to this noble end, Mr. Speaker, that the Consumer Affairs Subcommittee and I have just finished compilation of a 130-page booklet explaining consumer credit legislation in layman's language. Coincidentally, the title of this booklet is "Give Yourself Credit," a title for which I would not give myself credit.

When I realized that there was no comprehensive collection of the credit laws available to the public, the task was undertaken of preparing one. It seemed appropriate that since the laws were passed as a result of consumer problems, that a guidebook explaining the consumer's rights under these laws be available to them.

Unfortunately, the initial supply of the consumer credit guides has already been depleted very quickly, but a resolution for 20,000 copies to be printed is currently under consideration and hopefully will supply additional copies. Members who wish to receive copies of the guide should contact the Consumer Affairs Subcommittee, House Annex No. 1, room 212, x 59181.

The book is not intended to be merely a collection of laws filled with complex and confusing credit language. Rather, it is intended to be an easily understood tool to use whenever questions or difficulties arise in a credit consumer's daily life. This credit guide should be useful to the consumer as a simple and quick reference to the consumer credit laws passed to date. The consumer credit legislation that is pending right now will be added at a later time.

The guide covers many of the areas dealing with consumer credit legislation, many of which are complex and intricate in detail. It covers such areas as loans, car leasing, credit cards with their finance charges and billing errors, and what goes into an investigative credit report on a consumer.

How do credit cards work? What information is really in my credit files? What types of information may a creditor take into consideration concerning my age? All of the answers to these questions and many more, are contained in the consumer credit guide, and much of the book is written in an easily understood question and answer format.

Although many consumers may feel that they are aware of their rights as consumers using credit, this book details the most recent provisions of the Equal Credit Opportunity, Consumer Leasing, Fair Credit Reporting, Truth in Lending, and Fair Credit Billing Acts.

The booklet contains an entire glossary of terms frequently used in the credit industry, and readers will discover that a "billing cycle," for example, is the amount of time between regular periodic statement dates, and not a new type of 10-speed bicycle.

If the consumer has a complaint or problem involving any of the credit laws, there is also a list of Federal agency addresses with the division to contact concerning a particular problem.

It is my hope that consumers will utilize this important guide to learn the laws and know their rights so that they might avoid future credit complications and abuses.

This is one textbook that All Americans should study carefully so that in a real credit test, they will know the right answers.

I plan to keep consumers provided with a constantly updated version of the guidebook so that they can keep up with the changes and make informed decisions in credit situations.

INTRODUCTION OF H.R. 5562 TO AUTHORIZE THE ESTABLISHMENT OF ELEANOR ROOSEVELT NATIONAL HISTORIC SITE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

proud to introduce legislation today

Mr. BINGHAM. Mr. Speaker, I am which would establish the Eleanor Roosevelt National Historic Site in Hyde Park, N.Y. Joining me in cosponsorship of this bill are Mr. UDALL, chairman of the Interior Committee; Mr. PHILLIP BURTON, chairman of the Parks Subcommittee; Mr. YATES, chairman of the Committee on Appropriations Subcommittee on Interior; Mr. FISH, whose congressional district includes Hyde Park; Mrs. HECKLER, senior woman in Congress; Mr. BYRON, Mr. CORRADA, Mr. DE LUGO, Mr. FLORIO, Mr. KASTENMEIER, Mr. KOSTMAYER, Mr. MCHUGH, Mr. MILLER of California, Mr. MURPHY of Pennsylvania, Mr. RUNNELS, Mr. SEIBERLING, Mr. TSONGAS, Mr. VENTO, Mr. WEAVER, and Mr. WON PAT. Senator JAVITS is introducing an identical bill in the other body.

I need hardly offer any justification for the creation of a living memorial to Eleanor Roosevelt. She seems to be one of those few persons whose reputation grows, rather than diminishes, with time. Today, 15 years after her death, she remains sole claimant to the title of "First Lady of the World." Her leadership on behalf of civil rights, international peace, the American working man and woman, and the poor and underprivileged in every corner of the globe made Mrs. Roosevelt an international symbol of humanitarianism. I recall a Herblock cartoon in 1959 which said it best. It showed a refugee family on board a ship pulling into New York Harbor. A little child was pointing to the Statue of Liberty and saying, "Look, Mom, it's Mrs. Roosevelt." At a time when so many can only point to the foibles and defects in the American character it is fitting to commemorate the life of an individual who represented all that is good about America and Americans.

At a time when our President is redirecting the attention of the world to the question of human rights, it is fitting to recall that the Universal Declaration of Human Rights was drafted and pushed to adoption by Eleanor Roosevelt. Any international consensus on human rights is a product of that document and all our efforts are phrased in its language. At a time when women all over the world are moving with pride and purposefulness toward a new equality, it is fitting to recall that Eleanor Roosevelt was at the forefront of the women's movement in the early years of this century and to the end of her life. Her whole life was the story of a woman breaking out of stereotypical roles and into the main arena. Though she knew how to use her access to first Governor and then President Franklin Roosevelt to benefit those causes she favored, she was never a mere helpmate to her husband. During his life, and in the 17 years after his death, she was always Eleanor Roosevelt, a power in her own right.

The bill we present today would authorize the Secretary of the Interior to take possession of Val Kill cottage and 173 acres appurtenant to it. It is less than a mile from the "big house"—the FDR mansion which is already a national historic site. Val Kill was Eleanor Roosevelt's home. It was from Val Kill that she coordinated her many activities. It was from Val Kill that she received most of the great men and women of the 20th century—Winston Churchill, Golda Meir, John F. Kennedy, and a hundred others. Val Kill is associated with all Mrs. Roosevelt's endeavors and is a symbol of her career.

As a national historic site Val Kill will be open to the public. The people of Dutchess County, N.Y., State, and the Nation will be able to visit Mrs. Roosevelt's home and enjoy the cottage and its unique setting. Programing at Val Kill would be administered by the Secretary of Interior in cooperation with a Dutchess County group, Eleanor Roosevelt's Val Kill which is chaired by Eleanor and Franklin Roosevelt's grandson, Curtis Roosevelt. It was the Eleanor Roosevelt's Val Kill group which first brought this project to my attention. Programs would center on those themes identified with Eleanor Roosevelt—world

peace, women in politics, social justice, and others. Val Kill would be a center for research, lectures, symposia, and quiet contemplation. Eleanor Roosevelt's home—now unmarked and anonymous—would again be a special place. It would again be Val Kill.

The alternative to this is the loss of Val Kill forever. It is currently in private hands. Its proprietors are thinking of breaking the land up into half acre lots. The house will be offices and apartments. If we do not act now to save Val Kill a unique historical and natural site will be lost to our posterity. Surely we do not want to see Val Kill become just another missed opportunity—a marker in a shopping plaza. Mrs. Roosevelt deserves better than that—and so do we.

SELECT COMMITTEE ON ASSASSINATIONS BUDGET REQUEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

Mr. PREYER. Mr. Speaker, when the members of the House are asked to vote next week on the question of continuing the work of the Select Committee on Assassinations I am certain an important consideration for most of them will be the cost of the inquiries undertaken by that committee.

This week, on March 23, the committee considered and approved its budget request for the remainder of the year. That budget is considerably less than the projections presented to the House earlier.

To help my colleagues in their consideration of this important question I am entering into the RECORD two items: First the transcript of the presentation of the budget to the committee this week and, second, an explanation of that budget by individual items.

I am certain that all members of the select committee will be pleased to receive questions about this budget and any comments on it which our colleagues may have.

The material follows:

[From the record of the meeting of the Select Committee on Assassinations, House of Reprsentatives, Wednesday, March 23, 1977]

EXCERPT

* * * * *

Mr. PREYER. Thank you, Mr. Chairman.

Your budget committee, consisting of Mrs. Burke, Mr. Fithian, Mr. McKinney and Mr. Anderson, have a budget to report to you and I think you have documents before you at the table.

The committee made two basic decisions, two threshold decisions, which are reflected in this budget. The first decision by the budget committee was that we should go forward with both investigations simultaneously, both the Martin Luther King investigation and the President Kennedy investigation. We made this decision after reviewing the testimony given to us and briefings on the matter. So that this budget that we are presenting is a budget for both investigations for one year.

The second basic decision we made was that, while recognizing the need for a tight budget, we recognize equally the need for a thorough and complete investigation. And we repeat our belief that if this investigation is not done right, then it is better not to do it at all.

So, with these guidelines in mind, we submit this proposed budget to you. As you can see from the first document you have, which is entitled "Select Committee on Assassinations Budget Summary," the budget total we are submitting for this year is $2,796,650. That is a full year's budget and includes the three months which we have already been in existence.

Now, that is considerably less than the original $6½ million budget that was proposed, so that you would be interested in how we got to where we are from where we came.

There is a second document which you have, called "Reconciliation of Original and Proposed Budgets," which helps explain that. If you will look at the first sheet on that, you will notice that the original budget was a little over $6½ million. From that, we subtracted what are titled savings, which amount to $800,300. These savings would have been available to be subtracted from the original budget in any event.

These are things which, in light of more information and better information, we found did not necessarily have to be in the original budget. There is an explanation on the second page at the bottom of that page of how these savings came about.

Without going into all of those, I can point out a few of the large ones. Number 1, for example, travel was reduced almost $300,000. One of the reasons for that is that we have had some experience with the pattern of travel and it is primarily Memphis- and Dallas-oriented; it is not as widespread as we thought it might have been.

Also there has been a decision made to pay half-day per diem for less than 24-hour trips, so that has resulted in a considerable reduction there.

On Number 5, telephone and telegraph was reduced $245,000.

Part of that reduction, $50,000, was absorbed by the House Committee on Administration. That is something that we thought we would have to pay for. It turned out that the House Committee on Administration would pay for it.

The item "Long-Distance Calls" has been reduced. We originally figured each long-distance call at $5. Experience has shown that they don't take that long and they are averaging now about $2.50. So that has been refigured on the basis of that information.

Item Number 6, "Equipment Purchase," has been reduced or eliminated in that we are not going to buy our polygraph or stress evaluators; that equipment will be leased.

On Number 7, there is a reduction in computer services of $100,000. Again that is going to be absorbed by House Administration, not by this committee, which is something we didn't originally anticipate.

So the sum of all of those is a reduction of something over $800,000 in savings from the original budget. The largest item, however, in reduction is the next item listed on the first sheet there, called "Decrease Due to Reduction in Proposed Staff," from 170 to 115. This means that we are reducing the task forces. Both the King task force and the Kennedy task force will now consist, under this budget, of 27 people—1 deputy chief counsel, 10 staff counsel and 16 staff investigators.

We discussed this item with Mr. Sprague, with Mr. Tanenbaum, the deputy counsel for the Kennedy assassination, and with Mr. Lehner, the deputy counsel for the King investigation, because we were concerned with whether this was too drastic a cutback, whether it would affect the efficiency of the investigation. And they are of the opinion that the investigation can be carried forward efficiently with this staff.

I would like at this time to call on Mr. Sprague or Mr. Tanenbaum and Mr. Lehner for any comments they might have on that item there of the salary reduction.

Mr. SPRAGUE. Mr. Preyer, I had the staff go into great detail in terms of the kind of investigative effort that would be needed and keeping in mind the need to reduce at least as much as would be feasible.

Mr. Lehner and Mr. Tanenbaum both went over the projected areas of the investigation with as much care and detail as they could on the basis of the experience they have—to some extent; at least they have some even though it is limited—in the work effort that has been done up to this point. They made the recommendation to me for the size of staff that is in that contemplated budget.

I have questions with regard to how fine we can cut that. I am willing to cut that; I am willing to go along with their recommendation to me because they feel that, with that amount of manpower, they can get the job done. I have that degree of confidence in them that, although it is less than what I would have proposed, I am willing to go ahead on the basis of those figures and, at the moment I see no reason why we cannot.

Mr. PREYER. Thank you, Mr. Sprague.

That, of course, is the largest item in the reduction.

There is one final item, which is the decrease due to less than the full 12-month operation in 1977. That is a $600,000 item. In other words, this budget anticipates we will have 115 people working for the committee. We have 73 at the present time, so we have gone three months of the year with 73 and it is anticipated that we will not reach the full 115 number until July. We will be gradually building up to that.

Therefore, this $600,000 is what would have been necessary if we had had the 115 from the beginning of the year until the end of the year; but, since we do not have them, that is an item which comes out of the budget.

So, in short, with those adjustments and savings, we reached the figure of the proposed budget.

I might point out that, under the savings, under the new information which we have learned since the original budget went into effect, that original $6½ million budget would now be under $5 million. So, rather than comparing it with a $6½ million budget, actually we would be comparing it with a budget of something over $4 million.

So I think that puts in better perspective the extent of the reduction and that we aren't crippling the investigative side of things. I think it reflects rather that the first proposed budget was just that, a proposed budget, and not something that reflected the experience which we have had in the budget, that it was a budget subject to being worked over.

Mr. Chairman, the budget committee, then, recommends this budget of $2,796,650 to the committee.

* * * * *

Select Committee on Assassinations
Budget summary—1977

I. Salaries	$1,991,200
II. Travel	400,000
III. Consultant services	108,750
IV. Witnesses	45,000
V. Stationery and supplies	46,500
VI. Telephone and telegraph	95,600
VII. Equipment—purchase	10,600
VIII. Equipment—Lease	29,000
IX. Reproduction, printing, and graphics	18,000
X. Books and periodicals	2,000
XI. Miscellaneous	50,000
Total	2,796,650

I. SALARIES

A. (1) Director, $39,600.

B. (3) Deputy Chief Counsels at $36,000, $108,000.

C. (2) Special Counsels at $34,000, $68,000

D. (20) Staff Counsels: 8 Grade 3 at $28,000–$34,000; 8 Grade 2 at $20,000–$28,000; 4 Grade 1 at $12,000–$20,000; $492,000.

E. (32) Staff Investigators: 2 Chiefs at $30,000; 10 Grade 3 at $24,000–$28,000; 10 Grade 2 at $18,000–$24,000; 10 Grade 1 at $12,000–$18,000; $700,000.

F. (3) Legal Unit: 1 Grade 3 at $28,000–$34,000; 2 Grade 2 at $20,000–$28,000; $69,000.

G. (23) Document Analysis and Research Unit: 1 Chief of Unit at $34,000; 2 Deputy Chiefs of Unit at $24,000–$30,000; 4 Senior Researchers at $18,000–$24,000; 6 Staff Researchers at $10,000–$18,000; 8 Document Clerks at $8,000–$12,000; 1 Senior Computer Analyst at $25,000; 1 Computer Analyst at $18,000; $379,000.

H. (2) Security Unit: $30,000 and $16,000; $46,000.

I. (5) Administrative/Budget Unit: 1 Chief Administrator at $36,000; 1 Chief Clerk at $20,000; 1 Task Force Manager at $18,000; 1 Public Information Officer at $34,000; 1 Budget Officer at $30,000; $138,000.

J. (24) Secretarial/Clerical: 24 at $10,000–$16,000; $338,900.

Total, $2,378,500.

Note: This amount represents annual salaries for a full staff of 115. As the full staff level will not be reached until later in the year, salaries should be budgeted at $1,991,200.

II. TRAVEL

A. Committee Members and Staff: The Committee's projection of travel expense is substantially higher than $400,000 but this amount is being requested until a higher amount can be justified, $400,000.

III. CONSULTANT SERVICES

A. Forensic (i.e., medical, ballistics).

B. Experts—fingerprinting, handwriting, document analysis, criminalists (i.e., fiber, hair, clothing), neutron activation analysts, voice prints, electronic, photographic.

C. Translators—audio-visual, etc.: Fees, 750 man-days at $100, $75,000.

Travel: 75 trips, 3 days duration; Transportation, 75 trips at $300, $22,500; Per diem, 75 trips at $150; $11,250.

Total, $108,750.

IV. WITNESSES

A. Travel: Transportation, 60 trips at $300, $18,000; per diem, 60 trips at $150, $9,000.

B. Security: 60 days at $300, $18,000.

Total, $45,000.

V. STATIONERY AND SUPPLIES

A. Startup allowance, 115×300; $34,500.

B. Resupply, $12,000.

Total, $46,500.

VI. TELEPHONE AND TELEGRAPH

Long distance, 225 days × $425; $95,600.

Note: Long distance charges have been estimated at 170 calls per day at an average cost of $2.50 per call.

VII. EQUIPMENT—PURCHASE

A. Tape recorders: 2 at $300, $600.

B. Security devices for staff offices: $10,000.

Total, $10,600.

VIII. EQUIPMENT—LEASE

A. Xerox, 2 at $12,000; $24,000.

B. IBM Memory Typewriter, 2 at $2,500; $5,000.

Total, $29,000.

IX. REPRODUCTIONS, PRINTING AND GRAPHICS

This allowance is needed for the development of films, enlargements, special printing, art work, graphics, etc., $18,000.

X. BOOKS/PERIODICALS

This amount is needed for books, literature, periodicals, newspapers, etc., $2,000.

XI. MISCELLANEOUS

Contingency Allowance. This amount is to allow for underestimating in the various expense categories and to provide for unanticipated expenses, $50,000.

Reconciliation of original and proposed budgets

Original	$6,531,050
Savings:	
Travel	[1] 297,400
Consultants	[2] 46,250
Witnesses	[3] 33,900
Stationery and supplies	[4] 32,000
Telephone and telegraph	[5] 245,000
Equipment, purchase	[6] 23,750
Equipment, lease	[7] 112,000
Reproductions, etc	[8] 7,000
Books and periodicals	[9] 3,000
Total savings	800,300
Adjusted original budget	5,730,750
Decrease in salaries of $1,257,100 and other expenses of $1,077,000 due to reduction in proposed staff from 170 to 115	2,334,100
Subtotal	3,396,650
Decrease in salaries of $387,300 and other expenses of $212,700 due to less than full 12-month operation in 1977	600,000
Proposed budget	2,796,650

[1] Travel was reduced $297,400 by reducing the cost of domestic trips by $100 and foreign trips by $300. These reductions were made possible by better travel pattern information and the adoption by the Committee of paying half-day per diem where appropriate.

[2] Consultant services (i.e., medical, ballistics, fingerprinting, handwriting and forensic experts) were reduced to $46,250 by reducing the estimated use by 25% and the cost of trips by $100.

[3] Witnesses' expenses were reduced $33,900 by reducing estimated use by 25%, the cost of trips by $100, and the cost of witnesses' security by 50%.

[4] Stationery and supplies were reduced $32,000 based on our prior experience.

[5] Telephone and telegraph were reduced $245,000. Local service at $50,000 to be absorbed by Committee on House Administration. Long-distance telephone calls were reduced $195,000. Current experience shows an average cost of $2.50 per call compared with $5 in original budget.

[6] Equipment—purchase has been reduced by $23,750. Of this amount, $5,750 was purchased in December, 1976, against 94th Congress funds and $18,000 for polygraphs, stress evaluators and mini-recorders, were eliminated from the budget.

[7] Equipment—lease has been reduced by $112,000. Computer services expenses of $100,000 are to be absorbed by the Committee on House Administration and one Xerox copier at $12,000 has been eliminated from the budget.

[8] Reproductions, Printing and Graphics were reduced by $7,000 based on better budget information.

[9] Books and Periodicals were reduced $3,000 due to purchases in December, 1976, against 94th Congress funds.

TIME TO INVESTIGATE BLOODSHED IN CAMBODIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. DICKS) is recognized for 5 minutes.

Mr. DICKS. Mr. Speaker, recently we have seen much commentary in the press about the deteriorating situation in the African nation of Zaire. I have watched with interest the new Secretary of State request additional assistance for the beleaguered nation of Zaire from the House International Relations Committee. His testimony and the comments of committee members remind me of something many of us seem to have long forgotten.

It was not quite 2 years ago that a different Secretary of State went before the same committee to request additional assistance for the faltering Government of Cambodia. Each of us knows the rest of the story—assistance was denied, the shaky Cambodian Government fell, and the new Khmer Rouge government took power.

Because of our support of the failing Lon Nol government, the United States today has absolutely no influence with the new Cambodian Government. Indeed, Cambodia was conspicuously absent from the itinerary of President Carter's representatives sent to Southeast Asia to research the whereabouts of American POW's. This situation, of course, illustrates that we must be extremely careful in assisting shaky foreign regimes, both now and in the future.

But the most serious aspect of the Cambodian fiasco still remains. This most demoralizing facet concerns the treatment of the Cambodian population by the Khmer Rouge government since they took power. We hear almost daily of unimaginable atrocities committed by this government against its subjects. Many estimates, in fact, place as high as 1,000,000 the number of deaths connected with the brutal and savage acts of this government. These reports make the inhumane actions in Chile, Uganda, and the Soviet Union look pale by comparison.

With the refreshing emphasis on human rights being advanced by the Carter administration, I feel strongly that now is the time for the United States to become active diplomatically in trying to alleviate these merciless acts being committed by the Cambodian Government. Therefore, I am today calling on President Carter to act immediately and to explore any available means by which the United States can help to abate this terrible situation. I am also requesting that Chairman ZABLOCKI of the House International Relations Committee open a full-scale investigation of these atrocities and that the committee subsequently develop a plan by which the United States can aid in bringing world pressure to bear on the Khmer Rouge government.

Given our long overdue national commitment to the maintenance of human rights around the world, in all good conscience we cannot afford to stand by idly and watch as thousands more are slaughtered in violation of the most basic human right of all—the right to live.

MILK PRICES

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, at a time when the American consumer is being squeezed by increasingly higher prices, I am shocked that Agriculture Secretary Bob Bergland authorized an increase in milk price supports that could add a billion dollars a year to the costs of tax-

payers and consumers of dairy products. The administration's action increased by 9 percent, effective April 1, the price supports for manufacturing grade milk, which is used for butter, cheese, and nonfat dry milk. This action greatly exceeded the wishes of the National Milk Producers Federation which recommended only a 5-percent increase.

I deplore this exorbitant hike in milk supports which may cause retail milk prices to jump 6 to 8 cents per gallon. In addition, the price of butter may be increased by 10 cents a pound, and consumers may be faced with a 5 cents per pound increase in such products as cheese and nonfat dry milk.

The American taxpayer will face increased burdens in the cost of additional price supports while the American consumer has been forced to pay higher prices for milk products. The consumer takes the burden in two ways, higher taxes and higher prices. Since 1971, the average national retail price of milk has increased from approximately 57 to 83 cents per half gallon—a 46-percent increase.

In our concern over the well-being of our dairy industry, we must not forget the taxpayers and consumers who ultimately shoulder the burden in the form of higher prices.

THE CAREER EDUCATION ACT OF 1977

The SPEAKER. Under a previous order of the House, the gentleman from Iowa (Mr. BLOUIN) is recognized for 5 minutes.

Mr. BLOUIN. Mr. Speaker, on Wednesday of this week, the House Education and Labor Committee approved by unanimous vote H.R. 7, the Career Education Act of 1977.

This is legislation which Committee Chairman CARL PERKINS and I cosponsored and introduced earlier this year; it is almost identical to the Career Education Act of 1976 which I introduced last year.

The legislation is specifically designed, as its introduction states:

> To assist States and local educational agencies in making education as preparation for work; and as a means of relating work values to other life roles and choices (such as family life), a major goal of all who teach and all who learn.

The bill is designed to achieve that goal "by increasing the emphasis they place in elementary and secondary schools on career awareness, exploration, decisionmaking, and planning."

The bill provides planning and technical assistance and limited financial aid to State and local school districts which choose, voluntarily on their own, to develop career education programs. Federal financial assistance, totaling $25 million in the first year, $100 million in the second year, $75 million in the third year, $50 million in the fourth year, and $25 million in the fifth year, would be totally phased out after 5 years.

I believe this is a commonsense approach to a serious and obvious need in today's society.

Even with the progress that we have made over the past decade and a half in education, and notwithstanding the very real and very substantial success of our vocational education programs at the secondary and postsecondary level, I am convinced that we have a long way to go in providing young people with the type of education and with the educational options which they need to function as meaningful, productive, and reasonably contented members of adult society.

Perhaps now, more than ever before, in a highly technical, postindustrial society, far too many young people have been abandoned by the educational process in recent years. These are young people who were never given meaningful exposure to the world of work, who were not adequately apprised of the aptitudes, skills, talents, and training which they need to find meaningful, productive jobs. These are young people who are, literally, dumped into the adult world unaware of what they want to do and unaware of what, in fact, they are equipped to do. As a result, they become both frustrated and angry. In far too many cases, they end up as unemployment statistics—or worse yet, as crime statistics.

The National Advisory Council for Career Education, in a report issued in November of 1975, spotlighted the problem and the reasons for it. Too many American students, the advisory council said, leave the educational system "deficient in the basic academic skills required for acceptability in today's rapidly changing society:"

> Too many students fail to see meaningful relationships between what they are being asked to learn in school and what they will do when they leave the educational system. Too many persons leave our educational system unequipped with the vocational tools, the self-understanding and career decisionmaking skills, or the work attitudes that are essential for making a successful transition from school to work.

The council's study found that American elementary and secondary education today best meets the needs of the minority of students who will someday attend college. But it fails, the report said:

> To place equal emphasis on meeting the educational needs of that vast majority of students who will never be college graduates.

It concluded that—

> American education has not kept pace with the rapidity of change in the post-industrial occupational society.

Some people have had objections to the council's report. It is strong language and it probably ruffles some feathers. But if we are really honest with ourselves, we cannot dismiss the council's basic conclusions. Even a cursory examination of our society today reveals the obvious results of an educational process which does not fully meet the needs of society at large.

It is apparent to those who examine the employment problems of recent high school graduates that there is a wide gap between the qualifications for work which those young people have and the qualifications required by the jobs which are available.

There are an unusually high number of younger workers who are either overeducated—and consequently bored by their jobs, if they are lucky enough to find jobs, or an unusually high number of workers who are undereducated—and consequently frustrated by their jobs, or their inability to find jobs they are qualified to perform. These young people do not lack skills or talent, but in too many cases they have been trained in areas where there are already more than enough qualified workers, or areas in which their skills are quickly becoming obsolete.

Consequently, it is no surprise that some 3.4 million Americans between the ages of 16 and 24 who are unemployed—that figure represents one-half of the Nation's total unemployed. It represents an unemployment rate for young people of 14.7 percent, almost three times the national jobless rate for older workers.

As one high Government official noted recently, in commenting on those statistics:

> The cost in terms of street crime and drug addiction and welfare payments and the sheer under-utilization of a national resource, is incalculable.

It is a high price to pay, not only in terms of crime and drug addiction and welfare costs, but in terms of general social alienation, family problems, and political apathy as well.

The director of the career education project at Rhode Island College, Dr. Ronald Esposito, put his finger on at least part of the problem when he testified before our House Subcommittee on Vocational Education earlier this year. The young people he talks to, Mr. Esposito said:

> Rarely can list more than 100 different career titles or have any concrete knowledge of either the cognitive or affective requirements of their tentative job choices. This, to me, is frightening. With over 30,000 job titles to choose from, how can these young people make valid choices if they only have superficial knowledge of 100 of these titles?

Therein lies the problem and I am convinced that meaningful, comprehensive, integrated career education programs are the most effective way of addressing that problem.

Career education is not a substitute for vocational education and it is not designed to replace vocational education.

Gene Bottoms, the president of the American Vocational Association, recognized that fact in his testimony before our House committee on March 1.

A meaningful career education program, starting early in the elementary grades, can give students a more accurate picture of the workaday world. It can give them a better idea of the wide variety of occupations and careers available to them in our society and it can give them a better assessment of the skills, talents, and training they need to fill those jobs.

In the later secondary grades career education can give students actual on-the-job experience; it can help them make more deliberate and final decisions—career decisions which are not an exercise in futility or a shortcut to frustration and unemployment.

I envision career education as an integrated and comprehensive approach to education at the elementary and secondary levels, an approach which utilizes

traditional academic learning and more contemporary vocational education training. It must be an approach which fuses the formal classroom, the "shop," and the community at large in a common educational experience which prepares young people for the realities of the workaday world in which everyone must live.

I envision career education as an approach which relies heavily on the input of local community leaders, businessmen, labor, and parents, as well as educators, does not restrict students' freedom to make career decisions, but actually expands the meaningful career options which they are free to choose.

The legislation which the House Education and Labor Committee passed just this week—the Career Education Act of 1977—embodies that approach. It does not mandate career education programs; it merely provides Federal assistance to States and local school districts which choose to develop such programs, the financial assistance for such programs will be deliberately phased out over a 5-year period.

The bill requires local advisory panels and State advisory panels to insure meaningful input from the entire community. And, in amendments which I introduced on Tuesday, and which the committee accepted, it tries to insure that career education will not be only one more "add-on" program coexisting outside or alongside traditional classroom programs or a poor relation of existing vocational education programs.

I think that is critically important. Career education will not work unless it becomes an integrated part of the present elementary-secondary curriculum. It will not work unless we view the purpose and the goal of present elementary-secondary programs in terms of career awareness, career preparation, and career experience in addition to character development, basic academic discipline, and simple common knowledge, which have always been the purpose of education at any level.

Finally, career education will not work if teachers and administrators, local school boards, business, labor, and civic officials do not help make it work. Individuals at the local level, both within and without the educational system have a wealth of background, knowledge, and experience which can be very valuable in the planning process for career education programs at the local level. That knowledge and experience will be essential in the implementation of successful career education programs. Once we enact this legislation. I hope these individuals will accept the challenge and the responsibility to assume a leadership role at the State and local level. Members of Congress—even exschool teachers—are not the best people to be designing education programs, and Federal bureaucrats are the last people we want telling local communities how to prepare students for meaningful careers.

I believe the concept of career education is good; it addresses some very serious problems in our economy. But it will fail unless people at the local level accept its challenge.

If there are no objections, Mr. Speaker, I would like to include a section-by-section summary of H.R. 7 in the RECORD and commend it to my colleagues' attention. This is legislation which I believe deserves our close and prompt attention. I am hopeful that my distinguished colleagues in the House of Representatives, after studying the merits of H.R. 7, will join Chairman PERKINS and me in our support for this legislation.

Mr. Speaker, the section-by-section summary of H.R. 7, the Career Education Act of 1977, follows:

SUMMARY OF H.R. 7 AS REPORTED BY THE SUBCOMMITTEE ON ELEMENTARY, SECONDARY, AND VOCATIONAL EDUCATION

Section 1. The title of the Act is the Elementary and Secondary Career Education Act of 1977.

Section 2. This section contains the statement of purpose of the Act which is to assist States and local school districts in making education for work, and as a means of relating work values to other life roles, a major goal of the schools. The schools are also encouraged to promote equal opportunity by eliminating bias and stereotyping on the bases of sex, race, and physical handicap.

Section 3. This section authorizes the career education program for five fiscal years at the following levels: $25 million for the first year; $100 million for the second year; $75 million for the third year: $50 million for the fourth year; and $25 million for the fifth year. This section also requires that appropriations under the Act be provided in the year preceding that in which they are to be spent and makes funds provided under the career education demonstration program contained in the Education Amendments of 1974 available for postsecondary institutions when appropriations are provided to carry out this Act for elementary and secondary schools.

Section 4. This section distributes the appropriations under the Act among the States on the basis of each State's population with a minimum grant of $100,000 for each State. Three percent of the funds are set aside for Puerto Rico and the outlying areas.

Section 5. This section contains the requirements which States have to meet in order to receive funding under the Act for the first year. These requirements include provisions making the State educational agency the administering agency, requiring the State legislature and the Governor to be notified of the State's application, requiring that the programs assisted under this Act be coordinated by a person (designated as a State coordinator for career education) who has prior experience in the field of career education, requiring a maintenance of State and local effort for career education, requiring the employment of necessary staff including one professional trained in guidance and counseling and person(s) experienced in problems of discrimination and stereotyping in career education due to sex, race, and physical handicap, and requiring that 15% of the funds be used for guidance and counseling activities.

Section 6. This section requires each State desiring funds to submit a State plan to the Commissioner of Education during the first year in which they are receiving funds. This plan must set out the objectives the State will seek to achieve during a five-year period with all the resources available to it and describe how the funds available under this Act will be used to achieve those objectives. This plan must also set forth procedures the State will follow to assure equal access of all students, including boys, girls, and persons with physical handicaps, to career education.

Section 7. This section sets out the authorized uses of funds made available under this Act. These uses include employing necessary State staff, providing State level programs and making grants to local school districts for comprehensive programs of career education encompassing a wide range of activities. Private school children and their teachers must be involved in these activities on an equitable basis. Organizations representing women, minorities, and persons with physical handicaps are to be involved in collaborative arrangements for career education at both the State and local level.

Section 8. This section deals with the requirements concerning payments under the Act. These requirements include provisions limiting States to no more than 5% of the funds under the Act for administrative purposes and to no more than 10% of the funds for State level programs. The remainder of the funds must be distributed to local school districts. States are also required to match these administrative and program funds by increasing percentages over the five years of the State plan.

Section 9. This section designates the Office of Career Education as the administering agency within the U.S. Office of Education for the program provided for in the Act. This office is charged with asserting a national leadership role in career education as well as with administering the Act. The existing National Advisory Council on Career Education is given the same duties as regards the program under this Act as it has for the career education demonstration program authorized by the Education Amendments of 1974. However, the membership of the Council is broadened to include business and labor representatives and members of minority groups knowledgeable with respect to job discrimination, women knowledgeable with respect to sex discrimination, and persons knowledgeable with respect to discrimination due to physical handicap. The National Institute of Education is to continue its complimentary work in career education.

Section 10. This section deals with the reports which must be made under the Act. The States must submit to the Commissioner an annual report showing the uses of their Federal funds and evaluating the programs funded under the Act; and the Commissioner must send back to the States an analysis of this report and recommendations for improvement. The National Advisory Council must submit an annual report to Congress evaluating the effectiveness of the programs, and the Commissioner must submit a report to the Congress by September 30th of the fourth year of the program analyzing the programs assisted under the Act.

Section 11. This section defines the terms used in the Act, including "career education" and "work".

LET US NOT FORGET THE HEALTH NEEDS OF OUR SENIOR CITIZENS

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, today my friend and colleague, Congressman CLAUDE PEPPER, and I are reintroducing H.R. 453, the Koch-Pepper National Home Health Care Act of 1977. There are now 69 House cosponsors of this important legislation. This bill would extend supplemental medical insurance benefits to cover home health services. Home health care has been shown to be a cost-effective alternative to institutional care; in addition, a home health care program would allow our elderly citizens who require health care the choice of remaining in their own homes and communities if they so desire. I am

appending a list of the cosponsors of H.R. 453 to this statement.

In addition, we are reintroducing H.R. 452, the Koch-Pepper Improvement of Nursing Home Regulatory Procedures Act of 1977, which now has 66 cosponsors. This bill seeks to increase the accountability of nursing home administration and to provide for effective assessment of the progress of long-term care patients under both the medicare and medicaid programs.

Mr. Speaker, recently the Congress has been focusing on efforts to reform the administration of our health care programs under medicare and medicaid. This current assessment is important and long overdue. At the same time, the Congress must continue in its efforts to develop new approaches in improving the quality and accessibility of health care in the United States. The bills that we have reintroduced today are proposals to provide better and more effective health care for our senior citizens. Our goal is to tighten the controls on the Federal investment in the medicare and medicaid programs, and also to expand creatively and efficiently the administration of those health services.

The list of cosponsors follows:

LIST OF COSPONSORS OF H.R. 453, KOCH-PEPPER HOME HEALTH CARE ACT OF 1977

Hon. Glenn M. Anderson, California.
Hon. Herman Badillo, New York.
Hon. Max Baucus, Montana.
Hon. Edward Beard, Rhode Island.
Hon. Mario Biaggi, New York.
Hon. Jonathan B. Bingham, New York.
Hon. Michael T. Blouin, Iowa.
Hon. David E. Bonior, Michigan.
Hon. William M. Brodhead, Michigan.
Hon. Charles J. Carney, Ohio.
Hon. William Clay, Missouri.
Hon. Cardiss Collins, Illinois.
Hon. John Conyers, Jr., Michigan.
Hon. Ronald V. Dellums, California.
Hon. Charles C. Diggs, Michigan.
Hon. Thomas J. Downey, New York.
Hon. Robert F. Drinan, Massachusetts.
Hon. John J. Duncan, Tennessee.
Hon. Robert W. Edgar, Pennsylvania.
Hon. Don Edwards, California.
Hon. Joshua Eilberg, Pennsylvania.
Hon. Dante B. Fascell, Florida.
Hon. Hamilton Fish, New York.
Hon. James J. Florio, New Jersey.
Hon. William D. Ford, Michigan.
Hon. Benjamin A. Gilman, New York.
Hon. Tom Harkin, Iowa.
Hon. Michael Harrington, Massachusetts.
Hon. Augustus F. Hawkins, California.
Hon. Elizabeth Holtzman, New York.
Hon. James J. Howard, New Jersey.
Hon. William Hughes, New Jersey.
Hon. Henry Hyde, Illinois.
Hon. Martha Keys, Kansas.
Hon. Peter H. Kostmayer, Pennsylvania.
Hon. William Lehman, Florida.
Hon. Norman F. Lent, New York.
Hon. Clarence D. Long, Maryland.
Hon. Matthew F. McHugh, New York.
Hon. Helen S. Meyner, New Jersey.
Hon. Barbara A. Mikulski, Maryland.
Hon. Norman Y. Mineta, California.
Hon. Joe Moakley, Massachusetts.
Hon. Austin J. Murphy, Pennsylvania.
Hon. Stephen L. Neal, North Carolina.
Hon. Robert N. C. Nix, Pennsylvania.
Hon. Richard Nolan, Minnesota.
Hon. Edward J. Patten, New Jersey.
Hon. Nick Joe Rahall, West Virginia.
Hon. Charles B. Rangell, New York.
Hon. Frederick W. Richmond, New York.
Hon. Matthew J. Rinaldo, New Jersey.
Hon. Peter W. Rodino, New Jersey.
Hon. Fred B. Rooney, Pennsylvania.
Hon. Benjamin S. Rosenthal, New York.
Hon. Edward R. Roybal, California.
Hon. Marty Russo, Illinois.
Hon. Leo J. Ryan, California.
Hon. Fernand J. St Germain, Rhode Island.
Hon. James H. Scheuer, New York.
Hon. Louis Stokes, Ohio.
Hon. Richard A. Tonry, Louisiana.
Hon. Paul E. Tsongas, Massachusetts.
Hon. Morris K. Udall, Arizona.
Hon. Henry A. Waxman, California.
Hon. Theodore S. Weiss, New York.
Hon. Charles H. Wilson, California.
Hon. Gus Yatron, Pennsylvania.
Hon. C. W. Young, Florida.
Hon. Leo C. Zeferetti, New York.

LEGISLATION TO AMEND U.S. GRAIN STANDARDS ACT

(Mr. SEBELIUS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEBELIUS. Mr. Speaker, I have introduced a bill today, cosponsored by 17 of my colleagues in the House, "to amend the U.S. Grain Standards Act with respect to recordkeeping requirements and supervision fees, and to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service; and for other purposes."

This bill is identical to S. 1051, reported favorably by the Senate Committee on Agriculture, Nutrition, and Forestry on March 18, 1977. It is similar to a bill I introduced earlier in this session, H.R. 3369; however, the House Committee on Agriculture has not yet held hearings on this matter.

The short explanation which follows, taken from Senate Report No. 95-60, accompanying, S. 1051, provides a brief overview of the Senate bill:

The bill being reported by the Committee is designed to facilitate and improve the implementation of the amendments made in 1976 to the United States Grain Standards Act by Public Law 94-582. Under the bill—

(1) A committee would be established to advise the Administrator of the Federal Grain Inspection Service on the implementation of the 1976 Act. The advisory committee—which would be composed of twelve members, representing farmers, consumers, and all segments of the grain industry—would terminate at the end of eighteen months following the date of enactment of the bill.

(2) The requirement that grain merchandisers and elevator operators using grain inspection or weighing services under the United State Grain Standards Act maintain certain itemized types of records of their operations for a five-year period would be eliminated. Instead, they would be required to keep only such records and for such period of time as the Administrator of the Federal Grain Inspection Service prescribes for the purpose of administering and enforcing the Act.

(3) Effective October 1, 1977, the authority for the charging of fees for the Federal supervision of grain inspection and weighing under the United States Grain Standards Act would be repealed. This activity would be funded by appropriations.

(4) Several technical amendments would be made to the United States Grain Standards Act and the 1976 Act.

(5) Effective May 1, 1977, the subclassing of hard red winter wheat under the United States Grain Standards Act would be prohibited.

I am in complete agreement with the Senate committee with respect to items numbered 1, 2, and 3.

As to item numbered 4, the so-called technical amendments to the U.S. Grain Standards Act, as amended in 1976, I believe there is some question as to whether or not some of the technical amendments are not in fact amendments of substance which should be subject to some further examination by the House Committee on Agriculture. I am specifically concerned with some of the amendments of section 4 which relate to "official weighing" and "supervision and weighing."

I am also generally in favor of the language in the bill—section 6—relating to the subclassing of hard red winter wheat. I approve of the concept of replacing the dark hard vitreous—DHV—grading inspection process with a standard whereby purchases are based on protein content determined by laboratory analysis rather than the subjective color judgments of Federal Grain Inspection Service inspectors.

I also wish to call the attention of my colleagues in the House to the following information obtained from the U.S. Department of Agriculture which reflects that the Federal funding support—through appropriations—provided for in this bill is consistent with the relationship between fees and appropriation funding provided other commodity or products inspected by the Federal Government.

FUNDING FOR INSPECTION AND GRADING BY USDA OF COMMODITIES OTHER THAN GRAIN

[In millions of dollars]

Commodity	From user fees	From appropriations
Cotton	0.2	8.0
Tobacco	.8	5.0
Livestock	16.3	240.0
Fruits and vegetables	15.6	.6
Poultry	9.0	.03
Eggs	.2	5.5
Dairy	3.0	None

Source: Agricultural Marketing Service and Plant Health Inspection Service of the U.S. Department of Agriculture.

I urge my colleagues to support this bill, the principal provisions of which are needed to make some badly needed corrections to the Grain Standards Act of 1976—some provisions of which it now appears were improvidently included in that bill. In addition, 6 months of operation under the 1976 act by the Federal Grain Inspection Service and those who are regulated under that act dictate these changes.

BAKE AND TAKE DAY

(Mr. SEBELIUS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEBELIUS. Mr. Speaker, in January of this year, I introduced a resolution that would, by proclamation, make the fourth Saturday in March, National Bake and Take Day. I regret consideration of this resolution has not taken place and that this observance this coming

Saturday is not "official" by Presidential proclamation.

However, this Saturday, Bake and Take Day will be observed in various ways in at least 18 States. I would call to the attention of my colleagues the following information.

As a reminder of the importance of wheat foods in our lives, and to personally deliver fresh bakery products to the elderly, ill and shut-in, the Kansas Wheathearts, auxiliary of the Kansas Association of Wheat Growers have initiated a Bake and Take Day. Since its inception in 1971, the event has grown to national proportions. Some 18 States now observe this day by gubernatorial proclamation and many varied activities.

Over the centuries, wheat bread has become known to mankind as the "staff of life," because of man's dependence upon it. The reverence in which men held wheat and bread over the ages still lives in the Lord's Prayer and in the wafers of the Eucharist. In the Hebrew faith, the eating of unleavened matzoth during Passover also marks the significance of bread in religion.

So many foods today are made from or contain wheat that we take it for granted, an accepted and often unnoticed part of our daily meals. One bushel of wheat will provide about 70 loaves of whole wheat bread and more than 40 million loaves of bread are sold in the United States each day along with a myriad of wheat food products.

The United States is by far the world's leading exporter of wheat and flour, thereby supplying nutritious food to multitudes around the globe. Kansas is easily the leading producer of wheat and plays a major role in this humanitarian endeavor.

I realize many such events or programs have been "proclaimed" by this body in the past and that some of my colleagues feel such proclamations of no real significance. Let me say, national proclamation or not, this particular observation is most worthwhile.

The citizens involved with Bake and Take Day state it will work on a national scale because we have the agriculture abundance and because this type of program enables volunteers to truly demonstrate compassion through personal contact with no cost to the taxpayer and with little or no redtape. In Kansas, and in many other States, this program has rekindled the spirit of voluntary participation and Christian sharing with those who are less fortunate.

As many States in our Nation observe this program this Saturday I commend to the attention of my colleagues the following fact sheet on Bake and Take Day published by the Kansas Wheathearts:

FACT SHEET

Project.—To promote the Fourth Saturday of March as Bake and Take Day in Kansas and throughout the nation.

Purpose.—To show concern and thoughtfulness for others and promote wheat.

Bake.—Bread, cookies, cake, and pies.

How to participate.—As an individual or through a club, civic organization, church group, and 4–H Clubs.

Suggestions.—A short personal visit when you deliver your gift will mean much to the recipient.

If you would like to go to a nursing or convalescent home, perhaps a club or similar organization could take part, thereby providing for all of the residents of the home. A phone call would provide you with the number of residents and also let the home know that you are coming. Special arrangements can be made for diabetic cookies without sugar. The rest homes also discourage coconut, chocolate, and nuts.

For Meals-on-Wheels, contact the chairman and make arrangements for the gift to be delivered with the daily meal.

Don't forget the individuals who live at home and would appreciate a gift and a visit from you on Bake and Take Day.

WHY NOT

Is there someone near you?
Someone who's all alone?
Why don't you try the Wheatheart plan
And call them on the phone?

Just tell them you'll be over
And bring them bread or cake,
Then give to them a cheery smile
And you've done "Bake and Take."

The Wheatheart Bake and Take Day
Was planned so all who care
Could share their many blessings
With the less fortunate everywhere.

Why don't you join the Wheathearts?
Bake cookies, pies or bread.
Make friends or neighbors happy
And lots of sunshine spread.

God gives us the privilege
Of helping others along the way;
So why not join the Wheathearts
On their Bake and Take Day.

—Mrs. Frieda Worthington, *Burrton, Kans.*

If you participate in this observance, we would appreciate hearing from you, so that your group and state will be recognized as a participant.

If you desire further information, please write: Kansas Wheathearts, 900 East 23rd Street, Hutchinson, Kansas 67501.

MAJORITY WHIP JOHN BRADEMAS REPORTS ON RECORD OF 95TH CONGRESS

(Mr. WRIGHT asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. WRIGHT. Mr. Speaker, our colleague, and distinguished majority whip, John Brademas, today made an outstanding report on the record of the 95th Congress. Speaking to the National Democratic Club, John summarized all of our considerable achievements to date, and he projected our course for the immediate future. I commend his statement to all Members, and I insert it in the Record so that they may have a chance to read it in full:

Remarks of Congressman John Brademas of Indiana, House Majority Whip, Before the National Democratic Club, Washington, D.C., March 24, 1977

I am delighted to be with you here today. It's always a pleasure to speak to friends at the National Democratic Club. That is especially true this spring when the national capital is blooming with cherry blossoms, magnolias—and Democrats.

I don't need to tell you what a tremendous difference it makes to all of us in Congress to have a friend at the other end of Pennsylvania Avenue. The new working partnership—which is itself blooming—is a welcome relief from the past eight years of Republican negativism in the White House, when Congress carried on alone in the people's behalf.

This year beneficial new legislation is blooming too. Congress is off to one of its best starts in history. If we keep up this pace—and I believe we will—the 95th will establish itself as one of the great Congresses of history.

As you can hear, not all of us in Washington have learned to talk southern. Yet. But I am reading the book.

Let me, at the outset, say that I bring you greetings from Speaker Tip O'Neill on behalf of the entire House Democratic Leadership. We have already had some busy and productive weeks in Washington, and if our achievements in Congress have been urged along with a shamrock and a shillelagh, it has been no accident.

I want to talk with you for a time today about this new—blessedly Democratic—era in Washington, and what it will mean. For it is clear that we are going to produce some major legislation in a relatively short time.

Even before this new Congress was well under way, Speaker O'Neill announced four major legislative goals that he wanted accomplished by July. They are economic stimulus, ethics reform, reorganization authority for the President, and energy policy. We are well along on all of them, which shows what you can accomplish when the White House and Congress are controlled by the same political party—provided, of course, that it is the Democratic Party!

Let me bring you up to date on where we are with these four critical issues, beginning with our number one priority—a legislative package to stimulate the economy out of its present doldrums of high unemployment, continuing inflation and a low rate of economic growth.

ECONOMIC STIMULUS

As you know, regular, face-to-face conclusion between the leaders of the legislative and executive branches has been going on virtually since the results of the November election were known. The Democratic leaders of the House and Senate and key committee chairman met with President-elect Carter and his advisers in Plains in December to plan the economic stimulus package that we are now promptly and systematically enacting into law. The entire nation can be proud of our performance here, less than 80 days into the new Congress and 63 into the new Administration.

The components of our economic stimulus program are tax cuts and jobs. The tax bill, passed by the House and now before the Senate, could be on the President's desk in two weeks and new tables will reflect those changes in your paychecks on May 1.

THIRD BUDGET RESOLUTION

Another major element of the stimulus package, already adopted by both Houses in final form, is the Third Budget Resolution, which acts as an umbrella for the rest of the economic recovery program. The resolution permits an increase in federal spending and a reduction in revenues sufficient to accommodate $17.5 billion worth of stimulus in fiscal 1977. The remainder of the stimulus will be included in the budget resolutions for fiscal 1978, which Congress will consider later this year.

The job side of our economic stimulus package requires at least two authorizing bills.

The first of these—H.R. 11, public works jobs—is already through both houses and in conference. This bill, as the House passed it, would triple the authorization—from $2 to $6 billion—for job-creating local public works. I should tell you that even that sum is small beside the backlog of $24 billion worth of applications from state and local governments. The bill would finance such projects as municipal offices, schools, libraries, water and sewer lines, streets and sidewalks, police and fire stations and similar needed local public facilities. To qualify

for a grant, project sponsors must be ready to start construction within ninety days. H.R. 11 is another candidate for enactment within the next two weeks.

CETA

The other major jobs bill will be an expansion of the Comprehensive Employment and Training Act of 1973—CETA. President Carter wants to increase the number of public jobs from the present 310,000 to 715,000 by the end of 1978. He intends to expand programs that emphasize training and job skills, and ha has also promised specific legislative recommendations by April 1 on three programs for youth.

Next Tuesday, the House will be voting on a simple one-year extension of existing CETA programs. The legislation for new initiatives will come later.

APPROPRIATIONS

Appropriations measures are following quickly upon the heels of the authorizations. As you know, the House last week passed and sent to the Senate two major appropriations bills totaling more than $51 million—almost half of it in funding targeted specifically for economic stimulus. The stimulus includes funds for the special $50 payments to low-income persons who do not qualify for a tax rebate, funds for public works jobs, for training and manpower programs, and, finally, $200 million to help low and moderate income persons with the high home heating costs resulting from the harsh winter.

The tax cut is intended to pick up the economy by increasing consumer purchasing power and thereby boosting demand.

The job creation measures are intended to follow up the tax stimulus and give us the kind of solid, sustained growth that will generate consumer demand, increase capital investment and mean still more job creation in private industry.

All this legislative action has been aimed at achieving what President-elect Carter and the Congressional Leadership agreed in Plains last December would be our first priority—economic recovery.

Let me tell you now what we have been doing, simultaneously, toward accomplishing the additional three goals of Speaker O'Neill—ethics reform, reorganization and energy.

ETHICS REFORM

The House has already adopted a strong new financial ethics code as part of the House rules. It was an outstanding victory for Speaker O'Neill, who had committed himself firmly to major ethics reform, and for all of us in the Leadership and the Whip organization who worked so hard to get it adopted.

The new code will be melded with the code being adopted by the Senate and will be given statutory authority by July.

REORGANIZATION ACT

You will recall that during the campaign Jimmy Carter made reorganization and streamlining of the federal government a major issue. Legislation giving President Carter such authority was reported by the Government Operations Committee last week, and is scheduled to be on the House floor Tuesday. Speaker O'Neill is firmly committed to giving the President what he wants on this issue.

The bill, in my judgment, will provide President Carter the broad authority he has requested to reorganize the federal government. In fact, all Presidents since Herbert Hoover—except President Ford—have had reorganization authority at the start of their Administrations. President Roosevelt made extensive use of it during the New Deal and World War II. President Truman used such authority to get the agencies back to peacetime status. Four Cabinet departments owe their creation or a substantial enlargement of their powers to reorganizations: Defense; Labor; Health, Education and Welfare; and Housing and Urban Development.

However, after President Kennedy tried and failed to set up a Department of Urban Affairs and Housing in 1962, Congress required that future Cabinet departments be established only by legislation. After a dispute with President Nixon on the creation of a Drug Enforcement Administration, Congress allowed authority for the President to reorganize the executive branch to expire in 1973.

My own judgment is that we will have sent a bill in final form to President Carter by late April or early May.

ENERGY

The fourth item on Speaker O'Neill's agenda is energy.

Part of the President's energy recommendations have already been sent to Congress. His proposal for a Cabinet-level Department of Energy is now under consideration. James Schlesinger, who will be nominated as the first Secretary of the new Department, consulted with us on the shaping of the legislation and the nature of the new department. Under the Administration proposal, the department will consolidate some fifty energy-related agencies, including the Energy Research and Development Administration and the Federal Power Commission.

But this will be only the first step on overall energy legislation. The President has promised to send up recommendations for a comprehensive energy policy by April 20. That effort will require separate legislation.

Both the President and Dr. Schlesinger have stayed in close touch with Speaker O'Neill on this issue and the Speaker will appoint a special ad hoc Committee on Energy to facilitate the consideration of this crucial legislation.

Energy policy, as complex as it is vital, is the knottiest problem we will face this year. I am sure, though, that we will be enacting major energy legislation in the 95th Congress.

OTHER ACHIEVEMENTS

Even as Congress moves on these four major goals, we have also compiled a considerable list of achievements in other areas—many of them the direct result of having Democrats at both ends of Pennsylvania Avenue.

Congress and President Carter, working together, have enacted new laws:

Authorizing the President to deal with the natural gas shortage during the January cold spell;

Appropriating $200 million in urgent disaster assistance for victims of drought last summer and cold last winter; and

Rescinding $453 million for nuclear naval vessels, indicating that Congress does not favor giant nuclear carriers.

Congress has sent to the President a bill increasing small business assistance by $1.4 billion.

The House has ordered a full-scale inquiry on relationships between Members of the House, their families or associates and the government of South Korea.

Both houses have passed and sent to conference a bill extending interest rate ceilings on savings accounts and modernizing federal credit union powers.

Last Monday, the House passed a one-year extension of unemployment compensation under the Federal Supplemental Benefits Program.

Despite all these achievements, we cannot permit ourselves to become overconfident, as yesterday's vote on situs picketing shows. We cannot take anything for granted. Any lost vote should serve to remind us that we must redouble all our efforts. I am confident that we will rapidly regroup and push ahead with the broad legislative initiatives we have undertaken.

Let me turn now from domestic matters to interantional relations, also the scene of a recent major triumph.

PRESIDENT CARTER SETS FOREIGN POLICY GOALS

The House and Senate on successive days last week passed and sent to the President a bill permitting him to halt the importation of Rhodesian chrome. He has signed the bill and has reimposed our sanction against minority rule in Rhodesia. This goal is one that had twice eluded Congress during the Republican Administrations. This year we were able to act rapidly and to give the President a strong platform for his outstanding statement to the United Nations last Wednesday.

You remember that President Carter in his United Nations speech enunciated these goals for the foreign policy of the United States:

"We will aggressively seek to control the weaponry of war;

"We will promote a new system of international economic progress and cooperation; and

"We will be steadfast in our dedication to the dignity and well-being of people throughout the world."

Arms control, international economic advance and human rights—these are to be the three principal thrusts of American foreign policy during the Presidency of Jimmy Carter. They carry out the policy objectives of the Democratic Party, objectives that have been spelled out by the last two Democratic Congresses.

And I can assure you that President Carter and the Democratic Congress mean business when we talk about human rights. I was at the White House last Tuesday at the congressional leadership meeting, when he repeated his commitment—emphatically, I might add. He told us again, as he said at the United Nations, that he will continue to speak out on the question of human rights.

One of the most encouraging aspects of the Administration of President Carter is his willingness to consult with the leaders of Congress on foreign policy as well as with Members concerned with specific foreign policy issues. I hope that this practice will continue, and what I have seen so far gives me reason to believe that it will.

In January 45 Members of the House and Senate, of whom I was one, spent seven hours with the President-elect and his top foreign affairs advisers at the Castle building of the Smithsonian Institution here. We went, as it were, on a round-the-world tour of major issues in American foreign policy. The President listened, as I say, for seven hours.

Now, Presidents don't generally like to listen, and they certainly don't like to listen to Senators and Congressmen. The Smithsonian conference would have been wholly unthinkable under Nixon, Ford and Kissinger. For Dr. Kissinger simply did not believe that Congress had any legitimate role in the shaping of American foreign policy.

PRESIDENT CARTER AND CONGRESS ARE COOPERATING

It is not only I: the entire Congress is getting along well with the new President. He seems eager to listen and willing to work with Congress.

This is one of the big reasons for all the fresh enthusiasm and optimism I see for the years immediately ahead. For I believe that we shall see a direct turnaround from the past eight years of running confrontation between the executive and legislative branches. Where once we had conflict, now we have cooperation. Where Republican negativism once checked the advances of a Democratic Congress, now there is a wholesome partnership between two branches agreed on the common goal of serving the people.

There are three principal reasons for my hope and optimism.

First, we have a new President, a Democratic President, and I cannot overstate the difference that makes. During the past two Republican Administrations, Congress had to challenge more presidential vetoes than ever before in our history. That was because no Presidents, ever before, had vetoed so much substantive legislation affecting so many millions of Americans in so many different ways.

Jobs, economic recovery, tax cuts, health care, housing, energy, education, school lunches, child day care, manpower, social services, farm bills, the environment—you name it; they vetoed it.

The second reason for my optimism lies in the makeup of the new Congress itself. In the House of Representatives, in particular, we have a young, active, increasingly well educated group of new Members.

Some 156 Members—more than a third of the House—have served one term or less. And 242 Members—well over a majority—were first elected in 1970 or more recently.

They joined a cadre of seasoned, longer-term Members who are both knowledgeable on national issues and schooled in legislative skills. So what we have in the 95th Congress is a fortuitous balance of new blood and experience. It is a combination that, in my judgment, will serve the best interests of the American people.

The third reason for my attitude of hope is that we have energetic new leaders in both houses of Congress. Speaker O'Neill and Majority Leader Jim Wright of Texas are both men of outstanding ability and dedication as is my Chief Deputy Whip, Dan Rostenkowski of Illinois. I count it an honor to serve with them on a leadership team that has already proved effective and that is providing vigorous guidance for the House.

In the Senate, the new Majority Leader, Senator Robert Byrd of West Virginia, and the new Majority Whip, Senator Alan Cranston of California, are already winning praise and admiration for their outstanding leadership.

In addition to the changes in composition and makeup, the new Congress is generally more self-assured about what it is doing and where it is going. We are functioning once again as a branch of government co-equal with the executive and the judicial, as the framers of the Constitution intended. Over the past several years, we have engaged in a continuing process of reform, in which we have made Congress more open, more accountable and more responsive to the public. We have made it more democratic—with a small "d"—and because of that we have made it more Democratic with a big "D."

CONCLUSION

These, then, are the reasons that I look ahead with such enthusiasm. You and I know that our country has gone through the tragedies of Vietnam, Watergate and the domestic violence of the sixties. But those days are behind us now.

Our new President is a man of exceptional ability; he is a man of first-class intelligence. He has a strong set of values, values in keeping with the highest traditions of the American people, and he is seeking to translate those values into the workings of government as it affects the people. President Carter knows who he is. He knows what he believes. His convictions, rooted in his religious faith, are genuine. Anyone who has talked to him over a period of months now—and I have had that opportunity—feels in him a sense of assurance, without arrogance.

That combination of intelligence and strong values, in my judgment, gives Jimmy Carter the potential of being a great President.

The kind of Congress I have described has the potential, too, of being a great one.

So here we are, in the spring of 1977, with a Democrat in the White House and Democrats in charge on Capitol Hill.

The problems we face are many. The challenges are real.

But with this kind of President and this kind of Congress, I believe that the years ahead can be bright, not just for the Democratic party but for the American people, whom our party serves.

INTRODUCTION OF BILL ON DIRECT ELECTION OF THE PRESIDENT AND VICE PRESIDENT

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, in view of the recent experience we have had with close electoral counts in the Presidential race, I believe that the time has come for decisive action in order to eliminate the possibility of a winning Presidential candidate receiving a minority of the popular vote. I am now persuaded that the risk of an election going contrary to the popular vote is very real, and consequently we should move toward a direct election system, with a runoff if no candidate obtains 40 percent of the vote. Accordingly, I am today introducing a constitutional amendment to that effect.

Every close election in recent years has brought forth an outcry for a constitutional amendment to change the current system. The election of 1976 has been no exception. Jimmy Carter's relatively close electoral vote margin over former President Ford has again alerted us to the problems of our outdated system.

The results of the 1976 election presented the possibility that the former President could have gained an electoral victory while running behind his principal opponent in the popular vote. Had less than 8,000 of the voters of the States of Hawaii and Ohio voted for Ford instead of Carter, we would now have Ford in the White House—against the will of the majority of American voters. In addition, despite the ineffective third-party challenge of Eugene McCarthy, he too could have altered the results of the 1976 election. Had McCarthy been allowed on the New York State ballot, and had he drained away enough of Carter's votes to give the State to Ford, we would now have Ford as President.

In our present system, we vote for Presidential electors instead of the Presidential candidates themselves. Most of these electors, as opponents of electoral reform have pointed out, do vote for their party's candidate. One must consider the possibility, however, that some misguided elector, in the event of a close electoral count, may take it upon himself to cast a decisive electoral vote, regardless of his mandate to the contrary. As Senator DOLE pointed out in his recent testimony on this subject—

It just seems to me that the temptation is there for that elector in a very tight race to really negotiate quite a bunch * * *

In the most recent election, an elector who was pledged to Ford exercised his legal option, and voted for Reagan. If this were to happen on a wide enough scale to change the result, a serious crisis could confront the Government and the people of the United States.

The idea of entrusting the choice of the President to these electors, who are in most cases not known to the voters, and who may disregard the wishes of those who voted for them, is so deeply repugnant that it should no longer be tolerated as the basis of our electoral system.

An additional flaw in the present system is that the popular vote total of the losing candidate at the State level is totally disregarded in the State's electoral tabulation. In effect, millions of voters have thus cast meaningless votes, because the full voting power of that State, in terms of electoral votes, has been awarded to the opposing candidate. If a candidate receives one more popular vote than his opponent, he receives 100 percent of that State's electoral votes.

It is time for us to abolish this system, and to replace it with direct election, which is the only electoral system that can guarantee the election of the candidate winning the most votes. This would insure that the vote of every American is equal to all other votes that are cast.

Those of you who may be familiar with my past efforts in this area will notice that my suggestion is a significant departure from the proposal I put forth in 1968. At that time I felt it would be wise to maintain the State-by-State electoral vote, with a runoff in the event that no candidate received a majority of electoral votes. For two principal reasons, I refrained at that time from proposing direct popular election:

First. I felt the adoption of such an amendment by the Senate and its ratification by three-quarters of the States was most unlikely;

Second. I was concerned that the direct election system might permit a candidate with a large majority in one section of the country to prevail, even though that candidate ran second by relatively small margins in all other sections.

Point 2 is still a concern, but the risk does not seem very great, especially since candidate Jimmy Carter, although clearly identified as a candidate from the deep South, was successful also in some other areas. The experience of the 1976 election has satisfied me that the greater risk is that which I have already referred to; namely, the risk that the winner of the popular vote would not win the election.

As for my concern that a popular vote amendment will face hard sledding in the Senate and in the States, that concern remains. However, in spite of that, the House has an obligation to pass whatever amendment it considers to be wise. If this amendment again fails of adoption, we can consider what less drastic changes might be proposed that would eliminate the Electoral College, with its obvious faults, and would also eliminate the danger of a Presidential

election being thrown into the House of Representatives.

The proposal I am submitting is identical to a constitutional amendment offered by Mr. BAYH in the other House, Senate Joint Resolution 1. This bill abolishes the Electoral College and provides for the direct election of the President and the Vice President. If no canidate achieves 40 percent of the popular vote, a runoff election would be held between the two candidates who received the largest number of votes cast.

Once again we are in the postelection period where people are critical of the electoral process. I am especially encouraged that President Carter's administration has recently spoken out in favor of direct election. It is crucial that we remain alert to the undemocratic nature of our system. Before we forget about this problem for another 4 years, let us attend to this business now.

PROPOSED ADMIRALTY ISLAND NATIONAL PRESERVE

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, today I have introduced a bill to establish an Admiralty Island National Preserve in the State of Alaska. The people of Angoon, a Tlingit Indian village on Admiralty Island, have asked for help to preserve their ancient homeland through the establishment of a national preserve within the National Park System. I am pleased to respond to their request, in order to assure that the interests of Angoon are fully considered as the House takes up the disposition of Alaska's national interest lands this session. Admiralty, a 1-million acres, essentially untouched island in the Alexander-Archipelago of southeast Alaska, is one of the wilderness proposals in H.R. 39, the Alaska National Interest Lands Conservation Act of 1977. H.R. 39 addresses Admiralty Island for the first time and proposes to establish a wilderness area administered by the Forest Service. The measure I introduce today would provide another alternative for the committee to explore during our deliberations this year, in addition to a wilderness wildlife refuge alternative proposed by others, as we progress toward establishing national interest land dedications throughout the State of Alaska.

Admiralty Island and four other southeast Alaska areas are identified for wilderness area designation in H.R. 39—Yakutat Forelands, W. Chichagof-Yakobi Island, Stikine-LeConte, and Misty Fjords. Like Admiralty Island, all are exceptional areas. Admiralty Islands differs from them, however, in one very important respect: It is the historic and present home of the Indians of Angoon. For thousands of years these villagers have lived in harmony with nature on the island, taking what they need for survival from the surrounding waters and forests. Their dependence on these same lands and waters continues today, in the subsistence practices of the villagers.

Yet today, unlike the past, their island home is not secure. It is threatened by plans for large-scale, clearcut logging. Ironically, some of the logging is proposed by the urban Natives who reside in the predominantly non-Native communities of Juneau and Sitka. The Forest Service intends to log the rest of the island, with the timber and pulp destined primarily for shipment to Japan.

Given these threats, and frustrated at having their interests deliberately ignored by the Forest Service—and, most recently, the Interior Department—the people of Angoon and now asking us to review the Admiralty situation and take appropriate action.

It is sad to relate, Mr. Speaker, the history of official indifference shown toward the villagers of Angoon by the Forest Service. In 1968, after years of negotiations, the Forest Service signed a contract with U.S. Plywood Champion—now Champion Papers-International—for the largest single timber sale in U.S. history—8.75 billion board feet of timber over 50 years, with the first 15 years' production committed to Japan. Forested lands around Angoon were sold over the objections of the people of the village. Forests right down to the edge of Kootznahoo Inlet and Mitchell Bay near Angoon were destined for clearcutting on a tremendous scale, despite the fact that these same forests served as critical habitat for the fish and wildlife upon which the villagers then and still do depend.

Fortunately, Champion withdrew from the sale after years of a conservationists' lawsuit in the Federal courts. Angoon villagers, though not formally part of the lawsuit, supported the conservationists. No sooner was the Forest Service/Champion threat removed than a new dispute arose when the Department of the Interior in 1975 made withdrawals on Admiralty for land selections by the urban Native corporations of Juneau and Sitka. The withdrawals blanketed heavily forested land and bays surrounding Angoon's own selections. It has been contended that provisions of the act were intended to preclude selections on Admiralty by the two corporations, both of whom are separated from Admiralty Island by miles of open water and adjacent islands.

As a result of the withdrawals on the island, four lawsuits have been filed against the Department of Interior. The village of Angoon is challenging the location of withdrawals in subsistence areas near the village. The two urban corporations are also challenging the withdrawals, and are seeking withdrawals which allegedly would be even more damaging to Angoon's interests. And conservationists, represented by the Sierra Club, are again defending the island's incomparable natural values from noncompatible developments.

While protecting Admiralty Island and the interests of its native inhabitants, the bill, unlike H.R. 39, makes provision for the Juneau and Sitka urban native corporations, by requiring the Secretary of Interior to designate, for the benefit of those urban corporations, alternate lands of equal or greater value located elsewhere in southeast Alaska. However, I want to make it clear that it is not my intention, in introducing this bill, to interefere with any of these ongoing suits, or to influence in any way the orderly workings of the judicial process, or prejudice a decision of the court. In addition, I want to make it clear that we are not going to use this bill as a means of arbitrating controversies between Native regional or village corporations. However, now the people of Angoon have come to Congress with their proposal. They believe that unless they achieve permanent protection for the island, it will only be a matter of time before the clearcuts spread inexorably down to the boundaries of their land. They are convinced that it will not be sufficient to win their current lawsuit, because that will only mean a reprieve, and it would only be a matter of time before the Forest Service would return with new, separate timber sales designed to break their resistance to what they feel is the Service's intent to transform Admiralty into a tree farm for foreign timber corporations.

That is why they have come before us, Mr. Speaker, with their proposal for an Admiralty Island National Preserve. I am impressed. I think their is an imaginative approach, one basically consistent with H.R. 39, which proposes to designate Admiralty as a unit of the National Wilderness Preservation System. The villagers of Angoon currently would prefer the island to be a unit of the National Park System, and I can see some social and economic advantages in their suggestion not present in the Forest Service wilderness as proposed in H.R. 39. However, both approaches would achieve the same goal—the preservation in perpetuity of one of the most magnificent islands in the world. A third option which the committee intends to explore fully during our review of this spendid area is the possibility of Admiralty Island as a wilderness wildlife refuge in the National Wildlife Refuge System, as has been proposed by our distinguished colleagues, JOHN DINGELL and ROBERT LEGGETT.

In any event, we cannot fail to consider Admiralty's wildlife resources: It hosts the densest concentration of nesting American bald eagles in the Nation. Its shoreline is literally dotted with bald eagle nests. Its brown bear population is the largest in southeast Alaska and its habitat the finest in the Tongass National Forest. Numerous highly productive salmon streams drain the island, providing sustenance for the eagles, bears, numerous other fur-bearers and marine mammals, and the people of Angoon. Sitka Black-tailed deer roam the woods, and supply Angoon larders and those of sport hunters from around southeast Alaska. Kootznahoo Inlet hosts marine mammals, including upon occasion humpback whales.

Admiralty's recreational and scenic resources are also stunning. Its network of bays, inlets, salt-chucks, and fresh-water lakes, all readily accessible by boat and trail, make it unique in the Nation. Its scenery is such as to make the island the subject of numerous proposals for special national designation since the turn of the century.

Thus, Angoon's proposal is made in full recognition that Admiralty has the potential of being one of the finest wilderness park or wildlife refuge system units in the Nation and indeed in the world. At the same time, the villagers realize that such special designation would guarantee the highest possible degree of protection for their subsistence, archeological, cultural, and economic resources.

A survey conducted in February of 1976 showed that subsistence activities continue to play an important role in Angoon, both as a means of providing food and as a part of Angoon's cultural identity. Almost three-quarters of those interviewed—72 percent—said subsistence activities are an important reason for living in Angoon.

As an indication of their commitment to preserve the existing natural landscape surrounding their home, they propose to exchange their interests in their village-owned timber for volumes of timber of equal value located off Admiralty. Fee title to village lands would be retained.

Angoon's idea for trading out their timber interests is only one of the many fine ideas they have included in the bill I am introducing at their request today. Other provisions include tax incentives designed to provide the means for the villagers to retain the unique characteristics of their land without being penalized for nondevelopment, and ways to maximize the economic benefits to the village in conjunction with the preserve.

In summary, Mr. Speaker, this bill, if enacted, would realize our mutual goals of assuring that subsistence resources on public lands receive the best possible protection while at the same time permanently preserving outstanding natural values of national importance. I am confident that as part of our consideration of the national interest lands this session, we can resolve the longstanding controversy—as listed in the following chronology—over the fate of Admiralty Island, surely one of the most important and most threatened of all of Alaska's national treasures. Angoon's important contribution to our discussions and analysis of the Admiralty question is indeed welcome.

I include the following:

BRIEF HISTORY OF PUBLIC INVOLVEMENT ON ADMIRALTY ISLAND

1879-90—John Muir's, *Travels Through Alaska.*

1901—Teddy Roosevelt indorsed the "ABC" Islands (Admiralty, Baranof, and Chichigof) be placed in a brown bear refuge.

1909—Admiralty Island becomes Tongass National Forest.

1920-23—Speel River Pulpmill established and timber contract is on the Glass Peninsula on Admiralty Island. Bankrupt in three years.

1927—Crown Zellerback timber contract on West Admiralty—forfeited in 1 year.

1930—American Society of Mammalegists and New York Zoological Society propose Admiralty Island made an inviolate game sanctuary for brown bear.

1931—Stewart E. White proposed to the National Park Service that Admiralty Island be established as a national park.

1932—John Holsworth proposed to a special Congressional committee that Admiralty Island be established as a National Sanctuary.

1932—Sierra Club urged the National Park Service to investigate Admiralty Island for a national park.

1933—The United States Forest Service develops Admiralty Island for recreation use.

1940—United States Forest Service develops Admiralty Island recreation plan.

1955—Georgia—Pacific Sale made on Admiralty Island—forfeited.

1956—Frank Dufresene, long time director of the Alaska Game Commission, recommend that all of Admiralty Island be closed to logging and established as a national game management area.

1964—Stellar Society, later to become the Juneau Group of the Sierra Club recommends to the USFS for the 1964 Multiple Use Plan that Admiralty Island and Endicott River be wild areas.

1964—Ralph Young, Renowned guide, recommended Admiralty Island be established as a wilderness area.

1964—Multiple Use Guide for the Hongass National Forest commits over 98% of the commercial timber to intensive logging practices including Admiralty Island.

1960-69—USFS ignores public input and logging engineers plan the "multiple use" for Admiralty Island.

1969—U.S. Champion International is awarded the Juneau Unit Sale, which include Admiralty Island, after St. Regis forfeits.

1970—Territorial Sportsman Inc. propose the Wild Forests of Admiralty.

1970—Sierra Club vs. USFS to halt the Admiralty Island Timber Sale.

1974—Native land claims selections on Admiralty Island.

1975—US Champion International withdraws from contract with USFS.

1976-77—Kootznoowoo vs Kleppe the native village of Angoon located on Admiralty Island opposes the urban native selections on their island. Kootznoowoo favors Admiralty Island be designated a Wilderness area and feels the urban natives should file an EIS on their selections since it would effect their subsistence way of life.

1976-77—Goldbelt and Shee Atika vs Kleppe—these urban native corporations want to select on Admiralty Island and feel the lands they will receive elsewhere will be of less value.

1976-77—Sierra Club vs Kleppe—land other than on Admiralty Island could fill the need of the native corporations other than Kootznoowoo.

1977—Rep. Morris Udall introduces a d-2 Bill that establishes Admiralty Island, except the Kootznoowoo (Angoon Village) selection, into a Wilderness area.

1977—NPS attempts to get President Ford to establish Admiralty Island into a National Park through the antiquities Act.

INTRODUCING OF LOBBYING DISCLOSURE ACT OF 1977

(Mr. EDWARDS of California asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. EDWARDS of California. Mr. Speaker, today I am introducing the Lobbying Disclosure Act of 1977.

In the last Congress, both the House and the Senate passed lobbying disclosure bills as part of an effort to cleanse the legislative process. While the intent behind these bills was praiseworthy, I believe they ignored fundamental first amendment principles in their effort to bring about reform. The bill I am introducing today will provide for the disclosure of lobbying activities, but not at the expense of the individual's first amendment right to petition the government.

Although often portrayed as an evil influence on the legislative process, the lobbyist is exercising the constitutionally protected right to petition the Government for redress of grievances. The first amendment, which forbids abridgement of this right, confers broad immunity upon the activities of persons and organizations who attempt to present their points of view to elected officials. Our constitutional system puts great faith in the competition of competing ideas as the ultimate cleansing tool. As Chief Justice Charles Evans Hughes once wrote:

> The maintenance of the opportunity for free political discussions to the end that government may be responsive to the will of the people and that changes may be obtained by lawful means, an opportunity essential to the security of the Republic, is a fundamental principle of our Constitutional system. *Stromberg* v. *California*, 683 U.S. 259, 369 (1931).

The fact that the Constitution recognizes lobbying as a vital component of the democratic process does not mean that Congress is absolutely prevented from protecting itself against corrupting influences. However, because it seeks to regulate constitutionally protected activity, the efforts of Congress to protect itself must be as narrow as possible. I believe that these efforts must meet two principal tests:

First. The scope of activities covered must not be drawn so broadly that they sweep within the scope of regulation efforts to educate the general public, or segments of the public, on pending legislation. The Supreme Court has never sanctioned regulation of indirect efforts to influence the legislative or political process.

Second. Thresholds and deterrent effects must not be drawn so broadly that they sweep in organizations which are too small or whose lobbying activities are not widespread enough to affect significantly the legislative process, or on whom the burden of registration and reporting would fall so heavily that people would be frightened away from lobbying. Requirements which had this effect would directly abridge the right to petition the Government for redress of grievances.

None of the proposals presently before the Congress, including both the House-passed and Senate-passed versions from the last Congress, conform to these principles. My bill fulfills them both. It regulates only direct contacts with members, officers, and employees of the Congress. Activities aimed at informing the general public are not within the scope of the bill.

INDIRECT LOBBYING

American citizens must be allowed to indirectly exercise their first amendment rights without the threat of substantial criminal sanctions for failure to disclose and register their political literature with the Government.

The Supreme Court has never permitted Government regulation of such indirect efforts to influence the legisla-

tive or elective process. Decisions of the Court in both the Warren and Burger eras make it quite clear that the Court would strike down congressional efforts to regulate lobbying solicitations.

Lobbying solicitations typically include the efforts by organizations to require, encourage or solicit others to make direct contacts with Members of Congress or their staffs.

Restricting disclosure to direct lobbying activity provides Congress with information which the Supreme Court has said the Government may collect. Requiring disclosure of lobbying solicitations would cross over the boundary which now protects public advocacy of ideas from Government regulation.

DIRECT LOBBYING

The thresholds for triggering the act's obligations require substantial expenditures of money and time in directly contacting legislators or their staffs. Thus, only those groups who significantly affect the legislative process by direct lobbying activities will be forced to register and report.

The registration and reporting provisions are straightforward. Compliance will be relatively easy. Organizations which lobby must describe the organization, its size, and the amount of money it spends on lobbying communications. It must supply the names and salaries of its employees who lobby. It must identify any outside lobbyist hired by the organization and identify the issues on which that lobbyist works and the money which the lobbyist spends.

Under my bill, organizations would have to spend $2,500 a quarter on lobbying activities and either retain an outside lobbyist or have at least one salaried employee who spent 20 percent of his or her time lobbying.

It is only where groups are large enough to engage in lobbying on a sustained or widespread basis that the interest of Congress is sufficient to meet these criteria. My bill which requires the quarterly expenditure of $2,500 provides such a measure. Organizations of a size large enough to have one regularly salaried employee which then spends employee time or organization money in this amount are generally engaging in substantial lobbying and are well enough organized for the registration and reporting requirements not to be so bewildering, intimidating or costly that they would consider refraining from lobbying at all.

There is an additional reason why Congress should limit its regulation to lobbying activities of a certain size. In drafting the first amendment, the Founding Fathers sought to protect the ability of citizens to band together to petition their Government. Historically, public educational campaigns, which in part ask people to write to Congress, have been the key to the major social reform movements in this country, from the Revolutionary War to the Abolitionists and the civil rights movement to impeachment and Watergate. Such movements have begun small and gradually snowballed into forces for social change. The guarantees of the first amendment have given these citizens' movements breathing space in which to grow.

DISCLOSURE OF CONTRIBUTIONS

Believing that no individual should be forced to disclose his or her associational ties, my bill does not require organizations to disclose the identity of their members and contributors and the amount of their contributions.

Disclosure of members can have a significant deterrent effect on the free exercise of the right of association, especially for those individuals involved with unpopular causes.

The Supreme Court first recognized the right of associational privacy in *NAACP* v. *Alabama ex rel. Patterson*, 357 U.S. 449 (1968), where it reversed a conviction for contempt for failure to disclose the membership list of the NAACP. Speaking for a unanimous Court, Justice Harlan said the inviolability of privacy in group associations may in many circumstances be indispensable to the preservation of freedom of association.

The principle of the NAACP cases has been applied to other situations. In *Shelton* v. *Tucker*, 364 U.S. 479, (1960), the Court invalidated an Arkansas statute which compelled teachers to disclose all of their organizational affiliations for the past 5 years. And in *Talley* v. *California*, 362 U.S. 60 (1960), the Court ruled unconstitutional "on its face" a Los Angeles ordinance prohibiting the anonymous distribution of any handbill.

In Buckley against Valeo, the Supreme Court made it clear that it would not tolerate a contributor disclosure statute that affected the general funds of every conceivable general interest organization whose lobbying activities only make up a small percentage of its total effort. Said the Court:

> When it is an individual other than a candidate or a group other than a 'political committee' the relation of the information sought to the purposes of the Act may be too remote.

DISCLOSURE OF GIFTS

My bill also contains a greatly expanded provision on disclosure of gifts. The gifts provision is, indeed, at the heart of the bill. It is not vigorous advocacy of ideas which gives lobbying a bad name and which is perceived as corrupting. Rather, it is in the favors which lobbyists can lavish on elected officials which raise suspicions in the mind of the public. It is no accident that financial ethics code recently passed by Congress focused on outside money as the chief corrupting influence. My bill requires the disclosure of all gifts, direct or indirect, to a Member of Congress or his or her family. The obligation to disclose is placed upon both the Member of Congress and upon the lobbying organization.

Sixty days after the lobbying report information has been published in the Federal Register by the Comptroller General, each Congressperson and Senator must describe all gifts over $25 made to him or his or her staff or their immediate families.

ADMINISTRATION AND ENFORCEMENT

The Comptroller General is given power to enforce this act. He/she will attempt to rectify any possible violations first by advisory opinions and then by informal methods of conciliation. If this fails, the Comptroller General will then refer all possible violations to the Attorney General for appropriate action.

The Comptroller General also must publish periodic summaries of lobbying reports in the Federal Register.

SANCTIONS

A civil penalty of up to $5,000 may be imposed for a knowing and willful violation of the act as may a criminal penalty of up to $5,000 and 6 months.

For a knowing and willful falsification of data, a fine of up to $5,000 for each violation may be imposed.

The improper sale or use of report information will be subject up to a $10,000 fine.

CONCLUSION

If Congress insists on regulating lobbying as part of its effort to reform, then it must be sensitive to the prohibitions and limitations the Constitution places on its power to regulate the rights of individuals to freely associate and express political ideas. I believe:

First. Congress must not regulate indirect efforts to influence the legislative process.

Second. Congress must not regulate the lobbying activities of small, local organizations which have a light impact on the legislative process.

Third. Congress must not require the disclosure of contributors.

The regulation and disclosure of the above activities, I believe, would be found unconstitutional. On the other hand, my bill provides for the disclosure of lobbying activities within the contours of the Constitution.

Justice Brennan in *New York Times* v. *Sullivan*, 376 U.S. 259 (1969) wrote of a profound national commitment to the principle that "debate on public issues should be uninhibited, robust, and wide open." Believing in this principle, the Founding Fathers amended the Constitution to guarantee free speech and the right to petition the Government. In its quest for reform, Congress must not constrain these fundamental rights of the American democratic system.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. JEFFORDS) to revise and extend their remarks and include extraneous matter:)

Mr. DUNCAN of Tennessee, for 5 minutes, today.

Mr. KEMP, for 5 minutes, today.

Mr. TRIBLE, for 30 minutes, today.

Mr. WHALEN, for 5 minutes, today.

Mr. BOB WILSON, for 5 minutes, today.

Mr. FINDLEY, for 5 minutes, today.

Mr. TRIBLE, for 1 hour, on March 28.

Mr. CLEVELAND, for 5 minutes, today.
Mr. MILLER of Ohio, for 5 minutes, today.
(The following Members (at the request of Mr. PANETTA) to revise and extend their remarks and include extraneous material:)
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. BINGHAM, for 10 minutes, today.
Mr. PREYER, for 5 minutes, today.
Mr. DICKS, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. BLOUIN, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:
Mr. GONZALEZ, special order for 60 minutes, for Wednesday, March 30, 1977.
Mr. KOCH, to include extraneous material in his remarks during debate on H.R. 4991, National Science Foundation authorization.
Mr. RUDD, to include extraneous matter in his remarks on the bill H.R. 4991.
(The following Members (at the request of Mr. JEFFORDS) and to revise and extend his remarks:)
Mr. GILMAN.
Mr. CONABLE.
Mr. KEMP in seven instances.
Mr. RINALDO.
Mr. DERWINSKI in five instances.
Mr. WHITEHURST.
Mr. YOUNG of Florida in five instances.
Mr. MILLER of Ohio in five instances.
Mr. BOB WILSON in two instances.
Mr. FINDLEY in two instances.
Mr. PURSELL.
Mr. SYMMS.
Mr. ABDNOR in two instances.
Mr. FRENZEL in three instances.
Mr. MOORE.
Mr. DEL CLAWSON.
(The following Members (at the request of Mr. PANETTA), and to include extraneous material:)
Mr. BAUCUS in three instances.
Mr. MINETA.
Mr. BIAGGI in 10 instances.
Mr. GONZALEZ in three instances.
Mr. DANIELSON.
Mr. ANDERSON of California in three instances.
Mr. MCDONALD in three instances.
Mr. CARNEY in two instances.
Mr. ASHLEY.
Mr. HARKIN.
Mr. OTTINGER.
Ms. MIKULSKI.
Mr. TEAGUE in two instances.
Mr. RODINO.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 106. An act to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sutained use, and for other purposes; to the Committee on Agriculture.

ADJOURNMENT

Mr. PANETTA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 2 minutes p.m.), under its previous order, the House adjourned until Monday, March 28, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1092. A letter from the President, National Academy of Sciences, transmitting a report entitled "Perspectives on Technical Information for Environmental Protection"; to the Committee on Appropriations.

1093. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a list of contract award dates for the period March 15 to June 15, 1977, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

1094. A letter from the Acting Director, National Science Foundation, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1095. A letter from the Chairman, National Park Foundation, transmitting the Foundation's annual report for calendar year 1976, pursuant to section 10 of Public Law 90-209; to the Committee on Interior and Insular Affairs.

1096. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting a report covering the month of January 1977, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on House Administration. Senate Concurrent Resolution 8. Concurrent resolution authorizing the printing of the committee print entitled "The Accounting Establishment" as a Senate document (Rept. No. 95-113). Referred to the House Calendar.

Mr. YOUNG of Texas: Committee on Rules. House Resolution 420. Resolution to continue the work of the Joint Committee on Congressional Operations by establishing a select committee of the House to perform the functions of such joint committee for the House with amendment (Rept. No. 95-114). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 441. Resolution providing for the consideration of H.R. 5045. A bill to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes (Rept. No. 95-115). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BADILLO:

H.R. 5559. A bill to amend the Housing and Community Development Act of 1974 to strengthen certain provisions relating to low- and moderate-income families; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BAUCUS:

H.R. 5560. A bill to improve and strengthen disaster assistance programs for agricultural producers, and for other purposes; to the Committee on Agriculture.

By Mr. BINGHAM:

H.R. 5561. A bill to provide water to the five Central Arizona Indian Tribes for farming purposes, to settle their surface water rights, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BINGHAM (for himself, Mr. UDALL, Mr. PHILLIP BURTON, Mr. FISH, Mr. HECKLER, Mr. BYRON, Mr. CORRADA, Mr. DE LUGO, Mr. FLORIO, Mr. KASTENMEIER, Mr. KOSTMAYER, Mr. MCHUGH, Mr. MILLER of California, Mr. MURPHY of Illinois, Mr. RUNNELS, Mr. SEIBERLING, Mr. TSONGAS, Mr. VENTO, Mr. WEAVER, Mr. WON PAT, and Mr. YATES):

H.R. 5562. A bill to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BROYHILL (for himself, Mr. DAVIS, Mr. COUGHLIN, Mr. BAUCUS, Mr. CORNWELL, Mr. CLEVELAND, and Mr. ROE):

H.R. 5563. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for services furnished by physician extenders; jointly to the Committee on Ways and Means and Interstate and Foreign Commerce.

By Mr. CARTER:

H.R. 5564. A bill to provide incentives and otherwise to encourage the utilization of home dialysis and to encourage early kidney transplantation under the renal disease program authorized under section 226 of the Social Security Act; to the Committee on Ways and Means.

By Mr. CAVANAUGH:

H.R. 5565. A bill to amend section 154 of title 23 of the United States Code to increase the national maximum speed limit; to the Committee on Public Works and Transportation.

By Mr. JOHN L. BURTON:

H.R. 5566. A bill to amend chapter 83 of title 5, United States Code, to authorize the retirement of employees after 30 years of service; to the Committee on Post Office and Civil Service.

H.R. 5567. A bill to amend the Internal Revenue Code of 1954 to permit individuals to deduct losses, resulting from drought, to family gardens and to residential property of the taxpayer; to the Committee on Ways and Means.

By Mr. DEL CLAWSON (for himself, Mr. ABDNOR, Mr. BAFALIS, Mr. BAUCUS, Mr. BEVILL, Mr. BLANCHARD, Mr. BOWEN. Mr. BROOMFIELD, Mr. BROWN of Ohio, Mr. BROYHILL, Mr. CEDERBERG, Mr. DON H. CLAUSEN, Mr. COCHRAN of Mississippi, Mr. DERWINSKI, Mr. DEVINE, Mr. DICKINSON, Mr. EDWARDS of Alabama, Mr. ERLENBORN, Mr. ERTEL, Mr. FINDLEY, Mr. FRENZEL, Mr. FREY, Mr. GAYDOS, Mr. GILMAN, and Mr. GRADISON):

H.R. 5568. A bill to amend title 5 of the United States Code to establish a uniform procedure for congressional review of agency rules which may be contrary to law or inconsistent with congressional intent, to expand opportunities for public participation in agency rulemaking, and for other purposes; jointly, to the Committees on the Judiciary, and Rules.

By Mr. DEL CLAWSON (for himself, Mr. HAGEDORN, Mr. HANNAFORD, Mr. HOLLAND, Mrs. HOLT, Mr. ICHORD, Mr. JOHNSON of Colorado, Mr. KETCHUM, Mr. KINDNESS, Mr. LAGOMARSINO, Mr. LATTA, Mr. LOTT, Mr. LUJAN, Mr. MONTGOMERY, Mr. MURPHY of Pennsylvania, Mr. PEPPER, Mr. SAWYER, Mr. SEBELIUS, Mr. SISK, Mr. SNYDER, Mrs. SPELLMAN, Mr. STEED, Mr. STOCKMAN, Mr. TAYLOR, and Mr. TREEN):

H.R. 5569. A bill to amend title 5 of the United States Code to establish a uniform procedure for congressional review of agency rules which may be contrary to law or inconsistent with congressional intent, to expand opportunities for public participation in agency rulemaking, and for other purposes; jointly, to the Committees on the Judiciary, and Rules.

By Mr. DEL CLAWSON (for himself, Mr. VOLKMER, Mr. WALKER, Mr. WALSH, Mr. WHITEHURST, Mr. BOB WILSON, Mr. CHARLES WILSON of Texas, Mr. WON PAT, Mr. WYDLER, Mr. YOUNG of Florida, Mr. YOUNG of Missouri, Mr. COLLINS of Texas, and Mr. CLEVELAND):

H.R. 5570. A bill to amend title 5 of the United States Code to establish a uniform procedure for congressional review of agency rules which may be contrary to law or inconsistent with congressional intent, to expand opportunities for public participation in agency rulemaking, and for other purposes; jointly, to the Committees on the Judiciary, and Rules.

By Mrs. COLLINS of Illinois (for herself, Mr. RODINO, Mrs. SPELLMAN, Mr. FAUNTROY, Mr. MITCHELL of Maryland, Mr. FORD of Tennessee, Mr. SIMON, Mr. RICHMOND, Mr. FASCELL, Mr. WEISS, Mrs. KEYS, Mr. MOAKLEY, Mrs. CHISHOLM, Mr. STARK, Mr. MURPHY of New York, Mr. KOSTMAYER, Mr. SCHEUER, Mr. BONIOR, Mr. OTTINGER, Ms. MIKULSKI, Mr. HARRIS, and Mr. STEERS):

H.R. 5571. A bill to amend the Truth in Lending Act to require lenders to post current interest rates charged for various categories of loans to consumers; to the Committee on Banking, Finance and Urban Affairs.

By Mrs. COLLINS of Illinois (for herself, Mr. CHARLES H. WILSON of California, Mr. MITCHELL of Maryland, Mr. MAZZOLI, Mr. HYDE, Mr. DRINAN, Mr. HOWARD, Mr. SCHEUER, Mr. FORD of Tennessee, Mrs. CHISHOLM, Mr. ROYBAL, Mr. BRODHEAD, Mr. NIX, Mr. CLAY, Mr. BADILLO, Mr. HEFTEL, Mr. MOAKLEY, Mr. BUCHANAN, Mr. OTTINGER, Mr. ROSENTHAL, Mr. CONTE, Mr. LENT, Mr. HOLLENBECK, Mr. PICKLE, and Mr. RICHMOND):

H.R. 5572. A bill to make it an unfair practice for any retailer to increase the price of certain consumer commodities once he marks the price on any such consumer commodity, and to permit the Federal Trade Commission to order any such retailer to refund any amounts of money obtained by so increasing the price of such consumer commodity; to the Committee on Interstate and Foreign Commerce.

By Mr. COHEN:

H.R. 5573. A bill to amend the Age Discrimination in Employment Act of 1967 to prohibit compensated involuntary retirement, and for other purposes; to the Committee on Education and Labor.

By Mr. CONABLE (for himself, Mr. CORCORAN of Illinois, Mrs. FENWICK, Mr. LONG of Maryland, and Mr. O'BRIEN):

H.R. 5574. A bill to amend title XVIII of the Social Security Act to establish a program of long-term care services within the medicare program, to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of long-term care services, to provide a significant role for persons eligible for long-term care benefits in the administration of the program, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. CORRADA (for himself, Mr. HAWKINS, Mr. BADILLO, Mr. ROE, and Mr. STEERS):

H.R. 5575. A bill to amend title 5 of the United States Code to prohibit the consideration of certain matters in the determination of cost-of-living allowances for employees stationed outside the continental United States; to the Committee on Post Office and Civil Service.

By Mr. DRINAN:

H.R. 5576. A bill to amend section 541 of title 28 of the United States Code to change the term of office and the manner of appointment and removal of U.S. attorneys and to repeal section 546 (relating to temporary appointments to vacancies by courts) of such title; to the Committee on the Judiciary.

By Mr. DEVINE:

H.R. 5577. A bill to amend the Communications Act of 1934 to provide that the Federal Communications Commission, in granting or renewing any radio or television broadcast license, may not take into account whether the applicant involved owns a daily newspaper which is circulated in the area to be served by the radio or television broadcast station, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. EDWARDS of California:

H.R. 5578. A bill to regulate lobbying, and for other purposes; to the Committee on the Judiciary.

By Mr. EVANS of Indiana:

H.R. 5579. A bill to amend title II of the Social Security Act to increase to $5,000 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. HARKIN (for himself and Mr. NEAL):

H.R. 5580. A bill to establish a program for repairing and replacing unsafe highway bridges; jointly, to the Committees on Public Works and Transportation and Ways and Means.

By Mr. HARRINGTON:

H.R. 5581. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. JEFFORDS (for himself, Mr. STARK, Mrs. COLLINS of Illinois, Mr. ROSENTHAL, Mr. MCCLOSKEY, Mr. PEASE, Mr. DOWNEY, Mr. COUGHLIN, Mr. LENT, Mr. BROWN of California, Mr. MCHUGH, Mr. DRINAN, Mr. STANTON, Mr. RYAN, Mr. SOLARZ, Mr. BEILENSON, Mr. STOKES, Mr. PATTERSON of California, Mr. EDWARDS of California, Mr. MAGUIRE, Mr. NOLAN, and Mr. SAWYER):

H.R. 5582. A bill to require a refund value for certain beverage containers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTENMEIER (for himself, Mr. RAILSBACK, Mr. BEARD of Rhode Island, and Mr. VANDER JAGT):

H.R. 5583. A bill to require candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions; to the Committee on the Judiciary.

By Mr. KEMP:

H.R. 5584. A bill to transfer from Federal to State courts jurisdiction to enter decrees requiring the transportation of students or teachers to carry out a plan of racial desegregation; and for other purposes; to the Committee on the Judiciary.

H.R. 5585. A bill to prescribe the conditions with respect to affirmative action programs of Federal grantees and contractors in complying with nondiscrimination programs, to prescribe the necessary requirements for a finding of discrimination in certain actions brought on the basis of discrimination in employment and to prescribe reasonable limits on the collection of data relating to race, color, religion, sex, or national origin, and for other purposes; jointly, to the Committees on the Judiciary, and Education and Labor.

H.R. 5586. A bill to establish a commission to study the results of and other questions relating to the racial integration of public schools and the use of school busing to achieve it; jointly, to the Committees on the Judiciary, and Education and Labor.

H.R. 5587. A bill to amend title II of the Social Security Act to repeal the earnings limitation for all workers age 65 and over and for other purposes; jointly, to the Committees on Ways and Means, Interstate and Foreign Commerce, the Judiciary, and Rules.

By Mr. LEDERER (for himself, Mr. FLOOD, Mr. MOORHEAD of Pennsylvania, Mr. MURTHA, Mr. KOSTMAYER, Mr. EILBERG, Mr. AMMERMAN, Mr. COUGHLIN, Mr. ERTEL, Mr. ROONEY, Mr. DENT, and Mr. MURPHY of Pennsylvania):

H.R. 5588. A bill to amend the Internal Revenue Code of 1954 to encourage manufacturing-related investments in any State which has an unemployment rate which exceeds the national unemployment rate; to the Committee on Ways and Means.

By Mr. LONG of Louisiana:

H.R. 5589. A bill to amend the Occupational Safety and Health Act of 1970 to exempt employers of 10 or fewer regular employees, to require the issuance of warnings to employers of 25 or fewer regular employees for the first instance violations, and to bar the assessment of penalties where fewer than 10 violations are cited; to the Committee on Education and Labor.

By Mr. MCDONALD:

H.R. 5590. A bill to amend the Communications Act of 1934 in order to recognize and confirm the applicability of and to strengthen and further the objectives of the first amendment to radio and television broadcasting stations; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN (for himself, Mr. MANN, Mr. BOWEN, Mr. WAGGONNER, Mr. MCEWEN, Mr. SOLARZ, Mr. JACOBS, Mrs. KEYS, Mr. GLICKMAN, Mr. ANDREWS of North Carolina, Mr. HEFNER, Mr. BAFALIS, Mr. YOUNG of Florida, Mr. DUNCAN of Tennessee, Mr. LEVITAS, Mr. DAN DANIEL, Mr. NICHOLS, Mr. JONES of Tennessee, Mr. BEVILL, Mrs. LLOYD of Tennessee, Mr. RONCALIO, Mr. FINDLEY, Mr. VANDER JAGT, Mr. KEMP, and Mr. MOORE):

H.R. 5591. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN (for himself, Mr. LOTT, Mr. JONES of North Carolina, Mr. JENRETTE, Mr. GEPHARDT, Mr. WALSH, Mr. BLOUIN, Mr. QUILLEN, Mr. HALL, Mr. COHEN, Mr. LE FANTE, Mr. KINDNESS, Mr. EDWARDS of Oklahoma, Mr. TUCKER, Mr. DAVIS, Mr. CORCORAN of Illinois, Mr. VENTO, Mr. ERTEL, Mr. GRASSLEY, Mr. ROUSSELOT, Mr. THONE, Mr. FLYNT, Mr. GIAIMO, and Mr. HOLLAND):

H.R. 5592. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. MAZZOLI (for himself, Mr. EDWARDS of Oklahoma, Mr. HUGHES, Mr. FISHER, and Ms. OAKAR):

H.R. 5593. A bill to reform the method by which the pay for Members of Congress is determined; jointly, to the Committees on Post Office and Civil Service, and Rules.

By Mr. MEEDS:

H.R. 5594. A bill to suspend until the close of June 30, 1980, certain duties on calcined petroleum coke not commercially suitable for use as a fuel; to the Committee on Ways and Means.

By Mr. MURTHA:

H.R. 5595. A bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation; to the Committee on Education and Labor.

By Mr. NATCHER:

H.R. 5596. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. PICKLE (for himself and Mr. STEED):

H.R. 5597. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; to the Committee on Ways and Means.

By Mr. PICKLE (for himself and Mr. LUJAN):

H.R. 5598. A bill to amend part B of title XI of the Social Security Act to assure appropriate participation by optometrists in the peer review and related activities authorized under such part; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. PRESSLER:

H.R. 5599. A bill to provide a program for an "Operation Bootstrap" for the American Indian in order to create meaningful jobs and to improve conditions among Indians and non-Indians on reservations and in other communities, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Ways and Means.

By Mr. RINALDO:

H.R. 5600. A bill to amend the Securities Act of 1933 and the Securities and Exchange Act of 1934 to require the Securities and Exchange Commission to regulate the issuance and trading of municipal bonds and similar securities; to the Committee on Interstate and Foreign Commerce.

By Mr. RISENHOOVER:

H.R. 5601. A bill to allow Federal employment preference to certain employees of the Bureau of Indian Affairs, and to certain employees of the Indian Health Service, who are not entitled to the benefits of, or who have been adversely affected by the application of, certain Federal laws allowing employment preference to Indians, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. RODINO (for himself, Mrs. FENWICK, Mr. FLORIO, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. LE FANTE, Mrs. MEYNER, Mr. MINISH, Mr. PATTEN, Mr. RINALDO, Mr. ROE, and Mr. THOMPSON):

H.R. 5602. A bill to amend the Internal Revenue Code of 1954 to encourage manufacturing-related investments in any State which has an unemployment rate which exceeds the national unemployment rate; to the Committee on Ways and Means.

By Mr. RUNNELS:

H.R. 5603. A bill to allow Federal employment preference to certain employees of the Bureau of Indian Affairs, and to certain employees of the Indian Health Service, who are not entitled to the benefits of, or who have been adversely affected by the application of, certain Federal laws allowing employment preference to Indians, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. SEBELIUS (for himself, Mr. THONE, Mr. JEFFORDS, Mr. GRASSLEY, Mr. COLEMAN, Mr. MARLENEE, Mr. TRAXLER, Mr. ENGLISH, Mr. WINN, Mr. GLICKMAN, Mrs. KEYS, Mr. BEDELL, Mr. BROWN of Ohio, Mr. KINDNESS, Mr. ABDNOR, Mrs. SMITH of Nebraska, Mr. TONRY, Mr. SKUBITZ, and Mr. ANDREWS of North Dakota):

H.R. 5604. A bill to amend the U.S. Grain Standards Act with respect to recordkeeping requirements and supervision fees, and to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service, and for other purposes; to the Committee on Agriculture.

By Mr. SEIBERLING:

H.R. 5605. A bill to establish Admiralty Island National Preserve in the State of Alaska, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Merchant Marine and Fisheries.

By Mrs. SPELLMAN (for herself and Mr. GORE):

H.R. 5606. A bill to amend the Public Health Service Act to provide health care services for pregnant adolescents before and after childbirth; to the Committee on Interstate and Foreign Commerce.

By Mrs. SPELLMAN:

H.R. 5607. A bill to amend section 459 of the Social Security Act to provide for consent by the United States to certain additional garnishment proceedings; to the Committee on Ways and Means.

By Mr. THONE:

H.R. 5608. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. WHITE:

H.R. 5609. A bill to authorize the Secretary of the Army to acquire certain private and State-owned lands in Texas, in exchange for Government-owned lands; to the Committee on Armed Services.

H.R. 5610. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rending services in interstate and foreign commerce; to reaffirm the authority of the States to regulate certain terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WEAVER:

H.R. 5611 A bill to designate certain lands as wilderness; to the Committee on Interior and Insular Affairs.

By Mr. MAHON:

H.J. Res. 351. Joint resolution making further continuing appropriations for the fiscal year 1977, and for other purposes; to the Committee on Appropriations.

By Mr. BINGHAM:

H.J. Res. 352. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. JACOBS (for himself, Mrs. KEYS, Mr. BENJAMIN, Mr. COLLINS of Texas, Mr. DAN DANIEL, Mr. DERWINSKI, Mr. EDWARDS of Oklahoma, Mr. MANN, Mr. MARTIN, Mr. MATHIS, Mr. RONCALIO, Mr. SIMON, Mr. TRIBLE, and Mr. CHARLES WILSON of Texas):

H.J. Res. 353. Joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

By Mr. KEMP:

H.J. Res. 354. Joint resolution proposing an amendment to the Constitution of the United States relative to freedom from forced assignment to schools or jobs because of race, creed, or color; to the Committee on the Judiciary.

By Mrs. COLLINS of Illinois (for herself, Mr. CONTE, Mr. FAUNTROY, Mr. MITCHELL of Maryland, Mr. VAN DEERLIN, Mr. SIMON, Mr. ERLENBORN, Mr. FASCELL, Mr. WEISS, Mrs. CHISHOLM, Mr. DRINAN, Mr. SOLARZ, Mr. CLAY, Mr. OTTINGER, Mr. ROSENTHAL, Mrs. BURKE of California, and Mr. STEERS):

H. Con. Res. 176. Concurrent resolution expressing the sense of the Congress that the President should direct the U.S. Ambassador to the United Nations to take certain actions with respect to the protection of Namibia; to the Committee on International Relations.

By Mr. SARASIN:

H. Con. Res. 177. Concurrent resolution expressing the sense of Congress with respect to the Baltic States; to the Committee on International Relations.

By Mr. THOMPSON (for himself and Mr. DENT):

H. Res. 435. Resolution to extend the period during which payments from the contingent fund of the House may be made under House Resolution 11, 95th Congress; to the Committee on House Administration.

By Mr. DENT:

H. Res. 436. Resolution to provide for the administrative expenses incurred in concluding the business and activities of the former Select Committee on Professional Sports; to the Committee on House Administration.

By Mr. ADDABBO:

H. Res. 437. Resolution concerning committee hearings on the future telecommunications policy of the Nation; to the Committee on Interstate and Foreign Commerce.

By Mr. DUNCAN of Tennessee:

H. Res. 438. Resolution expressing the sense of the House that no ban on saccharin should take effect without prior congressional approval; to the Committee on Interstate and Foreign Commerce.

By Mr. GAYDOS:

H. Res. 439. Resolution directing the Committee on International Relations to conduct hearings to determine the nature and extent of any U.S. involvement in the hostilities in Northern Ireland; to the Committee on Rules.

By Mr. THONE (for himself, Mr. CLAY, Mr. CLEVELAND, Mr. DAVIS, Mr. EMERY, Mr. KASTENMEIER, Mr. LAGOMARSINO, Mr. MICHEL, Mr. SEBELIUS, Mr. SIKES, and Mr. WINN):

H. Res. 440. Resolution to insure that the quality and quantity of free broadcasting service not be impaired; to the Committee on Interstate and Foreign Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

60. By the SPEAKER: Memorial of the Legislature of the State of Mississippi, relative to requiring the labeling of beef as to origin; to the Committee on Agriculture.

61. Also, memorial of the House of Representatives of the State of Arizona, relative to aircraft illegally crossing the international border into Arizona; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. YOUNG of Missouri introduced a bill (H.R. 5612) for the relief of Irene Hoffman, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

66. The SPEAKER presented a petition of the Radio Television News Directors Association, Washington, D.C., relative to the first amendment rights of the broadcast news media, which was referred to the Committee on Interstate and Foreign Commerce.

SENATE—*Thursday, March 24, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 12 meridian, on the expiration of the recess, and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Lord our God, help us to turn from the feverish debate and tedious toil on codes of conduct, to hear Thy still small voice above the persistent sounds of the mob or the media. Guide us by the higher law of Mt. Sinai which cannot be improved or replaced. Make us worthy of the Nation's trust, not because of our rules, but because of what we are in soul and mind and character. Amid the draining duties of hassling hours renew our spiritual resources that we weary not nor fail in Thy purposes for the Nation.

In the Great Redeemer's name, we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 24, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Wednesday, March 23, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER VITIATING SCHEDULING OF H.R. 4876 FOR CONSIDERATION ON FRIDAY

Mr. ROBERT C. BYRD. Mr. President, at a meeting of the Committee on Appropriations earlier today the distinguished chairman of that committee, Mr. MCCLELLAN, asked that the order scheduling action by the Senate on H.R. 4876, the economic stimulus appropriations bill, for tomorrow be vitiated.

Senator YOUNG, the ranking member of the committee, was present, and Senator STEVENS, the Republican whip, was present also.

I have discussed this with the distinguished minority leader and I, therefore, ask unanimous consent, in deference to the chairman of the Appropriations Committee and the ranking member—and it was unanimous around the entire committee—that the order scheduling H.R. 4876 for tomorrow be vitiated.

Mr. BAKER. Mr. President, the majority leader is correct, there is no objection on our side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield back my time.

NEED FOR A DEMONSTRATION CENTRIFUGE ENRICHMENT PLANT

Mr. BAKER. Mr. President, one of the greatest problems facing our country is what has come to be known as the great energy crisis. The oil embargo of 1973 and the severe winter of 1977 have combined to show how vulnerable our economy, our health, and even our national security can be without an adequate supply of energy.

With that in mind, we should remember that while natural gas curtailments were bringing industry to its knees last winter, nuclear power plants went beyond all expectations to help meet the highest peak-load demand for electricity in U.S. history. As the energy needs of the Nation continue to expand, the need to increase its capacity to produce enriched uranium will become increasingly critical.

Most of us here know that natural uranium must be enriched before it can be used as fuel for light water reactors. Almost 9 percent of the electrical generating capacity of the United States is now supplied by 63 light water reactors. The problem is that the capacity of our three enrichment facilities is fully committed to fuel reactors which are operating or under construction. Construction decisions are becoming urgent because it is estimated that it will take 6 to 9 years to bring new enrichment plants on line.

The adequacy of enrichment capacity within the United States has serious implications for our efforts to control the proliferation of nuclear weapons. In the past, the United States has been an assured supplier of enriched uranium to other nations. This policy has served as a safety valve on weapons proliferation, because it eliminated the need for other countries to build their own enrichment facilities to supply their power reactors. Unfortunately, possession of an enrichment facility provides a country with a potential to make nuclear weapons. Furthermore, if countries question the dependability of the United States as a supplier of enriched uranium, they may be forced to consider the plutonium recycling option.

Mr. President, my colleagues may have noted the release, Monday, of a Ford Foundation study entitled "Nuclear Power Issues and Choices." I disagree with many of the conclusions reached in this report and will comment on specific points in more detail at a later time. However, I do concur with the recommendation of the report that the United States must expand its uranium enrichment capacity. According to the report, this will offer the world an alternative to a plutonium economy.

The present enrichment capacity of the United States consists of three gaseous diffusion plants, which are located at Oak Ridge, Tenn., Portsmouth, Ohio, and Paducah, Ky. They are based on technology that was developed during World War II, they are among the world's largest industrial facilities, and they are voracious consumers of electricity. A limited attempt to fill the enrichment gap has been made in the proposed add-on to the Portsmouth, Ohio, gaseous diffusion facility. It is clear, however, that a

more substantial expansion program is necessary if we are to satisfy in 1984 foreign and domestic enriched uranium commitments.

Fortunately a new enrichment technology, based on the gas centrifuge has been under development since the 1960's. Gas centrifuge technology offers the possibility of lower enrichment costs and the advantage of using only 15 to 25 percent of the electricity that is required by the older gaseous diffusion plant. A centrifuge enrichment plant is based upon modules and is readily adapted to expansions in capacity.

Although the gas centrifuge technology is well developed, no large commercial plants have been constructed at this time. It is my understanding that ERDA will be funding the construction of the centrifuge plant demonstration facility in Oak Ridge, Tenn., this year. Building this plant will demonstrate the technology, procedures, and methods that are intended to be used in subsequent large-scale production-size centrifuge plants.

Mr. President, I urge my colleagues to support fully this project, because it will enhance our ability to meet the future energy needs of the Nation, and is consistent with our policy of controlling the proliferation of nuclear weapons.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no other requirement for nor request for time under the standing order, and I yield back the remainder of my time.

AUTHORITY FOR CERTAIN MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may insert statements into the RECORD today, and may introduce resolutions, bills, petitions, and memorials as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider at this time only the nominations on page 2 of the Executive Calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, reserving the right to object, what is on page 2?

Mr. ROBERT C. BYRD. May I say to the Senator, the majority leader is protecting the distinguished senior Senator from Nebraska, and he asked that only the nominations on page 2 be considered, because he understood the distinguished Senator wanted to say something about that.

Mr. CURTIS. I do.

DEPARTMENT OF AGRICULTURE

The ACTING PRESIDENT pro tempore. The Senate will go into executive session to consider the first nomination on page 2, as requested by the majority leader. The nomination will be stated.

The second assistant legislative clerk read the nomination of Carol Tucker Foreman, of the District of Columbia, to be an Assistant Secretary of Agriculture.

The ACTING PRESIDENT pro tempore. The Chair recognizes the distinguished Senator from Nebraska (Mr. CURTIS).

Mr. CURTIS. Mr. President, in opposing the confirmation of Mrs. Carol Foreman as Assistant Secretary of Agriculture, I wish to make it clear that I find no fault with Mrs. Foreman as a person of good character and high intelligence.

I do feel that her appointment is a departure from the traditional policy of maintaining the high-level management of the Department of Agriculture in the hands of individuals directly involved in agriculture, agricultural research, or agricultural education and whose civilian pursuits were primarily agriculture-oriented.

I will detail some of the reasons for my opposition to her nomination from the hearings on her confirmation and material which she presented as a result of requests in those hearings.

QUALIFICATIONS

When questioned in the hearings of the Agriculture and Forestry Committee, Mrs. Foreman said that the following functions of the Agriculture Department would come under her direct authority: all of the Food and Nutrition Service; the Meat and Poultry Inspection Division; the Animal and Plant Health Inspection Service; and the standardization and grading branches of the Agriculture Marketing Service. To determine her qualifications in these areas, Mrs. Foreman was asked about her experience, background, and education. She acknowledged that she had no background in any of these areas. I excerpt from the hearings record:

Senator CURTIS. Have you had any training as a nutritionist?

Mrs. FOREMAN. No, sir.

Senator CURTIS. And have you had any training or experience in inspection or grading?

Mrs. FOREMAN. No, sir.

Senator CURTIS. What has been your educational experience throughout your adult years?

Mrs. FOREMAN. I have been primarily involved in government work as an employee of the government, and outside of the government been involved in analyses of government programs.

Senator CURTIS. Have you at any time during your adult life lived on a farm, or been connected in any way with a farm?

Mrs. FOREMAN. No, sir.

Senator CURTIS. In your work, did you have any agriculture-related training, above high school?

Mrs. FOREMAN. No, all of my training in college was directed towards American Government, which I then taught at the college level.

Mrs. Foreman has had a most active role in recent years as executive director of the Consumer Federation of America. That organization, along with the Paul Douglas Consumer Research Center, operates with a budget of about $300,000. The Consumer Federation of America has a 40-member board of directors and officers, according to Mrs. Foreman. Following is a list of directors and officers, which was provided by Mrs. Foreman.

Mr. President, I ask unanimous consent to print in the RECORD a list of directors and officers, which was provided by Mrs. Foreman.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

OFFICERS AND DIRECTORS

President—Lee Richardson, Louisiana Consumers League, 814 Kenilworth Parkway, Baton Rouge, La. 70806.

Immediate Past President (ex-officio)—George Myers, Director of Public Relations, Credit Union National Association, 1730 Rhode Island Ave., N.W. Suite 810, Washington, D.C.

Secretary-Treasurer—Kenneth S. Kovack, Legislative Representative, United Steelworkers of America, 815–16th Street, N.W., Suite 706, Washington, D.C. 20006.

Vice Presidents—Warren Braren, Associate Director, Consumers Union, 256 Washington Street, Mount Vernon, N.Y. 10550; Stephen Brobeck, President, Cleveland Consumer Action, 2697 Euclid Hts. Blvd., Cleveland Hts., Ohio 44106; Jacob Clayman, Sec.-Treas., Industrial Union Dept., AFL-CIO, 815 16th Street, N.W., Room 301, Washington, D.C. 20006; Ellen Haas, Legislative Chairman, Maryland Citizens Consumer Council, 5900 Rossmore Drive, Bethesda, Maryland 20034; William Matson, Chairman, Pennsylvania League for Consumer Protection, 2929 North Front Street, Harrisburg, Pennsylvania 17101; Arnold Mayer, Legislative Rep., Amalgamated Meatcutters & Butcher Workmen, 100 Indiana Ave., N.W., Room 410, Washington, D.C. 20001; Glenn Nishimura, Director, Arkansas Consumer Research, 1919 W. 7th Street, Little Rock, Arkansas 72202; Alex Radin, General Manager, American Public Power Assoc., 2600 Virginia Ave., N.W., Suite 212, Washington, D.C. 20037.

Directors—Roy Alper, Executive Director, California Citizen Action Group, 2315 Westwood Blvd., W. Los Angeles, California 90064; James Boyle, Executive Director, Texas Consumer Association, 808 San Antonio, Rm. 200, Austin, Texas 78701; Ann Brown, Chairman, Consumers Affairs Committee, 3005 Audubon Terrace, N.W., Washington, D.C. 20008; Jo Ann Clayton, Executive Director, San Francisco Consumer Action, 26 Seventh Street, San Francisco, Calif., 94103; Hildred J. Drew, Coordinator, Consumers Affairs Department, United Auto Workers, 8000 E. Jefferson Ave., Detroit, Mich. 48214; Evelyn Dubrow, Legislative Director, Int. Ladies Garment Workers Union, 1710 Broadway, New York, N.Y. 10019; Lois Felder, Co-Director, Community Relations Dept., Retail Clerks Int. Union, 1775 K St. N.W., Washington, D.C. 20006; James W. Green, Associate Dir. for Legis., National Education Association, 1201 16th St., N.W., Washington, D.C. 20036; Milton D. Hakel, Director, Int'l. and Intergroup Relations, National Farmers Union, 1012 14th Street, N.W., Washington, D.C. 20005; William Hutton, Exec. Dir. National Council of Senior Citizens, 1511 K Street, N.W., Suite 202, Washington, D.C. 20005; Peter Jacobson, Alliance for Consumer Protection, 310 Plaza Bldg., 535 Fifth Ave., Pittsburgh, Pa. 15219; Robert J. Kalaski, Assoc. Ed. *The Machinist*, International Assoc. of Machinists, 1300 Conn. Ave., N.W., Washington, D.C. 20036; Jonathan Lindley, Executive Asst., Government Affairs Division, Credit Union National Assoc., 1730 Rhode Island Ave., N.W., Washington, D.C. 20036; Dan McCurry, Chicago Consumer Coalition, Loop College, 64 E. Lake St., Chicago, Illinois 60601; Helen E. Nelson, Vice President, Consumers Union, University of Wisconsin Extension, 929 N. 6th Street, Milwaukee, Wisc. 53203; Sarah Newman, Vice President, National Consumers League, 1411 Hopkins St., N.W., Washington, D.C. 20036; Robert Par-

tridge, Exec. Vice Pres., National Rural Elec. Cooperative Assoc., 2000 Florida Ave., N.W., Washington, D.C. 20009; Lola Redford, Director, Consumer Action Now, 49 E. 53rd Street, New York, N.Y. 10022; Alfreda J. Riley, Director, Consumer Research Advisory Council, Inc., 1991 Edison, Detroit, Michigan 48206; James Royal, President, Consumer Ed. & Protection Assoc., 3121 Norris Street, Phila., Pa. 19121; Leroy Schecher, Manager, Grand Electric Co-op, Inc., Lock Drawer 500, Bison, S.D. 57820; Elizabeth Schimling, Sec.-Treas., Washington Committee on Consumer Interests, 2700 First Ave., Seattle, Washington 98121; Mark Silbergeld, Attorney, Consumers Union Washington Office, 1714 Mass. Ave., N.W., Washington, D.C. 20036; Herbert Simmons, Acting Exec. Dir., National Consumer Information Center, 8209 Cagle Road, Oxon Hill, Md. 20022; Shelby Southard, Legis. Dir., Cooperative League of USA, 828 L Street N.W., Washington, D.C. 20036; Sharon Stark, Editor, *Everybody's Money*, Box 431, Madison, Wisconsin 53701; Ronnie Straw, Dir. of Research, Communications Workers of America, 1925 K St., N.W., Washington, D.C. 20006; Charles F. Wheatley, Jr., Gen. Counsel, American Public Gas Assn., 2600 Virginia Ave., N.W., Suite 1115, Wash., D.C. 20037; Betsy Wood, Home Economist, Consumers Cooperative of Berkeley, Inc., 4805 Central Ave., Richmond, Calif. 94804; and Stanley Yarkin, Director, Greenbelt Consumer Services, Inc., 2944 John Marshall Dr., Arlington, Va. 22207.

Mr. CURTIS. Mr. President, Mrs. Foreman testified that the Consumers Union was the biggest contributor to the $300,000 budget of the Consumer Federation of America. She said the next largest contributor at $7,500 was the Industrial Union Department of the AFL–CIO, and that the other largest contributors consisted of three or four labor unions including the AFL–CIO at $5,000. Other large contributors she stated were Bristol Myers at $5,000 and the Rural Electric Cooperation Association and American Public Power Association at about $4,500 each. Mrs. Foreman said that 16 national labor organizations contributed to the CFA, with amounts ranging from $100 to the largest $7,500. She also stated that 5 or 6 local labor organizations and 15 or 16 State labor organizations contributed $50 to $100.

In the membership list of directors and officers of the CFA, and in the list of contributors to the organization, there is a preponderance of organized labor. Yet, from the information provided we can find no representation by farmers or agriculture organizations.

Mr. President, organized labor has one department in this Government, dominated from attic down to the basement. Now they are moving into another one.

I point this out, because in the past there have been several occasions when actions by organized labor have been contrary to the interests of agriculture. Furthermore, the CFA ratings of recent years have corresponded closely to organized labor ratings of Members of Congress. It is interesting to note that in CFA's ratings the substantial number of Members of Congress rated low are from agriculture States, while a substantial number of those rated high are from nonagriculture States. Mrs. Foreman and the CFA have made considerable overtures about the relationships of farmers with other consumers, but the positions of the CFA and some of its activities lead me to question this attitude.

The implications from the CFA's October 1976 ratings of Members of Congress are that most Members of Congress from agiculture States are anticonsumer while most nonagriculture State Members are for the most part proconsumer. Thus, by its very ratings the CFA appears to be pitting agriculture against consumer, and urban America against rural America.

And they are not satisfied to move into a department pertaining to that, but this is the department created and existing for the benefit of agriculture. That may not have been the intent of the organization, but it certainly is implied in its ratings. Where distinctions in the CFA ratings cannot be drawn along party lines, they can be drawn along geographical lines, with agricultural representation labeled as anticonsumer. The reverse implication would be that consumer interests are antiagriculture. I do not subscribe to either of these views, but point this out because some of the activities and programs of the CFA with which Mrs. Foreman has been associated, do, in fact, raise an issue of conflicting interests between agriculture and consumers.

Other questions have arisen with regard to Mrs. Foreman's views which may affect her performance in the interest of agriculture. These came from her statements in the confirmation hearings and from her past activities and associations.

BOYCOTTS OF FOOD ITEMS

The following excerpts are taken from the hearings:

Senator CURTIS. Did the Consumer Federation ever advocate a boycott of any food items?

Mrs. FOREMAN. In 1975 the Federation, by vote of its Board of Directors—and no policy positions were taken except by vote of the Board of Directors—urged a boycott of sugar products until the prices fell.

Senator CURTIS. What year was that?

Mrs. FOREMAN. 1975.

Senator CURTIS. What other action did you recommend in reference to sugar?

Mrs. FOREMAN. That was it.

Senator CURTIS. Did you recommend a boycott in reference to any other food items?

Mrs. FOREMAN. No.

Senator CURTIS. Have any of your directors advocated or taken part in boycotts of food items?

Mrs. FOREMAN. Not since there have been directors of the organization. The Consumers Federation by vote of its Board of Directors specifically chose not to participate in the 1973 meat boycott.

Senator CURTIS. Did any of your contributors participate in the meat boycott?

Mrs. FOREMAN. None of those in 1973, to my knowledge, Senator. That was prior to my association with the organization.

Mrs. Foreman testified that neither she nor her organization or any of its officers participated in or promoted any boycotts other than a sugar boycott. However, the February 1974 issue of the CFA's News report on approval by the organization of a 1964 platform and policy statement that included boycotts:

CFA urges consumers to use their purchasing power to affect prices in the marketplace, and, specifically, to choose less expensive alternatives of equal quality when available. CFA urges its members to use occasions, such meat boycotts, to educate consumers about how to develop desirable food eating habits in terms of nutrition, available food supplies and economic considerations.

For the record I point out that in the December 1, 1974, issue of CFA News, Mrs. Foreman's organization did declare a boycott on sugar. I would also like to point out that in the September 1975 CFA News in an article on the 1975 wheat sale to Russia Mrs. Foreman said:

The government should have taken advantage of this year's bumper wheat crop to create a domestic reserve as a hedge against a possible bad harvest and higher prices in the future.

Mr. President, wheat prices are critically low, and we are almost facing a disaster. But here someone is recommended for a high place in the Department of Agriculture who is opposed to high prices for wheat, though everyone knows that the price of wheat has very little, if anything, to do with the price of bread.

FOOD STAMPS

The issue of food stamp abuse and fraud has been quite controversial in recent years. I offered several amendments in 1976 designed to eliminate fraud and abuse, and to restrict the food stamp program only to those persons who are truly needy. Although Congress has been reluctant to make changes in the food stamp program, more and more attention is being focused on the abuses of this program. Where we have a single program that costs nearly $6 billion per year in the budget of the Agriculture Department, I think every effort should be made to correct the abuses and inequities.

In questioning on the food stamp program, and need to reform it to eliminate wastes, abuse, and corruption, Mrs. Foreman was vague in many of her answers. She failed to indicate she would favor a law to cut down the present program. Mrs. Foreman's questions about food stamps for strikers are somewhat symbolic of her attitude. I excerpt again from the hearings record:

Senator CURTIS. Do you favor food stamps to strikers?

Mrs. FOREMAN. Not unless they meet the income and resource limitations. Last year, out of 18 million people on food stamps, the House Agriculture Committee was able to identify only 5,000 who were strikers.

Senator CURTIS. You do not regard engaging in a strike or labor dispute—other than a lock out—to be considered as a refusal to accept employment.

Mrs. FOREMAN. No, sir.

In regard to food stamps for college students, Mrs. Foreman said she was not aware that students did not even have to meet the requirements to register for work in order to qualify for food stamps.

The last administration did propose some changes in the program to tighten controls and minimize abuses. Because food stamps would be under the authority of Mrs. Foreman, I think she should have some clear ideas about eliminating abuse and tightening up on the program. Mrs. Foreman's responses to questioning on this subject did not convince me of her desire along these lines. Again, I excerpt from the hearings:

Senator CURTIS. Did you approve, if you know, the actions of Secretary Bergland, in repealing the regulations that his predecessor has put in, in reference to food stamps?

Mrs. FOREMAN. Yes, sir, I did. We will be back to the Congress very shortly with a very substantial revision in the food stamp program.

Congress failed to act on food stamps last year. Oh, the Senate passed a bill that raised the cost of food stamps hundreds of millions of dollars. The House did not do anything. The Secretary of Agriculture acted, and Secretary Bergland immediately wipes that out; and Mrs. Foreman says she approves it.

Although opposing the past administration's proposals for changes in the food stamp program, it appears that Mrs. Foreman would support some revisions and improvements. Yet, in at least two occasions in the past while she was director of the Consumer Federation of America, that organization published articles opposing cuts and revisions in the food stamp program. In the January 1975 issue of CFA News there was an article opposing food stamp cuts, and another article appeared in the November 1975 issue.

OTHER CONCERNS

Mrs. Foreman testified that one of the objectives of the Consumer Federation was to enable consumers to participate more effectively in Government regulatory proceedings. She referred particularly to the Federal Trade Commission. She reported that the Consumer Federation intervened frequently. She mentioned in particular the proceedings before the Federal Trade Commission with regard to funeral home practices. Her testimony was as follows:

Senator CURTIS. Did you support the regulations the Federal Trade Commission reached on the funeral directors?

Mrs. FOREMAN. In part.

Senator CURTIS. What part did you support?

Mrs. FOREMAN. Sir, I would have to supply that for the record. We had a fairly lengthy brief supporting in part and opposing in part, and I do not recall the specifics of it.

Senator CURTIS. Now, that regulation provided that a regulatory agency could overrule state laws by regulation. Did you support that provision?

Mrs. FOREMAN. Yes, sir, because the Congress had issued to the Trade Commission the power to issue trade regulation rules. We did in fact support that.

Mr. President, here is a bureaucracy that holds that it has the power to override State law by regulation. Now, there are times when State law should be overridden in the national interest, but it should be done by Congress. What was involved there was the power on the part of the States to license occupation.

Senator CURTIS. And you believe that a federal agency should have the power to overrule state law, and do it by regulation?

Mrs. FOREMAN. In certain instances, yes, sir. I am not an attorney. Our attorneys thought it was within the power of the Trade Commission to do that.

The question is not did they have the power. The question is, is it right for bureaus, unelected by anyone, to overrule laws in your State and my State, and do it by regulation?

The question might be asked, what do funeral homes have to do with agriculture? Well, although funeral homes are not involved with agriculture, this testimony is cited to show the nominee's position on State rights and bureaucratic power.

POSSIBLE CONFLICT OF INTEREST

I do not know whether there is a conflict of interest here. I know there is a possibility of one.

Mrs. Foreman's husband, J. H. Foreman, is employed by the Retail Clerks International Association, where he is principal assistant to the president of the union. With her personal ties, and the acknowledged and reported heavy support and membership of unions in the Consumer Federation of America, it is obvious that the possibility of a conflict of interest exists. I excerpt from the hearings:

Senator CURTIS. Where is your husband employed?

Mrs. FOREMAN. He is employed by the Retail Clerks International Association.

Senator CURTIS. What is his position?

Mrs. FOREMAN. He is the principal assistant to the president.

Senator CURTIS. Does that union represent any workers in the food retail industry?

Mrs. FOREMAN. Yes, sir.

Senator CURTIS. With what companies?

Mrs. FOREMAN. With a variety of supermarket chains, Senator.

Senator CURTIS. All of the supermarkets?

Mrs. FOREMAN. No. There are a number of supermarkets that are not organized.

Senator CURTIS. What are the principal ones that are organized?

Mrs. FOREMAN. At various places across the country, and I am not totally familiar with the operation of the Retail Clerks Union. Safeway and A&P are the largest chains, to my knowledge. Some of the operations are organized, and some are not.

Senator CURTIS. A great number of meat packing plants in my area of the country have closed down because of strikes. What would be your position in regard to meat inspectors crossing picket lines?

Mrs. FOREMAN. I think that is up to the meat inspectors, Senator. Most of the meat inspectors are organized, and I would expect that they would have to do as they chose.

Senator CURTIS. What would be your position, so far as directions and instructions?

Mrs. FOREMAN. I am not sure it would be appropriate for me to give instructions if there were provisions for that in the labor contract.

Senator CURTIS. In whose labor contract?

Mrs. FOREMAN. The contract between the Government Employees Union and the Department of Agriculture.

Senator CURTIS. If you were approving, or disapproving a contract, would you approve a contract that permitted the meat inspectors to honor picket lines?

Mrs. FOREMAN. I expect that if it were otherwise a legitimate contract, and if I were advised by the Office of General Counsel it was an appropriate decision, arrived at by collective bargaining, that I would.

Mr. President, the meat inspectors are the key to the operation of a meat packing plant. There has to be inspection before the kill and after. Without inspectors they cannot operate. A picket line can be thrown up by a few people. The meat inspectors represent the Government of the United States.

This may not alarm the Senate, but when these facts are known it is going to alarm all of agricultural America.

Agriculture is in a difficult economic situation. Grain and livestock prices are dangerously low. Some farmers and ranchers are facing foreclosure.

The Honorable CLIFFORD HANSEN, the Senator from Wyoming, has provided the Senate with some startling figures which illustrate the distress in the agricultural areas. Senator HANSEN reported that the net income for all Wyoming farmers and ranchers in 1973 was $122 million, and the net income for 1974 had dropped to $62 million, and their net incomes for 1975 had dropped to $14 million. The figures for 1976 are not in but it is Mr. HANSEN's opinion that the situation has not improved.

Here was an opportunity to appoint someone knowledgeable in agriculture as Assistant Secretary of Agriculture, but it was turned over to organized labor.

Mr. HANSEN also reports that the average net income for all farmers and ranchers in Wyoming on a yearly basis is $1,725 with nothing allowed for wages of the owner-operator's interest on his investment.

Individuals of goodwill may disagree as to what steps should be taken. But there is one thing that the administration can do. That is to place farmers and farm-oriented individuals and those with farm knowledge and experience in the high policymaking positions of the Department of Agriculture. There are many men and women who are actively involved in agriculture who are of outstanding ability and who are available for Assistant Secretaries. To turn the high policymaking positions in the Department of Agriculture over to organized nonfarm groups because they represent more voters is to abandon the very purpose for which the Department of Agriculture exists. This appointment does that very thing and I cannot concur.

Mr. President, I yield the floor.

Mr. TALMADGE. Mr. President, the Committee on Agriculture, Nutrition, and Forestry held 3 days of hearings on the nominations of Carol Tucker Foreman to be an Assistant Secretary of Agriculture and a member of the Board of Directors of the Commodity Credit Corporation.

A major topic of the hearings related to Mrs. Foreman's past role as a consumer advocate in her position as executive director of the Consumer Federation of America, and the possibility that she lacked the necessary sympathy and understanding for farmers and the farm community to be an effective Assistant Secretary.

However, in the course of the committee's hearings, Mrs. Foreman dispelled to a great extent the concerns relating to her nomination. She responded candidly and fully to all questions which were asked.

Mrs. Foreman's answer to the questions made it clear that she does understand the problems that farmers face and that she supports programs that benefit farmers. Moreover, she stated that she would be impartial and fair in administering the departmental programs for which she will be responsible, regardless of any previous statements she has made or any biases that she may have held.

Mr. President, the character, integrity, and ability of Mrs. Foreman are not in question. The overwhelming vote by the committee to report the nominations favorably attests to the committee's belief that Ms. Foreman is well qualified

for the positions to which she has been nominated.

I urge the Senate to act speedily in confirming the nominations.

The ACTING PRESIDENT pro tempore. The question is on the confirmation of Mrs. Carol Tucker Foreman, of the District of Columbia, to be an Assistant Secretary of Agriculture.

Mr. CURTIS. Mr. President, I object.

Mr. ROBERT C. BYRD. Mr. President, could we have a vote?

The ACTING PRESIDENT pro tempore. All those in favor of the confirmation will let it be known by saying "aye"; opposed, "no."

In the opinion of the Chair, the ayes have it. The nomination is confirmed.

The Clerk will state the next nomination.

The second assistant legislative clerk read the nomination of Carol Tucker Foreman, of the District of Columbia, to be a member of the Board of Directors of the Commodity Credit Corporation.

The ACTING PRESIDENT pro tempore. The question is on the confirmation of the nomination. All those in favor of the nomination let it be known by saying "aye"; opposed, "no."

It appears to the Chair that the ayes have it. The ayes do have it. The nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified of the Senate action on the nominations.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, how much time did I yield back under my standing order?

The ACTING PRESIDENT pro tempore. Eight minutes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may retrieve control of that 8 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield the 8 minutes to the Senator from Massachusetts (Mr. KENNEDY).

The ACTING PRESIDENT pro tempore. The Senator from Massachusetts is recognized for 8 minutes.

SENATE RESOLUTION 124—SUBMISSION OF A RESOLUTION RELATING TO NEGOTIATIONS FOR A COMPREHENSIVE TEST BAN TREATY ENDING ALL NUCLEAR EXPLOSIONS

(Referred to the Committee on Foreign Relations.)

Mr. KENNEDY (for himself, Mr. MATHIAS, Mr. HUMPHREY, Mr. MUSKIE, Mr. CASE, Mr. CRANSTON, and Mr. PELL) submitted the following resolution:

S. RES. 124

Whereas the United States is committed in the Limited Test Ban Treaty of 1963 and of the Non-Proliferation of Nuclear Weapons Treaty of 1968 to negotiate a Comprehensive Test Ban Treaty;

Whereas the conclusion of a Comprehensive Test Ban Treaty will reinforce the Non-Proliferation of Nuclear Weapons Treaty, and will fulfill our pledge in the Limited Test Ban Treaty;

Whereas there has been significant progress in the detection and identification of underground nuclear explosions by seismological and other means; and

Whereas the SALT accords of 1972 and the proposed Threshold Test Ban Treaty established important precedents for arms control verification procedures;

Whereas early cessation of nuclear explosions would have many beneficial consequences: creating a more favorable international arms control climate; imposing further finite limits on the nuclear arms race; releasing resources for domestic needs; protecting our environment from the continuing dangers of nuclear explosions; making more stable existing agreements which place quantitative limits on offensive and defensive strategic weapons; and complementing the post-Vladivostok strategic arms limitation talks;

Whereas a Comprehensive Test Ban would achieve these goals far better than the proposed Threshold Test Ban; and Whereas President Carter has expressed his support for a Comprehensive Test Ban Treaty; Now, therefore, be it

Resolved, That it is the sense of the Senate that the President of the United States (1) should propose an immediate suspension of underground nuclear explosions to remain in effect so long as the Soviet Union abstains from conducting underground explosions, and (2) should set forth promptly a new proposal to the Government of the Union of Soviet Socialist Republics and other nations for a permanent treaty to ban all nuclear explosions.

Mr. KENNEDY. Mr. President, I am pleased to submit today with Senators MATHIAS, HUMPHREY, MUSKIE, CASE, CRANSTON, and PELL a resolution endorsing the initiation of an immediate mutual moratorium of all nuclear explosions by the United States and the Soviet Union and the negotiation of a comprehensive nuclear test ban treaty.

Essentially, we are supporting initiatives already outlined by President Carter and, at the same time, expressing the continuing support of many Senators for the United States and the Soviet Union to fulfill a 14-year-old commitment to put a permanent halt to the testing of nuclear weapons.

Hopefully, this goal will be brought closer as a result of the forthcoming visit of Secretary of State Cyrus Vance to the Soviet Union.

In the past three Congresses, I have joined with other Senators to introduce a resolution similar to the one we are presenting today. In the 92d Congress, we introduced Senate Resolution 230, in the 93d Congress, we introduced Senate Resolution 67, and in the 94th Congress, we introduced Senate Resolution 163.

More than 36 Senators ultimately joined these resolutions as cosponsors. The Foreign Relations Committee approved Senate Resolution 67 in June 1973, by a 14-to-1 vote. We expect an even greater number to join with us during the course of the current session. The original group of Senators which pressed this effort forward always had included our esteemed colleague, Phil Hart. He was ever in the forefront of the struggle to put a halt to the nuclear arms race. We are saddened again today by his absence.

While we are introducing this measure once more, it is being done with a different administration in office. Already, we have heard President Carter, strongly endorse the effort to seek a halt to all nuclear testing. He stated in his inaugural address:

> We will move this year a step toward our ultimate goal: the elimination of all nuclear weapons from this Earth. We urge all other people to join us, for success can mean life instead of death.

And again in his first press conference, he stated:

> As far as nuclear arms limitations are concerned, I would like to proceed quickly and aggressively with a comprehensive test ban treaty. I am in favor of eliminating the testing of all nuclear devices, instantly and completely.

The resolution we are introducing today has two key provisions. The first provision is based on the experience that led to the achievement of the limited test ban treaty in 1963. Then President Kennedy announced at American University his intention to halt all testing in the atmosphere and his expectation that the Soviet Union would follow suit. Negotiations quickly followed that produced the limited test ban treaty.

The first provision reads:

> That it is the sense of the Senate that the President of the United States (1) should propose an immediate suspension on underground nuclear explosions to remain in effect so long as the Soviet Union abstains from such underground explosions.

The second provision urges the President, again as was done 14 years ago, to make a concrete formal proposal for a permanent treaty to ban all nuclear explosions.

The second clause reads:

> (2) Should set forth promptly a new proposal to the Government of the Union of Soviet Socialist Republics and other nations for a permanent treaty to ban all nuclear explosions.

The new administration has begun to demonstrate its own intense interest in securing an end to nuclear testing and a beginning in the process of nuclear disarmament. We believe those efforts should be encouraged and can be encouraged while maintaining and ever increasing the security of the United States. We have witnessed the growing insecurity that has resulted from the failure to put a cap on the nuclear arms race. Now we have our Nation's leaders finally cognizant that arms control can be the most reliable path to national security.

Briefly, I would like to outline the arguments for a comprehensive test ban treaty.

First, I believe it is essential to recognize that we have a treaty obligation to continue negotiations seeking "to achieve the discontinuance of all test explosions of nuclear weapons for all

time." That solemn commitment is contained within the limited test ban treaty which was signed by President John Kennedy and ratified by the Senate of the United States in 1963.

It is an obligation reaffirmed in the preamble to the Nuclear Non-Proliferation Treaty of 1968.

It is an obligation that we can fulfill this year.

Second, a CTB would be a strengthening and stabilizing support for quantitative agreements on nuclear arms, such as SALT I and the forthcoming SALT II talks.

It would spell out an end to further refinement of warheads, hopefully thereby adding a restraint to the qualitative contest of nuclear one-upmanship. In so doing, we believe that a comprehensive ban is far more desirable than the proposed 150 kiloton threshold test ban agreement, whose ceiling appears just high enough to permit all weapons developers to be assured they can seek the latest warhead refinement far into the future.

Third, we believe that the conclusion of a permanent halt to nuclear testing by the United States and the Soviet Union would add a significant support to the nonproliferation effort. It would be stating to the nations which have not yet entered the nuclear club that the time has come for a halt to the nuclear arms race.

Too many of the nations with the growing capacity to enter the nuclear arena have not yet ratified the Non-Proliferation Treaty. One of the arguments they assert time and again is that the major powers are unwilling to even halt the refinement of their own massive stockpiles of nuclear warheads, while they ask others to forego nuclear weapons entirely. Ending nuclear testing would at least remove that argument from the nonproliferation debate.

In fact, the one potentially significant development in warheads that might be produced through continued testing is the creation of a thermonuclear weapon which did not require a fission trigger. Such a development permitting the production of cheap weapons, however, would make the United States less secure, not more secure. It would bring nuclear weapons within reach of every regime around the globe. No more disturbing image can be conceived.

Already, we have seen India demonstrate its nuclear potential and we have heard loud rumors of Israel's capacity and the future potential of Argentina and Brazil.

Fourth, while we cannot expect that the People's Republic of China or France immediately will alter their current posture, a CTB, at least, will place greater pressure on them to halt their own testing and weapons development.

Finally, a comprehensive ban fills the gaps and closes the loopholes that are present in the threshold treaty and its companion treaty on the conduct of peaceful nuclear explosions. The threshold test ban would permit underground nuclear tests below the level of 150 kilotons. The Treaty on Peaceful Nuclear Explosions would permit PNE's below the same level and provide for some onsite inspection.

These companion measures have been engulfed in controversy. Critics have charged that the threshold of 150 kilotons—10 times the size of the Hiroshima blast—would permit continued weapons tests of considerable range. I share their concerns and view the treaty as one whose benefit is less as an arms control measure in itself, but as an additional webbing in a network of agreements between the superpowers. Similiarly, the companion PNE treaty affords too great an excuse for the conduct of nuclear explosions.

The verification of a comprehensive ban will be far easier and far more sure than one which attempts to define whether a given explosion has passed the precise level of 150 kilotons or whether a peaceful explosion does or does not have military uses.

I far prefer, and this resolution supports, the concepts embodied in the address by President Carter in his speech last year to a conference at the United Nations. There he stated:

> The United States and the Soviet Union should conclude an agreement prohibiting all nuclear explosions for a period of five years, whether they be weapons tests or so called peaceful nuclear explosions, and encourage all other nations to join. At the end of the five-year period, the agreement can be continued if it serves the interests of the parties.

That statement far more accurately describes the appropriate goal for a halt to all explosions. While a 5-year ban would be a major accomplishment, hopefully, a permanent treaty can be achieved.

I believe that while the Soviet Union has expressed its own concern that other nations, particularly the People's Republic of China, join such a comprehensive test ban treaty, their major emphasis on achieving a CTB has been expressed publicly and privately in the past. As Secretary Brezhnev stated only this past week:

> The question of prohibiting all nuclear weapons tests is an extremely important and pressing one.

Much has been achieved over recent years in the verification arena that improves and underscores our capacity to use seismological and satellite means of verifying a complete halt on nuclear testing. The farfetched scenarios for cheating have largely been exposed as unconvincing, and virtually every outside scientist and arms control expert who has examined this issue concludes that no significant gain in weapons technology would accrue to the cheater. A far greater risk exists of being exposed as a treaty violator.

In that vein, it should be noted that under the ABM Treaty, the SALT I agreement and the proposed threshold test ban treaty, significant steps forward have occurred in establishing reporting procedures, monitoring procedures and verification procedures, even including a willingness by the Soviet Union under certain circumstances and conditions to accept some onsite inspections. My own view is that such inspections are merely icing on the cake when our seismological and satellite and other intelligence means of verification are really understood. In fact most experts—even in the absence of onsite inspections—believe that we would be far more secure today with satellite and seismological data and other national means of verification than we would have been in 1963, when the U.S. negotiating position merely required an extremely low number of onsite inspections.

The risks from cheating are so great, and the benefits from cheating so minimal, that it would be more than foolhardy for any nation to try and cheat on an agreement.

I believe that we are at a particularly important moment when the realization of the need for arms control is becoming clear. A CTB would demonstrate that the United States and Soviet are both still committed to specific and concrete limits on arms and to the reduction of those nuclear stockpiles. It might be a fitting and apt stimulus to the conclusion of the SALT II talks.

To understand our current strategic situation with regard to warheads, one must recognize that a CTB at this time is clearly in our interest. We have some 8,900 strategic warheads. We have some 22,000 tactical nuclear weapons. We have some 22,000 tactical nuclear weapons. We have warheads for our MIRV's. Each day that testing goes forward, our lead in this area diminishes.

If opponents of a treaty argue that the nuclear stockpile might be further refined by continued testing, it must be obvious to all that any such refinements pale beside the significance of placing a major cap on the qualitative side of the nuclear arms race.

Another argument raised against a CTB is that it might permit unlimited peaceful nuclear explosions which could be used for military purposes. Any CTB clearly must cover all explosions or make extremely tight restrictions over any exception. From previous statements of Soviet leaders, it is possible that the mutual advantage of a permanent treaty to ban all tests may well be sufficient incentive for them to yield on this issue.

The time for restraining the qualitative arms race is now. What we need now is the political initiative on both sides to carry the movement for a halt to all nuclear explosions to its conclusion. This resolution expresses support to Secretary of State Vance and President Carter in their efforts to achieve that goal. We hope that it will be viewed as an encouragement to the administration to direct its aim toward achieving a comprehensive test ban treaty as a goal of the highest priority and significance.

It is time to take this step away from the nuclear brink of destruction.

Mr. President, I send to the desk a resolution and ask that it be appropriately referred.

The ACTING PRESIDENT pro tempore. The resolution will be received and appropriately referred.

Mr. MUSKIE. Mr. President, Secretary of State Cyrus Vance's visit to the Soviet Union provides an early opportunity to

open talks centered on one of the most vital issues facing our world today: the development and implementation of an agreement to ban nuclear testing by the Soviet Union and the United States.

We took a major step toward that goal in 1963, with the signing of the Limited Test Ban Treaty, which bans atmospheric and underwater nuclear tests. One hundred and four nations have ratified it. Congress has enacted legislation limiting the transfer of nuclear energy materials to nonsignatory nations. And complete agreement to it by all the nations of the world remains a goal to which we are committed.

But it is time to step beyond the limited test band and work aggressively toward a comprehensive test ban.

The commitment of the President to such a ban is clear. He enunciated it at his inauguration, and he repeated it in his statement before the United Nations General Assembly on March 17. The President specifically said his administration will "explore the possibility of a total cessation of nuclear testing. While our ultimate goal is for all nuclear powers to end testing, we do not regard this as a prerequisite for suspension of tests by the two principal nuclear powers."

Secretary Vance's visit is a splendid opportunity to begin that exploration.

Perhaps, as the President has suggested, an informal start toward an agreement can be made through a process of voluntary prenotification of testing, giving ourselves and the Soviets the necessary degree of confidence in each other's intentions.

Technological advances in seismic research have moved us toward an adequate offsite monitoring ability which can provide a firm basis for negotiating such an agreement. And the repeated signs of willingness on the part of the Soviet Union to consider this as one component of wide-ranging arms control efforts is an opportunity we cannot afford to ignore.

The need for a complete ban is clear, especially in light of the Chinese atmospheric explosion last September and underground test in October. If we are to prevent the growth of a third major nuclear armaments stockpile which can only add to the instability that nuclear arms create for all mankind, it is imperative that we move now toward a comprehensive and total ban on all weapons testing, and that we use the impetus of that agreement to urge all the nations of the world to join us.

By the terms of both the Limited Test Ban Treaty of 1963 and the Nuclear Non-Proliferation Treaty of 1968, the United States committed itself to making every effort to conclude an agreement ending all nuclear testing. In 1969, President Nixon explicitly committed his administration to work toward the conclusion of a comprehensive nuclear test ban treaty.

Official U.S. policy for many years favored a comprehensive test ban provided it could be adequately verified to protect our security. For verification, the United States has always insisted on on-site inspections to provide assurances that unidentifiable seismic events are not clandestine explosions. The Russians have consistently claimed that such inspections are unnecessary, although they have at times consented to limited onsite inspections.

Mr. President, both in 1971 and 1972, the Arms Control Subcommittee of the Foreign Relations Committee, which I chaired, held hearings on a comprehensive test ban treaty. At those hearings, a host of national scientific experts documented the progress made in recent years in the techniques of detection and identification of underground nuclear tests. The fact is that our seismic research during the last decade has paid off handsomely.

Onsite inspections now add very little to our verification capabilities. Discrimination between earthquakes and underground explosions is now possible with high reliability for energy yields of a few kilotons.

Onsite inspections at best now seem useful for only a narrow yield range below this level and above the threshold at which seismic signals are detectable, that is, about one to a few kilotons. It is hard to see how cheating in this yield range could be of great security significance. Strategic weapons have yields 10 times more than these levels.

The time is ripe for a new and bold initiative toward concluding a comprehensive test ban treaty. Such an accord is a natural corollary to SALT II, and the effort being made to break the deadlock in those negotiations. A ban would strengthen the likelihood of acceptance by emerging powers whose nuclear capability is not yet substantial enough to pose a global threat.

Continued lack of action on a comprehensive test ban provides no assurance to the nonnuclear nations that their restraint in not developing a nuclear capacity has served their security interests. In a world dominated by sometimes hostile superpowers with huge stocks of lethal weapons, that sense of insecurity can only be heightened by an apparent deadlock in the superpowers' positions on a comprehensive test ban.

Renewed negotiations for a comprehensive test ban serve to reassure both our allies and nonalined nations that the lack of their own strategic forces does not inevitably expose them to greater threats. The climate for nonproliferation would be vastly improved, and the efforts of the superpowers in reaching agreements on arms controls would be enhanced.

Thus, we stand to gain much and risk little by taking this step now.

If the United States and the Soviet Union can rededicate themselves to finding a way to end their nuclear testing, the world will have taken a desperately needed step toward controlling the spread of nuclear weapons.

But if they let this opportunity go by, we can only expect a continued acceleration of the development of nuclear arms by other nations.

And that is a consequence with grave implications for the future of humanity.

Mr. MATHIAS. Mr. President, in 2 days Secretary of State Cyrus Vance will leave for Moscow to negotiate on strategic arms limitations with the leaders of the Soviet Union. Our prayers and our heartfelt wishes for his success go with him.

The SALT talks are the most important negotiations in the world today. They are, however, only a part of what needs to be done to control the scourge of nuclear weapons. The SALT talks deal with nuclear arms after the fact—they deal with the consequences of the development and deployment of nuclear weapons.

But, if we are to get to the heart of the nuclear problem, we must begin to anticipate, we must act before the fact. We must take steps that will deal with the testing and the scientific effort that go into the development of ever more devastating nuclear weapons.

The resolution which the Senator from Massachusetts, Mr. KENNEDY, and I are submitting today is aimed at fulfilling the commitment of the Partial Test Ban Treaty of 1963 and the Nonproliferation of Nuclear Weapons Treaty of 1968 to negotiate a comprehensive test ban treaty.

The vital importance of a comprehensive test ban treaty should be obvious to all who support bringing the dangers of nuclear war under control. We are introducing this resolution at this time so that, as Secretary Vance begins his negotiations, he will know that he has the full support of the Senate to seek, in addition to strategic arms limitations, agreement on the suspension of underground nuclear testing and on a permanent test ban treaty.

I would like to remind my colleagues that various forms of this resolution have been before the Senate since 1972 when the late Senator Philip Hart and I submitted Senate Resolution 273 calling upon the President to propose an extension of the Nuclear Test Ban Treaty of 1963 to include underground testing. I can think of no more fitting memorial to Phil Hart than resounding Senate approval of this resolution to which he gave so much of himself.

Mr. PELL. Mr. President, I am pleased to cosponsor the comprehensive test ban resolution offered by the distinguished senior Senator from Massachusetts. I heartily endorsed a comprehensive test ban, as such a ban will contribute significantly to slowing the nuclear arms race and help control further nuclear proliferation.

Over the past several years, significant progress has been made in the detection and identification of underground nuclear explosions by seismological and other means. While there may be a small range in which it would be difficult to distinguish between an illegal nuclear explosion and an earthquake, the upper limit of this range of cheating possibilities is very low. Hearings by the Senate Foreign Relations Committee in 1973 showed that the level of detection is around 5 kilotons or less—and there has been further significant progress since those hearings. The strategic benefits to be gained by the Soviets or any other nuclear power by cheating is, in my view, negligible in comparison with the risks which would be run of this cheating being discovered.

The test ban resolution considered in

1973 and earlier efforts called for an end only to nuclear testing. This resolution would also encompass so-called peaceful nuclear explosions. It is these explosions which represent the most insidious means of circumventing a comprehensive nuclear weapons test ban. An ostensibly "peaceful" project or even an entire "peaceful" program could be used to further weapons developed by one of the presently nuclear nations or by a nonnuclear nation trying to get nuclear weapons under the guise of a "peaceful" program. In this connection, it should be recalled that when the Soviet Union conducted its first nuclear weapons test in 1949, it claimed that the device being tested was designed to "move mountains and dam rivers." So a healthy skepticism about the nature of "peaceful explosions" conducted by previously nonnuclear states is in order.

Mr. President, the time for a complete ban on nuclear explosions has come, and I am delighted that President Carter has endorsed such a ban himself. The resolution being introduced today will support and encourage him in that effort, and I urge my colleagues to join in adopting this resolution.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, the Senate will resume consideration of Senate Resolution 110, which is the ethics resolution.

The clerk will state the resolution.

The legislative clerk read as follows:

A resolution (S. Res. 110) to establish a code for official conduct for the Members, officers and employees of the U.S. Senate, and for other purposes.

AMENDMENT NO. 153

The ACTING PRESIDENT pro tempore. The pending question is on agreeing to the amendments, amendment 153, en bloc, of the distinguished Senator from New Mexico (Mr. SCHMITT). The time for debate is limited to 1 hour, equally divided between the Senator from New Mexico (Mr. SCHMITT) and the Senator from Wisconsin (Mr. NELSON).

The clerk will state the amendments.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) for himself, Mr. JAVITS, and Mr. RIBICOFF, proposes amendment No. 153:

On page 10, delete lines 8 through 12.

On page 10, line 13, delete "(2)" and insert in lieu thereof "(c)(1)".

On page 10, after line 21, insert the following new paragraph:

"(2) For the purposes of subparagraph (a)(3) and subparagraphs (d) through (j) of paragraph (2) a reporting individual shall also report the interests of the spouse or dependents of that individual if such interests are within the constructive control of the reporting individual. For the purposes of this subparagraph, an interest is in the constructive control of a reporting individual if the enhancement of the interest would substantially benefit the reporting individual.

On page 12, line 8, delete "knowledge; however, it is the responsibility" and delete lines 9 and 10 and insert in lieu thereof "knowledge.".

On page 21, line 24, delete "or knowingly permit his spouse or dependent to accept".

Mr. HELMS. Mr. President, I ask unanimous consent that Mr. Dick Bryan of my staff be accorded the privilege of the floor during consideration of Senate Resolution 110 and any votes thereon.

The ACTING PRESIDENT pro tempore. Without objection, is is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time therefor be charged against both sides on the resolution, not on the amendment.

The ACTING PRESIDENT pro tempore. Is there objection? There being no objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. METZENBAUM). Without objection, it is so ordered.

REQUEST FOR THE COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS TO MEET TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet at 3 p.m. today.

Mr. BAKER. Mr. President, with great reluctance, but in keeping with my previous statement in that respect, I object.

The PRESIDING OFFICER. Objection is heard.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. NELSON. Mr. President, I ask unanimous consent that the time for this quorum not be charged against the bill or any amendment.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. I object.

The PRESIDING OFFICER. Objection is heard. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, inasmuch as there has been objection, I ask unanimous consent that the time for the quorum call suggested by Mr. SCHMITT be charged against the resolution, equally against both sides, not against the amendment.

Mr. HELMS. Very well.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SCHMITT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. SCHMITT. The Senator from New Mexico yields himself 5 minutes.

Mr. President, in the consideration of amendment No. 153, which has been worked out with the cooperation of numerous staff members and numerous Senators, as a consequence of last night's discussion and debate, I first wish to express my appreciation to Senator JAVITS and Senator RIBICOFF and their staffs for working out the compromise language which is in the printed amendment and which was printed in the RECORD yesterday.

I believe that this language clearly protects the basic individual rights of spouses and dependents, while at the same time it prevents any possible abuse of this protection by the transfer of assets through which a Member might benefit.

I strongly recommend that the Senate approve this amendment.

At this time, I yield to the distinguished Senator from New York, if he has additional comment.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. SCHMITT. I yield.

Mr. RIBICOFF. There is a typographical error in the amendment. On line 7, the numeral "2" in parentheses does not belong there. It should be removed. I ask unanimous consent that on line 7, the numeral "2" be removed.

Mr. SCHMITT. The parentheses, I believe, should be removed. Is that correct?

Mr. RIBICOFF. That is correct.

Mr. SCHMITT. Not the number, just the parentheses.

Mr. RIBICOFF. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. SCHMITT. I yield to the Senator from New York such time as he may require.

Mr. JAVITS. Mr. President, I think we are ready now to act upon this matter. I gather that Senator NELSON and his colleagues, Senator RIBICOFF and Senator CLARK, wish to have a colloquy; and I am quite prepared for that, whenever the Senator is ready.

Mr. RIBICOFF. I thank the Senator.

First, Mr. President, I express my appreciation to the Senator from New Mexico, the Senator from New York, the Senator from Wisconsin, the Senator from Iowa, and our respective staffs, who tried to work out carefully a very complex and sticky situation. I think our objectives all have been the same, but we tried to find language to carry it out. To this end, I thought it would be wise, for the record—and to assist the members of the Ethics Committee, who will have the obligation to issue rules and regulations—to know on what basis to work.

Mr. President, last night a number of Senators engaged in extensive debate on to what degree public financial disclosure should be required of the financial

interests of a spouse or dependent of a Member, officer or employee of the Senate. As a result of that dialog, a compromise was agreed to by Senator SCHMITT, the sponsor of the pending amendment, Senator JAVITS, one of the chief proponents of that amendment, Senator NELSON, the manager of Senate Resolution 110, and myself. I believe that that compromise amendment is acceptable only if accompanied by a clear expression of how the Senate interprets the language in that amendment.

The first part of that amendment would amend rule XLII relating to financial disclosure by deleting paragraph 3(c)(1) of that rule—found on page 10, lines 8 through 12 of amendment number 65 to Senate Resolution 110. Subparagraph 3(c)(2) would be renumbered to be subparagraph 3(c)(1) and a new subparagraph (2) would be added. The new subparagraph would state:

> For the purposes of subparagraph (a)(3) and subparagraphs (d) through (j) of paragraph 2, a reporting individual shall also report the interest of the spouse or dependents of that individual if such interests are within the constructive control of the reporting individual. For the purposes of this subparagraph, an interest is in the constructive control of a reporting individual if the enhancement of the interest would substantially benefit the reporting individual.

This language was chosen because it utilizes the concept of constructive control used in the Code of Conduct adopted by the House of Representatives while also incorporating the interpretation given the term "constructive control" by the House of Representatives.

The purpose of the public financial disclosure provisions of the proposed Senate Code of Official Conduct is to provide information to the public on financial interests or sources of income which could present a potential conflict of interest or the appearance thereof. Clearly, the financial interests and income of a Member, officer, or employee covered by this rule must be disclosed. In addition, if there are investment holdings held in the name of a reporting individual's spouse or dependents, such investment holdings should be disclosed if the reporting individual is in any way substantially benefited by those holdings. It is obvious that if we are going to rely on public financial disclosure to permit the public to judge whether or not a high-level Government official is acting in furtherance of a private financial interest to the detriment of the public interest, a private financial interest which he is receiving substantial benefit from, whether the interest is in his name or in the name of some other member of his immediate family, should be disclosed.

The best way of clearly expressing this concept is by citing a few examples. If a spouse of a Senator has substantial holdings in stocks, bonds, real estate, business proprietorships, farm or other property and the Senator and his spouse have a home in Washington, a residence in his home state, and a summer vacation home elsewhere, and income from these investments held by the spouse is used to defray the expenses of those homes, including the purchase of the homes, the maintenance of the homes, taxes on the homes, or the upkeep of the homes; and both the Senator and his spouse benefit from those homes and use those homes; then the identity of the property held by the spouse would have to be disclosed because the Senator is deriving substantial benefit and enhancement from that interest. If the value of these holdings were to increase, the Senator and his spouse would both benefit from such an increased value in these holdings.

Similarly, if income from investment holdings of a spouse are used to pay for vacations for the family, or the cost of sending their children to expensive private schools, the Senator is gaining substantial benefit from those holdings and would presumably suffer substantial detriment if the value of the holdings were reduced; therefore, the holdings of the spouse would have to be disclosed.

In addition, the enhancement of an investment holding of a spouse would substantially benefit a Senator if the Senator had a legal right to a portion of the holdings of a spouse. In a community property State, by law one spouse has a legal interest in the property holdings of another spouse obtained during the marriage. Therefore, the enhancement of the interest of one spouse inevitably would benefit the other spouse. Therefore, such holdings would have to be reported.

The original amendment which was drafted by the staff to reflect the construction placed on the terms "constructive control" by the House of Representatives and which was presented to Senators JAVITS and SCHMITT, contained a sentence which stated—

> Normally, in the absence of a specific property division agreement, the interest of a spouse or dependent are constructively controlled by the reporting individual.

This sentence directly conveys the concept that in the normal family situation, one spouse has constructive control over the holdings and interests of another spouse or dependent unless there is some kind of specific property division agreement which would provide that the reporting individual would not benefit by the enhancement of the interest of his spouse or dependent. The sentence I have referred to was deleted from the compromise amendment because Senator JAVITS felt that the sentence was not drafted in statutory-type language. Therefore, I agree to have this sentence omitted from the language of rule XLII. However, it is my clear understanding that Senators JAVITS, SCHMITT, and NELSON have agreed that this sentence accurately describes the way we interpret the term constructive control at this time.

At this point I would like to ask Senator NELSON if he agrees with my description of the amendment and the interpretation which the sponsors of this compromise place on that amendment?

Mr. NELSON. Mr. President, I believe that Senator RIBICOFF has accurately described the compromise amendment which Senators SCHMITT, JAVITS, RIBICOFF, and I agreed to on the floor last night. Given the language of that amendment, I do not see how any other interpretation could be given to it. The amendment states that the interest of a spouse or dependent must be reported if the enhancement of the interest would substantially benefit the reporting individual. If the interest held by a spouse or dependent is used for the education of one's children or the maintenance of a home or for vacations, there can be no doubt that the Senator would benefit from the enhancement of that interest. I believe that this compromise amendment provides a degree of financial disclosure that is needed so that the public will know the identity of investment holdings held by anyone in the immediate family of a Senator if any action taken by a Senator might appear to affect the value of a holding from which the Senator derives some economic benefit.

Senator CLARK has been also very concerned and involved in this discussion of what reporting should be required with respect to the holdings of a spouse and dependents. I would like to ask Senator CLARK at this point whether he believes that Senator RIBICOFF and I have correctly explained the meaning of the compromise amendment from the Senator's viewpoint.

Mr. CLARK. Mr. President, as you know, I believe that Senator RIBICOFF was correct last night in arguing that in almost all situations in our society each of the members of an immediate family derives some benefit from the income and investment holdings of the other members of the immediate family. However, I understand the concerns of the Senator from New Mexico and the Senator from New York about the new status of women and their desire to follow the approach taken by the House of Representatives. I believe that the interpretation of this provision described by Senator RIBICOFF and Senator NELSON accurately reflects the content of the amendment and the discussion we had on the floor last night.

There can be no question that if an investment holding such as common stock in the name of a spouse is used as security for a mortgage on a home occupied by the reporting individual or used as security for any other kind of loan which is used to benefit the reporting individual and his spouse, whether it be for financing a vacation or a summer home or the education of their children, the reporting individual benefits from the enhancement of that interest, or may I add, suffers from a decrease in the value of that interest and, therefore, that interest, even though held by the spouse, would have to be disclosed.

Mr. RIBICOFF. Mr. President, I would like to make one more concept clear about the effect of this compromise amendment. I am sure it is not the intent of the sponsors of this compromise amendment that a Senator or other reporting individual could transfer assets or investment holdings into the name of a spouse or dependent in order to avoid the reporting requirements of this rule. If an investment holding is presently in the name of a Senator or other employee who has to report under this rule, or if an investment holding is purchased with the income earned by a Senator or other

reporting individual, but that investment holding is transferred or placed in the name of a spouse or dependent, that holding would clearly have to be reported on the financial disclosure statement required by rule XLII. Any other interpretation than that would provide a huge loophole where financial interests of a Senator or reporting individual are placed in name only in the name of a spouse or dependent to avoid the effect of this disclosure rule.

During the course of the debate last year on the Watergate bill, I believe Senator JAVITS took the position that even if the concept of "control" were used, that it was his intent to prevent an officeholder from transferring assets to a spouse or child to avoid disclosure. I would like to ask the Senator from New York whether he interprets this compromise amendment to require the disclosure of any assets which are so transferred from an officeholder to a spouse or dependent.

Mr. JAVITS. Now, Mr. President, I would like to comment on the whole presentation. The only addition I would like to make occurs in respect of a statement made—I will come to this last point—both by Senator RIBICOFF and Senator CLARK about income from investment holdings of a spouse being used to pay for vacations for the family or the cost of sending their children to expensive private schools, and so on.

The only thing I want to be sure of is that we mean material. It is understood there has got to be some material contribution.

Mr. RIBICOFF. Oh, yes.

Mr. JAVITS. In other words, if the lady has a private savings account or she does the tipping——

Mr. RIBICOFF. There is no question about it.

Mr. JAVITS. I knew that.

Mr. RIBICOFF. There is no question. I am in complete agreement with it.

Mr. JAVITS. I had no doubt about it.

As to the end point about transfers of assets, I believe, and I have to draw on my recollection—we will rely on the experts—that there is something here about not reporting what you transfer to your dependents or spouse in the reporting section, but what Senator RIBICOFF means, I believe, is that the Senator would have to report that because he really would be reporting it as his own.

Mr. RIBICOFF. That is another section of the rule.

Mr. JAVITS. That is correct.

Mr. RIBICOFF. I mean there is nothing to prevent a Senator from making transfers to his wife or family during the course of the year.

Mr. JAVITS. Exactly.

Mr. RIBICOFF. But then when the next year came around he would not have to report he made the transfer but it would show up as an asset held by the Senator's dependent; is that correct?

Mr. JAVITS. That is correct.

Mr. RIBICOFF. That is correct.

Mr. JAVITS. In other words, he would identify that.

Mr. RIBICOFF. The Senator is absolutely correct.

Mr. JAVITS. Within the meaning of the rule he would still have to report it.

Mr. RIBICOFF. The Senator is absolutely correct.

Mr. JAVITS. I think those are all valid. I wish to state now why I asked for a change on another knotty matter in the amendment as originally submitted. The Senator may recall that when it was drafted it provided, "written specific property division agreement." I asked that the word "written" be stricken because in a family situation it just may not be, and I think we can leave to the Committee on Ethics that under the circumstance in a given family situation there may be what is tantamount to an agreement. We leave that as a factual question for them.

Mr. RIBICOFF. I would say that is a problem. We have two members of the Ethics Committee here.

Mr. JAVITS. Right.

Mr. RIBICOFF. They do understand that, and I would imagine that provision could be provided for, that when a situation comes up that the Senator could get an advisory opinion from the Ethics Committee to approve it.

Mr. JAVITS. Or they would take into consideration the actual facts, because I think in a family situation we cannot ask them to sign a separation agreement. If they did the section would not apply at all.

Mr. RIBICOFF. As soon as the Senator raised that point it was clear to me it was justified, and we are more than willing to delete that word.

Mr. JAVITS. I thank my colleague, and as far as I am concerned we are in agreement.

Mr. CLARK. Mr. President. will the Senator from Wisconsin yield for 1 minute for a question?

Mr. NELSON. I yield.

Mr. CLARK. Mr. President, on another point, on page 12, in subsection (e), lines 8 through 10, the pending amendment would delete the phrase which reads:

. . . however, it is the responsibility of a reporting individual to exercise reasonable diligence to obtain the information necessary to comply with this rule.

It is my understanding that in case law the word "knowledge" carries with it the implication that the individual involved has exercised good faith, in other words, has made a reasonable attempt to obtain the requisite knowledge. Is it the understanding of the distinguished floor manager of the resolution that this case law definition of "knowledge" would still apply as the word is used in subsection (e)?

Mr. JAVITS. I ask if the floor manager will yield to me before he answers that question.

Mr. NELSON. I might say to the Senator, staff had intended to let me read this part of "knowledge" and I had not gotten around to it. So in any event I wish to look at it first.

Mr. JAVITS. Mr. President, will the Senator yield to me?

Mr. SCHMITT. I yield.

Mr. JAVITS. I do not accept that interpretation in this situation. We are striking the words which appear at page 12, lines 8 to 10, because we are dealing with family situations. We are not dealing with the kind of a situation that the case Reynolds against Moseley dealt with, to wit, an arm's length transaction. I am enough of a lawyer to know that "knowledge" means that you knew or should have known. But we are dealing here with a family situation. I do not think any Senator true to his oath can account to the Ethics Committee for walking around with his eyes shut. Certainly not. But at the same time I do not think we expect any Senator to go investigate his wife and rummage through her property, and so on. Therefore, I just do not think we can qualify what we are saying. The Ethics Committee will determine whether he had knowledge, and they can easily prosecute him if they and the Senate think so. But I do not believe that we should qualify that where it is a familial relation in any sense. As a matter of fact, that is one of the most important amendments the Senate has accepted. It is recognizing the familial relation between husband and wife, and it is not trying to impose a rule which we know is unenforceable, impractical, and against that familial relation. So I cannot accept that interpretation of what we are doing here.

Mr. CLARK. I might respond to the Senator that that language is in the resolution now:

. . . however, it is the responsibility of the reporting individual to exercise reasonable diligence to obtain the information necessary to comply with this rule.

Mr. JAVITS. The Senator had better know what it means.

Mr. CLARK. It would take positive action of this body to take it out. What I am simply saying is, if I can read my statement again, we are simply asking that there be a good-faith effort made to obtain that knowledge, because if we are not going to ask Members, in fact, to make a good-faith effort to determine what their spouse or dependents in fact hold, then it seems to me that obviously one could simply not become knowledgeable on those holdings and would be relieved of reporting them.

I would say this language on page 12, subsection (e), lines 8 through 10, does not simply apply to a spouse; it applies to every part of this resolution. It applies to the entire disclosure provision. I think that to eliminate it might be a rather significant loophole.

Remember all I am saying is it is my understanding in case law the word "knowledge" carries with it the implication that the individual involved has exercised good faith, in other words, has made a reasonable attempt to obtain the requisite knowledge.

I do not see anything wrong with asking a Member to make a reasonable attempt to obtain requisite knowledge of his dependents' or his spouse's holdings.

Mr. NELSON. I wish to raise a point at this time. I must say, with all due respect, I do not agree with the Senator from Iowa.

But let me inquire of the Senator from New York. This issue on the exercise of due diligence was raised yesterday, and I thought an amendment of the Senator from New York eliminated it because you either have knowledge or you do not.

Mr. JAVITS. It does eliminate it. The amendment at the desk eliminates this clause.

Mr. NELSON. May I say a word on that to the Senator from Iowa?

The Senator is asking something about a personal relationship which just seems to me is preposterous.

The Member, whoever it is, either has knowledge or he does not have knowledge. To say that the Senator has to exercise diligence to find out what assets his wife may have——

Mr. CLARK. I never used the word "diligence."

Mr. NELSON. The Senator is using the word. I thought "due diligence" was still in there, and I thought we agreed to take that out.

Mr. CLARK. A reasonable attempt, I said.

Mr. NELSON. Let me say to the Senator, "knowledge" carries with it the implication the individual involved has exercised good faith, in other words, has made a reasonable attempt to obtain the requisite knowledge.

If the Member says, "I have no knowledge," you must take him at his word. If a joint return is filed, which I would guess is the commonest way to file tax returns—the overwhelming majority file joint returns—the return reflects knowledge, and the Member would report the knowledge shown on that return. But to be saying to a Member, or anyone in this country, that you have to exercise good faith, make a reasonable attempt, to find out something about your spouse's assets goes beyond anything you can require reasonably.

And how would you decide if a sufficient effort was not made? In a case before the Ethics Committee, who would prove who made a good faith effort? So a spouse becomes mad, and says, "I don't think he made a good faith effort," and the Member says, "I made a good faith effort." Who is going to decide this nonsense? As far as I am concerned, I think it is preposterous, and on some of these things we are going beyond all reason whatsoever. I certainly cannot support that.

Mr. RIBICOFF. Mr. President, will the distinguished Senator yield?

Mr. NELSON. Yes.

Mr. RIBICOFF. The Senator from New Mexico, the Senator from Wisconsin, the Senator from New York, and I did come to this understanding last night, and incorporated it in the substitute that is now before the Senate, and I agreed to it.

I think if we go back to a little history of what happened in the Nelson committee, we will understand the background to this matter. All spouses do not have the same relationship. We know there have been Members in recent years who have been divorced from their spouses, which would indicate that prior to the divorce there has been a period of time where the relationship has not been close and intimate, and it would be unfair to place upon the shoulders of such a Member the complete obligation and responsibility to discover all property and all interests that his wife may have.

I can see a situation where a wife may have a savings account of $10,000, and it might throw off $500 or $600 a year in interest, which is not a great sum. Very obviously we could not charge the Member of being in bad faith if he did not know his wife had a savings account of $10,000.

It would be different if she had an investment in the magnitude of $1 million, that would bring in $50,000 or $60,000 a year, which would show up in their standard of living.

Again, I think we have a situation where we are going to have to rely on the commonsense and intelligence of the Ethics Committee, who at times are going to really need, may I say to my friend from New Mexico, to exercise the wisdom of a Solomon. It may be that there are situations that, on the face of them, may look difficult or bad, but when you consult with the Member and get the facts, it is obvious they are perfectly proper.

As the Senator from Wisconsin points out, if there is the filing of a joint return, a joint return that you both signed, and there is an indication there that income is coming in from a different source, then you have knowledge.

I think we have worked out a good understanding. We understand one another. The Ethics Committee is composed of members of various shades of thinking and experience, and I do believe we can work this out fairly and properly.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. JAVITS. I do not wish to be in the position of belaboring anything, but I think, in trying to put this interpretation in of what knowledge means, my opinion of it was the negative one, that it was too restrictive on the Ethics Committee.

Now we are giving the Ethics Committee the ability to determine what is knowledge. It is obvious, and that is the only thing I am contending for—and Senator RIBICOFF, with his accustomed sensitivity, has put his finger on those problems that arise in marriages—we must apply that standard realizing that a Senator may think differently in an arm's length situation than he would in a husband-wife situation. That was my only reason for contending for what I did.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. SCHMITT. Mr. President, I believe I have control of the time. First I would like to associate myself with the remarks of the Senator from Connecticut, the Senator from Wisconsin, and the Senator from New York in the interpretation they have placed on the amendment language.

I think the Ethics Committee will have the ability to determine broadly what violations of the code might occur and what violations in fact did not occur, with the language that is in the amendment combined with other language in the resolution.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. SCHMITT. Does the Senator from South Carolina need any specific amount of time?

Mr. THURMOND. Just several minutes.

Mr. SCHMITT. I yield 5 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, on page 12, the committee wrote into this resolution, into its code of ethics, these words:

> (e) An individual only is required to report information within his knowledge; however, it is the responsibility of a reporting individual to exercise reasonable diligence to obtain the information necessary to comply with this rule.

Now, when this was written into the code, I had serious doubts then, and I raised the point and would have preferred some other wording, but we did not seem to be able at that moment to find the exact wording that we needed to convey what we thought.

The House of Representatives provided that the spouse has constructive control. Now the amendment by the Senator from New Mexico, the Senator from New York, and the Senator from Connecticut provides these words:

> A reporting individual shall also report the interests of the spouse or dependents of that individual if such interests are within the constructive control of the reporting individual.

Then the amendment goes on to explain what constructive control is, and they define it in these words:

> For the purposes of this subparagraph, an interest is in the constructive control of a reporting individual if the enhancement of the interest would substantially benefit the reporting individual.

So, Mr. President, the way I understand it now, this amendment takes away the question of knowledge. It is not a matter of knowledge any longer, if this amendment is adopted. It is a matter of constructive control.

I favor this amendment, because I think it is more reasonable than what we wrote into the code of ethics when we were considering the matter. I think what the House did is in line with this, except I believe we are going a little further here, and not only staying within constructive control of the reporting individual, but we are defining what is constructive control, which the House did not do.

I think the amendment is fair. It is just a question of whether the Senate wants to adhere to the words we wrote in the code of ethics about the reporting Member having knowledge of the property of the spouse, or whether we want to accept this amendment, which I think is more practicable and more workable, and for that reason I favor the amendment and shall support it.

Mr. SCHMITT. I thank the Senator.

Mr. CLARK. Mr. President, will the Senator yield for another 30 or 60 seconds?

Mr. SCHMITT. I yield 1 minute to the Senator from Iowa.

Mr. CLARK. I do not wish to belabor the point, but let me make it clear one more time: my concern is that on page 12, we strike lines 8 through 10, which apply not just to a spouse or a dependent, but to a Member himself, or an employee, or anyone covered by the disclosure provision.

It certainly should not be interpreted that if Members do not know the value of their home, or do not know the value of their stock, or if at some time in the past they have put their money in a blind

trust, that not knowing that in some way gives them sanction not to report it, or, indeed, with the wife or the dependent, if you simply do not ask—and obviously you do not know what those holdings are—that somehow you have less responsibility for finding out.

I am not trying to create any new rule of law. Let me just quote from *Reynolds* v. *Moseley* (8th Cir. 1929, 32 F.2d 979, 981):

> Knowledge of facts sufficient to put a reasonably prudent man upon inquiry, which if followed up with reasonable diligence, would lead to knowledge . . . is equivalent to knowledge.

That is the law. I am simply saying I think it is important, as Members read this, that they understand there ought to be some reasonable effort to know their holdings, their spouse's holdings, or their dependent's holdings in the process of reporting.

Mr. NELSON. May I ask a question at that point?

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. I yield myself 3 minutes.

It is the practical application that concerns me and the impossibility of the Ethics Committee dealing with it. For example, I remember a friend of mine 3 or 4 years ago in rather limited circumstances whose wife had spent 2 years setting aside nickels and dimes so that they could take a trip to visit a child, a daughter of theirs. They never thought they would make it. But she saved the money in 2 years. If that person was a Member when the date to file comes, exercising good faith and so forth, does that mean that he would sit his spouse down and say, "Now, tell me true, have you squirreled aside a little money here?" And if he did not do that, has he exercised good faith or not? This is the kind of thing the Senator is talking about.

Mr. CLARK. No, I am saying that we ought not to create the impression that if one does not ask or find out either about his own holdings or his wife's or dependent's holdings, there is no problem at all about not reporting those things we have not asked about. That is the only concern I have.

Mr. NELSON. For the record, is the Senator saying that in the case I suggested a moment ago, a person would not have been exercising due care and good faith if one failed to make that inquiry of one's spouse at the time one filed the report?

Mr. CLARK. I would not think it would be reasonable for him to necessarily assume that he has to make that kind of deep inquiry.

Mr. NELSON. Then what inquiry does he have to make?

Mr. CLARK. I do not see anything wrong with sitting down with a spouse or a dependent and saying, "It is time this year for us to file." I do not see anything wrong with simply sitting down and saying, "Now we are going to file our accounts with the Senate as required by law. Let us figure out what they are." They are gone through, they are brought in, and that is it. To be able to say to your spouse, "I do not want to know any of your holdings because if I know that, I have to file it." I do not think we want to give particular encouragement to that approach.

Mr. NELSON. May I say to the Senator, if any Member of this or any other institution wants to consciously engage in fraud, evasion of the law, or anything else, they may do so and nice little golden rules will not solve that. In the ordinary family situation each spouse knows what they have. Is the Senator saying that if a spouse acquired some assets and did not notify the other spouse over a period of time, and the Member failed to ask the spouse, whom the spouse never supposed had any assets, that the Ethics Committee is going to say that Member did not exercise good faith in a case before it?

Mr. CLARK. Not at all.

Mr. NELSON. The Senator was saying he did not see anything wrong with a Member sitting down each year with his spouse and saying, "What do we have, Honey?" I just say we are creating a situation that is impossible to live with.

Mr. CLARK. Does the Senator argue that it is inappropriate for a Member to sit down with his spouse and dependent and ask such a question?

Mr. NELSON. I say in almost any situation I can think of, two married people know what each other's assets are. All this does is say, "Reveal what you know." If a Member is a liar, so he is a liar. If he is found out, he is sent to the Ethics Committee. But to start setting up little rules about having to comply with an exercise of good faith, and so forth and so on, will be absolutely meaningless. If a Member wants to say to his spouse, "Do not tell me anything," does the Senator suppose one day he will come before the Senate Ethics Committee and say, "I told my wife not to say anything." Nonsense. We are writing provisions in here that do not mean anything, that accomplish no purpose, and just bring disrespect upon the sensible rules I hope we are going to adopt. I am opposed to it.

Mr. JAVITS. Will the Senator yield?

Mr. SCHMITT. I yield 1 minute to the Senator from New York and 2 minutes to the Senator from Kansas.

Mr. JAVITS. Mr. President, all I was trying to state was that the agreed upon colloquy ended when Senator RIBICOFF said:

> I would like to ask the Senator from New York whether he interprets this compromise agreement to require the disclosure of any assets which are so transferred from an officeholder to a spouse or dependent.

That is the only point I was trying to make. That ended our agreed upon interpretation of these amendments which hopefully will be adopted. On everything else, every Senator has a right to his views of the facts, of the law, whatever, and he has a right to state them. I just wanted to make that point clear, which I do now.

Mr. SCHMITT. I yield 2 minutes to the Senator from Kansas.

Mr. DOLE. Mr. President, this Senator is bothered by the idea that normally, in the absence of a specific property division or agreement, the interests of a spouse or dependent are constructively controlled by the reporting individual.

That happens not to be the case in many marriages. I would suggest that there may be a relationship where the spouse comes into the marriage with her own or his own checking account, or their own job. I do not understand the distinguished Senator from Iowa saying that we necessarily can just sit down every year and say, "We are going to fill out this report."

What if the spouse says, "It is none of your business." Is that a reasonable effort to find out what property your spouse has? I would like someone to respond to that question. Are we required, if a spouse has separate property, a separate job, a separate checking account, to somehow investigate that? That is in the colloquy. It says "normally." It is not normal these days. I think it is abnormal.

Mr. JAVITS. The Senator has just answered his own question. The colloquy says, which is why it is satisfactory to me and I think to many others, "in the normal family situation." The Senator has just said it is not normal so, therefore, it is not encompassed within this expression which is used in this section.

Mr. DOLE. In other words——

Mr. JAVITS. If the Senator will forgive me, we cannot get into individual finite details, obviously. Probably there are 100 different situations in the Senate. I was willing to accept that fact, that the burden of proof would then be on a Member if he ran into a situation like this to show that his situation was not "the normal family situation." If he did, then he would have to justify it on the circumstances of his case.

Mr. DOLE. Without going the extra step suggested by the Senator from Iowa?

Mr. JAVITS. We just wrestled that one. We should leave it be.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. I wish to compliment the effort made by all parties, Mr. President. I think we do have an agreement in an amendment here which does protect the basic individual rights of spouses and dependents and at the same time reflects the purpose of this resolution. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SCHMITT. The Senator from New Mexico yields back the remainder of his time.

Mr. NELSON. Mr. President, has a rollcall been requested?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Does the Senator from Wisconsin yield back the remainder of his time?

Mr. NELSON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico, amendment No. 153. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. RANDOLPH) and the Senator from South Dakota (Mr. ABOUREZK) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from Florida (Mr. STONE) are absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mr. HUMPHREY) and the Senator from West Virginia (Mr. RANDOLPH) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Idaho (Mr. McCLURE) is necessarily absent.

The result was announced—yeas 93, nays 1, as follows:

[Rollcall Vote No. 69 Leg.]

YEAS—93

Allen	Goldwater	Moynihan
Anderson	Griffin	Muskie
Baker	Hansen	Nelson
Bartlett	Hart	Nunn
Bayh	Haskell	Packwood
Bellmon	Hatch	Pearson
Bentsen	Hatfield	Pell
Biden	Hathaway	Percy
Brooke	Hayakawa	Proxmire
Bumpers	Heinz	Ribicoff
Burdick	Helms	Riegle

Garn	Metzenbaum	
Glenn	Morgan	

NAYS—1

Durkin

NOT VOTING—6

Abourezk	Humphrey	Randolph
Gravel	McClure	Stone

So Mr. SCHMITT's amendment was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. BENTSEN). Under the previous order, the Senator from Alaska (Mr. STEVENS) is recognized to call up an amendment on which there shall be 1 hour of debate to be equally divided and controlled.

AMENDMENT NO. 134

Mr. STEVENS. Mr. President, I call up amendment No. 134.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 134 to amendment No. 65.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At page 24, line 12, add subparagraph 5.

5. (a) In the alternative to any other provisions of this rule, a Member, officer, or employee of the Senate may comply with this rule if he makes a regular public disclosure, in a form and manner as prescribed by the Select Committee on Ethics, of any gift, favor, service, or anything of value exceeding $35 per contributor accepted by himself, his spouse, or dependent thereof from any person, business, or other entity under circumstances where he knows by the exercise of ordinary care that such gift, favor, service, or thing of value will, might tend to, or is intended to affect the present or future performance of official duties—

(b) each supervisor, as defined under rule XLV, subparagraph 11, shall personally review and sign disclosure statements filed by an employee under his supervision;

(c) each disclosure filed pursuant to this subparagraph shall include: (1) the identity of the contributor; (2) the nature of the gift; and (3) the date and location of the receipt of such gift; and

(d) such public disclosure shall be made quarterly on dates to be established by the Select Committee on Ethics.

Mr. STEVENS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Those Senators desiring to converse may retire to the cloakroom. The Senator will not proceed until the Senate is in order.

The Senator from Alaska.

Mr. STEVENS. Mr. President, I offer this amendment so that we might consider the alternative of full disclosure to the limitations we apply to gifts in this resolution. I hope each Member will look at the first section of rule XLIII on page 21. I will read it:

No Member, officer, or employee of the Senate shall solicit or accept a present or future gift, favor, service, or anything of value from any person, business, or other entity, under circumstances where he knows, by the exercise of ordinary care, that such gift, favor, service, or thing of value will, might tend to, or is intended to affect the present or future performance of his official duties.

Let me cite to the manager of the bill some examples that have actually occurred during the time this Senator has been in the Senate.

We had a problem that raised national concern over the quality of the welds on the Alaska oil pipeline. I called the company involved and said, "I want to see that pipeline. I want to see the area where these welds are questioned." That meant I was soliciting a service, because there is no other way to go to see that pipeline, except to go with the company.

The company has planes under charter, and these are either twin-engine turbo-prop planes or twin engine jets. The turbo-prop costs $600 an hour to ope- the quality of the welds.

The company, realizing that my interest was official, arranged to take me out there. We flew to one of the camps, and then we took a helicopter to fly from the landing strip to the camp involved, where serious question was raised as to the quality of the wells.

So, having solicited the ride, I accepted the service, and I accepted it for the purpose of influencing the future performance of my official duties. I wanted to know what was going on, and the company wanted me to know what was going on, so that I could express the Alaskan point of view concerning this issue.

There was another situation, which I mentioned to the manager of the bill the other day, when we had brought into the State of Alaska one of the new balloon devices for harvesting timber. When I learned that this balloon device would be unveiled in southeast Alaska, I called the company involved and said, "I want to see this." This new technology may mean that we will not have to build logging roads any more, provided it proves successful on these islands of southeast Alaska. The company was very pleased with my interest in this balloon device and arranged to have a plane pick me up and fly me down to the island where they were logging.

It was done for the purpose of influencing my actions as a U.S. Senator. It did influence them, because I have supported that particular method of harvesting timber; and I believe we can eliminate some of these problems in the future with respect to logging from islands such as those in the southeastern part of Alaska.

I have raised to the manager of the bill the question of section 1. If the President of the United States invites one of us, as Members of the Senate, to a working breakfast in the White House for the purpose of influencing us on an issue before the Senate, we are accepting a service or a gift or a favor, whatever you want to call it. It is a breakfast, paid for by the President of the United States, and he seeks to influence us in the performance of our official duties.

That section has no business in this gift provision, so far as I am concerned. The balance of this amendment, however, does have merit, and I offer an alternative to that section.

However, I again raise the question of section 1. I urge every Member of the Senate to take a look at it; because if we mean to have a new official code of conduct that Senators will really live up to, the first section is something no one can live up to if he is honest with himself and the American people. There is nothing one can do in this respect when meeting and discussing with his constituents, whether it is the American Legion, or the people who are in favor of the hot lunch program, who by the way came here the other day, and had a list of things they were interested in, in terms of legislative action by Congress. Attached to it was a note which stated something along the lines of . . .

You are invited to a cocktail party. By the way, Miss So and So, from your State, will be there to be your hostess.

Who is kidding whom? They are trying to influence us in the performance of our official duties, and they are offering us a gift. They are offering us the right to attend a hosted cocktail party or lunch, or whatever it might be. There is nothing we can do to live within the confines of section 1 and be honest with ourselves and the American public.

My amendment attempts to go beyond that by offering an alternative of full disclosure, to those limitations provided

in this rule. Under this rule, if a corporation is registered under the Lobbying Act or an individual is registered as a lobbyist, or if a corporation or a labor organization has a political action fund, the limitation that applies is $100.

Again I tell the manager of the bill about an example which really happened. I was in my State, making a speech at Mount McKinley National Park. I received a call from a labor organization indicating that there was a matter coming up the following week in which they were interested. They wanted to tell me how they felt. I said, "I'm sorry. I have to catch a plane to go to Anchorage, and from there I have to go on to Washington, and I cannot take any time."

They said: "If we come and get you with our plane and fly you down and land you in Anchorage so that you can get on the plane that goes back to Washington, will you discuss it with us?"

I said, "Of course."

So they brought their plane up, and I rode back to Anchorage from Mount McKinley National Park; and they told me of their interest in legislation that was pending before the Senate—as I think they have a right to do. In doing so, they provided me a service, and that service, as I pointed out, is $600 an hour for a turboprop jet. If I called for that plane myself, it would have cost me $1,200. They took me back to Anchorage because it was for their convenience to do so, in order to assist me in representing them.

I say to my friend—and he is my good friend—that to put a limit of $100 on those people who have already taken action to participate legally in the lobbying process, or legally in the process of funding those who are candidates for election to Congress, is wrong in my opinion.

The committee has chosen that course. My amendment offers the alternative of full disclosure, under rules promulgated by the Ethics Committee, on a quarterly basis. Let a Senator have the alternative of listing anything he has accepted which exceeds $35.

That comes back again to the very interesting language in my amendment, which is from the resolution directly. It is from the first section of rule XLIII, and it reads:

> . . . under circumstances where he knows, by the exercise of ordinary care, that such gift, favor, service, or thing of value will, might tend to, or is intended to affect the present or future performance of his official duties.

Many of my friends have said to me, "Do you really mean to put that in there? That is right out of the bribery statute. You mean you want to go and admit that you have accepted a bribe?"

I called my friends' attention to the fact that it is right out of section 1 of this ethics resolution, because that says that when I accept the invitation of the President of the United States to have a working breakfast with him, to discuss appointments, or if I go to a meeting of the Associated General Contractors, or to a meeting of the boilermakers and accept a drink and discuss with them their legislative program, I have accepted a bribe.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. NELSON. There is a difference, in that with respect to the section referred to by the Senator, describing the circumstances in which the Member knew or should have known that the gift was given for the purpose of influencing a vote—the section provides that under those circumstances, the Member should not accept the gift. That is quite different from the situation of accepting and reporting it.

I happen to think it is an unnecessary piece of language in there, and I did not think it should be included, because that is obvious, if that is its purpose.

Mr. STEVENS. The Senator is saying that if it is given to a Senator with a criminal intent, he has committed the crime of accepting a bribe. If it is given to the Senator for the purpose of carrying out his constituent's right to petition a Member of Congress to properly represent them, it is not a bribe; except that the Senator says that even if it is a gift, it should not be accepted.

Again, I call the Senator's attention to the labor union that brought the plane to Mount McKinley and took me to Anchorage. That was a service which I had solicited. Was that a bribe? I do not think it was. Was it a gift? Certainly it was. Under the Senator's rule, it was a gift. It was a service provided to me at my solicitation.

The difference between bribery and gifts, I think, is there, between title 18 and this rule. But the problem is that the committee, in its wisdom, has seized upon the bribery language and put it into the rule. So that, in effect, if you accept a gift under those circumstances, people can say, "Ah ha, he was just bribed by a labor union," or by the person who provided the transportation.

I urge Senators to take a look at section 1. It is the most harmful section in the entire resolution. It is a standard of conduct with which one cannot comply in good faith and good conscience as a Member of the U.S. Senate.

Does the Senator seek time?

Mr. BUMPERS. I just wanted to ask the Senator a question.

Mr. STEVENS. Yes.

Mr. BUMPERS. I am not sure how the section reads. But it is a common occurrence that when I go home I land in Little Rock and have a speaking engagement with a chamber of commerce in the southern part of the State, normally they will have a plane at Little Rock to fly me to the community which is not served by a commercial airline.

I received an opinion last year from the Federal Election Commission saying that that did not constitute a contribution as long as I was not a candidate. There was nothing wrong with it.

My question is now under this resolution could that be construed as a gift?

Mr. STEVENS. Yes. And, what is more, it is not only a gift but if the plane happens to be owned by a company or a labor organization which as a political action committee or a registered lobbyist, the limitation is $100, and I think in Arkansas you can fly just about the same distance for the same amount as in Alaska. I mean the cost of operating a plane is not that different. You are not going very far in small planes provided for the convenience of the Senator or the constituency under this rule unless something is done to make certain that we understand that those services provided to assist you to carry out your official duties, even though they are provided with the intent of influencing you, are still not to be included within the realm of this section.

Mr. BUMPERS. Will the Senator allow me to propound a question to the floor manager on that point?

Mr. STEVENS. He has time on this, yes.

Mr. BUMPERS. Mr. President, will the distinguished floor manager yield for a question on his time? It is not the Senator from Alaska's right to yield, I recognize, but I think the Senator from Alaska will permit this.

Mr. NELSON. I will be glad to yield time.

Mr. BUMPERS. The first question I asked the Senator from Alaska was if I fly from Little Rock to another part of the State in a private plane to keep a speaking engagement to a nonpartisan group would that be considered a gift under this resolution?

Mr. STEVENS. The answer is, "Yes."

Well, it is a service. I do not see how the Senator can hesitate at all. You are accepting a service which, if you wanted to go and they are coming after you, you would otherwise have to pay for yourself.

Mr. NELSON. I would appreciate it if the Senator from Alaska would not decide when I should hesitate. [Laughter.]

If the question the Senator is raising is if the Senator is invited to speak in his State or any place, for that matter, and is provided transportation, that is acceptable. There is no prohibition against that.

Mr. BUMPERS. What if the plane is owned by a labor organization or some business firm that has a PAC?

Mr. NELSON. Is this the kind of a case where it is the Arkansas Federation of Labor, and the Arkansas Federation of Labor had a plane or chartered a plane or is it the Chamber of Commerce and a member of the Chamber of Commerce?

Mr. BUMPERS. Let me give you two illustrations. Let us assume I am going to the southern part of the State to speak to a Chamber of Commerce banquet, and the AFL-CIO provides me with a plane to fly from Little Rock to that town.

Mr. NELSON. I do not think I have to answer that. If that were the case, the chamber would not let you speak. [Laughter.]

That would be a case prohibited under the rules.

Mr. BUMPERS. If I were going to the same town to speak to the COPE convention and the AFL-CIO picked me up, would that be prohibited?

Mr. NELSON. No.

Mr. STEVENS. Why not?

Mr. NELSON. Because they are authorized to provide transportation to the speaker to get there. They can pay for the commercial ticket, they can charter a plane to get you to their meeting; if they own a plane, they can take you to the meeting.

Mr. BUMPERS. Let me ask the Senator a third question. Let us assume that going to the same destination, a corporation which does not have a PAC of its own but which belongs to an association, for example, let us assume Weyerhaeuser, which does not have a PAC but belongs to the National Association of Foresters, which does, and they pick me up, would that be prohibited?

Mr. NELSON. Pick you up to fly you to one of these meetings?

Mr. BUMPERS. No, flies me to a Chamber of Commerce banquet.

Mr. NELSON. Are they a member of the Chamber of Commerce?

Mr. BUMPERS. Yes.

Mr. NELSON. It is not prohibited.

Mr. STEVENS. I might interrupt—would the Senator allow me to interrupt—to clarify the facts a little bit? I think the Senator did not correctly answer one question, and that is where the union provided you a plane to speak at a convention. If they are paying you an honorarium they can provide the transportation. There is nothing in this rule that says if you are not provided an honorarium, that you can accept a gift of service of transportation that is not subject to this limitation of $100 or $250.

Mr. BUMPERS. Does the floor manager agree with that statement?

Mr. STEVENS. Well, he has to, because it is in the report.

Mr. NELSON. You are raising the question if a corporation places a——

Mr. BUMPERS. No, we passed that. In the question posed by the Senator from Alaska if I am speaking to the COPE convention, and they pick me up in a plane, the AFL–CIO picks me up in their plane, and they are paying me no—they are not paying me an honorarium, do I correctly state the point?

Mr. STEVENS. Yes.

Mr. BUMPERS. They are not paying me an honorarium, the Seantor from Alaska says their flying me to that convention would still be prohibited under the rule.

Mr. NELSON. That is not correct.

Mr. STEVENS. Where the Chamber of Commerce does it it is still under the gift section and not the honorarium section. Therefore, it is a gift of $150. If you are going under the honorarium section, you have to receive an honorarium to fall under it. We have two different rules here, and we have to be careful. One deals with earned income and the other with gifts. If you do not have any earned income, you come under the gift section. These are several good lawyers around here, and I urge them to take a good look at it. I do not see how you can get under the honorarium rule and the provision that says reasonable expenses, when you are not getting paid. You have to be under the gift section, in this case.

Mr. NELSON. Any transportation to a meeting where you are going to speak is not a gift.

Mr. STEVENS. Where does it say that in the resolution?

Mr. RIBICOFF. On page 23, beginning at line 7, "reimbursement for other than necessary expenses," is a gift, but if you are being reimbursed for necessary expenses——

Mr. STEVENS. It is not a necessary expense for them to send a plane after him if he can ride on a commercial plane. We are getting down to a different situation. Again, this relates to my State. I ask the Senator, is it a necessary expense if I could wait until tomorrow and take a commercial plane, rather than send a plane after me tonight?

Mr. RIBICOFF. On page 20 of the report:

> When an individual required to report under this rule is reimbursed for (or is provided) transportation, lodging, or food, such reimbursement need not be reported.

We were very clear in the report to set out in the first paragraph on page 20 that we contemplated that situation. We understood that.

If you were going to be giving a speech or going back home to do something for an organization, and they provided you transportation, lodging or food, then you did not have to report it.

Beginning in the first paragraph on page 20——

Mr. DURKIN. Mr. President, will the Senator yield for another question?

Mr. STEVENS. Wait, just a minute, please. I want to be sure we understand what is necessary under the gifts rule, right? Under the honorarium rule the question is what were the expenses that were paid. As long as you are within the section of the report that deals with the fact that you cannot go out 2 days early and come back 2 days late. But the necessary test still applies to gifts, and again I raise the question posed by the Senator from Arkansas about the plane that comes up to get him for his convenience to take him to a town where he could wait and take commercial transportation. The question of necessary expense is still raised. Perhaps the Senator—I would be happy to have a legislative history that says he can take his plane, because if he can take it from Little Rock to wherever he wants to go, then I can take it from Anchorage to Prudhoe Bay.

Mr. NELSON. I think it was clearly the intent, although, as the Senator knows, one cannot write into a committee report or a statute every conceivable case that could be raised. I think the committee report makes it clear that if transportation may be furnished by any organization for the Member to come and speak to them; they may do it by reimbursing the Member for a ticket, they may do it by buying a ticket and sending it to the Member; they may do it by sending a plane for the Member. It is not a gift. They are providing transportation, and I do not think the fact that one could catch a commercial plane 1 or 2 hours later or 1 hour earlier makes any difference at all.

Their responsibility is to provide the transportation for the Member to get there to speak to the organization, however, they wish to do it. I do not think there is any question, under the rule or under the intent of the committee, they may furnish it.

Mr. STEVENS. What if I solicit? Suppose I ask them:

> I want you to send a plane after me, come get me, and I will speak to you; if you don't, I won't.

Mr. NELSON. I do not think there is any question about that either.

Mr. STEVENS. Even under section 1?

Mr. NELSON. No. I do not think there is any question under section 1 at all.

Mr. STEVENS. As long as I am making a speech they can influence me, if I am soliciting.

Mr. NELSON. I do not think there is anything wrong.

Mr. STEVENS. The Senator did not hear me.

Mr. NELSON. If a Member is going to speak to an organization, they are asking the Member to speak and if it is more convenient to supply transportation one way or the other I do not think there is any doubt whatsoever but that that is authorized.

Mr. STEVENS. But the Senator did not hear me. As long as I am going to speak it is all right if they pay my way or send a plane. If I am going to listen to them, to influence me in the course of my official duties and, if I am not going to make a speech, they are not paying me an honorarium. They want me to come listen to them so I can come back here and properly represent them. Does that change the Senator's mind about the service? Is it limited to $100 if they send a plane after me so I can go listen to them?

Mr. NELSON. The Senator's fertile mind raises a point I had not thought about. But I guess it would be clear that if the Senator is being invited to meet with his constituents so he can hear what their problems may be, that is clearly covered.

Mr. STEVENS. Now we are getting someplace. Will the Senator agree with me? I hope the Senator from Connecticut and members of the Ethics Committee will listen. If a Senator is provided a service, whether he solicits it or not, to assist him in the performance of his official duties as a Senator and that service involves transportation, whether be it by automobile, bus, boat, or plane, is that to be considered a gift or a service within the confines of this rule and therefore subject to a limitation as far as the $100 or $250 limitation?

Mr. RIBICOFF. Personally I do not think so. The Senator's constituents in Alaska are saying to him:

> There is a meeting involving environmental factors of a large section of our State and there will be a large meeting with different input from all the groups, and we think it is only right and it is your duty as a Senator from Alaska to listen to all points of view.

The Senator replies:

> How am I going to get there?

They say:

> We will send a plane.

If they provide the plane, I think that is all right.

Mr. STEVENS. I do, too, but I think it is still within the confines of this rule, unless the Senator agrees it is out.

Mr. RIBICOFF. I can see the situation where the officers of a company state:

> We are having the 50th anniversary celebration of the founding of our industry in Bridgeport, Connecticut, and we would like you, Senator Ribicoff, to be present at the 50th anniversary of the founding of our company.

I say:

Well, you know we are pretty busy down here and it is hard for me to get a plane to Hartford and drive to Bridgeport and get back here and vote at 6 o'clock.

They respond:

We will send our company plane to get you to Bridgeport and after the ceremony fly you back to Washington so you make your vote.

In that event, I do not think I have violated anything in this code.

Mr. STEVENS. I am glad the Senator said that.

Mr. RIBICOFF. If the Senator from Arkansas is to make a speech at some place in Arkansas, and they say, "If you come and make the speech we will supply you a plane," whether he gets an honorarium or does not get an honorarium, that, in my opinion, is legitimate.

Mr. STEVENS. I have great faith in the Senator's ability to interpret the English language as well as any of the rest of us. I hope he would read between lines 15 and 21 on page 21 and tell me, if I asked them to send a plane after me, how I am not soliciting a service to influence me in official duties?

Mr. NELSON. May I comment on that? And I wish the other members of the committee were here.

Let me say to the Senator from Alaska, from the first minute I looked at the paragraph I have been arguing with the staff about the lack of necessity, the confusion, and foolishness of having that paragraph in there. It is a wordy restatement of the Golden Rule and totally unnecessary, totally confusing, and I am personally prepared to strike it out personally.

Let me read the language. I do not think it makes any sense at all, and someone who was working overtime and got tired must have written it:

No Member, officer or employee of the Senate, shall solicit or accept a present or future gift, favor, service, or anything of value from any person, business, or other entity under circumstances where he knows by the exercise of ordinary care that such gift, favor, service, or thing of value will, might tend to, or is intended to affect the present or future performance of official duties.

What does that mean?

It is nonsense, and I do not even understand it. I have been through it 10 times with staff. As far as I am concerned I am prepared to knock it out of there unless someone tells me it does mean something.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. RIBICOFF. I say I agree with the chairman on the condition that our colleagues stop this discussion, on the proviso that the chairman knock it out of the resolution.

Mr. STEVENS. Mr. President, I move to modify my amendment.

The PRESIDING OFFICER. The clerk objection to the modification?

The legislative clerk read as follows:

On page 21, strike lines 15 through 21.

On page 21, line 22, strike "2." and insert in lieu thereof "1."

On page 23, line 6, strike "3." and insert in lieu thereof "2."

On page 24, line 6, strike "4." and insert in lieu thereof "3."

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. This modification removes the section in question that gives me so much problem.

The PRESIDING OFFICER. Is there objection to the modification?

Mr. NELSON. Is the Senator modifying the amendment that is at the desk?

Mr. STEVENS. That is right. It has the effect of withdrawing amendment No. 134, and instead deletes section 1 of the proposed rule 43.

Mr. NELSON. So the Senator is simply striking out lines 15 through 21.

Mr. STEVENS. The rest of the amendment will be struck but subject to the history that I just heard which states that if a Senator solicits transportation to take him to perform his official duties, that that is not to be considered subject to the limitation of $100 and $250 that is within this section.

Mr. NELSON. Let me see if I can make a record here that will be acceptable to Senator CLARK, Senator RIBICOFF, or anyone else for that matter.

This has been written carefully to try to cover the circumstances raised by the Senator. Let me say, with regard to travel by airplane, the committee believes that there is a latitude for use of private planes in certain limited circumstances. When no other transportation is reasonably available because of the time factor or remoteness of a destination and the trip is for official business, then it would not be a gift if a private plane is used by a Senator.

However, this would not permit the use of a private plane by a Senator to go home for weekends or to fly to vacation spots in private planes. That must be obvious anyway. The use of such planes should only pertain to situations where a Senator feels there is no other reasonable way to get to the place in connection with official duties and there is a pressing need to reach the destination. There should be reimbursement out of official funds for these types of trips at ordinary commercial rates pertaining in the United States.

I believe that to be the law now, that one can charter a plane if it is necessary, and one can reimburse for the cost of private transportation, but, in any event, this part of colloquy represents my view and I ask if the other committee members endorse that.

Mr. DURKIN. Mr. President, will the Senator yield for a question?

Mr. STEVENS. I shall take 1 minute to clarify this in terms of what the Senator from Connecticut just said.

He is asked to make a speech in Connecticut, and because of the timing of his Senate duties, he says, "I cannot make it," and they say, "We will send a plane after you, and we will see that you get back there for the vote."

Is the Senator saying if he does that, he ought to reimburse them for the cost of what it would have cost him to fly back and forth? The Senator is not saying that, is he?

Mr. NELSON. No; what we are saying in that case is that if you are being requested by an organization in your State, or any place, to come and give a speech, they may provide the transportation in any way that suits your convenience.

Mr. STEVENS. When I went down to look at the pipeline in connection with that weld problem I mentioned earlier, there were a bunch of welders there that were mad as hops, and I gave them a little off-the-cuff speech about what went on back here, but that was not the purpose of my trip. I was going to inspect the pipeline. Is the Senator saying that if the company provides me transportation in that instance, I have to pay for it, out of official funds, but the Senator from Connecticut does not have to pay out of his official funds if he goes for the purpose of speaking, even though it is a trip without an honorarium?

Mr. NELSON. No. If an organization is providing the transportation, obviously that is not reimbursable, and they should pay for it. But if the Senator is attempting to get around his State, and it is not convenient, because of lack of availability of transportation, the Senator may charter a plane or he may ask a private owner of a plane to transport him, if that is all that is available, and then reimburse at commercial rates out of his official accounts for that trip. However, if it is provided free by a private source of some kind, not for the purpose of speaking at a meeting, then it comes under the section of a reportable gift, if it has a value of over $250.

Mr. STEVENS. Just so I understand, and I think we have come a long way down the road that I wanted to come down: As I understand this, in terms of my flight, for instance, going back to see the balloon that was taking the logs up, when I called that company and asked them to show me that balloon so I could know whether or not we ought to increase the road funds in the forest or stimulate further use of these balloons, when they come and get me and take me out and show me, and bring me back again—that is two round trips for them, from the island—if I reimburse them at the rate of what it would have cost me to fly commercially or to charter a plane, then, as far as the Senator is concerned, I have complied with this rule; is that correct?

Mr. NELSON. I think it is reasonably clear that you have complied with it if you pay them out of official funds for it. In the case the Senator states, if within his State, where they are using this method of forestry or if the Senator were to come to look at a mine or a new mill or something like that—I have not thought about that. My inclination would be that they ought to be able to fly you into their place to look at it, and then back.

Mr. RIBICOFF. Mr. President, may I make a suggestion? We are going to be on this resolution a couple of days. The purpose of this kind of colloquy on amendments is to show weaknesses or uncertainties in legislation.

If there is an uncertainty or question in the mind of any Senator, we ought to try to do something about it. I wonder if

the distinguished Senator would be willing to lay aside his amendment—we are not going to finish this week, anyway, I understand—so that his staff, having listened to the colloquy, could try to work out better language.

Mr. STEVENS. Would the Senator agree to strike section 1, and try to improve the language of the balance, on the gift section, later?

Mr. RIBICOFF. That is right. The chairman has agreed to strike section 1, and that is perfectly all right with me. But I think we could save a lot of time if we let the staff, who have been on the floor and heard this colloquy, try to perfect language to take care of the situation.

Mr. STEVENS. The Senator from Wyoming wanted to speak on this point.

Mr. HANSEN. Mr. President, I do not wish to impose on the Senator's time. I do have 80 minutes on amendments of my own. However, I do understand his situation, and I can understand full well what the Senator from Alaska is talking about.

I have made trips to Wyoming to inspect surface mine reclamation lands. There are no commercial airlines going into those areas. There is no way to get there except by private auto.

Mr. STEVENS. Or plane.

Mr. HANSEN. Or private plane. I have done precisely what the Senator from Alaska has done. To say the very least, and to be as charitable as I can be, I have to say that when this bill was put together by the staff, there were a lot of things they did not think about or anticipate.

As I understand, I think of a gift as presumed to be something of benefit to me, and perhaps of equal detriment to the person who makes that gift. In this case, I would have to join with my friend from Alaska in saying I was simply trying to do a better job.

Here would be another situation: Suppose a disaster strikes, and time is of the essence, and you want to get out to some place. You may be aware there are no commercial flights scheduled, and the quickest way to get there is to go in a company plane.

I think you have a responsibility to find out what has happened, to see what can be done to alleviate the suffering and to bring about conditions which would help restore things to normal.

I would have struck the entire gift provision, but I realize that probably is not going to happen. I think at the very least the first section should be stricken, and I believe that has tentatively been agreed to. Am I right about that?

Mr. NELSON. Yes. I just wanted to say to the Senator from Wyoming that I commend the Senator from Alaska for his great influence in being able to strike lines 15 through 31, which I have been trying to do for weeks without success. I thank the Senator for his help.

Mr. STEVENS. In view of the fact that the Senator has said they were meaningless, I accept the compliment.

Mr. NELSON. Let me make one further comment. The Senator from Connecticut (Mr. RIBICOFF) did suggest laying the amendment aside because some questions were raised on which I cannot speak for the committee. But it has always been my view that if one is going to speak to his constituents, and they wish to provide the transportation, however it is provided, it can be accepted. On the other hand, if one wants the opportunity to see some industrial development, or some strip mining operation, some new process to learn more about it, and if the people involved in the operation provide the transportation, it is perfectly okay to reimburse from official funds if you want to travel by plane to look at it.

But Senator RIBICOFF has suggested setting the amendment aside.

Mr. RIBICOFF. There is no point in setting aside section 1. We have agreed to strike that right now.

Mr. NELSON. We have not voted yet.

Mr. RIBICOFF. To set aside the subject for further consideration of the ramifications of the limitations of $150 or $250, after we have written out the colloquy, or whatever the two Senators wish to do.

Mr. STEVENS. I wonder, if there is no objection, if we could adopt the amendment——

Mr. NELSON. The Senator from New Hamoshire has some comments he would like to make. I would like to yield first to him.

Mr. President, how much time does the Senator from Wisconsin have remaining?

The PRESIDING OFFICER. The Senator from Wisconsin has 11 minutes remaining, and the Senator from Alaska has 10 minutes remaining.

Mr. NELSON. The Senator wants 2 minutes. I yield 2 minutes to the Senator from New Hampshire.

Mr. DURKIN. Mr. President, to clarify my understanding, let us go back to Alaska for a moment. Its people are not my constituency. There is no speech involved, and no honorarium involved. Again, it is not the State that I represent. And a company is flying me out, in a helicopter, to an oil rig in the Cook Inlet to see an oil rig functioning.

Those landing platforms are small enough. There are not that many people who are adept in landing in about 3 square feet of space in a windswept inlet. Would that run afoul of the second section?

Considering it is official business, it is committee business. There was no committee reimbursement contemplated, but it involves questions of energy, natural gas, oil, and taking a look at the Alaska pipeline.

It is not a Senator's State, no constituents are involved, no speaking fee involved, no speaking honoraria.

Then the second question: If a Senator is in his State and there is the practice of a rental car company making available to a Member a car at cost, is that considered a gift? Is that considered a gift under the ethics code?

Mr. STEVENS. Let me address the first question. The Senator from Connecticut, the Senator from Wisconsin, and the rest of us can deal with it regardless of how we deal with the limitations of $100 or $250.

Incidentally, I took a trip and saw the *Glomar*. I thought the *Glomar* might be useful in terms of development of the Outer Continental Shelf of Alaska. I went to see that vessel to try to determine its advantages and limitations in the climate that we have as far as the Gulf of Alaska is concerned. That was in California, not in my State. But it was official business. I think it was official business.

If the Senator comes to my State and wants to visit a platform to take a look at one, and I hope he will, there are very few people I would send the Senator out with to land a helicopter on a platform. They are all people working for the oil and gas companies.

I do not see that type of activity within the scope of this amendment. We will define that, I am sure, as we go through the concept of what are official duties.

Official business is not limited to a Senator's own State. I believe the Senator from Connecticut would be willing to conduct a study to determine the concept of official duties.

As far as the second point is concerned, I believe that has already been covered by the Ethics Committee. The practice in the past has been that we rented automobiles at a fleet rate from car rental agencies. The Ethics Committee informed me that was considered in violation of the old ethics rule and we all discontinued our rentals at less than the cost at which cars were available to the public.

That is another subject about which I would urge the Senator to inquire of the Ethics Committee people.

Mr. DURKIN. But it was coming out of a consolidated account. It was official business but the rate charged the consolidated account was at cost rather than cost plus.

Mr. STEVENS. The Senator raises a good question. If one goes into a hotel and asks for a Government rate, he can get a room at less cost than if he forgets to tell them he works for the Government. I tell them I work for the Government and I save some money. It is reimbursed, but I do believe we have an obligation to try to reduce the cost to the taxpayers.

Again, I do not believe that subject matter is within the purview of this section.

Mr. BUMPERS. Will the Senator from Wisconsin yield for a question before we lay this aside?

Mr. STEVENS. We are not going to lay this aside. I hope the Senator will agree to have the vote on the amendment to strike section 1, lines 15 through 21, and get it done, and then go on from there as to the application of the balance of the rule.

Mr. BUMPERS. Let me ask the Senator from Wisconsin this question: A week from tonight the Arkansas bankers will be in town and have a big reception and a big dinner. There are about 35 of them. It is what they call their legislative group. I hear these receptions around town and in some of the fancier hotels cost about $20 a person. I assume the dinner would probably cost around $30 to $40 a person.

Let us assume that my wife and I go to

the reception. That is $40. Let us further assume that they spend another $50 for dinner. That is $90. Those same bankers will be back in town in July and they are going to expect their Senator to be there. Shall I tell them I can come to half of the reception but I cannot stay for the balance and I cannot go to dinner with them, that I would be in violation of the law? Or next Thursday night shall I inquire as to what it is costing them per person to hold that reception and what the cost of the dinner is?

Mr. NELSON. The Senator is addressing himself to another section about which I have some concerns. However, there are two pending amendments that will be brought up and debated subsequently. I would hope we would not get into a debate on those two amendments now. However, I can say something from my casual glance at them.

One amendment would simply say that if it is the annual institutional American Legion, VFW, bankers, Wisconsin Bar Association, what have you, to which the congressional delegations are invited, it would be exempt.

There will be another amendment that I am aware of, if it is called up, which would simply exempt food, beverages, and entertainment so long as there was no overnight lodging involved. We will have those two amendments before us.

Mr. RIBICOFF. If the Senator will yield, I think the best favor we could do for the 100 of us is to outlaw all of these functions and we would not have to attend them.

Mr. BUMPERS. I will vote for outlawing or exempting, but I will not vote for the proposal the way it is presently written.

Mr. PELL. Mr. President, will the Senator yield 2 minutes on the question just raised?

Mr. NELSON. Is this on the amendment of the Senator from Alaska?

Mr. PELL. No. It is on the comment of the Senator from Arkansas.

Mr. NELSON. I wonder if the Senator would withhold that. There are two amendments on exactly that point. Maybe we can dispose of this section now and get to that subject matter later.

Mr. PELL. Very well.

Mr. NELSON. Mr. President, can we have a vote on the amendment striking section 1?

Mr. STEVENS. If the Senator from Wisconsin is prepared to yield back the remainder of his time——

Mr. NELSON. Mr. President, I yield back the remainder of my time.

Mr. STEVENS. Before I yield back the remainder of my time, I would like to know the next order of business, Mr. President.

The PRESIDING OFFICER. The Senator from Maine will present his amendment as the next order of business.

Mr. NELSON. The Senator from Maine has a brief amendment which I believe is acceptable. Does the Senator yield back the remainder of his time?

Mr. STEVENS. I will not be here tomorrow because of a very personal commitment I have made. I have been discussing with the Senator an amendment which deals with the question raised by the Senator from Arkansas, the admission to an event held by an organization or association as an annual or periodic event for Members of Congress. Is it the Senator's intention to address that subject sometime today?

Mr. NELSON. I do not know whether the subject will come up today or not. In any event, I believe it is quite certain the resolution will not be finished tomorrow. If the resolution has not been disposed of, the Senator may bring the subject up on Monday.

Mr. STEVENS. I thank the Senator, and I yield back the remainder of my time.

The PRESIDING OFFICER. Both sides have yielded back the remainder of their time. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment, as modified, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. As the next order of business, the Senator from Maine is recognized to call up an amendment on which there will be 10 minutes of debate, to be equally divided.

UP AMENDMENT NO. 94

Mr. MUSKIE. Mr. President, I call up my amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. MUSKIE) proposes an unprinted amendment numbered 94.

Mr. MUSKIE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On Page 29, strike lines 5 through 12 and insert in lieu thereof the following:

"8. An employee on the staff of a committee who is compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year (unless hired on a per diem basis) shall divest himself of any substantial holdings which may be directly affected by the actions of the committee for which he works, unless the Select Committee, after consultation with the employee's supervisor, grants permission in writing to retain such holdings or the employee makes other arrangements acceptable to the Select Committee and the employee's supervisor to avoid participation in committee actions where there is a conflict of interest, or the appearance thereof."

Mr. MUSKIE. Mr. President, I have two reasons for bringing up this amendment: First, I searched desperately for some way of doing something with this bill which would find the distinguished Senator from Wisconsin and the Senator from Maine in agrecment. I wanted to make some contribution to this bill which would find us in agreement. That is one of my reasons for offering this amendment.

Second, it is designed to get at what I think is a rather tough provision, which is on page 29. This is in the conflict-of-interest section. The language to which my amendment addresses itself begins on line 5. What that provides, as in the bill, is that an employee on the staff of a committee who is compensated at a rate in excess of $25,000 per annum and employed for more than 90 days in a calendar year shall divest himself of any holdings which may be directly affected by the actions of the committee for which he works unless he has received permission in writing from his supervisor and the Select Committee on Ethics to retain such holdings. There are two features to that language that trouble me.

One, it seemed to me that the divestiture provision left too few options to the employee or to his supervisor or to the Ethics Committee. In the executive branch, there are other options which are available—disqualification, for example, from engaging in an activity which poses the conflict, or a blind trust, for example, or some other kind of limitation.

Second, I was troubled that this kind of police work was imposed on the chairmen of committees. I happen to be chairman of the Committee on the Budget, on which there are many professionals whose wage level is above the $25,000 mark. I simply could not see myself taking on that workload and making those kinds of judgments in anything like a thorough manner. So what we have done with this amendment—I shall read the amendment, and I think it explains itself. We have discussed it with the distinguished Senator from Wisconsin and the distinguished Senator from South Carolina. This is how it would read:

"8. An employee on the staff of a committee who is compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year (unless hired on a per diem basis) shall divest himself of any substantial holdings which may be directly affected by the actions of the committee for which he works, unless the Select Committee, after consultation with the employee's supervisor, grants permission in writing to retain such holdings or the employee makes other arrangements acceptable to the Select Committee and the employee's supervisor to avoid participation in committee actions where there is a conflict of interest, or the appearance thereof."

That puts the principal responsibility for oversight with respect to staff and employees on the Ethics Committee. It does provide for consultation with the chairman of the committee in the event a problem arises, and then provides greater flexibility with respect to the action to be taken to insulate the employee from any potential conflict. I think this is a reasonable resolution.

I do not think it needs further explanation, but I yield to my good friend from Wisconsin.

Mr. NELSON. I yield myself 3 minutes.

The amendment is clearly explained, but for purposes of the record for legislative intent, I would like a little bit more elaboration. The Senator mentioned that divestiture may be too harsh and not flexible enough, considering

other alternatives, that the executive branch does have other alternatives, and that there are people with substantial holdings who could never serve in the Government, no matter how valuable they could be, if divestiture were the only answer.

It is correct, is it not, that the staff employees in that salary class must disclose their holdings, just as Members of the Senate do, so that the chairmen of committees, the Ethics Committee, and the public are aware of their holdings?

Mr. MUSKIE. The Senator is correct.

Mr. NELSON. It is also correct that there is much room for flexibility, as suggested by the Senator from Maine, on any one of these large committees which deals with a large spectrum of activities. It may very well be that a staff member who had a substantial holding that might be affected by one piece of legislation would not be affected by 95 percent of the rest of the work of the committee, and it gives the opportunity for the Ethics Committee and the chairman to look it over and decide whether or not that member may participate in the work on that particular legislation.

Is that not correct?

Mr. MUSKIE. The Senator is correct. I think that is a very important point to make.

Mr. BAKER. Will the Senator yield to me for a question?

Mr. MUSKIE. Yes, I yield to my good friend from Tennessee.

Mr. BAKER. I notice in the language that was brought to my attention in the amendment as originally proposed, I believe, in the third line, it says, "unless hired on a per diem basis." Is that language included in the amendment today?

Mr. MUSKIE. Yes, that language is still in the amendment. I just did not read it.

Mr. BAKER. I wonder what the situation would be if, as sometimes is the case, we have a consultant who is hired on a per diem basis who may be paid $25,000 in the course of a year and may be there more than 90 days.

Mr. MUSKIE. That language I left in because it was in the committee language. I had not focused on the implications. The Senator has raised a question I had really not considered.

I wonder if the manager of the bill would explain that. I did not submit that language.

Mr. NELSON. What was the question, may I ask, that one might go beyond the 90 days?

Mr. BAKER. Does this exempt from the provisions of section 8 an employee who may be hired as a consultant on a part-time basis but may work more than 90 days and make more than $25,000? Does this language mean that in such a case, he would not have to go this route? If it does, we have set up two standards of conduct.

Mr. MUSKIE. I have the same reaction, I say to the Senator. I am interested in the answer, too.

Mr. NELSON. As I recall it, the Senator from Idaho (Mr. McCLURE) raised this precise question as to another section in the bill. The intent is not to exempt somebody who might work on a per diem basis endlessly. We attempted to work out, and may well have, an amendment to clarify that question, which is the same as the issue raised by the Senator from Idaho.

Mr. BAKER. If the Senator will yield just briefly, my concern—and I am not familiar with the amendments of the Senator from Idaho—would just be that we are creating two different classes of employees that are subject to different levels of procedure. That concern could be met if that language in the parentheses in the third line of the section 8 were changed to read:

(unless hired on a per diem basis and unless such employee earns less than $25,000 per annum, or for less than 90 days.)

Mr. NELSON. I do not think that gets at the problem, because you may be hiring somebody for a period, on a per diem basis, at a higher rate for 90 days or less.

Mr. BAKER. What is the per diem rate now? Per day, $100 or $135? Is that the maximum?

Mr. NELSON. I do not know what the maximum is.

Mr. BAKER. I think that figure is correct, a GS–18 equivalent, which I believe would be $135 a day; but there is no limitation on the number of days that employee can be hired.

The PRESIDING OFFICER (Mr. LEAHY). The time of the Senator from Wisconsin has expired.

Mr. BAKER. Mr. President, I shall address the question later.

The PRESIDING OFFICER. The Senator from Maine has 1 minute remaining.

Mr. MUSKIE. We ought to be able to solve a lot of problems in 1 minute.

Mr. THURMOND. Will the Senator yield to me?

Mr. MUSKIE. Yes, I yield a minute.

Mr. THURMOND. Mr. President, I think this amendment offered by the distinguished Senator from Maine is practical. I think it improves the wording in the code. As far as I am concerned, I am willing to accept it.

Mr. NELSON. Perhaps this will clarify the question raised by the Senator from Tennessee.

Mr. BAKER. Mr. President, I yield 2 minutes of the bill for this purpose.

Mr. NELSON. On page 39, line 3, that section overlies this issue:

"4. No Member, officer, or employee of the Senate shall utilize the full-time services of an individual for more than ninety days in a calendar year in the conduct of official duties of any committee or office of the Senate (including a Member's office) unless such individual—

"(c) agrees in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate.

Mr. BAKER. The problem is, as I understand the reading of that section, that it does not provide for a consultant who is not a full-time employee, who then may be on the payroll constantly, more or less, as a part-time employee, and in the course of a year earn more than $25,000.

Mr. NELSON. That is true. But we did not see that as the kind of abuse we are——

Mr. BAKER. I think we have a problem, Mr. President. I will try to draft an amendment to reach the problem, rather than trying to deal with it at this point. So I will not proceed any further on this matter at this time.

Mr. MUSKIE. May I have 1 more minute?

Mr. NELSON. I yield to the Senator from Maine.

Mr. MUSKIE. Mr. President, the only thing I would like to suggest to the distinguished floor manager is that the phrase "of any substantial holdings" may well be standards or regulations for the Ethics Committee. It seems to me, there ought to be some objective standard that would be difficult to write into the law. I wonder if we might have some indication here of the desirability of that.

Mr. NELSON. I think the Senator is correct.

Mr. RIBICOFF. If I may respond, I think the Senator from Maine has addressed a basic weakness that will be corrected. I think it would be tragic if the Senate lost the services of so many valuable people who got in as a result of this system.

It would seem to me, first, there would not be so many cases coming before the Ethics Committee, and when a case presents itself to a chairman, he could take it up with the Ethics Committee. I do believe the Ethics Committee would have no difficulty ruling on the cases as they came up. I am sure each member of the Ethics Committee—I certainly would be more than willing and I think I can speak for the other five members—would take these problems up with respective chairmen when they were presented.

I think the Senator has addressed himself to a basic weakness we could rectify between the various chairmen, as a whole.

Mr. MUSKIE. I thank my good friend and the distinguished floor manager.

Mr. NELSON. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maine.

The amendment was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Illinois (Mr. STEVENSON) is recognized to call up an amendment on which there shall be 2 hours of debate to be equally divided and controlled.

The Senator from Illinois.

AMENDMENT NO. 146

Mr. NELSON. Mr. President, I wonder if the Senator will yield for a question?

Mr. STEVENSON. Mr. President, I yield to the Senator.

Mr. NELSON. It is my understanding that the Senator from Illinois has refined this amendment to quite a precise point and that it is highly unlikely that the 2 hours is needed. Am I correct on that?

The PRESIDING OFFICER. Would the Senator from Wisconsin withhold for just a moment and let us have the amendment stated, then he can continue with his question.

Mr. NELSON. I leave the question with the Senator from Illinois.

Mr. STEVENSON. Mr. President, I call up my amendment No. 146.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. STEVENSON), for himself, Mr. RIBICOFF, Mr. CLARK, and Mr. RANDOLPH, proposes an amendment numbered 146.

The amendment is as follows:

On page 32, strike lines 11 through 24, and on page 33, strike lines 1 through 13, and insert in lieu thereof the following:

"RULE XLVI

"PROHIBITION OF UNOFFICIAL OFFICE ACCOUNTS

"1. No Member may maintain or have maintained for his use an unofficial office account.

"2. The term 'unofficial official account' means an account or repository into which funds are received for the purpose of defraying ordinary and necessary expenses in the operation of a senatorial office.

"3. No funds derived from a political committee (as defined in section 301(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) can be used for the purpose of defraying ordinary and necessary expenses in the operation of a senatorial office.

"4. No contribution (as defined in section 301(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) shall be converted to the personal use of any Member, or any former Member who is defeated for reelection or does not seek reelection.".

On page 55, after line 4, insert the following:

"(3) Except as modified by the resolution required to be reported pursuant to section 301 of this title, paragraph (3) of rule XLVI shall take effect thirty days after the Senate takes final affirmative action on the resolution so required to be reported under section 301 of this title.".

Mr. STEVENSON. Mr. President, I ask that the amendment be modified further in accordance with the modification which I send to the desk.

The PRESIDING OFFICER. The amendment will be so modified.

Mr. STEVENSON. Mr. President, in response to the question from the distinguished Senator from Wisconsin, this amendment has been refined. It has been printed and made available to the Senators. It has also been debated at some length. So it should be fairly well understood by all of the Senators now.

That being the case, I would not propose to take long on it. The proponents might need about 40 minutes; if the Senator would be willing to agree to a further limitation of 40 minutes on a side, that would be agreeable to me.

Mr. NELSON. I have no objection. I just raised the question because it had been debated.

Mr. DURKIN. Mr. President, reserving the right to object. I would like to see the modification, or hear it.

The PRESIDING OFFICER. The Clerk will state the modification.

The assistant legislative clerk read as follows:

Modification of Stevenson amendment No. 146:

On page 2, line 11, after the word "Member," insert a period and strike the words "who is defeated for reelection or does not seek reelection."

Correct the word "formed" to read "former".

Mr. STEVENSON. Mr. President, I will explain the modification for the purposes of this discussion.

Mr. President, Senate Resolution 110 was intended to prohibit the conversion of unofficial office accounts to the personal use of Members, but paragraph 4 of rule XLVI seems to say that the prohibition only applies to Members who are defeated for reelection or not seeking reelection.

To clarify that provision of XLVI, I have in this modification deleted the expression, "who is defeated for reelection or does not seek reelection" in order to prohibit the conversion of these funds, as was intended, by all Members, regardless of whether they were defeated for reelection or were seeking reelection to the Senate. That is the only purpose of that modification.

Having explained the modification, Mr. President, I ask unanimous consent that the remaining time on this amendment be evenly divided with 40 minutes hereafter for the proponents and 40 minutes for the other side.

Mr. DURKIN. Mr. President, I am forced to object at this time.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENSON. Mr. President, unofficial office accounts first came to public attention when Senator Nixon's use of private funds to defray official expenses almost caused his demise as a candidate for national office. The ambiguities inherent in using political funds for varying purposes were later illustrated in the censure of Senator Dodd. They are euphemistically called unofficial office accounts—and more commonly called slush funds or "Checkers" funds.

Senate Resolution 110 purports to prohibit unofficial office accounts. But in the same breath that it prohibits such funds it permits them. It permits the use of private contributions or political funds to defray official expenses, so long as they are derived from a political committee. Indeed, the proposed rule XLVI of Senate Resolution 110 would not only sanction the use of political contributions for official purposes, it would authorize expanded use of such funds by removing the restrictions imposed since 1968 under the present rule XLII.

That rule, Mr. President, says that a Senator may use contributions only to influence his nomination for election or his election and shall not use any part of any contribution for any other purpose, including the deferral of his official expenses, except as otherwise provided in the rule.

Then the rule goes on to enumerate certain exceptions. In Senate Resolution 110 as it is presently drawn, these political funds, private contributions, unofficial office accounts, or whatever they may be called, can be used for any official expenses of a Senator.

The House of Representatives, in its recent debate upon this subject, concluded—and I believe rightly—that official expenses should be paid from official allowances and not from private contributions. It adjusted allowances accordingly.

This amendment would put an end to unofficial office accounts by whatever name. Political and private contributions could not be used for official expenses. A Senator's personal funds could, of course, be used to defray such expenses. The prohibition against the use of political or private contributions for official expenses would become effective 30 days after the Senate had acted to adjust allowances in order to cover Member's official expenses.

Official allowances and personal resources are not in most cases now adequate to cover the actual expenses of service in the Senate. So, Mr. President, Members have turned to unofficial office accounts—namely, excess political funds and private contributions—to defray the ordinary and necessary expenses of their office. This use of private contributions to pay for the public's business is both politically vulnerable and ethically questionable.

A Senator may with the best of motives accept the availability of a corporate plane or the largesse of private contributions as the readily available alternative to spending the taxpayer's money. But the damage to public confidence in this body by having Senators' performance of their responsibilities dependent upon private contributions is a high price to pay for an infinitesimal reduction in the tax burden.

Disclosure does not wash private contributions for public business of their taint. Senators are beholden to their benefactors and demeaned by a process which invites them to seek private patrons. And the public, most reasonably, questions whether those who pay for public duties acquire a disproportionate influence over public duties. Senators are forced in these circumstances to spend time away from public duties to seek the funds with which to discharge public duties. These funds bring disfavor and suspicion upon the Congress. They should be done away with. It is no more necessary to conduct the public's business with private funds than it is to conduct private business with public funds. Public money ought to fund public duties as it does in the other branches of the Federal Government and now in the House of Representatives.

The Senate has already acted in this Congress to reorganize itself. Now it is acting to eliminate public suspicion of improper influence and inattention to the public's business. The Senate is entitled to much credit for what it has already done. The public should already be reassured. But one large step remains—the elimination of "slush" funds.

It will be said that the distinction between official and political activities is not always clear—and, indeed, it is not. But Senators make those distinctions each day in the use of the frank, the computer and the Senate television studio.

Under this amendment, the Senate Appropriations Committee would provide guidelines to govern the use of funds for the ordinary and reasonable expenses of service in the Senate. The Senate itself would make the determination as

to what is ordinary and reasonable and as to what amounts are adequate. It is a distinction which must be made in any event. The Internal Revenue Service has already proposed rules that jeopardize the exempt status of political committees which provide funds for the ordinary and necessary expenses of a Member's office. Under those rules, Senators will be required to segregate political funds for official expenses from political funds for political expenses. Members would be required to make determinations of what are exempt political expenditures and what are ordinary and necessary official expenses, keep accounts accordingly and then justify those decisions to the Internal Revenue Service.

The deduction and tax credit to the contributor of a political contribution would depend on the use to which it was put and the fund to which it was assigned by the Senator. What is more, the Federal Election Commission may impose additional requirements respecting the use of political contributions for nonpolitical purposes. These unofficial accounts not only invite the public's suspicion and demean the Senators, they embroil the Senators in controversy and detail over what is and what is not political, which funds for which accounts, which contributions get the deductions, which expenditures are deductible, which receipts are taxable, and so on.

This is one of those fortuitous circumstances in which right conduct and convenience coincide. As in industry and as in government, the Senate can fund its ordinary and necessary expenses, and put up a wall between those which are political and those which are personal. The "Checkers" funds and the slush funds would be behind us. Then the Senators would be better off, and the country better served.

So, Mr. President, I urge Members to approve this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. DURKIN addressed the Chair.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Who yields time?

Mr. DURKIN. Mr. President, I do not think the Senator has the floor.

The PRESIDING OFFICER. Time is controlled by Senator STEVENSON and Senator THURMOND. Does Senator STEVENSON or Senator THURMOND yield time?

Mr. STEVENSON. Mr. President, I would prefer that someone else yield time. I already have used up a good deal of my time.

Mr. THURMOND. Mr. President, if Senator DURKIN is going to speak, I withdraw the request.

Mr. NELSON. Mr. President, who has control of the time?

The PRESIDING OFFICER. The Chair made a mistake. The time is controlled by the Senator from Wisconsin and the Senator from Illinois.

Mr. NELSON. Mr. President, I yield 5 minutes to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 5 minutes.

Mr. DURKIN. I thank the Senator from Wisconsin.

Mr. President, the Senator from Illinois is correct. This matter, in some form or other, has been discussed for 2 or 3 days.

Again I should like to state that I am not talking about a personal situation. I have never solicited contributions for an office account. I have never accepted contributions for any type of Checkers account or any similar type of account. I think it characterizes the debate and clouds the issue when we start talking about Checkers accounts.

As I say, I have never maintained or solicited or accepted contributions for any kind of unofficial office account or slush fund or Checkers account. I strongly resent anyone who would suggest that my questioning this amendment is an attempt to protect a slush fund or seek the authority to begin one.

I think a very real problem exists with this amendment. What I am talking about are funds that are excess campaign funds. They are funds that were reported in accordance with requirements of the FEC. The reporting of these funds went far beyond the requirements of the FEC and, I think, during the campaign we made daily reports; we reported much more information than was required by the FEC.

I do have some problems. Earlier, the debate seemed to focus on television tapes and radio clips being sent back to the home State. That is not the reason why I am concerned. I do not think we have ever used television tapes, and I do not think we have used the radio clip except for public service announcements.

The problem is that the amendment does not define "ordinary and necessary." There is no assurance of additional funds, and we are not talking about money being diverted to personal use.

In my office we accepted the suggestion of Common Cause and installed a toll-free citizen "hotline" enabling anybody in the State of New Hampshire to call my state office toll free.

It requires five, six or seven people, depending on the number of calls, just to handle the workload generated by the "hotline".

What I am talking about is the utilization of excess campaign funds to pay for the incoming WATTS line, and to pay for the telephone key systems that are required to return those calls, and the service that that is needed to keep the system functioning.

The space allowance for an in-State office, in a State the size of New Hampshire, is 4,800 square feet. The office allowance is not adequate to put phones and people into the 4,800 square feet.

So in the 1½ years I have been here, on both year-ends we have had to take money from the excess campaign funds which were solicited and reported in accordance with all—in fact far beyond all—the laws, to defray the cost of that telephone service and to defray that cost of these constituent services.

I am concerned that if this amendment is adopted as it reads today, and there are no funds appropriated to defray these costs, and no definition of "ordinary and necessary expenditures" is made, that I may well have to tell the people of New Hampshire we are going to have to curtail the "hotline" or curtail the services provided to them.

If the clerk hire account, could be utilized to pay for telephones, it would solve a good deal of the problem. But what we have now is we are allowed to hire more people, but the person has to use seaman flags to communicate because there is not enough money in the consolidated account to pay for telephone service.

I do not think anybody in the Chamber is in favor of Checkers accounts or using excess funds for expenses that would not fall into the "ordinary and necessary" category as expenditures incidental to a Federal officeholder duties.

I would like to ask the sponsor of the amendment this question: Say that a group of Boy Scouts was in the Senate dining room, and the group were guests of a Senator, or guests visiting Washington prior to Jimmy Carter's second inauguration, and the Illinois delegation wanted to host the people from Illinois.

Could, under the Senator's amendment, any excess——

The PRESIDING OFFICER (Mr. LEAHY). The Senator's 5 minutes have expired.

Mr. NELSON. How much time does the Senator from Wisconsin have?

The PRESIDING OFFICER. The Senator from Wisconsin has 54 minutes left.

Mr. NELSON. I yield the Senator from New Hampshire 5 more minutes, and if he desires more time, additional time will be yielded.

Mr. DURKIN. I thank the Senator.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 5 minutes.

Mr. DURKIN. To repeat the question, say the Illinois delegation would like to host a pre-inauguration reception here in the Capitol Building on the eve of Jimmy Carter's second inauguration. This would be prohibited by the amendment if to defray the cost of that reception the funds were coming out of excess campaign funds or even campaign funds which had been properly reported in strict conformity with the Federal law.

Mr. STEVENSON. The kind of judgment the Senator is suggesting, that would have to be made under my amendment, has to be made now. If he makes a mistake now he violates the Internal Revenue Code and his political committee could lose its tax-exempt status, and his political contributors lose their deductions and their credits.

That is the situation which the Senator faces now if he makes a mistake and uses those political funds in that campaign fund for purposes which are not political, and under my amendment that decision would be made under guidelines that were first recommended by the Appropriations Committee and then approved by the Senate. He would know

how to make that judgment. At the moment he makes it at his peril.

Mr. DURKIN. With all due deference to the Senator, I think he has raised and slain a straw man. Has the IRS come in and removed the tax-exempt status from any campaign account? Has that event happened to any Member in this Chamber in recent times? With all due deference to the Ethics Committee, I do not think the Ethics Committee or the Senate by resolution is going to alter what the IRS intends. We passed the IRS Code, it is written into law, and they interpret it. So I do not think a mere resolution of this body is going to have much impact on the IRS.

I do not think I heard an answer to my question with respect to the Illinois delegation hosting a reception on the eve of the second inauguration. There are many question raised: Is hosting a reception out of your campaign funds rendered unethical by this amendment?

Mr. STEVENSON. My amendment is intended to pick up all political funds. It makes very little difference if they are contributed in a campaign or after a campaign. I cannot be very responsive to the Senator's hypothetical reception because it is not this Senator, it is not the Senator from Illinois, who would be laying down the guidelines under which the Senators in the future would be making that decision.

But I think that any reasonable guidelines would permit the expenditure of political funds for the expenses of such a reception. That sounds to the Senator from Illinois like a political, as opposed to an official, expense, and political funds could be used to defray it exactly as they can now.

But I say to the Senator, in response to his other question, has the Internal Revenue Service deprived political committees of their exemptions? I do not know. I have not asked the IRS. After my last campaign for the U.S. Senate, I asked the best lawyers and the best accountants I could get, and they said: "You better not use any campaign funds"—and I had a surplus—"for any such official purposes." And I did not. I turned my surplus over to the Democratic National Committee.

The PRESIDING OFFICER. The 5 minutes yielded to the Senator from New Hampshire have expired.

Who yields time?

Mr. DURKIN. The Senator from Wisconsin (Mr. NELSON) said he would yield additional time.

Mr. NELSON. I yield an additional 5 minutes to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator is recognized for an additional 5 minutes.

Mr. DURKIN. To offer this as a way to solve tax problems I do not think is addressing the real issue, I submit that the IRS is not going to be intimidated or influenced by virtue of a Senate resolution which does not define "ordinary" and "necessary."

And I am not sure I have an answer. If it slipped by me, I apologize. Second, I am not sure I have an answer to the question: Could one even use political funds from an active campaign account? Say someone in the Illinois delegation is campaigning for election or running for mayor of Chicago. I do not know when that comes up. I am not sure one would want to go from Congress to mayor of Chicago, but someone may so wish. I do not know. Suppose he pitched into that reception out of an active campaign account. I think the Senator said it was set. The Senator has not done a thing for us with respect to IRS, but he said that the type of contribution to a reception, that I described, would be unethical.

Mr. STEVENSON. No, if the Senator will yield, I did not say that. I said in my own opinion, which is of little relevance, the guidelines the Senate will subsequently adopt will determine which political expenses are appropriate.

I certainly did not intend to suggest there would be anything unethical about the expenditure of political funds for what I would regard as a legitimate political purpose.

Mr. DURKIN. The Senator is saying if it is an ongoing campaign, as he sees his amendment, there is no problem taking money from an FEC account, if it is fully reported in accordance with FEC requirements. If it is an active campaign or an active campaign of a Congressman or Senator running for Governor of Illinois or mayor of Chicago, there is no problem as long as it is still an active campaign, as long as it is reasonably prior to election; but once the election is over it is unethical to use those funds. And God knows we are not asking for appropriated funds for a reception on the eve of inauguration.

Mr. STEVENSON. The Senator misunderstands me or I am not making myself clear. I do not make a distinction between political funds and private contributions raised during the campaign and before an election or after an election. Those are contributions obtained by Members of the Senate from private sources. And I am saying they should be used for the purposes for which they were intended. Those purposes are political. Political expenses take place and are contracted during campaigns and, as in the Senator's example, after campaigns. They could be used for such political purposes, whether they are raised before, after, or during a campaign and for political purposes before, during, and after a political campaign.

My simple point is political funds, funds raised by Senators for political purposes, should be used for political purposes, and the corollary of that proposition is that official funds should be used for official expenses. I remind the Senator that this wall would not be built the line drawn, or the prohibition take effect, until after allowances were adjusted, as the House of Representatives already has done, to make adequate official funds available to cover official expenses. So at that point there should not be any need on the part of any Member for political funds with which to defray his personal expenses. He still could, in addition to the allowances made available to him, of course use personal funds, including the honoraria that are still permitted, for the official expenses of his office.

Mr. DURKIN. But on line 17 the Senator says that this amendment shall not take effect until there is affirmative action. If they increased the consolidated account by $5 that is affirmative action.

Mr. STEVENSON. Again, if the Senator will permit me, it only takes effect, not when the Appropriations Committee has acted, but after the Senate has acted. It will be the Senate that makes the judgment, and I think it unlikely that the Senate would regard $5, or an increase of $5, or any such nominal, obviously inadequate amount, as adequate.

The PRESIDING OFFICER (Mr. SARBANES). The time of the Senator has expired.

Mr. DURKIN. Mr. President, will the Senator yield 2 additional minutes?

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. I yield 2 additional minutes to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 2 additional minutes.

Mr. DURKIN. I thank the Senator and thank the Chair.

The net effect of his amendment is we are going to go back and ask the American taxpayer and the American public Congress.

Mr. STEVENSON. I think the American public for more money to run would be delighted to pay a fraction of a penny a year to rid itself, rid Congress, and rid this Government of the last of the slush funds. The House of Representatives has already acted to do so. This is the only branch of the Government in which they are tolerated.

Mr. DURKIN. I resent the Senator's reference to slush funds. I do not have one. If the Senator has one and wants to make a public confession, go ahead. I am talking about accounts completely recorded disclosing far beyond the requirements of the Federal Election Commission. We are not talking about slush funds. That is another straw.

Mr. STEVENSON. It is aimed at this amendment. That is all it is aimed at. I acknowledge that they are now, as a result of the Federal Campaign Act, publicly disclosed slush funds.

Mr. DURKIN. Will the Senator answer me this question: Paragraph 2 of concurrent rule 42 says that a Senator may use the contribution only to influence his nomination for election or his election. When does that period begin? We still have that problem even in the Senator's resolution. So we muddied the water rather than clarified it.

Mr. STEVENSON. I beg to differ with the Senator. Will he refer me to the specific provision? Certainly the intention of this amendment is to permit the use of political funds for all political purposes. They need not be directly related to his campaign for reelection and, if I am in error and my amendment does anything that is different, I want to be aware of it so that I can correct it.

The PRESIDING OFFICER. The time of the Senator has expired. Who yields time?

Mr. ALLEN. Mr. President, will the Senator yield me 10 minutes so that I might engage in further colloquy with the distinguished Senator from Illinois?

Mr. NELSON. Mr. President, how much time does the Senator from Wisconsin have remaining?

The PRESIDING OFFICER. The Senator from Wisconsin has 40 minutes remaining.

Mr. NELSON. I yield 10 minutes to the Senator from Alabama.

Mr. ALLEN. I thank the distinguished chairman.

Mr. President, I must say that when this amendment was first offered, I was very skeptical of it, because I saw it as an attempt to place on the taxpayers the burden of paying official nonreimbursable expenses of a Senate office, whereas at present they might be paid from a political committee. I say, too, the danger that if the political committee was forbidden from paying official nonreimbursable expenses of a Senate office, and no provision was made by the Appropriations Committee for the payment of these expenses, then the Senator personally would be charged with the expense of paying for these official senatorial expenses for which no reimbursement is being made.

The distinguished Senator from Illinois, in answer to that, did modify his amendment to provide that section 3 of his amendment, which forbids the use of political funds to pay nonpolitical official nonreimbursable expenses of a Senate office, not take effect until provision was made by the Appropriations Committee and approved by the Senate.

The question remains in my mind still, I will say to the distinguished Senator from Illinois, inasmuch as section 302 does mandate that the Appropriations Committee and the Finance Committee—the Rules Committee has been dropped from that by amendment—should study the Internal Revenue provision, and I assume consult with the IRS as to the tax features, the tax liability for expenditures from a political fund for official senatorial nonreimbursable expenses, it would seem to me that the amendment as now presented would prevent this question that he is having the Appropriations Committee and the Finance Committee confer with the IRS on.

The Senator assumes in his amendment that these official nonreimbursable expenses would be taxable to the Member, whereas that is the very question that the committees are mandated to find out from a study of the IRS ruling and a conference with the IRS itself. So I would like to ask the distinguished Senator from Illinois if it would not be the better course of wisdom to delay the implementation of this amendment, that is, not seek to put it in until a report has been made by the Appropriations Committee and the Finance Committee as to the tax liability for expenditures from this fund. Then that would serve as a guideline to the Senate in working out a blueprint for the putting of this liability on the taxpayers through increasing allowances, or whether it might properly remain with the political committee, without any tax liability on the part of the Member.

Are we not getting the cart before the horse, I ask the distinguished Senator from Illinois?

Mr. STEVENSON. Mr. President, the distinguished Senator from Alabama has been most helpful to the Senator from Illinois, and I am grateful to him. His suggestions have led to modifications of this amendment which I believe improve it, and I am certainly not unsympathetic to his most recent suggestion. But I believe it is accommodated already by the amendment.

First of all, the Internal Revenue Service has already issued proposed regulations.

Mr. ALLEN. Are those available?

Mr. STEVENSON. Yes.

Mr. ALLEN. I wish the Senator would place them in the RECORD. I have not seen a copy of them myself.

Mr. STEVENSON. Very well, I will attempt to do so. But it is my understanding that it has, and that those proposed regulations would require Senators to segregate political funds to be used for nonpolitical purposes—the official expenses as opposed to the political expenses—and failure, then, to make a proper judgment as to which contributions are for official expenses and which for political expenses, and therefore which goes into which fund, would cause the political committees of the Senator the loss of their exemption.

As I understand it, under these proposed regulations, if a Senator made a mistake and were to use political funds for official expenses, they would be taxable to him, and without any firm assurance that the expenditure of those funds would entitle him to a deduction.

So, I think that Senators are already faced with this problem, and no amount of consultation between committees of the Senate and the IRS is going to change the law. It would take more than that to change the law.

I say further to the Senator that other Members of this body and myself have already consulted accountants, lawyers, and others who are expert on taxation, and have been advised that this is the case, and that political contributions, funds received for political purposes, or the funds of political committees, should not be used for any different purposes.

It was because of such advice, as well as my own feelings about the questionable ethics involved, that, after my last campaign for election to the Senate, I turned over my campaign surplus to the Democratic National Committee, which is clearly a political purpose.

But let me add further, in response to the Senator's question, that there will be time under this amendment to act, and in the light of consulations between the Finance Committee and the Appropriations Committee of the Senate and the IRS, because the prohibition against the use of political funds for official purposes would not take effect until 30 days after the Senate had acted to adjust its allowances, and it will not act to adjust its allowances until after the Appropriations Committee has reported, and the Appropriations Committee is mandated to report within 120 days.

So I think that it would be reasonable to expect about 120 days before the Appropriations Committee reported, and then still more time, which could be adjusted by the Senate, by the leadership, in order to hear from the Finance Committee before the Senate were to act on the allowances and make this amendment effective.

Mr. ALLEN. Well, now, the potential tax liability to a Senator actually gives me very little concern——

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. ALLEN. An additional 5 minutes?

Mr. CRANSTON. Mr. President, I yield the Senator 5 minutes.

Mr. ALLEN. I thank the Senator. Because if a Senator is charged, with having received from a campaign committee funds that he uses to pay official nonreimbursable expenses of his office, that would be a checkoff; I mean the one would offset the other. It would be an offset, so there would be no tax liability there.

I do see the problem that if these funds are used for other than political purposes, it might destroy the political nature of the contribution which, to a certain extent, is deductible by the contributor. I can see that point. I did fear that if we simply rule out all possible expenditures from a political fund for necessary expenses of an office, we might be faced with this problem, irrespective of the findings by the Appropriations Committee and the Finance Committee in its consultations with IRS on an entirely different situation. They might rule that some of these expenses could be paid from a political fund. The Senator, by this amendment, has banned any such expenditures. We do not know what they will rule, I assume.

Mr. STEVENSON. As I tried to indicate, I have proposed a prohibition against the use of political funds for official expenses, because I believe they are wrong. I believe they are unethical. I am not making this proposal to benefit Senators so much as I am to benefit the public interest, to try to enlarge the public's confidence in the impartiality of this body.

The Senator may be right that, if the use of political funds for official expenses would subject the Senator to tax liability, he will get an offset by the deduction. I do not think that is entirely certain, but it ought to be. It ought to come out that way. I agree with the Senator.

Let me say to the Senator that in those decisions as to what is the appropriate use of political funds, whether political or official, with some taxable and, therefore, subject to a deduction, a decision is made in the first place, at least, by an agent of the Internal Revenue Service, made by an official of the executive branch, sitting down with a Senator to tell him what is an official expense and what is a political expense. Senators may end up with as many different judgments on the same set of

facts as there are agents of the IRS auditing returns.

Leaving aside all the questions of executive control over actions of the Senate, my amendment is intended to produce guidelines originated in the Appropriations Committee, acted upon by the Senate, which would establish the principles by which the Senate itself, and not some agent of the IRS, made these determinations as to what is a reasonable, ordinary expense of a Senator in the conduct of his senatorial duties.

The Senator says there can be no assurance that the IRS will accept the judgment of the Senate as to what is a Senate expense. I disagree with the Senator. If that judgment is made under the guidelines of the Senate, adopted in its rules, and interpreted from time to time as necessary by the Ethics Committee or some other more appropriate body of the Senate the IRS will pay need.

I would be surprised if the Internal Revenue Service did not respect that judgment. Of course, if it did not, if its authority was abused, then it would be appropriate for the Senate to take more formal action, perhaps in the Internal Revenue Code.

Mr. ALLEN. The Senator speaks of guidelines. What disturbs me is that we are acting now and then awaiting guidelines, whereas we ought to have the guidelines first and then act. It is a question of timing with the Senator from Alabama.

I also wish to express my appreciation for the Senator's willingness to accept my suggested modification about the effective date of section 3. I think possibly this does give added protection to those who are interested in not placing this burden on the taxpayers.

Mr. STEVENSON. I thank the Senator.

The PRESIDING OFFICER (Mr. CULVER). The time of the Senator has expired.

Mr. ALLEN. Mr. President, could I have 1 additional minute?

Mr. CRANSTON. I yield 1 additional minute, Mr. President.

Mr. ALLEN. There were at least four Senators in the Chamber when this matter came up before who expressed some misgivings about the amendment. While I now feel inclined to support the amendment, in order to protect them when all time has been yielded back I am going to suggest the absence of a quorum in order that they might come to the Chamber and possibly offer amendments to this amendment or strike section 3.

I thank the distinguished Senator.

Mr. DURKIN. Will the Senator yield for a question?

Mr. STEVENSON. I will be happy to yield on someone else's time.

Mr. NELSON. Mr. President, I yield 2 minutes.

Mr. DURKIN. I thank the Senator.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 2 minutes.

Mr. DURKIN. Thank you, Mr. President.

I agree with the stated intent of the Senator from Illinois. As I read the amendment, and I have read it again during the colloquy, the amendment says a Member can use political funds, referring to publicly disclosed FEC accounts, for political purposes. A Member can use political funds for a political purpose, but a Member cannot use campaign funds or excess campaign funds after the campaign for ordinary and necessary expenditures. Is that correct?

Mr. STEVENSON. The Senator is correct. Let me say first——

Mr. DURKIN. Let me propound the rest of this as I only have 2 minutes.

But the Senator does not define either one—ordinary and necessary expenses or political expenses. The Senator does not define what a political purpose is or define what is necessary. Did I understand the Senator to say that to use excess campaign funds to pay for a toll-free citizen hotline in the home State, to allow every citizen in my State just a phone call away 24 hours a day, is unethical?

Mr. STEVENSON. No, I did not say that. I did intend to say earlier that there could be some question as to what is ethical in that situation. But as to what is a taxable use of political funds, if they are used for official purposes they are taxable to the Senator. If he makes the mistake of treating those political funds as political funds used for political purposes and does not report them now, if they are used for official expenses, he violates the Internal Revenue Code. It is an agent of the Internal Revenue Service who makes that judgment.

Mr. DURKIN. But nothing we can do here will save anyone from the tax collector.

Mr. STEVENSON. I do not agree with that. Nothing is done by this amendment until after the Senate has acted on what are the ordinary and reasonable expenses of the Senate.

Mr. DURKIN. Is the Senator saying this amendment does not become effective until we define what is political and we define what is ordinary and necessary, and which is prohibited? Is the Senator saying those definitions must be forthcoming before this section takes effect and there must be an affirmative statement as to each?

Mr. STEVENSON. It is my intention to mandate the Appropriations Committee in the first instance to report adequate allowances for official expenses. To do that, it will have to define official expenses.

It will define them. It must to avoid adverse tax consequences. Otherwise, the reimbursements obtained by a Senator for costs which were not ordinary and reasonable would be taxed to him.

So the Appropriations Committee in the first instance, then the Senate as a body, will have to make a determination in a general way as to what are ordinary and reasonable expenses for services in the Senate and then act on the adequacy of allowances to cover those expenses before the prohibition will take effect.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. DURKIN. May I just follow that up for 2 minutes?

The PRESIDING OFFICER. Who yields time?

Mr. STEVENSON. Mr. President, how much time do I have remaining on this amendment?

The PRESIDING OFFICER. Forty-four minutes the Senator from Illinois has remaining to him.

Mr. STEVENSON. I yield 2 minutes to the Senator from New Hampshire.

Mr. DURKIN. I thank the Senator. If I get a yes or no, I shall not use up the 2 minutes and I shall not have to ask for any more time.

This amendment does not take effect until there has been a definition of "political," which is permissible, and "ordinary and necessary," which is prohibited. Yes or no, otherwise my 2 minutes are gone.

Mr. STEVENSON. The Senator is correct. It will be the Senate that makes that decision—the Senate as a body—before this amendment can take effect and the use of political funds for official purposes be prohibited.

Mr. DURKIN. If it does not take effect until the terms are defined by this body, then some of my concerns are eliminated. But I am concerned that there is no definition of what is permitted as political and we are asked to vote now. It is sort of a pay-now-and-fly-later program.

The Senator has allayed some of my fears, and I thank the Senator for yielding.

Mr. STEVENSON. Mr. President, I would have much preferred it if it had been possible to do this differently, as the House did, but it is a much easier matter for the House, with every Member representing the same size constituency, to make a determination on short notice or on the floor as to what is ordinary and reasonable and establish an appropriate allowance.

It is not easy, it will not be easy, for the Senate to do it. The circumstances of our constituencies are vastly different. The Senator from Alaska is faced with extraordinary expenses for the conduct of his official duties in that State, which lacks the kind of transportation facilities that are available, for example, in New Hampshire. So it is a job that will take some time. It will take some thought. It is a job that can be done, but not now.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. CRANSTON. Will the Senator yield?

Mr. STEVENSON. I yield myself 2 more minutes. Unless it is done to the satisfaction of the Senate, then the prohibition in this amendment will not take effect.

Mr. JOHNSTON. Will the Senator yield?

Mr. STEVENSON. Yes, I yield to the Senator from Louisiana for a question.

Mr. JOHNSTON. If I may ask a slightly long question, because it is a little bit rhetorical, I urge the Senator to think of the wisdom of perhaps pulling back this amendment at this time. This happens to be an area that I have taken a lot of interest in. It was my amendment

to the Federal Election Code that limited the uses to which the old office accounts could be put to "any ordinary and necessary expenses incurred by him"—that is, by the Senator—"in connection with his duties as a holder of Federal office."

Now, there are three other phrases used in this resolution which may or may not have slightly different meanings:

"Otherwise unreimbursed expenses allowable in connection with the operation of a Member's office"—that is used in one place.

In another place, we have, "Expenses incurred by a Member in connection with official duties;"

In another place, "Reimbursement of expenses incurred by a Member in connection with his official duties."

I am advised that those phrases mean the same thing as the FEC language does.

My point is this: We allowed the FEC to define what that phrase meant, first, by rulemaking power and, second, by giving advisory opinions to Senators. There are still enormous gaps in the area of definition of what is and what is not a proper office expense. I think the committee is going to have a great deal of difficulty in trying to define what that is. So I urge the Senator, I ask him if he will not consider pulling the amendment down for the time being. I know what he wants to do and I have been in sympathy with him for months and years in the Senate, but it is a most difficult thing to make that definition. I hate to see us sort of buy a pig in a poke, say that we are for this principle, but it does not take effect until we get around to defining what we mean.

Would the Senator consider doing that?

Mr. STEVENSON. The Senator from Illinois is reluctant to disappoint the Senator from Louisiana, but I cannot accept his suggestion that I withdraw my amendment. In fact, I wish he would withdraw his suggestion that I withdraw my amendment. I feel strongly about this and have for the years that I have been in the Senate. This is an obvious reform. It has been obvious ever since the campaign of 1952 that something needed to be done about Checkers funds in the U.S. Senate.

The PRESIDING OFFICER. The Senator's additional 2 minutes have expired.

Mr. STEVENSON. I yield myself 2 more minutes, Mr. President.

Nothing has been done, and I am not very optimistic that anything will be done, unless we act and act now. I frankly do not see any reason for delay, though I recognize that it is not an easy proposition; but it is one that, in my judgment, can be resolved satisfactorily in the timeframe that would be established by Senate Resolution 110 as amended by this amendment.

Mr. JOHNSTON. Will the Senator yield for another question?

Mr. STEVENSON. The Appropriations Committee would not have to report for 120 days. If more time is necessary, it could be granted.

Yes, I yield to the Senator for another question.

Mr. JOHNSTON. Under the Senator's amendment, it would not be permissible for a Senator to use his own personal funds for these purposes?

Mr. STEVENSON. Yes, it certainly would be. A Senator could use his personal funds, including honoraria, for any personal, official, or political purposes under this.

Mr. JOHNSTON. Would that not then discriminate against those Senators who are less wealthy by allowing their more wealthy colleagues to establish traditions in the Senate—traditions like entertaining your constituents in a certain style, at a certain expense level?

Mr. STEVENSON. No, I cannot agree with the Senator. On the contrary, I think that those who do not have adequate personal funds for these official expenses would be the principal beneficiaries. They would no longer be forced to rely on political funds, with the possibilities of adverse political and tax consequences. Instead, they would be able to receive an adequate allowance from the Government, official funds instead of their personal funds, to defray official expenses.

Mr. JOHNSTON. Certainly not entertainment expenses.

Mr. STEVENSON. No, and they would not be prevented from using their political funds for political purposes.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. STEVENSON. Mr. President, I yield myself 2 more minutes.

If the purpose is political, if it is a fundraising reception or the entertainment of a contributor, he would continue to have his political funds available for such a political purpose.

Mr. JOHNSTON. Well, suppose, for example, that he entertained all of the people from his home State with coffee, as my colleague and I did at the inauguration. Are we going to have Federal funds that would provide for that?

Mr. STEVENSON. That is a question that would have to be worked out by the Appropriations Committee and, finally, the Senate, under this amendment.

I would assume that such an expenditure would be regarded as a political expenditure and would not be absorbed by Government funds and, therefore, political funds would remain available for such purposes.

Mr. STEVENS. Will the Senator yield?

Mr. STEVENSON. The Senator from California had been seeking to ask a question.

Mr. STEVENS. I do not intend to get into dialog.

Mr. CRANSTON. It is all right to proceed with the Senator.

Mr. STEVENS. I would like to offer an amendment at the appropriate time on section 3. I wanted to know how much time remained on this amendment, if I could ask. It is my understanding I cannot offer that amendment until the Senator's time is exhausted.

The PRESIDING OFFICER. That is correct.

The Senator from Illinois has 34 minutes of time remaining and the manager has 19.

Mr. STEVENS. For the information of the Senator from Louisiana, I had the same problems and I have discussed them previously with the Senator from Illinois.

It is my intention to offer an amendment to strike section 3 from the amendment when the time comes.

Mr. CRANSTON. Will the Senator yield.

Mr. STEVENS. Yes.

Mr. CRANSTON. I would like to ask one question which follows on that which was asked by the Senator from Louisiana.

As I understand, this amendment was a revision of page 32 of Senate Resolution 110, rule XLVI, for the purpose of eliminating the use of political committee funds.

That raises a question about three matters, one of which the Senator from Louisiana already inquired about. He asked if it was all right to have an unofficial office account that included the personal funds of the Member, and it was stated, "Yes, you could have that kind of fund."

I would like to ask if we can have an account which includes official funds specifically appropriated for that purpose and also funds received as reasonable reimbursements for expenses incurred by a Member in connection with personal services provided by the Member to the organization making the reimbursement? Both these provisions were included in the original language of the resolution.

Mr. STEVENSON. Yes; if I understand the question correctly, it is certainly proper and, indeed, my own practice is to maintain a separate fund or bank account to which payments are made to defray official expenses and to make deposits or contributions to such a fund from one's personal resources.

Mr. CRANSTON. Including expenses paid by some organization that one gives a speech to?

Mr. STEVENSON. Yes; I would certainly think so.

In fact, it is necessary to maintain such accounts because one is not usually reimbursed for the expenses until after he has paid the expense.

Mr. CRANSTON. Right.

Mr. STEVENSON. And that requires the expenditure of the personal funds by the Senator.

Mr. CRANSTON. Right.

Mr. STEVENSON. And many Senators maintain a separate account for such purposes.

That would not be affected in any way.

Mr. CRANSTON. Right.

Also, just to make it crystal clear, official funds specifically appropriated for some purpose may be placed in a separate unofficial office account?

Mr. STEVENSON. The Senator is correct.

There, again, official reimbursements in the normal course do not obtain until after the Senator has made the expenditure. So it is necessary for him to maintain such an account and to maintain some personal funds in it in order to make such expenditures before reimbursement is received.

The PRESIDING OFFICER. The Senator's 2 additional minutes have expired.

Mr. CRANSTON. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, will the Senator yield me 3 minutes?

The PRESIDING OFFICER. Who yields time?

Mr. STEVENSON. Mr. President, I will yield the distinguished Senator from Louisiana 3 or 4 minutes for a question.

The PRESIDING OFFICER. How many minutes did the Senator from Illinois yield?

Mr. STEVENSON. Three.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 3 minutes.

Mr. JOHNSTON. Mr. President, in connection with the concern of the Senator from Louisiana and the Senator from Alaska (Mr. STEVENS) with reference to section 3, I would submit that to amend section 3 out of this amendment would not have totally the desired effect, for this reason.

The Senator from Illinois is amending rule XLVI and his amendment is a substitute for rule XLVI.

Now, in its official form, rule XLVI makes clear that we can make expenses——

May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order. The Senator will suspend, the Senate is not in order.

The Senator from Louisiana.

Mr. JOHNSTON. I thank the Chair.

Mr. President, in its original form, rule XLVI makes clear that a Member may make expenditures for office purposes from four different sources, which include personal funds of the Member, official funds appropriated for that purpose, funds derived from a political committee, and funds received as reasonable reimbursement.

If we adopt the amendment of the Senator from Illinois as amended by the Senator from Alaska (Mr. STEVENS), then I fear it would leave unclear as to whether expenditures from those four sources could be made.

So while I support the amendment, simply to take some of the difficulty out of this situation, I think the whole amendment of the Senator from Illinois should be defeated at this time, and not because the purpose is not excellent, but because we are, in effect, buying a pig in a poke, limiting expenditures in some ways while not making it clear how we can provide for those expenditures.

I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. STEVENSON. The time to be taken evenly from both sides.

The PRESIDING OFFICER. Will the Senator put that in the form of a unanimous consent?

Mr. JAVITS. Mr. President, why does the Senator not ask unanimous consent not to charge it to either side?

Mr. STEVENSON. I do so, Mr. President.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, will the Senator yield me 5 minutes on the bill?

Mr. THURMOND. Mr. President, I yield 5 minutes on the bill to the Senator from Alaska.

Mr. STEVENS. Mr. President, I indicated that I would offer an amendment to delete section 3; but first I wish to ask the Senator from Illinois if he will respond to some questions concerning this amendment.

As he knows, I was chairman of the senatorial campaign committee for the Republicans. My good friend from Louisiana was the chairman of the Democratic campaign committee for that party. In the course of our duties, we administered funds of a political committee, and we defrayed the expenses incurred by the Senators on our respective sides of the aisle for photographs.

A photograph taken in my office by the photographer is reproduced, and the expenses are paid by the Senatorial campaign committee. The Senatorial campaign committee, likewise, pays the cost of the radio and television tapes that I make in the basement of this building, to the extent of the limitation that we have figured out in terms of a formula based on population.

It is my understanding that section 3 provides that no funds derived from a political campaign can be used for the purpose of defraying ordinary and necessary expenses in the operation of a Senatorial office. The existing rule of the Senate permits just that. That is existing rule XLIII, as I recall.

Mr. STEVENSON. XLII.

Mr. STEVENS. It is the Senator's intention to change that long practice that has been followed by Members of the Senate on both sides of the aisle with respect to this amendment?

Mr. STEVENSON. The Nelson committee, in Senate Resolution 110, makes a change in rule XLII. I do not know—I was not a member of that committee—whether the change was intentional; but instead of going forward to rule out the slush funds, it goes backward to open up even more exceptions. It is wide open from here on out.

Mr. STEVENS. Mr. President, I have yielded on my time, and I have only 5 minutes.

I am not talking about slush funds or whatever it might be. I am talking about the money raised by two recognized campaign committees, two of the parties in the Senate, that have legally contributed moneys. There is no question about the violation of any laws or slush funds or anything else. These are moneys raised in the public eye, moneys which have been used to pay for photographs and radio and television tapes.

Is it the Senator's intention to do away with that? It is my interpretation of his amendment that these expenses could no longer be paid by either the Democrats or the Republicans, that we no longer could use funds derived from either Senatorial campaign committee to pay for photographs or for radio and television tapes. Is that the Senator's intention?

Mr. STEVENSON. First of all, if the Democratic Party has such funds available for the use of television studios or photographers, it is news to me. I have never been a recipient of such funds for such purposes.

Under this amendment, if the purpose of photographs in the Senator's office is political, then the political funds could be used for that purpose. On the other hand, if the purpose is official, a normal, official communication by television or radio, and by the use of publicly owned facilities in the basement of this building, no. Then political funds could not be used for those facilities. What is more, they cannot be used for such purposes now, legally.

Mr. STEVENS. I beg the Senator's pardon. The Senator from Louisiana and I went before the FEC and they did, in fact, change their regulations so that the funds derived from the political committees can, and are, in fact, used today legally for this purpose.

There is a provision in the existing law that states—and the two of us joined together to put it in there—that for the first 5 years of Senators' terms they do not charge against any limitation that was imposed by the Federal Election Act. So the law does, in fact, recognize them. They are legal.

As I understand it, your party makes contributions to the Senator. Our party pays the bills at the Senate office, but the limitations on contributions in the two campaign committees are the same, so the net result is the same.

But my problem with this is that it does not seem that we are recognizing the fact that when the chairman of the Democratic Party of Alaska comes to see me, the senior Senator from Alaska, and he pays his respects, and I pay my respects to him, and we have a picture taken, most of the papers in my State would print that picture recognizing that it was official business. And I assure you he is coming to see me on official business because I am a Senator.

Now, that is, incidentally, paid for by the Republican Campaign Committee.

There are no funds I know of in any allowance that are provided to any Senator today to pay either for photographs, for radio tapes, for television tapes, or for paying the charges of the senatorial radio and television studio.

The Senator is saying, as I understand it, that no funds derived by a political committee, whether it is the National Senatorial Campaign Committee for the Republicans or the Democrats or my own campaign committee, can pay for these things when there are, in fact, no other funds available.

The PRESIDING OFFICER (Mr. CULVER). The Senator's 5 minutes have expired.

Mr. STEVENS. May I have another 5 minutes?

The PRESIDING OFFICER. The Senator from Alaska is recognized for 5 minutes.

Mr. STEVENS. I am very serious about this my friend, and I will raise the issue again. I asked my good friend from California, the Democratic whip, what he was going to do if this passes and we find that there are no funds for expenses for the positions the two of us hold. I take it, the office of assistant leader on both sides of the aisle is a senatorial office within the terms of this amendment.

I today have my assistant out doing something I should have done had I not been involved in this business.

I accepted something a long time ago and could not go. He has gone in my place. His expenses are today being paid by my campaign committee even though they have nothing to do with my campaign in the direct sense. They would have something to do with my campaign if I broke the promise and did not get there or at least send somebody in my place while I am doing my official business here.

That, I take it, is official business I would have done had I been able. I take it is official business he is doing there. It is not campaign business.

But the Senator from Illinois would say, "No, the Senator from Alaska can pay for it personally, if he has his own money or if he has family money, but he cannot use the funds collected by his campaign committee to maintain his official business expenses."

Again this gets back to where we were a week ago. I questioned the Senator's judgment with regard to the standard he is setting, in that a double standard comes out—I think the Senator from Louisiana sees it also. Those of us who have no private fortune or have no access to large amounts of funds would have to say to the Senate, "Increase the official allowances of a Senator because we can no longer use the funds contributed legally by our supporters."

They are not slush funds; they are collected, they are reported, they are honest, there is no question of taint to these funds. You cannot, however, use those funds to do anything that would be considered by somebody else to be ordinary and necessary expenses in the operation of a senatorial office.

Again I ask my friend, and I am sure he is sincere about this, does he really intend to do that? Does he intend to prohibit the Senator from California from using funds contributed to his last campaign, funds left over, to pay the expenses of being a whip or that I cannot do the same? Does the Senator mean to say we cannot use the funds in the Democratic Senatorial Campaign Committee to pay for those photographs that were made?

I really do not think this was part of the official code of conduct we started out to enact. This is going back to where we labored, twice we labored, with the House to get a fair election bill, a bill that covered the use of political funds, a bill which is the law now, a standard of conduct which I thought had the support of Common Cause, of everyone at that time, when we created the Federal Election Act, and then brought about the amendment to that act.

Now, this imposes a standard of conduct on us that I think, and again, I say with due respect to the Senator from Illinois, means that if you are a rich man you can do it, if you are a poor man do not come.

Mr. STEVENSON. Mr. President, I remind my good friend from Alaska that the prohibition in this amendment against those funds which are euphemistically called unofficial office accounts——

The PRESIDING OFFICER. The time of the Senator from Alaska has expired.

Mr. STEVENSON. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Illinois is recognized. The Senate will be in order. The Senator will suspend.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. STEVENSON. I am answering a question.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. STEVENSON. Mr. President, in response to the statement by my good friend from Alaska, I want to remind him that the prohibition in my amendment against those funds, which are most commonly called Checkers funds or slush funds, would not become effective until official funds were available for official expenses and, at that time, the political funds could be used for photographs or all of the other political purposes and requirements of a Senator.

Mr. STEVENS. Mr. President, will the Senator yield for just a moment?

Mr. STEVENSON. The hypothetical Senator, without private resources, that the Senator from Alaska has referred to would be better off. His expenses would be covered if they were official by official funds, and his political funds could be used to cover his political expenses.

Mr. STEVENS. Mr. President, will the Senator yield for just one moment?

Mr. STEVENSON. What is more, Mr. President, according to the best opinions available to me, and according to the proposed regulations of the Internal Revenue Service, that poor Senator is not going to be able to use those funds anyway because a political committee which, under Senate Resolution 110, made funds available to defray the official expenses of a Senator would lose its exemption. That is what the IRS is saying, that is what the accountants are saying, that is what the lawyers are saying.

That is why this Senator, with a surplus after his last campaign, got rid of all of his political funds and turned the surplus over to the Democratic National Committee, which was a legitimate political purpose.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. STEVENSON. It has been 25 years, a quarter of a century, since these funds in the Senate, privately solicited, solicited by Senators with their tin cups in hand, from the special interests, from the rich, those with interests in the legislative process——

Mr. STEVENS. Mr. President, will the Senator yield, please, for just one question?

Mr. STEVENSON (continuing). Were brought to the attention of the American people. That was in 1952, and the fund was the Checkers fund, and still the Senate has not acted.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. STEVENSON. Now it is proposing to go back on the action, the modest action, it took to permit unlimited use of political funds for official expenses.

Mr. NELSON. Mr. President, will the Senator yield for a question?

Mr. STEVENSON. I say to my good friend the time has come, and it was recognized in the other body, it was recognized in the House of Representatives, just a couple of weeks ago when the same question came up, and the House acted, as this body should, once and for all——

Mr. TALMADGE. Mr. President, will the Senator yield for a question?

Mr. STEVENSON (continuing). To put behind us these unofficial office accounts——

Mr. TALMADGE. Mr. President, will the Senator yield for a question?

Mr. NELSON. I wonder if the Senator, Mr. President, would allow me to ask one question for clarification?

Mr. STEVENSON. I have not finished my answer—and replace them with allowances or official funds for official expenses as is the practice now not only in this other body but in every branch of Government. This is the only one that holds out.

Yes, I yield to the Senator.

Mr. NELSON. Simply for clarification because, as I was listening to the Senator, he was referring to office accounts or unofficial office accounts: the resolution abolishes unofficial office accounts. So far as I know and so far as I have heard, no one objects to the abolition of the so-called unofficial office account, and that is what is provided in the House of Representatives, and that is what is provided in the Senate resolution.

What we are talking about is the expenditure of campaign funds under the law and the resolution. Am I not correct in that?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STEVENSON. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 additional minutes.

Mr. STEVENSON. The Senator is technically correct. Senate Resolution 110 says unofficial office accounts are abolished. But in the same breath it says they are permitted.

It says that funds derived from a political committee and used for the expenses of the Member in connection with his official duties are not unofficial office accounts.

So the point is a semantic point. Yes,

the Senator is correct. Unofficial office accounts, it says, are abolished, but it also says that political committees of which Senators are beneficiaries can continue to go out and raise money and pass the money through these committees and into their official expenses.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. STEVENSON. Yes, the Senator is correct in that sense. But in the larger sense, call them what one will, unofficial accounts are still with us.

The TALMADGE. Will the Senator yield for a question?

Mr. STEVENSON. Yes, I yield to the Senator from Georgia.

Mr. TALMADGE. I refer to the Senator's amendment on page 2, paragraph 3, line 1:

> No funds derived from a political committee (as defined in section 301(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) can be used for the purpose of defraying ordinary and necessary expenses in the operation of a senatorial office.

My point is this: Saturday evening in Macon, Ga., I shall be the chief speaker at a fundraising dinner for the newly elected Congressman from the State of Georgia to help pay off his debts. I do not consider that official business. When I get to Georgia the only way I can pay my expenses at the hotel will be out of remaining campaign funds. Is it the intention of the Senator from Illinois to prohibit that?

Mr. STEVENSON. No. It is not the Senator's intention.

The PRESIDING OFFICER. The Senator's additional 2 minutes have expired.

Mr. STEVENSON. Mr. President, I yield myself 3 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. STEVENSON. The Senator has pointed to an expense which is clearly a political expense and, consequently, political funds are appropriate. These funds of political committees could, under this amendment, as in the past, be used to defray those expenses.

Mr. TALMADGE. Will the Senator yield for a further clarification?

Mr. STEVENSON. I yield for a further clarification.

Mr. TALMADGE. As he knows, we serve 6-year terms, and in this business we run all the time or else someone will be running against us all the time and we will find ourselves victims at the ballot box at the next election. It is not the Senator's intention, is it, that we cannot use our political funds for political purposes during this 6-year term in which we serve?

Mr. STEVENSON. No. It is not this Senator's intention. On the contrary, it is my intention to permit the use of political funds, be they raised before, during, or after a campaign, for political purposes before, during, or at any point in the Senator's term, recognizing, as the distinguished Senator from Georgia does, political expenses continue throughout, day in and day out.

Mr. TALMADGE. If the Senator will yield further, from time to time I have considerable expenses entertaining guests that come from Georgia to Washington. As a matter of fact, only last week my colleague, Senator NUNN, and I cohosted a luncheon for some 40-odd newspapermen. I intend to pay that out of my political campaign fund. It is not the Senator's purpose to abolish that, is it?

Mr. STEVENSON. That becomes a closer question. Under this amendment the Senate would make the final judgment as to what is political and what is official after the Appropriations Committee had studied the matter and made a recommendation. In that particular situation I suppose it could be argued that this is a means of communicating with one's constituents and, therefore, it is reimbursable out of official expenses. My own feeling is no, that is a political expense and should be reimbursed out of political funds.

Mr. TALMADGE. If the Senator will yield further, there are no further funds for which that could be paid except personal funds, which would be prohibitive over a period of years, or else remaining political funds. Now a Senator is the best judge of what is political and what is not political, and he must have some discretion in using his political fund. If he is denied that discretion in using his political funds, he cannot operate effectively to represent his constituents and remain in office.

Mr. STEVENSON. The Senator is exactly right, and that is why it is the intention of the Senator from Illinois to permit the Senate to make that judgment, instead of leaving it to an Internal Revenue Service agent, who under the proposed regulations of the Internal Revenue Service will make such determination, and if the Senator has made a mistake his political committee loses its exemption from the Internal Revenue Code.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STEVENSON. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. STEVENSON. Those are judgments which the Senate can best make. They are judgments now which are made by agents, lesser officials, at least in the first instance, of the executive branch, and they are judgments I would point out to the Senator which can vary on the same set of facts, from Senator to Senator to Senator, depending on which agent looked over his shoulder and reviewed his return and made that judgment.

I say in this amendment that is a judgment which the Senate should make. When the Senate adjudges that certain expenses are official, reasonable, ordinary, and necessary expenses of service in the Senate, then they should be reimbursed from official funds.

If they are political expenses in the judgment of the Senate, a political body, then they should be reimbursed out of political funds. In both cases, of course, also they can be paid out of personal funds.

Mr. TALMADGE. If the Senator will yield further, there is no such fund in existence at the moment, and I doubt there ever will be. I do not think the Appropriations Committee or the Senate would authorize a blank check to any Senator to use for entertainment purposes or such purposes as he saw fit that might benefit his political future.

The only way a Senator can operate for his poltical future is with political campaign funds that his friends have been generous enough to make available for him. We have adequate disclosure laws. They are very stringent. We have to report every dime that is received and every dime that is expended, and I do. And that seems to cover the subject, without trying to fuzz it up where a Senator cannot make decisions as to how he can operate for his political benefit in future years.

It seems to me the Senator is attempting to go much too far here. I have no objection to abolishing these so-called office funds. I have an extremely modest one. I have not solicited any money for that purpose. I think I spend some $200 annually, and I think the bank account at the present time contains some $1,500 or $1,800 at the moment. I have used that fund heretofore to purchase paper to send newsletters to my constituents.

There are not adequate funds for that purpose. But traveling around a Senator's State when he is buying food for friends, renting hotel rooms for himself, and entertaining constituents who come to Washington, D.C., the only fund a Senator has to pay for it is with his political funds that have been contributed.

They are disclosed, the laws are stringent, and the law is adequate.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STEVENSON. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 15 minutes remaining.

Mr. STEVENSON. Mr. President, first I point out to my colleagues that as to one of those examples, the purchase of paper, this resolution would prohibit any expenses for that purpose except from official funds. Also, this amendment would permit Senators to make exactly the judgments that the Senator from Georgia is talking about, and that he is not permitted to make now and will not be with any confidence in the future—not by the Senate, but by the Internal Revenue Service and probably the FEC.

The prohibition in this amendment will not become effective until and unless the Appropriations Committee and the Senate itself make the judgment about what is reasonable, what is official expense, what are the political expenses, and provides, as the House of Representatives already has, allowances to cover the official expenses. If that has not been done, and if there are no funds to cover what clearly are official expenses for the cost of a Senator's service in this body, there will not be a prohibition against the use of political funds for those official expenses.

That, in my judgment, would be important. And I think the taxpayers of the United States would be happy to pay

a small fraction of one penny per year to get rid of what are commonly called, and not inaccurately, slush funds.

Mr. HART. Mr. President, will the Senator yield?

Mr. STEVENSON. I yield to the Senator from Colorado.

Mr. HART. I would like to ask the same sort of question as has the Senator from Georgia. The Senator from Colorado has the same sort of expenses as the Senator from Georgia. I travel through the State, in my case in a mobile office, funds for which are not voucherable, and have some other costs of holding the office which I do not consider political.

Suppose the Senator from Colorado does not have political funds left over from his campaign, as I did not. Fortunately, some people who run for office have friends who are sufficiently generous contributors that they have such funds available, but in my case it did not work out that way.

Under this amendment, am I prohibited from hiring a singer or a guitar player, or some such, to come to Colorado for a concert, and charge the people for the entertainment, about $5 or $10 apiece, for the purpose of raising funds?

All the discussion so far has focused on the political campaign funds. I did not have any, but I still have all the burdens of holding this office. My question is, would the Senator's amendment prohibit me from holding that kind of fundraiser, to raise funds to use for these puropses?

Mr. STEVENSON. No, the amendment would not prevent the Senator for holding such a gathering to collect political funds for political purposes at any time.

Mr. HART. No, not political.

Mr. STEVENSON. Or to be used for any purpose, until the Senate puts its house in order, as every other branch of Government has, by providing adequate allowances to defray official expenses. At that point, then, the political funds raised in such circumstances as the Senator just mentioned would not also be available to cover official expenses. Official funds would cover the official expenses, and the political funds would cover the political expenses, and the Senate, not the IRS, or someone else would make the judgment as to which is which.

Mr. HART. But the amendment offered by the Senator from Illinois would not have the effect of prohibiting that kind of fundraiser, which he calls political and which I do not.

Mr. STEVENSON. No. No, but the Senator——

Mr. HART. Or the expenditure of those funds for such purposes.

Mr. STEVENSON. It would not prohibit the Senator from raising the funds as outlined. Under Senate Resolution 110, the resolution that the Senate is now considering, those funds could not go into an unofficial office account. Unofficial office accounts are abolished under this resolution.

Mr. HART. I understand that.

Mr. STEVENSON. Senate Resolution 110 provides that they have to come through a political committee, and if they do, they can then be used for official expenses. All my amendment would do is state that when, as, and if the Senraising activities for official expenses; then Senators could no longer hold fundrasing activities for official expenses; and and that is what the Internal Revenue Service seems to be saying.

Mr. HART. Leaving that aside, the Senator from Colorado being less sanguine than the Senator from Illinois about the Rules Committee acting and taking care of the matter, what if the Rules Committee does not take care of the matter, and then the Senator's amendment does not take effect. Where are the less affluent Members of the Senate then?

Mr. STEVENSON. First of all, it is not the Rules Committee that acts.

Mr. HART. Well, whatever committee.

Mr. STEVENSON. The Appropriations Committee. The Appropriations Committee is mandated to act. The amendment would not become effective until and unless the Senate had acted and 30 days after it acted. So, without action, the amendment would permit the use of political funds for official expenses.

Mr. HART. But the action is to solidify the decision of Senate Resolution 110, and we are not going to expand the definitions of what is voucherable under our office accounts; that is the action that the Appropriations, Rules, or Ethics Committee, or whoever has to act on this, would take. Then 30 days pass, and the amendment of the Senator from Illinois takes effect, and some of us are left out in the cold.

Mr. STEVENSON. I call the attention of the Senator to paragraph 4 of proposed rule XLVI, which says, in subparagraph 3, that the prohibition will take effect 30 days after the Senate takes final affirmative action on the resolution so required to be reported under section 31. So there would not be any prohibition at all until the Senate had acted and 30 days after that, to approve the allowances of official funds for official expenses. There is no hiatus.

Mr. HART. I am not talking about a hiatus, but the Senator from Illinois is assuming the action will be positive. The action can be to finally cut things off, or even more strictly define what is voucherable.

Mr. STEVENSON. The Senator is assuming the Senate is going to approve zero. I do not make that assumption. I do not think it is reasonable.

Mr. HART. But I have to.

Mr. STEVENSON. If the Appropriations Committee so reports, then the Senator will have the opportunity, as will all other Senators, to say no, and require the Senate to act as the House has already.

We have been waiting a quarter of a century; we can go on waiting another quarter of a century, and that is exactly what will happen. Unless this amendment is adopted, the Appropriations Committee is not mandated and the Senate does not know. But when that moment comes, there will be no more Checkers funds, no more slush funds, no more tin cups for oil companies and special interests who wish to defray the expenses of Senators. When that moment comes, maybe the Senate will do what it should have done a quarter of a century ago.

Mr. HART. It is a big maybe for a person who has no other source of income, and whose sources for an unofficial account are not the oil companies or other special interests, but people who contribute $5 or $10 to go to a concert.

Mr. ALLEN. Will the Senator yield?

Mr. STEVENSON. Mr. President, I cannot yield any more of my own time. I have yielded too much already. I would be glad to yield on the time of other Senators.

Mr. ALLEN. Who has time? Who controls the time?

Mr. President, on behalf of Senator NELSON, I yield myself 5 minutes.

I would like to ask the distinguished Senator a question. In listening to the Senator respond to the question of the distinguished Senator from Colorado, I believe the Senator from Illinois unwittingly left the wrong impression. He seemed to indicate there to be some sort of distinction between an ongoing political fund, as outlined by the Senator from Colorado, and the other type of fund to which he referred, which would be the disbursement from a surplus political fund.

Actually, there is no difference between the two. The same rules under paragraph 3 as to disbursements from these funds would be identical. Is that not correct?

Mr. STEVENSON. The Senator is absolutely correct. I was mistaken, if I left that impression.

Mr. ALLEN. I thank the Senator.

The PRESIDING OFFICER (Mr. BUMPERS). Who yields time? Is all time yielded back?

Mr. STEVENSON. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Illinois has 3 minutes.

Mr. STEVENSON. Mr. President, I think it is unfortunate that the debate has taken this turn and centers almost exclusively on what is good for Senators. The purpose of this amendment is to benefit Senators, but its larger purpose is to benefit the country.

I do not believe that Checkers funds or unofficial office accounts, whatever they are called, are cured just because they are made public. The system still forces Senators to be, or to be preceived as being, beholden to their benefactors, demeaned by a process which invites them to seek patrons. The public reasonably questions whether those who pay for public duties acquire a disproportionate influence over public duties.

Senators are, and they have cited numerous circumstances, forced to spend time away from public duties to seek the funds with which to discharge public duties. These funds ought to go. They have been with the Congress too long. They bring disfavor. They bring suspicion upon the Congress. It is no more necessary to conduct the public's business with private funds than it is to conduct private business with public funds.

Mr. President, this amendment would make public money available to defray the cost of performing public duties, just as has been done in the other body and is done in the other branches of the Federal Government. This is the one holdout. I urge Senators to support this amendment. It has been a quarter of a century, it has been too long already.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STEVENSON. The chance for Senators to act in this regard may not come again for a long time.

Mr. JOHNSTON. Mr. President, I move to table the amendment of the Senator from Illinois.

The PRESIDING OFFICER. The motion is not in order until the opposition time has either expired or has been yielded back. Does the floor manager yield back his time?

Mr. THURMOND. Mr. President, we yield back the remainder of our time.

Mr. STEVENSON. Mr. President, I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. The motion has not yet been made.

Mr. JOHNSTON. Mr. President, I move to table the amendment of the Senator from Illinois, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Illinois. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Louisiana (Mr. LONG), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Massachusetts (Mr. KENNEDY), the Senator from North Carolina (Mr. MORGAN), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Florida (Mr. STONE) are absent on official business.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. MCCLURE), and the Senator from New Mexico (Mr. SCHMITT) are necessarily absent.

The result was announced—yeas 47, nays 43, as follows:

[Rollcall Vote No. 70 Leg.]

YEAS—47

Baker	Dole	Huddleston
Bayh	Domenici	Inouye
Belimon	Durkin	Javits
Bentsen	Eastland	Johnston
Brooke	Garn	Laxalt
Bumpers	Glenn	Mathias
Burdick	Hansen	Matsunaga

Eag.eton	Metcalf	Zorinsky
Ford	Metzenbaum	

NOT VOTING—10

Abourezk	Long	Schmitt
Gravel	McClure	Stone
Hatfield	Morgan	
Kennedy	Moynihan	

So the motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Texas (Mr. TOWER) is recognized to call up two amendments on each of which there shall be a 1-hour debate, equally divided and controlled.

Mr. ROBERT C. BYRD. Will the Senator from Texas yield for a unanimous-consent request only?

Mr. TOWER. I yield to the distinguished majority leader.

Mr. President, may we have order?

The PRESIDING OFFICER. Senators will cease conversation.

The Senator from West Virginia.

ORDER DEFERRING HUDDLESTON AMENDMENT

Mr. ROBERT C. BYRD. Mr. President, following the amendments by Mr. TOWER, Mr. HUDDLESTON has an amendment, but he has asked that the order recognizing him at that time to call up his amendment be vitiated.

I, therefore, ask unanimous consent that instead of Mr. HUDDLESTON, Mr. JOHNSTON be recognized at that time to call up his amendment, and that Mr. HUDDLESTON not be recognized today to call up his amendment.

I am just substituting one Senator for another.

The PRESIDING OFFICER. Is this a unanimous-consent request?

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 96

Mr. TOWER. Mr. President, I call up my first amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an unprinted amendment numbered 96.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, line 14, after the word "INCOME", add "; INCOME FROM GOVERNMENT SOURCES".

On page 26, after line 24, add the following new language; "4. During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis), such individual shall not accept any subsidy payment from the Treasury of the United States, nor shall he accept any income from any enterprise which is regulated or financed either wholly or in part by the Government of the United States, except that this paragraph shall not apply to any income from securities of the United States Government.

Mr. TOWER. Mr. President, I yield myself such time as I may require.

The purpose of this amendment is very simple. I am hopeful that the distinguished manager of the bill will agree to it. I feel some optimism that he will agree to accept it in that he supported this identical amendment about 2 years ago when this same issue came up on the Senate floor.

As a matter of fact, this is identical to an amendment that I offered to the Federal election campaign financing bill. Actually, I offered it as an amendment in the second degree to an amendment of the Senator from Alabama, which passed the Senate by a vote of 56 to 37—a vote of 56 to 37 by which it passed.

It is very simple. It is something that if we want a meaningful ethics code I am sure all Senators will want to support because it removes any doubt about what we are trying to do here.

Its purpose is to prohibit any Senator or Senate employee making $35,000 or more from accepting any Federal subsidy or any income from any enterprise which is regulated or financed, wholly or in part, by the Federal Government. That is all it does. Just so that we will not be earning income from business enterprises that are either federally regulated or federally financed. Also, we cannot accept Federal subsidies such as agricultural subsidies and that sort of thing.

If we want to convince the people that we mean business, we should adopt this amendment. It makes eminent sense, because every day we pass on legislation here that influences the earned income and the unearned income of people who have some kind of equity ownership in a business enterprise in this country.

For example, let us take regulation Q. We have gone on extending that about every 3 or 4 months around here. Anybody who has any income invested in a savings and loan, it would seem to me, would want to divest of that savings and loan investment, because he is voting on regulation Q, which puts money in his pockets. We want to be entirely incorruptible and that no longer, under the good ethical standards, will this kind of thing be tolerated.

When I was assigned to the Committee on Banking, Housing, and Urban Affairs, I divested myself of all my banking stock, such as it was, and my small business

investment corporation stock, because I did not want there to be even a suggestion of conflict of interest. Since we have been considering this measure, I have learned what a sap I was. Being a clergyman's son by background and a teacher by profession, I never accumulated much in this world except a little of that stock. I got rid of it at a loss.

If this ball passes in its present form, what we are being told is, "Go out and make your real estate deals, invest in a savings and loan association or a bank, and you can influence the kind of earnings that you make by the legislation that you pass on here, in the Congress of the United States."

Without some proscription such as this, if indeed earnings are corruptible, then this bill is a hoax. It is a PR gimmick. I am amazed that the press, for the most part, is bought off on this business, that if we simply proscribe the earning of honoraria, somehow we have become ethical and we have legislated ourselves into a high state of public morality that everybody is going to accept.

Mr. GOLDWATER. Mr. President, will the Senator yield for a question?

Mr. TOWER. A distinction between honoraria income or other earned income and unearned income is invidious, and any court in the land would so hold. If we do not adopt something like this amendment, this resolution is a hoax.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. TOWER. Regardless of what the press says about it, the people are going to find out about it one of these days.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Georgia.

Mr. TALMADGE. If you have a savings account in an S. & L. bank, would the Senator's amendment prohibit that?

Mr. TOWER. Yes. It would prohibit your earning income from it.

Mr. TALMADGE. Would it also prohibit a savings account in any national bank?

Mr. TOWER. It would prohibit that; yes. If it is a federally regulated bank, it would, so you would have to put your money in a nonfederally regulated bank.

Mr. TALMADGE. Suppose you owned stock in A.T. & T.

Mr. TOWER. Yes; the income would be prohibited.

Mr. TALMADGE. And any regulated business whatever—a bank or a savings and loan?

Mr. TOWER. That is correct. This is broad and sweeping in scope.

I think it makes us even more pure and above reproach than Caesar's wife. We will be so pristine in the eyes of the world that they will not be able to stand us. [Laughter.]

Mr. TALMADGE. Is the Senator offering his amendment in a spirit of levity?

Mr. TOWER. I am not offering it in a spirit of levity.

I see no distinction between earned income and unearned income, and I think we are deceiving the American people when we say there is a difference. There are men in this body who earn one hell of a lot of money on matters that are federally regulated.

Does the Senator from Georgia think that is right? Does he really think we should?

Mr. NELSON. May I ask the Senator a question?

Mr. TOWER. By the way, I would expect my distinguished friend from Wisconsin to accept this amendment, because he voted for it the last time it came up.

Mr. NELSON. I have supported a lot of stuff, but nothing this radical. I would like to try it out sometime.

Mr. TOWER. As a matter of fact, the Senator from Wisconsin did vote for it the last time. It passed the Senate by a vote of 56 to 37 the last time. Why it was good then and is not good now, when we are all covered up with the spirit of wanting to do something ethical, I do not know.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. NELSON. The reason I voted for it the last time was that I was not here when the Senator from Texas gave his speech. [Laughter.]

Mr. TOWER. I will be glad to stop speaking, if the Senator will vote for it this time.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Arizona.

Mr. GOLDWATER. Would this apply to income from agricultural support programs?

Mr. TOWER. Yes, it would. No agricultural subsidies.

Mr. GOLDWATER. Any subsidies at all from the Federal Government?

Mr. TOWER. That is correct.

Mr. GOLDWATER. I am glad I am not a farmer.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. TOWER. Are we going to say, by defeating this amendment, that we think that Members of Congress should accept the subsidies we authorize and appropriate? That is precisely what we would be doing.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. HUMPHREY. We have a little family drugstore that continues to lose money, which I would be glad to sell at any time, so I have no conflict of interest. Give me 50 cents on a dollar, and you can have it today.

Mr. TOWER. As long as it continues to lose money, the Senator from Minnesota is all right; but once it starts to earn money, he is in trouble.

Mr. HUMPHREY. We have filled a few medicaid prescriptions. Would there be any conflict of interest?

Mr. TOWER. Obviously, there is. That will have to be interpreted by the Ethics Committee. That should not give us any problem.

Mr. HUMPHREY. We do not need the Ethics Committee to look over the drugstores. We have enough problems.

Mr. TOWER. That would not cause any problem, because we confer on the Federal bureaucracy broad powers to interpret all the time; and they do it, and they go beyond the intent of Congress. I think we could count on our own Ethics Committee to determine this in a fair way. I think that someone wholly engaged in intrastate commerce, not subject to Federal regulations, would be excluded.

Mr. HUMPHREY. It is subject to Federal regulation from OSHA on up.

Mr. TOWER. I would like to see the Senator trying to vote for an exemption for drugstores from OSHA if he is earning money from a drugstore.

Mr. HUMPHREY. I am losing money. That does not make any difference.

By the way, we give a 10-percent preacher's discount to Members of Congress if they stop by. Would that in any way cause any trouble with this code of ethics?

Mr. TOWER. I would be glad to accept a clarifying amendment from the Senator from Minnesota, if he would offer one. [Laughter.]

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Nebraska.

Mr. CURTIS. Congress is called upon to vote for or against including the cost of prescription drugs in the medicare program.

Mr. TOWER. That is correct.

Mr. CURTIS. I think that probably would put the matter under discussion within the purview of the amendment of the Senator from Texas.

Mr. TOWER. I think it would.

Mr. DECONCINI. Mr. President, will the Senator yield for a question?

Mr. TOWER. I yield for a question.

Mr. DECONCINI. Would this amendment prohibit the purchase of savings bonds by Members of this body?

Mr. TOWER. It would not prevent income earned from U.S. savings bonds, no.

Mr. DECONCINI. Even though that is regulated by the Federal Government?

Mr. TOWER. It would not prevent that, because the Federal Government needs the money. [Laughter.]

Mr. GOLDWATER. Mr. President, will the Senator yield for a question?

Mr. TOWER. There is a specific exception in the amendment for all U.S. securities.

I yield to the Senator from Arizona.

Mr. GOLDWATER. How could this apply to pensions?

Mr. TOWER. It would not apply to pensions, retirement.

Mr. CURTIS. Why should it not?

Mr. TOWER. Why should it? Because that is a double dip. [Laughter.]

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. It looks pretty bad right now. Perhaps I had better keep talking.

Mr. President, I yield back the remainder of my time, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. TOWER. Before I yield back the

remainder of my time, I wish to say this: A lot of fun has been made of this amendment, and perhaps there is a great deal that might invoke a spirit of levity here. But I simply would like to raise a question to dramatize the point.

How can we really say this is an honest bill when many of us are going to be sitting here earning income from business enterprises that are federally regulated, federally controlled in some instances, federally subsidized, federally financed, and farm subsidies?

If we fail to pass this what we say is this is all legitimate, that we are not corruptible on this. Why not? What is the difference between this and an honorarium? I fail to see the distinction, and I do not think it has been made. I think the Senator from Maine did a great service the other day when he challenged anyone here to explain why earned income is corrupting and unearned income is not. That distinction has not been made, and I wonder if the general public is going to see the distinction? I do not think they are.

What we are going to do here when this is voted down—and I am certain it will be—is to tell the public we do not think it is unethical for us to vote, for example, to extend regulation Q if we have money invested in a savings and loan when we are casting a vote that directly puts money into our pockets if we have that type of investment.

I cite that merely as an example.

I yield to the Senator from Maine.

Mr. MUSKIE. I am not going to indulge in any extended repetition of what I said the other day, but I must support the amendment of the distinguished Senator from Texas.

He is absolutely right. Normally, I would be impressed by these questions that are suggesting difficulties that would be involved for Members who are in one way or another running afoul or who would run afoul of the restriction the Senator's amendment would propose. But I have lost all sensitivity to those problems because the sensitivity is not reciprocated.

Perhaps the only way you can get the Senate to focus on the realities of unearned income as well as earned is to adopt an amendment of this kind, and I enthusiastically support the amendment.

Mr. HANSEN. Mr. President, will the Senator from Texas yield?

Mr. TOWER. I yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I, too, shall support this amendment not because I agree at all with what the result of the amendment, if it were to become law, would be, but rather because, as was expressed by the Senator from Maine, it does clearly point up the hypocrisy of what we are doing here.

I supported the Senator from Maine, as did some 33 or 34 others in this body. For reasons that I do not understand, being on the minority side, we did not do too well that afternoon, as I remember. But, at least, I would like to assure my friend from Texas if he will stay hitched, the Senator from Maine and I will assure him there will be three votes for it.

Mr. NELSON. Mr. President, I must say to the distinguished Senator from Texas that he achieved a level of eloquence that matched the eloquence of the Senator from Maine the other day, and I have never seen the Senator so sincere about an amendment before in my life. If there is no objection, I will accept the amendment.

Mr. TOWER. Good. [Laughter.]

Mr. NELSON. I just want to see how many people here wanted to kill the code of conduct.

Let me point out——

Mr. TOWER. Is there objection? There does not appear to be any objection.

Mr. NELSON. I think I will move to table it.

Mr. President, I ask unanimous consent that title 18, section 431, respecting contracts with Members of Congress, and section 433 of title 18 of the United States Code be printed in the RECORD.

They prohibit payments to Members of Congress based upon contracts with the Government, but they make exceptions for the Reconstruction Finance Corporation Act, the Agricultural Adjustment Act, the Federal Farm Loan Act, the Emergency Farm Mortgage Act of 1933, the Farm Credit Act of 1933, the Homeowners Loan Act of 1933, the Farm Home Administration Act of 1946, the Bankhead-Jones Farm Tenant Act or as to crop insurance agreements or contracts or agreements of the kind which the Secretary of Agriculture may enter into with farmers.

I ask unanimous consent that both of those sections be printed in whole in the RECORD.

There being no objection, the sections were ordered to be printed in the RECORD, as follows:

TITLE 18—CRIMES AND CRIMINAL PROCEDURE

§ 431. Contracts by Member of Congress.

Whoever, being a Member of or Delegate to Congress, or a Resident Commissioner, either before or after he has qualified, directly or indirectly, himself, or by any other person in trust for him, or for his use or benefit, or on his account, undertakes, executes, holds, or enjoys, in whole or in part, any contract or agreement, made or entered into in behalf of the United States or any agency thereof, by any officer or person authorized to make contracts on its behalf, shall be fined not more than $3,000.

All contracts or agreements made in violation of this section shall be void; and whenever any sum of money is advanced by the United States or any agency thereof, in consideration of any such contract or agreement, it shall forthwith be repaid; and in case of failure or refusal to repay the same when demanded by the proper officer of the department or agency under whose authority such contract or agreement shall have been made or entered into, suit shall at once be brought against the person so failing or refusing and his sureties for the recovery of the money so advanced. (June 25, 1948, ch. 645, 62 Stat. 702; Oct. 31, 1951, ch. 655, § 19, 65 Stat. 717.)

LEGISLATIVE HISTORY

Reviser's Note.—Based on title 18, U.S.C., 1940 ed., § 204 (Mar. 4, 1909, ch. 321, § 114, 35 Stat. 1109).

Word "agency" was inserted in three places to eliminate any ambiguity as to scope of section. (See definition of department or agency under section 6 of this title.)

Minor changes were made in phraseology.

AMENDMENTS

1951—Act Oct. 31, 1951, struck out ": exceptions", following "Congress" in catchline of section.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 433 of this title; title 10 section 2?9; title 15 section 714m; title 22 section 2676.

§ 433. Exemptions with respect to certain contracts.

Sections 431 and 432 of this title shall not extend to any contract or agreement made or entered into, or accepted by any incorporated company for the general benefit of such corporation; nor to the purchase or sale of bills of exchange or other property where the same are ready for delivery and payment therefor is made at the time of making or entering into the contract or agreeemnt. Nor shall the provisions of such sections apply to advances, loans, discounts, purchase or repurchase agreements, extensions, or renewals thereof, or acceptances, releases or substitutions of security therefor or other contracts or agreements made or entered into under the Reconstruction Finance Corporation Act, the Agricultural Adjustment Act, the Federal Farm Loan Act, the Emergency Farm Mortgage Act of 1933, the Farm Credit Act of 1933, or the Home Owners Loan Act of 1933, the Farmers' Home Administration Act of 1946, the Bankhead-Jones Farm Tenant Act, or to crop insurance agreements or contracts or agreements of a kind which the Secretary of Agriculture may enter into with farmers.

Any exemption permitted by this section shall be made a matter of public record. (June 25, 1948, ch. 645, 62 Stat. 703; Oct. 4, 1961, Pub. L. 87-353, § 3(o), 75 Stat. 774.)

LEGISLATIVE HISTORY

Reviser's Note.—Based on section 1514(f) of title 7, U.S.C. 1940 ed., Agriculture; sections 264w, 598, 1188d(e), 1441(e) 1467(d) of title 12 U.S.C. 1940 ed., Banks and Banking; section 616(e) of title 15, U.S.C., 1940 ed., Commerce and Trade; title 18, U.S.C. 1940 ed., § 206 (Mar. 4, 1909, ch. 321, § 116, 35 Stat. 1109; Dec. 23, 1913, ch. 6, § 22(j), as added June 19, 1934, ch. 663, § 3, 48 Stat. 1107; Jan. 22, 1932, ch. 8, § 16(c), 47 Stat. 12; July 22, 1932, ch. 522, § 21, 47 Stat. 738; June 13, 1933, ch. 64, § 8, 48 Stat. 135; June 16, 1933, ch. 98, § 64, 48 Stat. 268, 269; Jan. 25, 1934, ch. 5, 48 Stat. 337; Jan. 31, 1934, ch. 7, § 13, 48 Stat. 347; June 27, 1934, ch. 847, title V, § 510, 58 Stat. 1264; May 28, 1935, ch. 150, §§ 20, 21, 49 Stat. 298; Aug. 23, 1935, ch. 614, § 101, 48 Stat. 703; Aug. 20, 1937, ch. 821, 50 Stat. 838, Feb. 10, 1938, ch. 30, title V, § 514, 52 Stat. 77).

These sections were consolidated with such changes of phraseology as were necessary to effect consolidation. Said section 206 of title 18, U.S.C. 1940 ed., was the principal source of this section, but the enumeration of the kinds of commitments exempted was drawn from the various sections of said title 12 set forth above. The reference to crop insurance agreements is drawn from section 1514(f) of Title 7, Agriculture.

The applicability provisions of the sections

here consolidated were unclear and of doubtful value. As revised the section preserves everything of value without change of substance.

References to the Bankhead-Jones Farm Tenant Act and the Farmers' Home Administrative Act of 1946 were included in this revised section notwithstanding the emission (and consequent repeal) of former subsection (d) of section 52 of the said Bankhead-Jones Act (1937) (Title 7, U.S.C., 1940 ed., § 1026) in the amendment of said section 52 of such Act by section 3 of the said Farmers' Home Administration Act of 1946 (August 14, 1946, ch. 964, 60 Stat. 1062). The essential nature of the transactions under the several acts would render inconsistent any attempt to include some and exclude others.

REFERENCES IN TEXT

The popular name acts referred to in the text have been classified to the Code as follows:

Reconstruction Finance Corporation Act.—Sections 601, 603, 605, 606, 607, 608, 609, and 611 of Title 15, Commerce and Trade.

Agriculture Adjustment Act.—Sections 601–604, 607, 608, 608a, 608b, 608c, 608d, 608e—1, 608f—612, 613, 614–619, 620, 623, and 624 of Title 7, Agriculture.

Federal Farm Loan Act.—Sections 641, 642, 651, 656, 658–664, 672, 673–678, 691–697, 701, 711–723, 731–734, 741–744, 745–747, 751–757, 761, 771, 772, 781, 791, 801–808, 811–824, 831, 841–844, 851–857, 861–864, 871–886, 891–899, 901–903, 911–915, 921, 931, 932, 933, 941–943, 951–953, 961–963, 964–967, 971–973, 991, 992, 993, 1011, 1012, 1021–1023, 1024–1026, 1031–1033, 1041–1045, 1051–1053, 1061, 1072, 1081, 1091–1095, 1101, 1111, and 1129 of Title 12, Banks and Banking.

Emergency Farm Mortgage Act of 1933.—Sections 347, 462b, 636, 723, 771, 781, 810, 823 note, 992, 993, and 1016–1019 of Title 12, Banks and Banking.

Farm Credit Act of 1933.—Sections 639, 640, 659, 674, 677a, 694, 723, 744a, 771, 781, 791, 874, 876, 878–880, 884, 952, 964, 971, 972, 992, 1016–1018, 1022, 1031, 1131c–1131e, 1131f, 1131g, 1131h, 11311, 1134–1134m, 1138–1138c, 1138e, 1141c, 1141d, 1141e, 1141f, 1141j, 1148a, and 1151a of Title 12, Banks and Banking, and section 610 of Title 7, Agriculture.

Home Owners' Loan Act of 1933.—Sections 1424, 1461–1463, 1464–1466, and 1468 of Title 12, Banks and Banking.

Farmers' Home Administration Act of 1946.—Sections 1001, 1001 notes, 1002–1005d, 1007, 1008, 1009, 1015, 1015 note, 1016–1025, and 1027–1031 of Title 7, Agriculture, sections 371, and 1702 note of Title 12, Banks and Banking, and section 82h of Title 31, Money and Finance.

Bankhead-Jones Farm Tenant Act.—Sections 1000–1005d, 1006c, 1006d, 1007, 1008–1012, 1014–1025, and 1027–1029 of Title 7, Agriculture.

AMENDMENTS

1961—Pub. L. 87–353 struck out "the Federal Farm Mortgage Corporation Act," following "the Emergency Farm Mortgage Act of 1933,".

ABOLITION OF HOME OWNERS' LOAN CORPORATION

The Home Owners' Loan Corporation, which was created by the Home Owners' Loan Act of 1933, referred to in this section, was dissolved and abolished by act June 30, 1953, ch. 170, § 21, 67 Stat. 126, set out in note under section 1463 of Title 12, Banks and Banking.

ABOLITION OF RECONSTRUCTION FINANCE CORPORATION

The Reconstruction Finance Corporation, which was created by the Reconstruction Finance Corporation Act, referred to in this section, was abolished by section 6(a) of 1957 Reorg. Plan No. 1, eff. June 30, 1957, 22 F.R. 4633, 71 Stat. 647, set out in the Appendix to Title 5, Government Organization and Employees.

Secret Service, detection and arrest of violators, see section 3056 of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3056 of this title; title 12 section 209.

Mr. NELSON. I intend to move to table the amendment of the Senator from Texas.

Does anybody wish to have time or is the Senator prepared to yield back the time?

Mr. TOWER. I will yield it back in just a moment.

Again I want to say in all seriousness that a lot of questions have been raised about the scope of this. The scope is admittedly very broad indeed. We got a lot of levity and a lot of fun over this amendment, but really is it any laughing matter if we purport to establish standards of ethical conduct for ourselves and tell the public this is what we have done, when a number of us profit from enterprises that are impacted by legislation we pass? It occurs to me if one form of income from a private sector of this economy is evil, all forms should be.

No, I do not think this amendment is really good, but I do not think any limitation on income is good. I think full disclosure is enough, and let the people decide. We are taking the decision-making process away from the people, that is what we are doing.

Why not full disclosure and let the people decide? But if we are going to limit income and say we have removed potential corrupting influences from the Senate, let us be honest about it. We have been patently dishonest to this moment when we say that one kind of income is corrupting and, therefore, we removed it; it does not affect many people.

I think the Senator from Maine properly raised the possibility this may be a rich man's body one of these days. It is called an exclusive club, and it is going to get even more exclusive, and we are going to find it more difficult by virtue of proscriptions on income to get people to serve in the Senate.

There is no difference between income in the sense that if it comes from the same source it is incorruptible or corruptible; it is in terms of the form in which you get it.

I say we are being hypocrites. We are being dishonest if we suggest we removed every potential for corruption of the Senate by removing one type of income. When a man's pocketbook can be vastly more influenced by a vote he casts in the Senate on a matter from which he derives a regular earning than a vote he casts on a matter in which some association he has spoken to has an interest, I think we are being dishonest.

Why put a $1,000 limit? Does that mean Senators can be bought for $2,000 but they cannot be bought for $1,000? What does that mean? What is the going price for a Senator? Or if indeed getting honoraria from 25 different organizations is more corrupting than getting it from 8 different organizations, what kind of sense does that make? It does not make any sense; it does not make any at all.

So why do we not confess what we are doing here in engaging in some PR gimmickry—that is what we are doing. We are not really setting a rigid ethical standard for the Senate to follow, because you can still go on with your real estate deals, fellows, you can still get involved in some promotional "sweetheart" deals.

Some of your constituents can tell you and say they have a little promotional scheme; "Put in $500, we will put you down and we will make it $10,000 in 6 months." You can do that, that is ethical, by definition it is ethical, by virtue of what we do here.

Mr. MUSKIE. Mr. President, will the Senator yield? The Senator might be interested to know the other evening after I returned to my office after that overwhelming vote against my amendment I was advised by my staff I had received several invitations from colleges to visit their campuses and to lecture on the new Senate code of ethics.

Mr. TOWER. New Senate what?

Mr. MUSKIE. To lecture on the new Senate code of ethics.

It seems to me my answer has got to be that next year, if I have already earned $8,600 from hororaria, that accepting their invitation will be unethical, but if I have not yet reached that ceiling, I can ethically accept their invitation.

That is the ridiculousness of the situation in which we have been put, and I cannot imagine an argument against the Senator's amendment which would be more ridiculous than the implications of what we have already voted on in the Senate.

Mr. TOWER. I thank the Senator from Maine.

I shall simply close with this: What we are trying to do is placate the public in their outrage over our voting to raise our pay. That is all we are doing here. I think they will respect us more if we are honest about it and say: "Look, we are just trying to soothe your ruffled feathers because we voted to raise our pay and you raised hell with us about it, and now we are going to put this bad ethical code out here."

Oh, we are going to still engage in our private business deals, and we may use some of our insider information to buy equity in some business or to buy a security. We could do that because by definition that is ethical. We are not going to say that, but that is what we can do.

Some day the public is going to cotton onto the fact that what we have given them here is window dressing. This is a cosmetic resolution. It is rank hypocrisy. It is a hoax.

I yield back the remainder of my time.

Mr. HUMPHREY. Mr. President, is any time left?

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. I do not yield back the remainder of my time.

The PRESIDING OFFICER. The Senator does not?

Mr. TOWER. No.

Mr. NELSON. How much time does the Senator from Wisconsin have?

The PRESIDING OFFICER. Twenty-eight minutes.

Mr. NELSON. I yield 10 minutes to the Senator from Minnesota.

The PRESIDING OFFICER (Mr. FORD). The Senator from Minnesota is recognized for 10 minutes.

Mr. HUMPHREY. Mr. President, I think what we are doing here more than anything else is saying to the American people that we are not trustworthy. That is really what we are doing.

I have checked my mail on the whole issue of this so-called code of ethics. I get a lot of mail, over 1,000 letters a day. That is a lot of mail. I have had six letters on this issue. And by the way, I have not had very many on the pay increase either. I get a whole lot more letters on a lot of other issues that people are concerned about. We received a little batch of mail after the editorials went out in the local newspapers from some of our constituencies, but we did not get very much on it, if one really checked it out, as compared to our other mail on issues.

What we are really saying and telegraphing to the American people here is that a group of us have got together here and we decided, looking at each other, that we are not trustworthy. I tell Senators that their opponents will find out whether we are trustworthy or not in an election. I do not know what the Senators media are in their State, but they are able to investigate pretty well. And most of us are under the glare of public examination in our private and public conduct.

There is not a saint in this body, I might add, unless I have missed one of them. There are some who are close to it, but I do not think we should proclaim that we are saints. But we are reasonably good mortals.

I do not recall hearing too many Senators in this body say by whisper, innuendo, in private conversation, or in public statement that they are voting for a particular bill, because it is going to enrich them.

I do not have time to think about that. And that is why 12 years ago what little assets Mrs. Humphrey and I had we put in a blind trust, and to this day I do not know what is in it, because it has been blind. My lawyer says keep it that way. And it has been kept that way. In that trust was an inheritance that came from my father-in-law, some that came from my father, and some of it, thank God, someone had some sense to wisely invest. I have not had the time or maybe the sense. I have hardly had time to take care of my family much less talking about taking care of a business.

I joked many times in here about a family drugstore. All I know about is once a month, because it is an incorporated little town business that my father set up years and years ago, I get a monthly statement showing us what the effect of the drought is in South Dakota.

I can learn more about the economy out of that business than I can learn from Dr. Burns or the Council of Economic Advisers. All I need to look at are the accounts receivable that are not being received and the bad checks that we have in the cash drawer. I do not need to go to Harvard Business School to find out what is happening to this economy insofar at least as that part of the country is concerned.

But really if we are going to adopt a code of ethics here I think we should make up our mind that we should not during the process by implication by what we say and do make us all look as somehow or other we are not worthy of the public trust or the trust of our local constituency or our next door neighbor.

Quite frankly I was deeply moved by what Senator MUSKIE had to say about earned income. There is no man in this Senate who has had the privilege of earning more money on the speaking circuit than HUBERT HUMPHREY, and I am proud of it. I worked hard. I sacrificed body and family. I went out late at night. I traveled all night to get up early and come back the next morning.

I told Senators that I had a home out there in Minnesota. I have a sign on it that says "The home that wind built." I never would have been able to buy it except I went out and I spoke, I wrote, and I lectured.

When I was out of office for 2 years I made more money in 2 years than I made in all the years that I was in office. Hallelujah. Private enterprise. It was like picking it off the trees, and I worked for it, too. I taught two schools, served on the board of directors, chairman of a corporation, wrote a column, did a radio show, and lectured, worked like blazes 18 hours a day, 7 days a week, and packed it in.

I thought I might be foolish enough to come back to office again and would not be able to earn anything, so I put all I could put away in 2 good years of private life. The electorate took care of me, they defeated me for the Presidency, and the private enterprise system helped take care of me financially. And I thank both of them for both judgments.

There is not any doubt that a Member of this body should have a chance to earn income, but we are getting a salary of $57,000 a year. In my State that is a lot of money. I do not know how many people in Minnesota get that much money, but not too many. I also recognize that they do not have the same expenses. I have a home in Minnesota, and I have one here. I am going to keep it in Minnesota if I never get out there, because that is my home. If I can get there 1 week a year I still love it. And I did not come on this Earth just to come down to Washington and be in this body. And here we are so much we do not even know we have a wife or kids.

I had someone interview me today about my marriage who asked:

Why did your marriage hold together?

I said:

Because I am a good husband.

I put a couple other words in there. This is a male chauvinistic attitude, but I said:

I have an understanding and tolerant wife who is very self sufficient, who is forgiving, tolerant, and when I get out of hand she knows how to shape me up.

That is about true. But I did not have much time with those kids, because I was out speaking, and I was out working.

And this place consumes a Senator, and every Member here knows it if he is honest about it. We come up here early in the morning; we are here all day. This is like a sinful monastery. We are here all the time.

If a Senator wants to go out and make a speech I think he should be able to be paid for it. But we did set a code here. What we did was we put a limit on how much we could earn.

I told the majority leader here today when I said the hardest vote I had to make—and he is here; he knows I am telling the truth—was when I voted "no" on Senator MUSKIE's amendment, the most difficult vote, because I know what this means to a number of younger Members of this body. I guess if I had a vote I wanted to change, it would have been the vote on the unearned income, but I decided to stay with the committee, because they have spent more time with this business than I have. But I will say this: This body may become a rich man's club, but it will be worse if it becomes a civil service club. We are going to get ourselves painted into a box where these campaign bills are paid out of the public Treasury. We are all paid out of the public Treasury. And a Senator will not dare cast a vote because he will go home and look his wife in the eye later on in life and say:

I don't know whether I can have any independence of judgment on this, Momma, because all I have is my salary there and if I vote on this the way I really ought to vote, I maybe will get kicked out of office. And then where will we be?

I think a certain amount of independence of judgment is very necessary around here. There are two ways to get that—three ways, I guess. One is just plain caring. I hope we all have that.

The second is to have some resources of your own, and the third is just not to care.

I guess that is what I am saying now, because I am now at the point of my life where I am just deciding to get up and lay them out as I see it.

I think the code we are considering is far to meticulous. I have looked it over. This gift section; I guess we are going over it again.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HUMPHREY. Two more minutes, and then I am through.

Mr. NELSON. I yield the Senator 2 more minutes.

Mr. HUMPHREY. I looked over that gift section, and it has me confused. I do not know what it means. I cannot say before the Lord God Almighty that I have never accepted a gift from any-

body in this body. We have gotten a lot of presents, and we give a lot of presents.

I will never forget that I had an IRS man to me one time:

You stayed at such and such an apartment; we are going to call that income.

I said:

Why are you going to do that?

He said:

That is a fee for services.

I said:

You're nuts. I stayed at a friend's apartment. His son is my godson, and he stayed at my home all summer. Am I supposed to charge that family for that boy staying at my home?

We can get ridiculous around here. We are not all going to be bought off. If we are, we better get out of here.

The people who elect us know what we are. If not, they will catch on. This is representative government. The people will get what they want.

I think it behooves us to have a standard of conduct, to be sure, public and private, but I do not think you can write any law so good and so strict that anyone who wants to break the law will not do it.

I am not happy with all the rules we are adopting, but I voted for that pay increase, and it was not particularly propitious. I voted for it the other time. In fact, my colleague from my State, who today is the Vice President, sat alongside me and said:

If you don't vote for that pay increase, Hubert, I won't be able to go home and face Joan.

He was having some financial problems at the time.

I voted for pay increases, and I got reelected in Minnesota. I have been reelected in Minnesota time after time, and have not hesitated to vote for a pay increase, because I am worth it. I give my constituents full measure, 14, 15, or 16 hours a day.

I hope we will exercise some good judgment here and not paint ourselves into a corner. This is an honorable body, the Senate of the United States, and the best way to keep it honorable is to act honorably and not send a message out from here that somehow or other we cannot trust each other. We can argue with each other, but I trust every Member of this body.

The PRESIDING OFFICER. The Senator's additional 2 minutes have expired.

Mr. HUMPHREY. I am done.

Mr. CURTIS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Who yields time?

Mr. CURTIS. Will the Senator from Texas yield some time to me?

Mr. TOWER. Mr. President, I yield 5 minutes to the Senator from Nebraska.

Mr. CURTIS. I thank my friend.

Mr. President, there is no man I admire and love more in this body than HUBERT HUMPHREY. I have heard him make some wonderful speeches, but I have never heard him make a better one than he did today.

Mr. President, if we pass this resolution anything like it is now, it will bring discredit upon the U.S. Senate, it is so ridiculous.

To go out and make a speech is a part of our representative government. When I go to make a speech, I go to sell my ideas and get some support on them. It is a part of our representative government to go back and forth. If someone is a bank director, and he comes here and brings that knowledge, it means better Government, just as Senator HUMPHREY gets valuable information from the drugstore. We are not living in a vacuum.

How ridiculous can we get? This monstrosity has 11,000 words in it. The Ten Commandments have less than 400. It is not a code of ethics; it is a sham.

I would hope that the lead leadership would look into this situation and postpone this matter until it can be thought through with a different approach. If you feel that you must go on with something, I cannot present it in 5 minutes, but I wish to call it to your attention: I invite your attention to amendment No. 75. It is a code of ethics. It provides that at the first day of the session every year, every Senator shall subscribe to a code of ethics, the first point of which is:

I will not cast a vote in a committee or in the Senate, or refrain from casting a vote, in return for anything of value from any person, firm, association, organization, committee, or corporation.

It relates to gifts, it relates to entertainment, but you do not do them. You do not get those things in exchange for your official action here.

Then it provides:

I hereby waive any immunity or any privilege against self-incrimination afforded to me by any law or by the Constitution of the United States with respect to any matter which may constitute a violation of this Code.

This code has teeth in it. It says:

I shall not engage in any conduct unbecoming to a Senator, or that would bring disgrace to the Senate, and upon a majority vote of the Committee on Ethics, I agree not only to waive all of the immunity, but to provide them with all information, facts, figures, documents, and data pertaining thereto, requested of me by the select committee.

Then, if the Senate finds a person has engaged in corruption, conflict of interest, or other wrongdoing, he can be punished, and punished severely, by censure, by forfeiture of pay, by forfeiture of retirement or a part thereof—and I put that in there, because some day, some time, there may be someone who would enrich himself by a great amount of money, and he ought not to go unpunished. Or he can be expelled.

Now, Mr. President, the idea of 11,000 words of sham and fraud is ridiculous. I can live under anything we pass here. This is my 39th year in Congress, and I am not going to annoy Senators every day by bragging about that. I will have to live under that which we pass here, or yield, and I am as tough as anyone here. I can endure anything you can.

But I am thinking about the reputation of the U.S. Senate, and the idea of sending word out that if you earn $8,000 it is pure, but if it is $9,000 you are corrupt, or saying to people, "If you amount to something back home, if you are involved in business, if you know something about banking or manufacturing or farming, you are disqualified to come here." How many people are going to refuse to run for office?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CURTIS. Will the Senator give me 1 more minute?

Mr. TOWER. One minute.

The PRESIDING OFFICER. The Senator has 1 additional minute.

Mr. CURTIS. It is time for us to quit being the pot calling the kettle black. What is the difference between going before a trade association and saying some nice things to get them to like me and vote for me, and someone else coming into this body and voting at the behest of Common Cause, in order to get them to like him and vote for him? What is the difference?

What we need here is God-fearing men, who will obey the law and be honest, and stop all of this sham.

As I say, if you feel you must have a code of ethics, take a look at amendment 75. But what I would much prefer is that the leadership would move in and rescue this body from this foolishness, and that we take a little while to think about it.

I thank my good friend.

The PRESIDING OFFICER. Who yields time?

The Senator from Texas is recognized.

Mr. TOWER. Mr. President, I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. NELSON. The Senator from Wisconsin in the past week has taken more time on this floor than anyone else.

I am sure Senators do not wish to defeat the code of conduct by agreeing to this amendment. Mr. President, I yield back the remainder of my time. I move to table the amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wisconsin to table the amendment of the Senator from Texas. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from North Carolina (Mr. MORGAN), the Senator from New York (Mr. MOYNIHAN), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from Arkansas (Mr. BUMPERS) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Florida (Mr. STONE) are absent on official business.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN) would vote "yea."

Mr. BAKER. I announce that the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), the Senator from Alaska (Mr. STEVENS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

The result was announced—yeas 63, nays 22, as follows:

[Rollcall Vote No. 71 Leg.]

YEAS—63

Allen	Eastland	Nelson
Anderson	Ford	Nunn
Baker	Glenn	Pearson
Bartlett	Griffin	Pell
Bellmon	Hart	Percy
Bentsen	Haskell	Randolph
Brooke	Hathaway	Ribicoff
Burdick	Hayakawa	Riegle
Byrd, Harry F., Jr.	Heinz	Sarbanes
	Huddleston	Sasser
Byrd, Robert C.	Humphrey	Schweiker
Cannon	Jackson	Scott
Case	Javits	Sparkman
Chafee	Johnston	Stafford
Chiles	Leahy	Stennis
Clark	Magnuson	Stevenson
Cranston	Mathias	Talmadge
Culver	Matsunaga	Williams
Danforth	McIntyre	Young
DeConcini	Melcher	Zorinsky
Durkin	Metcalf	
Eagleton	Metzenbaum	

NAYS—22

Bayh	Hansen	Muskie
Biden	Hatch	Proxmire
Church	Helms	Roth
Curtis	Hollings	Thurmond
Dole	Inouye	Tower
Domenici	Laxalt	Wallop
Garn	Lugar	
Goldwater	McClellan	

NOT VOTING—15

Abourezk	Long	Packwood
Bumpers	McClure	Schmitt
Gravel	McGovern	Stevens
Hatfield	Morgan	Stone
Kennedy	Moynihan	Weicker

So the motion to lay on the table was agreed to.

UP AMENDMENT NO. 97

The PRESIDING OFFICER. By previous order, the Senator from Texas is recognized for another amendment.

Mr. TOWER. Mr. President, I call up my second amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk proceeded to read as follows:

The Senator from Texas (Mr. TOWER) proposes unprinted amendment No. 97.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, line 14, after "INCOME", insert "; INCOME FROM GOVERNMENT SOURCES".

On page 26, after line 24, insert the following:

"4. (a) During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than 90 days in a calendar year (unless hired on a per diem basis), the aggregate amount of any subsidy payments received by such individual during such period from the Treasury of the United States and any income received by such individual during such period from any enterprise which is regulated or financed either wholly or in part by the United States Government shall not exceed 15 per centum of—

"(1) the aggregate amount of the salary of such an officer or employee disbursed by the Secretary of the Senate during such period; and

"(2) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"(b) For purposes of subparagraph (a), any income from securities of the United States Government shall not be considered to be either a subsidy payment or income from any such enterprise.

The PRESIDING OFFICER. The amendment has 1 hour of debate, to be equally divided and controlled.

Mr. TOWER. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. The Senate will come to order. Senators wishing to discuss can go to the cloakroom. The Senator is entitled to be heard.

Mr. TOWER. After that last vote, Mr. President, I am not sure I am entitled to be heard.

The PRESIDING OFFICER. Well, the Senator is entitled to it, whether he wants it or not.

Mr. TOWER. Mr. President, this amendment is similar to the one that was just tabled, except that it does allow unearned income from subsidies or any enterprise regulated or financed by the Federal Government up to 15 percent. In other words, it places the same stricture on unearned income from federally subsidized, financed, or regulated sources, up to 15 percent, placing the same stricture on such income as is placed on honoraria income. But in that there appears to be no disposition to establish totally the incorruptibility of the Senate in such matters, I have no doubt as to what the fate of this amendment will be.

But I do intend to modify the amendment and see if it will be made more palatable.

Mr. President, I send a modification to the desk.

The PRESIDING OFFICER. The modification will be stated.

The second assistant legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes a modification to his unprinted amendment numbered 97.

The amendment, as modified, is as follows:

On page 24, line 14, after "INCOME", insert "; INCOME FROM GOVERNMENT SOURCES".

On page 26, after line 24, insert the following:

"4. (a) During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than 90 days in a calendar year (unless hired on a per diem basis), the aggregate amount of any subsidy payments received by such individual during such period from the Treasury of the United States and any income received by such individual during such period from any enterprise which is regulated or financed either wholly or in part by the United States Government shall not exceed 15 per centum of—

"(1) the aggregate amount of the salary of such an officer or employee disbursed by the Secretary of the Senate during such period; and

"(2) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"(b) For purposes of subparagraph (a), any income from securities of the United States Government shall not be considered to be either a subsidy payment or income from any such enterprise.

Mr. TOWER. Mr. President, I have modified my amendment simply to preclude or to prohibit the receipt by Members of the Senate or employees of the Senate of any subsidy from the Federal Government in excess of 15 percent of his aggregate salary.

In other words, he could still receive a Federal subsidy if he were engaged in an agricultural endeavor, but that subsidy could not exceed 15 percent of the aggregate amount of the salary of such a Member or such an officer-employee of the Senate.

I think that is certainly reasonable, if we are going to authorize and appropriate money for subsidies, that we should be prepared to limit what we as individuals could receive if we qualified under any programs so subsidized to 15 percent of our salary.

I do not think that is at all unreasonable. Certainly, if we are going to limit honoraria, this seems to be very reasonable, and because the very money appropriated would go directly into our pockets if we qualified under some program which received a subsidy.

Therefore, I hope that the Senate will give more favorable consideration to this amendment than they did my previous amendment.

The PRESIDING OFFICER. Who yields time?

The Senator from Wisconsin.

Mr. NELSON. I say to the Senator from Texas that we are hoping to get some amendments, other amendments, additional amendments disposed of this evening and at some reasonable hour.

I guess this Senator understands very well the proposal made by the Senator from Texas.

Mr. TOWER. If the Senator will yield, I am prepared to yield back the remainder of my time, provided I am not set upon by such eloquent and aggressive men of the Senate as the Senator from Wisconsin and have to defend myself for an additional few minutes.

Mr. NELSON. That is the nicest thing I heard all week.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Wisconsin yields back the remainder of his time.

The Senator from Texas.

Mr. TOWER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. NELSON. Mr. President, I move to table the amendment now.

Mr. TOWER. I ask for the yeas and nays on the motion to table.

By the way, the motion is out of order,

because I had not yielded back my time, but I yield it back and ask unanimous consent it be in order.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Texas. The yeas and nays have been ordered and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Arkansas (Mr. BUMPERS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from North Carolina (Mr. MORGAN), the Senator from New York (Mr. MOYNIHAN), the Senator from Mississippi (Mr. EASTLAND), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from Montana (Mr. METCALF) are necessarily absent.

I further announce that the Senator from Florida (Mr. STONE) and the Senator from Alaska (Mr. GRAVEL) are absent on official business.

I further announce that if present and voting, the Senator from North Carolina (Mr. MORGAN) would vote "yea."

Mr. STEVENS. I announce that the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), the Senator from Vermont (Mr. STAFFORD), the Senator from Connecticut (Mr. WEICKER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

The result was announced—yeas 53, nays 28, as follows:

[Rollcall Vote No. 72 Leg.]

YEAS—53

Allen	Durkin	McIntyre

So the motion to table Mr. TOWER'S amendment (No. 97) was agreed to.

Mr. JOHNSTON. Mr. President, I have an amendment at the desk.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. ROBERT C. BYRD. Mr. President, I hope we can dispose of this amendment by Mr. JOHNSTON.

I believe Mr. DURKIN has 3 amendments. I wonder if we could not agree to—where is Senator DURKIN? I wonder if Senator DURKIN would agree that we could take up his amendments, discuss them tonight, and if he wants rollcall votes on them we could order the rollcalls, have those rollcall votes tomorrow back to back early in the day. Would that be agreeable to the Senator?

Mr. DURKIN. As I understand it, the request is to debate them tonight and set a time certain tomorrow for a rollcall?

Mr. ROBERT C. BYRD. Set them at a certain time tomorrow, vote them back to back if the Senator wishes or we could take them with 5 minutes in between so they could be explained, and this will accommodate the Members and yet we will be making progress.

Mr. DURKIN. Fine.

What time do we have on it, 30 minutes?

Mr. ROBERT C. BYRD. Yes. Perhaps we could cut it down to 10.

Mr. DURKIN. I would be willing to do that. They are short and sweet, and they speak for themselves. I do not need more than 10 minutes, so 20 minutes equally divided and rollcalls in the morning.

Mr. ROBERT C. BYRD. Very well.

Mr. President, I ask unanimous consent that on each of the amendments by Mr. DURKIN there be a time limitation of not to exceed 20 minutes, equally divided and controlled in accordance with the usual form. That if rollcall votes are ordered on them that the rollcall votes occur tomorrow beginning at 12:30 p.m.

Is the Senator agreeable to having them back to back?

Mr. DURKIN. Yes. We do not need any more debate.

Mr. ROBERT C. BYRD. Yes. We would have the votes back to back, and Senators could go once the Johnston amendment is disposed of tonight, with the understanding we would have those votes the first thing back to back.

Mr. SCOTT. Reserving the right to object—and I do not want to object—I wonder what time we are coming in tomorrow?

Mr. ROBERT C. BYRD. Twelve o'clock.

Mr. SCOTT. Could we do as the Senator suggested but put off the vote until 2:30 or 3 o'clock?

Mr. ROBERT C. BYRD. Yes, we will do that. We might have votes though prior thereto.

Mr. SCOTT. I understand that you might. I agree to those. Frankly, I have some things to do and I may be a little late tomorrow, not expecting to be in on Friday.

Mr. ROBERT C. BYRD. But the Senator would understand votes might occur before 2:30.

Mr. SCOTT. I understand that, but on the unanimous-consent agreement put it off until——

Mr. ROBERT C. BYRD. Is 2 o'clock all right?

Mr. SCOTT. Make it 2:30.

Mr. ROBERT C. BYRD. If we have three votes——

Mr. SCOTT. The first one at what time?

Mr. ROBERT C. BYRD. Two o'clock.

Mr. SCOTT. Well, I do not know how I am going to get my trees sprayed, but all right.

Mr. HATHAWAY. Some of us have to leave before he comes back so we are going to miss the votes.

Mr. ROBERT C. BYRD. May I have the attention of the Senator from Virginia. We have other Senators who have problems if we have the vote delayed.

What I am trying to do is to accommodate Senators tonight if we possibly can.

Mr. SCOTT. What hour does the distinguished majority leader want?

Mr. ROBERT C. BYRD. I had first suggested 12:30 p.m.

Mr. SCOTT. Mr. President, I am constrained to object to 12:30, having a vote at that time. But if the Senator could put it off until later—we are going to have other votes later, I assume, because we are going to be here several hours tomorrow. If we were going to be here for a short time maybe we could put it off until Monday.

Mr. ROBERT C. BYRD. Very well, Mr. President, I guess we will just have to vote on the amendments tonight.

I am sorry to take the time of the Senate, but I do ask unanimous consent that there be a time limitation or was that agreed to? That was agreed to.

AMENDMENT NO. 125

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER (Mr. MELCHER). Will the Senator from Louisiana identify the amendment he is calling up?

Mr. JOHNSTON. Mr. President, I have amendment No. 125 at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state amendment No. 125.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes amendment No. 125.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 23, line 23, after "memento," insert the following new (6) and renumber the existing (6) as (7): "(6) food, beverage, or entertainment, provided the food, beverage, or entertainment is not enjoyed or consumed in connection with a gift of overnight lodging,".

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me for a unanimous-consent request?

I ask unanimous consent that there be a time limitation on his amendment of 20 minutes to be equally divided in accordance with the usual form, and if he needs more time we will yield it from the resolution, which fully protects him.

Mr. JOHNSTON. Very well.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, this amendment is designed to keep this code from being totally trivial and totally demeaning to Senators.

Under rule XLIII a Senator may not accept gifts exceeding $100 in a calendar year from any person who has an interest in legislation.

Now, what this means—and excluded from the definition of gifts is any meal which costs under $35.

If a meal costs over $35 or if the drinks consumed or the entertainment in connection therewith or if any member of a person's family gets anything that costs over $35 then it obligates the Senator to find out how much it costs, to carry it around in his book, and not to exceed $100 in a year.

That means, I suppose, if you get asked out to dinner by a lobbyist, which happens from time to time, you would have to ask the lobbyist what it cost, and I guess you would have to ask for separate checks, including the tip, and you had better not go over the $100 that night. But if you were still under the $100 you would have to keep the record because 6 months from then you might be asked again.

Mr. President, I do not think I need really to make the case against the trivial nature of that kind of rule. As a matter of fact, I think the authors, the sponsors, are willing to accept this amendment.

Mr. President, I ask unanimous consent to change the amendment as follows, and I will explain this change in just a moment:

On page 23, line 23, after "memento," insert the following new (6) and renumber the existing (6) as (7): "(6) meals, beverages, or entertainment consumed or enjoyed with the host, provided the meals, beverages, or entertainment is not enjoyed or consumed in connection with a gift of overnight lodging,".

In other words, strike from line 3 to line 5 and insert this in lieu thereof.

The PRESIDING OFFICER. Would the Senator send the modified language to the desk?

Mr. JOHNSTON. Yes.

The PRESIDING OFFICER. Is there objection to the amendment being so modified? The Chair hears none, and it is so ordered.

The amendment, as modified, is as follows:

On page 23, line 23, after "memento," insert the following new (6) and renumber the existing (6) as (7): "(6) meals, beverages, or entertainment consumed or enjoyed with the host, provided the meals, beverages, or entertainment is not enjoyed or consumed in connection with a gift of overnight lodging,".

Mr. JOHNSTON. Mr. President, very simply what this does is it relieves Senators of the duty of carrying around their little black books when they get invited out to dinner and asking their host what the meal and what the drinks cost, and it allows the Senator to go to dinner with the feeling of an absolutely free spirit, knowing in full confidence he is not violating the ethics code. I do not mean it in a funny way because it would impose a great burden upon Senators.

It does permit a Senator to get groceries ordered to his door; it does not permit his favorite lobbyist friend to send him a case of whisky to his house; it does not permit anything except for him to go to dinner and to have entertainment that night with drinks that night and not record it in his little black book.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. CANNON. Will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. CANNON. The Senator has some language in there that is very disturbing to me. I come from a State that is considered the entertainment capital of the world, and the Senator has written in there "consumed or enjoyed with the host." Now the host normally is the manager of a hotel and generally he does not sit down and eat with you. Someone else will. But the manager of the hotel frequently will pick up the tab for a meal when you are invited to come out to his hotel for a show. I see no reason for that kind of a distinction, "consumed or enjoyed with the host" because that certainly discriminates against the type of situation we have in my State where the host himself frequently does not sit right down and stay with you at the meal.

Mr. JOHNSTON. I am not particularly married to that language "with the host." I simply wanted to make it clear that they could not send you a gift of food or drink to your home.

Mr. SARBANES. They would be covered by the Senator's language.

Mr. CANNON. They could do that anyway. But the Senator has some money there.

Mr. JOHNSTON. I would have, frankly, no objection to taking out the phrase "with the host." It depends on how colleagues feel.

Mr. RIBICOFF. That is fine.

Mr. JOHNSTON. Very well.

Mr. President, I ask unanimous consent that the three words "with the host" be deleted from the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. DOLE. Will the Senator simply explain to the Senator from Kansas the last few words of the amendment in connection with the gift of overnight lodging? Maybe I misunderstand the amendment.

Mr. JOHNSTON. In other words, if he gets invited to fly on the corporate jet to Hawaii and stay overnight out there, really, he cannot do any of that, but let us say he was invited down to a fishing camp in Louisiana and he had food and drinks, then he does have to add that up on his little book and keep a record of it because that is considered to be such a big gift because it involves overnight stay.

What I am trying to except from this rule is the meal, the drinks, the wine or even the cigar or the entertainment if it is all in connection with one episode, not an overnight episode. Let me get another word. Event. [Laughter.]

Mr. DOLE. In other words, it is all right to have dinner, a Senator may have dinner with a friend, but if he and his wife went out to dinner, he could not stay with friends; is that correct?

Mr. NELSON. May I respond to that?

Mr. JOHNSTON. Yes.

Mr. NELSON. The whole resolution exempts all personal hospitality no matter who the person is.

Mr. DOLE. Is that true if the person owned a motel or hotel?

Mr. NELSON. The Senator would think of one question no one else asked yet.

Mr. DOLE. I have been here 4 days trying to think of something.

Mr. NELSON. Yes.

Mr. RIBICOFF. We are trying to do something very simple. The situation the Senator gives concerns a person who own a hotel or motel and who is not a lobbyist. He could stay there, but if the value of his lodging was over $250 he would have to report it. He would not be forbidden to accept the hospitality. If, for example he stayed for 2 days at the Sunset Motel, it would probably not be over $250 and so no report or disclosure would be required.

There have been serious complaints about a situation we all face when organizations and associations have their annual or semiannual dinners at one of the hotels and a Senator and his wife are invited. It is very obvious that by the time they go through the evening's entertainment, the costs are beyond $35 a person. Prohibiting that makes all of us look ridiculous and is ridiculous.

What Senator JOHNSTON is trying to achieve is, if a Senator goes out and has a meal and drinks, and the place has a piano player or singer that night, he does not have to ask his host "does it cost more than $35," since it is being consumed on the premises at that time. He would eliminate any limitation or restriction on such meals. But that does not prevent him from staying overnight and taking entertainment if it is not from a person with a direct interest in legislation. If it is personal hospitality, there is no limitation whatsoever. A Senator does not have to list it.

Mr. DOLE. That is the point I am making.

The PRESIDING OFFICER. The 10 minutes of the Senator from Louisiana have expired.

The Senator from Wisconsin has 10 minutes remaining.

Mr. DOLE. May I have one followup question?

Mr. NELSON. I yield 2 additional minutes to the Senator.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I do not want to delay it. Let us say I have a longtime friend in Kansas who happens to own a motel. He is not a lobbyist. If I stay there without cost, and he buys my dinner, is that permissible?

Mr. RIBICOFF. I will say if the equivalent of the cost to a stranger was up to $250 the Senator would not have to list it. If it is a room worth $25 or $50 a night, and a Senator stayed 5 nights, he would not have to list that at all. If he says it was worth $50 a night and he

stayed 6 nights so it came to $300, he would list that he received a gift of $300. Up to $250 Senators do not have to list at all. There is no limitation on accepting personal hospitality and he does not have to list that at all.

Mr. DOLE. I thank the Senator.

Mr. ALLEN. Mr. President, if the Senator will yield, is the Senator saying that a Senator can accept up to the worth of $250 free accommodations at hotels and motels?

Mr. RIBICOFF. No.

Mr. ALLEN. What is the Senator saying as to $250?

Mr. RIBICOFF. I would say that it is a question of a disclosure requirement. A Senator need not publicly disclose lodging received up to $250.

Mr. ALLEN. From whom?

Mr. RIBICOFF. From anyone but a person with a direct interest in legislation. But he has to list it.

Mr. ALLEN. I understand. Is it under $250 or over $250 or what breaking point?

Mr. RIBICOFF. Up to $250 he does not have to list it. If it is over $250 he has to list it.

Mr. ALLEN. A Senator could accept hotel accommodations up to $250 and not list it?

Mr. RIBICOFF. That is right.

Mr. NELSON. That is in the resolution.

Mr. ALLEN. I declare that is a terrible provision.

Mr. RIBICOFF. That is not what Senator JOHNSTON is talking about now.

Mr. ALLEN. I understand. If that exemption is in the ethics law resolution it ought to be eliminated. I am going to offer an amendment to that effect.

Mr. JOHNSTON. Let me make clear that this has nothing to do with that. That is another provision of the resolution. If the Senator wishes to amend separate provisions that is all right with me. All my amendment does is make a very narrow exemption. It simply says that with respect to food, beverages, and entertainment where they are not consumed or enjoyed in connection with overnight lodging a Senator can accept them from a lobbyist and he does not have to list them even though in a year's time they might aggregate $300.

Mr. ALLEN. At the proper time I will offer an amendment to knock out the up to $250 in free accommodations.

I travel all over my State and I never accept complimentary lodging anywhere. I insist on paying my bill. I did not know that provision was being made for Senators to accept $250 in free hotel accommodations. That must come out.

I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. JOHNSTON. Let me make it clear.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. STEVENS. Mr. President, will the Senator withhold that for a few minutes?

The PRESIDING OFFICER. There is not a sufficient second.

Does the Senator from Wisconsin yield time?

Mr. STEVENS. Will the Senator yield me 2 minutes?

Mr. NELSON. I yield 2 minutes to the Senator from Alaska.

Mr. STEVENS. I am interested in the problem I mentioned earlier about the question of fishing boats I go fishing on up in Alaska. What does the manager of the bill interpret entertainment to mean? And I understand there is some language in the report that indicates that it might cover this area. But what is the difference between those fishing boats I am getting on that belong to a friend of mine and I go out fishing for a couple hours and having dinner in a hotel in terms of entertainment?

Mr. NELSON. That is another section.

Mr. RIBICOFF. Is this a personal friend of the Senator who owns a fishing boat?

Mr. STEVENS. Yes.

Mr. RIBICOFF. There is no restriction on that at all. That is as if he visited his home and he had a boat. That is part of the entertainment that he supplies the Senator with personal hospitality. There is no requirement for it being listed at all.

It is just the same thing, to visit on the boat, as if you were visiting in his home.

Mr. STEVENS. Does the Senator have a duty to find out if the boat is owned individually or by a corporation?

Mr. RIBICOFF. Well, I think if it is a corporation, that is another matter.

Mr. STEVENS. Would this exception in terms of entertainment cover a hotel that is a member of a hotel association?

Mr. RIBICOFF. No; if it were commercial and political, it would not. It would not be personal.

Mr. ROBERT C. BYRD. Mr. President, this amendment is going to be accepted, if the Senator from Alabama is willing to withdraw the yeas and nays.

The PRESIDING OFFICER. The yeas and nays were not ordered, for lack of a sufficient second. Who yields time?

Mr. JOHNSTON. Mr. President, will the Senator yield to me? I want to make something clear.

Mr. NELSON. I yield to the distinguished Senator from Louisiana.

Mr. JOHNSTON. I just want to make clear to my friend from Alabama that my amendment does not exempt any overnight hotel accommodations; it has absolutely nothing to do with that. All it has to do with is meals, beverages, and entertainment in connection therewith.

Mr. President, before we vote I have a question which I have been trying to ask the distinguished manager of the bill for 3 days, and while I have time, I wonder if I could ask it at this time.

Mr. NELSON. Is it on the pending amendment.

Mr. JOHNSTON. No, on a separate amendment.

Mr. NELSON. Why do we not yield the time back and vote on the amendment, and deal with that question as soon as we adopt the amendment?

Mr. JOHNSTON. Mr. President, I ask unanimous consent that I be given 2 minutes to ask the distinguished Senator from Wisconsin a question immediately following the vote.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, is the Senator yielding time on the resolution?

Mr. NELSON. I could.

Mr. ROBERT C. BYRD. Sure, 2 minutes on the resolution.

Mr. NELSON. Let us settle this amendment first. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. NELSON. I have yielded 2 minutes to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 2 minutes.

Mr. JOHNSTON. I thank the Senator.

In the Federal Election Campaign Act (2 U.S.C. 439a), the phrase "any ordinary and necessary expense incurred by him in connection with his duties as a holder of Federal office" is used.

That phrase, in turn, has been interpreted a number of times by the Federal Election Commission in connection with their ability and their mandate to give advisory opinions to Representatives and Senators.

My question is, Does that phrase have the same meaning as the following phrases, which are found in this resolution: "otherwise unreimbursed expenses allowable in connection with the operation of a Member's office" and "expenses incurred by a Member in connection with his official duties" and "reimbursement of expenses incurred by a Member in connection with his official duties"?

Do those phrases have the same meaning as the phrase quoted from the Federal Election Act?

Mr. NELSON. That is my interpretation. We are referring to official expenses in connection with one's official duties, or, as one would say in the private sector, expenses "associated with the business." What the Federal Election Commission's language interpretation means, in my judgment, is exactly the same as what is in the resolution. Both are related to official duties and performance of official duties. I do not think there is any difference between the two.

Mr. JOHNSTON. So that we could use the precedents, such as they are, by the Federal Election Commission, in interpreting the phrases in this resolution?

Mr. NELSON. That was my belief at the time we framed the resolution. We checked with the staff prior to my response to this question, and that is their interpretation also.

Mr. JOHNSTON. I thank the Senator.

The PRESIDING OFFICER. Under the previous order, the Senator from Delaware (Mr. ROTH) is recognized to call

up an amendment on which there shall be a time limitation of 1 hour of debate.

Mr. STEVENS. Mr. President, is this the amendment of the Senator from Delaware?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. It is my understanding that he was left under the understanding that that matter would be brought up tomorrow. I wonder, since the Senator from New Hampshire has amendments, if we might ask unanimous consent that Senator ROTH's amendments would follow those to be presented now, three of them, I believe, by the Senator from New Hampshire.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Under the previous order, the Senator from New Hampshire (Mr. DURKIN) is recognized to call up an amendment on which there shall be 20 minutes of debate, to be equally divided and controlled.

The Senator from New Hampshire is recognized.

AMENDMENT NO. 101

Mr. DURKIN. I thank the Chair. I know the hour is late, and we have discussed ethics almost ad nauseam.

The PRESIDING OFFICER. Does the Senator wish to call up his amendment?

Mr. DURKIN. Yes, I am in the process of calling up amendment——

The PRESIDING OFFICER. The clerk will state the amendment.

Mr. DURKIN. Amendment No. 101.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. DURKIN) proposes an amendment numbered 101.

Mr. DURKIN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 30, line 7, insert the following: "No member should vote, in committee or on the floor, on any matter where he individually or as a fiduciary, or his spouse or dependents, has a direct financial interest, or any other interest that could be substantially affected by the outcome of the vote.".

On page 32, after line 11, insert the following new section:

"(j) For purposes of this rule 'financial interest' means ownership of a legal or equitable interest, however small, or a relationship as director, adviser, or other active participant in the matter being voted, except that—

"(i) ownership in a mutual or common investment fund that holds securities is not a financial interest in such securities unless the member participates in the management of the fund;

"(ii) an office in an educational, religious, charitable, fraternal, or civil organization is not a financial interest in securities held by the organization;

"(iii) the proprietary interest of a policyholder in a mutual insurance company, of a depositor in a mutual savings association, or a similar proprietary interest, is a financial interest in the organization only if the outcome of the vote could substantially affect the value of the interest; and

"(iv) ownership of government securities is not to be considered a financial interest vote.".

Mr. DURKIN. Mr. President, the amendment is very short, very sweet, and every direct. It addresses, I think, one of the four preceptions or four concerns that the American public seem to express with respect to the operation of the Senate.

One is outside income, the second is honoraria, and from what source; the third is campaign contributions, which I think will be handled later in the year in a campaign financing bill. But there is a major gap, I think, in the otherwise excellent work of the committee chaired by the Senator from Wisconsin.

I think that the public is very much concerned with the appearance and possibly the fact that Members of this body are voting their portfolios, in committee and on the floor.

Mr. President, if we have one overriding obligation in the 95th Congress, it is to restore the confidence of the American people in the institutions of government. To this end, we must exhibit ourselves as guiding moral forces. Congress is attempting to restore and reshape its image by pledging the adoption of a tough new code of ethics. As written, however, our new code of ethics is weakest where it should be strongest. We have pledged to the Nation that we will eliminate all real and potential conflicts of interest. Yet our new code of ethics fails to include any direct, clear prohibition of voting on the interests of a Member's corporate involvements. My amendment is intended to resolve this void by stressing that, ethically, Members of the Senate should not vote on any matter where he has a direct financial interest or any other interest that could be substantially affected by the outcome of the vote.

We must take concrete steps to eliminate even the appearance of a potential conflict of interest. But how is faith to be restored when the American public learns that a Senator with financial interest in Exxon, Gulf, Mobil, or Standard Oil votes against oil divestiture? Failure to restrict the ability of Members to vote on matters where they have a direct or substantial interest will result in the Senate's new code of ethics being viewed by the people of the Nation as simply another unfulfilled promise. And our governing institutions cannot continue to function effectively without the faith and support of its people.

The code of ethics, as presently written, contains a limitation on outside income but excludes from that restriction the dividend income received from stocks or other investments. My amendment will emphasize that no Senator should vote, either in committee or on the floor, where he or his immediate family has a direct financial interest or any other interest that could be substantially affected by the outcome of the vote. Financial interest is defined to mean ownership of a legal or equitable interest, no matter how small. Excluded from the term financial interest is ownership in a mutual or common investment fund that holds securities, office in an educational, religious, charitable, fraternal, or civic organization and ownership of Government securities or those in a blind trust. The Congress has emphasized its agreement with these restrictions by imposing them as qualifications for judges of the United States. Just as judges should not sit on cases in which they have a direct financial interest, neither should Members of the Senate vote in such situations. We should not be so hypocritical as to apply these limitations to judges, but not adopt them for our own body.

Mr. President, adoption of this amendment will do much to enhance public confidence in the impartiality of Congress. Members of the Senate must be made to vote the interests of the people and not the interests of his corporate portfolio.

Under the language of Senate Resolution 110, Senators can vote on an issue in committee or on the floor even if they have financial holdings that could influence or affect their vote. The committee report justified its action in this respect because it felt it would be "unwise for the Senate to adopt a rule which would require Senators to choose between divesting themselves of their holdings, on the one hand, and disqualifying themselves from votes on the other."

However, the committee recognized the same problem people all across this country have recognized when they said that staff members compensated at a rate in excess of $25,000 a year are required to divest themselves of holdings which could otherwise directly affect their actions, unless they receive permission from the Ethics Committee and their staff supervisor to retain such holdings.

My amendment simply states that no Senator should vote, either in committee or on the floor, when he individually or his spouse or his dependents have a financial interest or any other interest that could be substantially affected by the outcome of the vote.

Direct financial interest is defined as the ownership of any legal or equitable financial interest that is not in a blind trust, contemplating that the Senate will take action under the Danforth amendment and clarify the blind trust rule. A direct financial interest is defined as the ownership of any security or any equitable financial interest that is not in a blind trust. This would not require divestiture. It just would require disqualification with respect to voting, unless the holding in conflict was in a blind trust.

The words substantially affected are not defined in the amendment, but it is the same term and the same prohibition that has been applied to our Federal judges with considerable success for some time.

The distinguished chairman of the Ethics Committee this afternoon argued that the words "ordinary and necessary," and the words "political expenditure," could be defined for purposes of his amendment. I think any problems in administering this amendment, if agreed to, by way of a definition of "substantially affected" could be very well and adequately handled by the Ethics Committee.

As I say, I do not think ethics and pay are linked. If this was a voluntary

job, we should be ethical. However, there are people who linked it. We have tied ourselves to the Federal judges. I think we should be controlled by the same standard which controls our Federal bench. I think in this way the people of the United States will know that when someone votes against oil divestiture they are not voting the interest of their portfolio, but they are voting what they think to be the best interests of the energy situation in this country.

Mr. RIBICOFF. Mr. President, this amendment was considered very seriously and extensively by the Nelson committee. The problem that faced us was that in disqualifying the Member we are really depriving the constituents of the State of representation. For example, a farmer from Wisconsin could not sit on the Agriculture, Nutrition and Forestry Committee and an oil man from Oklahoma could not sit on the Finance Committee. While it certainly would prevent potential conflict of interest, it would jeopardize the interests of a State in full representation on an important committee. For that reason, the Obey commission rejected disqualification as a way of dealing with conflict of interest, noting that such disqualification cut to the heart of the representative function.

Further, a Senator holding limited amounts of common stock, let us say, in 10 companies might have to disqualify himself in an enormous number of votes: a bill from the Judiciary Committee on antitrust; the Finance Committee on taxes; the Banking, Housing, and Urban Affairs Committee on securities; Governmental Affairs on Energy; Commerce, Science and Transportation on transportation. The list is endless.

This amendment makes it explicit that the Senator must not vote on any matter where he has a financial interest, however small.

It seems to us that in listing holdings and listing assets, a Member makes it clear to his colleagues, clear to the public, and clear to his constituency what they have and what their votes imply. The constituency can then determine whether the vote is of such a nature that it represents a conflict of interest.

We have felt that requiring disclosure is sufficient, that the world then knows what the vote means. Consequently, in behalf of the committee, we would have to oppose the amendment of the Senator from New Hampshire.

Mr. DURKIN. I appreciate the statement of the Senator from Connecticut. I believe if someone has substantial holdings they can be handled by a blind trust. If they are insignificant holdings, the parameters for what are insignificant holdings can be ironed out by the Ethics Committee. I believe there will be some inconvenience but this whole code will be some inconvenience.

This amendment goes a long way in eliminating the possibility of the appearance that Members are voting their portfolios. I do not think anyone is upset with the Senator from an oil State, for example, who votes with the oil companies. But they may well be upset and there may well be a conflict when a Senator from a nonoil State votes with the oil companies and then has a substantial portfolio of oil or related stocks that are not in a blind trust.

Mr. RIBICOFF. The Senator raises a very serious problem and it is worth discussing. It was the cause of great concern. The subject matter raised by the Senator's amendment was discussed at length. When we mention the blind trust, keep in mind that under the present rule the blind trust has to be terminated and dissolved. That is why there was an amendment agreed to requiring the Governmental Affairs Committee to go into the entire problem of the blind trust. But I do not know if the result of that study will be adopted by this body or become part of the statutory law.

That being the case, we are passing a rule to govern us until we have statutory language. There is no blind trust in which a Member could place these securities. That is the problem we have at the present time.

Mr. DURKIN. Is the distinguished Senator from Connecticut willing to refer this to his committee to be studied along with the study which is going to be required, and within the same reporting period as is required, under the Danforth amendment?

Mr. RIBICOFF. I am certainly not looking for extra business for the Governmental Affairs Committee. May I say, at the time we have the hearings on blind trusts, we will specifically invite the Senator from New Hampshire to come to testify and present these arguments to us. Those hearings will be comprehensive. At that time we will certainly consider the Senator's views. I do not know what the decision of the committee or the Senate will be at that time, but there will be another opportunity for the Senator from New Hampshire to propose his amendment. There will be that opportunity to go into this matter again.

Mr. DURKIN. I thank the Senator from Connecticut. I really would like a little more than the opportunity to testify. If I could have the same assurance that the matter will be studied, addressed, and reported back at the same time the Governmental Affairs Committee is required to report back on the Danforth amendment, then I would be willing to withdraw the amendment, with the assurance that it will be considered, that it be mandated that the committee consider it in the same time frame.

Mr. RIBICOFF. While the majority leader is here, may I say that the Senator raises a serious question and it is worthy of study. If the majority leader feels the Governmental Affairs Committee ought to take on the additional burden, if he says so, we will make that study and report back with the Danforth amendment.

Mr. DURKIN. Then the proper procedure would be to amend or modify my amendment to incorporate reference to the reporting language of the Danforth amendment. That can be accepted, I believe, by a voice vote.

The PRESIDING OFFICER. Who yields time?

Mr. RIBICOFF. Mr. President, I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. Mr. President, I ask that the time be charged equally against the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. I say to the distinguished Senator from New Hampshire that he does not need an amendment. He can take my word for it that when we take up the Danforth amendment, we shall take up the Durkin amendment with it. This is right in the RECORD now and the staff is here from the Governmental Affairs Committee. They will enter it in the docket.

Mr. DURKIN. I thank the Senator from Connecticut.

As I understand it, then, the chairman of the Committee on Governmental Affairs is agreeing to report back—at the same time they report back on the Danforth amendment, they will report back, either accepting or rejecting or modifying my amendment No. 101, depending, and at that time, if it is rejected or modified, we will have, then, an opportunity to address the issue and amend the report of the Committee on Governmental Affairs.

Mr. RIBICOFF. The Senator would have that opportunity at any time on any bill coming out of the Governmental Affairs Committee.

Mr. DURKIN. I am a little perplexed.

I guess what the Senator has done is accept my amendment by unanimous consent, with the unanimous consent understanding that it has the same reporting features as the Danforth amendment.

Mr. RIBICOFF. We are not accepting the Senator's amendment at all.

Mr. DURKIN. Accepting my amendment, as amended, by incorporating the Danforth language with respect to reporting, the net effect is that you have to either accept it, reject it or modify it.

I just do not want it to disappear, never to surface again.

Mr. RIBICOFF. I do not know how I can accommodate the Senator. We have the majority leader here and the chairman of the Governmental Affairs Commitee, who is telling the Senator that there will be hearings on his amendment at the same time that there are hearings on the Danforth amendment; that when we report back the Danforth amendment, we shall then put to the committee the Durkin proposal, to vote up or down, in the Governmental Affairs Committee. When we report back, one way or another on the Danforth amendment, we shall report back, at the same time, that we voted to accept, modify, or reject the Durkin amendment.

Mr. DURKIN. At that time, then, if it is not accepted or is modified in a manner which appears to me to be unacceptable, we can hassle that again when the Danforth amendment is on the floor.

Mr. RIBICOFF. The Senator from New Hampshire may not only do so at that

time, but at any time—there is no germaneness rule, generally, in the Senate. He can always bring his amendment up again in connection with the Danforth amendment.

I cannot say how the Governmental Affairs Committee will treat the Danforth amendment.

Mr. DURKIN. Maybe I am laboring under a misapprehension. I understand that the Governmental Affairs Committee has to report something.

Mr. RIBICOFF. That is correct. At that time, we shall give a report on the committee action on the Durkin proposal.

Mr. DURKIN. That report has to be taken up by the full Senate, either concurring with its rejection or accepting or modifying the Danforth amendment.

Mr. RIBICOFF. The report will be before the Senate. If there is no legislation reported out, then there is nothing before the Senate. We shall make a report, but, generally, as I understand it, if there is no bill reported out, there is nothing for the Senate to act on, either Danforth or Durkin.

Mr. DURKIN. I did not mean to insinuate that I did not accept the word of the Senator from Connecticut. I am a realist, and I find, at the present time, no objection to that suggestion on the assurance of the Senator from Connecticut.

Mr. RIBICOFF. I thank the Senator from New Hampshire.

The PRESIDING OFFICER. Does the Senator request unanimous consent to withdraw his amendment?

Mr. DURKIN. The Chair stated it very well.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment was withdrawn.

AMENDMENT NO. 104

The PRESIDING OFFICER. Does the Senator from New Hampshire wish to introduce a second amendment?

Mr. DURKIN. Yes.

Mr. ROBERT C. BYRD. Mr. President, could we have an understanding with the Senator that there will be no more rollcall votes tonight?

Mr. DURKIN. I am prepared.

Mr. ROBERT C. BYRD. Will the Senator from New Hampshire call up his amendment and discuss it?

Mr. DURKIN. I call up amendment No. 104, which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Hampshire proposes amendment No. 104. On page 28, line 1, insert the following: After the word "a" strike the word "principal".

The PRESIDING OFFICER. By previous agreement, there will be 20 minutes on this amendment, to be equally divided.

The Senator from New Hampshire is recognized.

Mr. DURKIN. Again this is a very short amendment. The amendment speaks for itself—maybe to itself, too.

The concern about conflicts of interest forms the heart of the proposed Code of Official Conduct. Almost every section of the code is related to resolving possible and potential conflicts of interest. This is truly the intent of the Code of Conduct.

In the belief that sunshine is the best of all disinfectants, the code requires full disclosure. A full disclosure of financial interests and holdings enables the public to scrutinize our activities and provides the opportunity whereby the public can determine whether any of us have abused the public's trust and used for private positions for private gain.

It is no secret to anyone that one of the principal purposes for this code is the restoration of the public's respect. A Democratic nation is only as strong as its institutions and its institutions are only as strong as the people who comprise them. We are here in an attempt to revamp our public image and go on record to the American public that we are here solely to perform the public's business and no other. This is the reason why the code focuses so sharply on the conflict of interest question.

There are many different types of conflicts of interest. These conflicts can manifest themselves in many different fashions. But of all the conflicts of interest, the most corrosive to both this institution and the public respect needed to sustain this institution is the conflict which enables a Senator to utilize his position of power for personal financial gain. The report and resolution of the Special Committee on Official Conduct recognizes that a conflict is as damaging to this body whether it be real or potential. We must be forever alert to potential conflicts of interest and we must be steadfast in our determination to eliminate, root and branch, all conflicts of interest. But where even the appearance of impropriety exists, the image of a tarnished Congress, blind to its public duty and arrogant toward the public needs, will fester. It is for this reason that I am shocked to learn that the resolution is weakest where it should be strongest.

I could think of no greater disservice that we could perform than to declare in the official code of ethics that there is no impropriety for a Senator to introduce and aid the passage of legislation where one of his purposes in doing so is to foster only his pecuniary interest or those of his family.

The resolution as now written prohibits a Senator from aiding legislation only when his principal purpose in doing so is the furtherance of his own financial interest. This is no restriction at all. It flies in the face of the whole tenor of the committee's resolution and compromises all that we are trying to do here.

We should not let the public believe, for even a moment, that the Senate sanctions a Member's use of his public position to further only his financial interest whether it be his principal purpose in doing so—a significant purpose in doing so—or any purpose in doing so. Certainly there will be bills that we will vote on which will financially affect us. We are a body of lawmakers and unless we are to exempt ourselves from the laws we pass, then it is a natural occurrence that legislation will have an impact on our financial interest. But it is a totally different situation when a Member utilizes his position to introduce legislation when his purpose in doing so is to benefit only his personal interests. Intent here is paramount, and I recognize that it may be difficult to determine whether a Senator's purpose in introducing legislation is to aid his financial holdings. Nevertheless, we should go on record and state clearly and affirmatively to the American public that, under no circumstances and for no purpose, should a Senator introduce or aid legislation when his reason for doing so is the furtherance of his own pecuniary interest. Let the record show that the Senate today is attempting to eliminate the most malignant of all conflicts—the conflict of money.

Mr. RIBICOFF. Will the Senator yield?

Mr. DURKIN. Yes.

Mr. RIBICOFF. Personally, I think he has a good amendment, but the chairman has left for the day and the ranking minority member has left for the day. I would not want to accept the amendment in the absence of Senator NELSON or Senator THURMOND. I wonder, under the circumstances, whether the Senator will not bring that up tomorrow, because I do not think I have the authority to accept it. I happen to like the amendment and I think it makes sense, but I do not have the authority to accept it.

Mr. DURKIN. Fine.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to withdraw his amendment?

Mr. DURKIN. I ask unanimous consent to withdraw this amendment at the present time and unanimous consent to make it the pending business when we reconvene in the morning.

Mr. STEVENS. Before the Senator does that, may I inquire, if I may have a minute?

It is my understanding that in the committee, the word "significant," was there.

Mr. DURKIN. Yes.

Mr. STEVENS. That was changed to be "a principal."

I would rather see it read, if the Senator is going to take out "principal," put in "the purpose of which."

Mr. RIBICOFF. If the Senator will yield, there is a point here. In due respect to the Senator, my feeling is that I do not want to accept the responsibility to accept this amendment or speak against it in the absence of Senator THURMOND and Senator NELSON.

So I hope we ask unanimous consent to allow the Senator from New Hampshire to bring this amendment up the first thing tomorrow.

Mr. STEVENS. My only suggestion is that I will not be here tomorrow and if the Senator takes out "principal" and leaves "a," it is much broader than "the" which is a limiting adjective. It then becomes "the purpose of which," which is very different from "a purpose of which."

Mr. RIBICOFF. All I can say is that the Senator might ask for a rollcall vote tonight on his position.

Mr. STEVENS. No.

Mr. RIBICOFF. There is something

here. But I do not want to take that responsibility, I say to the Senator from Alaska.

Mr. STEVENS. I concur.

The PRESIDING OFFICER. Does the Senator from New Hampshire ask unanimous consent to withdraw his amendment and make it the pending business when we take it up tomorrow?

Mr. ROBERT C. BYRD. Reserving the right to object, why does the Senator wish to withdraw his amendment?

Mr. DURKIN. Well, the Senator from Connecticut——

Mr. ROBERT C. BYRD. I was wondering if the Senator wants to put it aside and take up his next amendment, or what was the idea?

Mr. DURKIN. The Senator took the words out of my mouth.

Then have it become the pending business in the morning?

Mr. ROBERT C. BYRD. Yes; we can make it the pending business in the morning. But does the Senator wish to take up his third amendment?

Mr. DURKIN. Yes.

The PRESIDING OFFICER. Without objection, the pending amendment will be laid aside temporarily for the purpose of taking up another amendment.

Without objection, it is so ordered.

Does the Senator from New Hampshire have an additional amendment?

AMENDMENT NO. 103

Mr. DURKIN. Mr. President, at this time I call up amendment No. 103.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. DURKIN) proposes an amendment numbered 103:

On page 26, line 8 through line 11, strike the following: "income from a family-owned farm employing no more than ten employees if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;".

The PRESIDING OFFICER. The time limit on the amendment is 20 minutes, to be equally divided.

The Senator from New Hampshire.

Mr. DURKIN. I thank the Chair.

Mr. President, at this time——

Mr. RIBICOFF. If the Senator will yield to save time, the language the Senator has in his amendment is not found in the bill. He is striking out something that is not in the bill.

Mr. DURKIN. On amendment No. 102?

The PRESIDING OFFICER. Amendment No. 103 is pending.

Mr. STEVENS. I might state, it looks like a typographical error, striking the language and inserting the following.

Mr. DURKIN. It should be.

I ask unanimous consent it be so amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, is as follows:

On page 26, line 8 through line 11, strike all of the language in (c) (2) and insert the following "income from a family-owned farm employing no more than ten employees if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;".

Mr. DURKIN. Mr. President, again, this is another short amendment that speaks for itself.

Under Senate Resolution 110 income received from a family enterprise is not subject to the 15-percent limitation on outside earned income, provided the services rendered are not a materially income-producing factor. The report states that this income could be distributed in the form of either a salary or a dividend. The label of the money received is not considered to be determinative.

The Durkin amendment would exempt from the earned income limitation only the income received for services rendered for a family-owned farm employing no more than 10 employees provided the services provided are not a materially income-producing factor. All other income received from family enterprises would be subject to the 15-percent limitation on outside earned income. Dividends would not be affected.

I point out that I do not have a family business, nor do I have a farm.

Mr. RIBICOFF. Again, the Senator is involved in an issue that concerns many other Senators. Senator LUGAR, Senator HATHAWAY, and Senator WALLOP, are all concerned with the problem of family enterprises.

As I understand it, they have been meeting with one another to see if they can work out a proposal on which they can all agree.

I wonder if the Senator's staff could join in those discussions to see if there can be a meeting of the minds, because this subject is going to come up again.

I ask the Senator from Alaska if that is correct, that a number of other Senators are involved in the problem of family enterprises?

Mr. STEVENS. Yes. The Senator from Connecticut will recall that before voting on the Muskie amendment, I raised this question with the Senator from Wisconsin.

We have been negotiating on the total question of family enterprises and we almost have some language that appears to deal with the problem. There are still a few points among some Members of the Senate that the language concerning the family enterprises ought to be deleted.

I state to the Senator from New Hampshire, I do not have a family enterprise anymore, but I do feel that the limitation of 10 people gets into a serious problem when we are dealing with even a family-sized farm at harvest time.

My father-in-law has a small 160-acre farm out in Nebraska and at the time the soybeans come in, I guarantee there are more than 10 people there, and it is still a family-sized farm.

I think the Senator intended a different thing. But I urge the Senator not to prematurely go into this. It will be discussed, I understand, either late tomorrow or Monday and the whole concept worked out. It is an ongoing discussion following the discussion I had with the Senator from Wisconsin the other day.

Mr. RIBICOFF. I think the problem, as I say, is that the Senator just deals with a family enterprise involving a farm, so it is restricted to one type of enterprise. But there are other enterprises that have more than 10 employees that are not farms. It would be treating a farm differently than other family enterprises.

However, the Senator should proceed as he wishes.

On behalf of the committee, I would have to oppose this amendment.

Mr. DURKIN. As I am sure we all know, I had another amendment which deleted the family enterprise exemption totally. But it was my feeling that it was going nowhere. This is an alternative.

The justification seems to be that the family farm has been sort of enshrined, although I do not know how many family farmers we have in the Senate. So to eliminate what appears to be more of an emotional than a real problem, we exempted the farm except when there are 10 employees.

If they want to work it out with 10 full-time employees, I do not want the same hassle as on the OSHA bill.

Mr. STEVENS. Will the Senator yield?

Mr. DURKIN. I yield.

Mr. STEVENS. There is a gentleman down at 1600 Pennsylvania Avenue who has a family enterprise in Georgia. I certainly do not think we should have a situation in which a similar person could not run for the Senate. He has a family enterprise; it is continuing. He now has another office, and the family is taking steps to immunize him from that operation. But to disqualify him after he gets here, if such a person is elected, would seem to me to be wrong I do not think we should have a situation in which a person who has a family enterprise that has more than a certain number of employees could not run for the Senate. If they look at this rule, they say, "If I get there, I have to close down the business."

Mr. DURKIN. The thrust of the amendment is just to include the income as part of the 15-percent limitation.

Mr. STEVENS. The limit is 15 percent. That is the problem. The problem is that the limit is in the resolution, and we are going to keep the limits, apparently. Since this is an exception to the limitation, the question is, What is reasonable? What is reasonable is what the man or woman has when he or she comes here.

I am in deep sincerity. We have worked together on other amendments today. I urge the Senator to withhold this and see what happens on Monday.

The question is the amount of time you put in on it, whether it is a conflict in time. If you are just involved in a managerial situation and that seems to be the direction people are going in, and you make a managerial decision, a supervisory decision; what is wrong with that?

I believe that when the Senator sees the new draft, he will see that it is not a question of the amount of income but the question of the conflict of time the family enterprise would take from the Senator's role in this body.

Mr. DURKIN. I am willing to try to work it out. I do see a problem. If you call it income, it has tax benefits to the family enterprise, and the gentleman may well not be an income-producing factor; but he picks up a check on Sat-

urday morning which is called income and is deductible by the family enterprise under the IRS code, and it is exempt from the limitation on earned income. I think it is a loophole that is not consistent with the rest of the code and the limitations that have been imposed on earned income.

But I will soon be talking to myself if I persist, so I am more than happy to set this aside, with the understanding that I will be able to bring it up again.

The PRESIDING OFFICER. Does the Senator from New Hampshire ask unanimous consent to temporarily set aside the amendment?

Mr. STEVENS. Mr. President, will the Senator withdraw it and offer it at the time the Wallop and other amendments are before us which deal with this section?

Mr. DURKIN. The Senator is asking me to withdraw it? What is the problem with asking unanimous consent to set it aside and take it up in conjunction with or immediately after the Wallop amendment? Does the majority leader see any problem with that?

Mr. ROBERT C. BYRD. Why do we not just vote on it tomorrow when we come in?

Mr. DURKIN. All right.

Mr. ROBERT C. BYRD. Mr. President, all of Mr. DURKIN's time has been taken; has it not?

The PRESIDING OFFICER. Yes.

Mr. RIBICOFF. Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT OF NEW DEFERRALS OF FUNDS FOR WATER PROJECTS—PM 57

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, pursuant to the order of January 30, 1975:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report two new deferrals of funds totaling $12.6 million. The deferred funds were provided for water resources projects in the Corps of Engineers and the Department of the Interior. Only one of the deferrals—related to the Corps of Engineers' Meramec Park Lake project—is now in effect. This deferral will be maintained, at least until the completion of a review of Federal water resources projects currently in progress.

The details of each deferral are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, *March 24, 1977.*

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-971. A letter from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, notice that the appropriation to the Department of Agriculture for the Food Donations Program for the fiscal year 1977, has been reapportioned on a basis which indicates the necessity for a supplemental estimate; to the Committee on Appropriations.

EC-972. A letter from the Deputy Assistant Secretary of Defense, Installations and Housing, transmitting, pursuant to law, notice of three construction projects to be undertaken by the U.S. Army Reserve (with an accompanying report); to the Committee on Armed Services.

EC-973. A letter from the Chairman of the Securities Investor Protection Corporation transmitting, pursuant to law, the Annual Report of the SIPC for 1976 (with an accompanying report); to the Committee on Banking, Housing and Urban Affairs.

EC-974. A letter from the Secretary of the Interior transmitting, pursuant to law, the 1976 annual report of the National Park Foundation (with an accompanyng report); to the Committee on Energy and Natural Resources.

EC-975. A letter from the Assistant Secretary for Congressional Relations of the Department of State transmitting a draft of proposed legislation to improve the Foreign Service personnel system and for related purposes (with accompanying papers); to the Committee on Foreign Relations.

EC-976. A letter from the Assistant Legal Adviser for Treaty Affairs of the Department of State transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past 60 days (with accompanying papers); to the Committee on Foreign Relations.

EC-977. A letter from the Acting Assistant Secretary for Administration of the Department of Commerce transmitting, pursuant to law, notice of a proposal to adopt a system of records in addition to those previously noticed in the Federal Register, in accordance with the Privacy Act (with accompanying papers); to the Committee on Governmental Affairs.

EC-978. A letter from the Acting Director of the National Science Foundation transmitting, pursuant to law, a planned addition to the NSF system of records, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC-979. A letter from the Secretary of the Board of Governors of the Federal Reserve System transmitting, pursuant to law, a report on a new system of records, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC-980. A letter from the Director of the National Institute of Corrections transmitting, pursuant to law, the first annual report of the National Institute of Corrections (with an accompanying report); to the Committee on the Judiciary.

EC-981. A communication from the President of the United States transmitting proposed supplemental appropriations for the fiscal year 1977 in the amount of $35,036,000 and amendments to the request for fiscal year 1978 appropriations in the amount of $439,000 (with accompanying papers); to the Committee on Appropriations.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM-101. Senate Resolution No. 4 adopted by the Senate of the State of New Hampshire in opposition to the action of the President of the United States pardoning the draft evaders; ordered to lie on the table:

"SENATE RESOLUTION No. 4

"Whereas, the President of the United States has seen fit to issue a pardon to all the draft evaders, and we firmly believe this to have been a mistake; and

"Whereas, such pardon does nothing to form a more perfect union because it has undermined the very core of responsible citizenship, and, in a single act, demeaned the basic concepts upon which our great nation was founded; and

"Whereas, such pardon does nothing to establish justice because it contradicts the principle that we are a nation of laws, not of men; and

"Whereas, such pardon does nothing to provide for the common defense because it is an effront to every veteran living and dead who has served his country honorably and because it can do nought but weaken the general resolve of our people with respect to freedom and its defense; and

"Whereas, such pardon does nothing to promote the general welfare because each of us is now authorized to make his own decision on a personal basis oblivious to the effect on the whole and because it endorses the actions of the draft evaders in putting their own good and welfare above the good and welfare of the general populace; and

"Whereas, such pardon does nothing to secure the blessings of liberty to ourselves and our posterity because it assures that we can never again depend upon our citizens to put forth their full effort to defend our liberties, back our democratic decisions, nor to protect our rights no matter the source of the attack and, therefore, puts in jeopardy our future survival as a democratic and free society; now, therefore, be it

"Resolved by the Senate:

"That we vigorously protest the action of the President of the United States in issuing a blanket pardon of the draft evaders and request that he be informed of our sentiments; and

"That certified copies of this resolution be forwarded by the secretary of state to the members of the New Hampshire delegation to the United States Congress, the clerk of the United States Senate, the clerk of the United States House of Representatives, and to the President of the United States."

POM-102. Resolution No. 410-77 adopted by the council of the city of Cleveland, Ohio supporting the proposal of Senator EDMUND MUSKIE to provide assistance to low income families to meet the winter's high cost of

heating; to the Committee on Human Resources.

POM-103. House Resolution 2003 adopted by the House of Representatives of the State of Arizona urging the President and Congress of the United States to marshal all the resources at their command to prevent aircraft illegally crossing the international border into Arizona and to take immediate measures to ensure the security of the international border; to the Committee on Foreign Relations:

"HOUSE RESOLUTION 2003

"Whereas, the federal government has given little more than lip service and has shown an insufficient commitment toward containing and solving the problem of aircraft illegally crossing the international border into Arizona; and

"Whereas, innumerable successful daily crossings of the international border by aircraft transporting illegal narcotics present a significant and pressing problem in Arizona; and

"Whereas the importation of such large quantities of illegal narcotics by air is an immediate, critical and ominous threat of the security and safety of the citizens of this nation and the inhabitants of Arizona in particular; and

"Whereas, the situation of international political and social unrest in many countries south of the boundaries of the United States poses a threat to our security; and

"Whereas, the threat of a foreign power hostile to the interests of the United States crossing the international border into Arizona is a real threat to national defense and the security of Arizona; and

"Whereas, the United States has hundreds of miles of unguarded border on its southern boundaries.

"Therefore be it resolved by the House of Representatives of the State of Arizona:

"1. That the Members of the House of Representatives respectfully request that the President and the Congress of the United States marshal all the resources at their command to prevent illegal flights of aircraft across the Arizona border into the United States.

"2. That the Members of the House of Representatives respectfully request that the President and the Congress of the United States take immediate measures to ensure the security of its international border as an intrinsic component of national defense.

"3. That the Secretary of State of the State of Arizona transmit a duly certified copy of this resolution to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives and to each Member of the Arizona Congressional Delegation."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLELLAN, from the Committee on Appropriations, with amendments:

H.R. 4877. A bill making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes (Rept. No. 95-64).

By Mr. NELSON, from the Select Committee on Small Business, with an amendment:

S. Res. 105. A resolution requesting a White House Conference on Small Business, together with additional views (Rept. No. 95-65).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

W. J. Michael Cody, of Tennessee, to be U.S. Attorney for the Western District of Tennessee for the term of 4 years.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. McGOVERN:

S. 1116. A bill to amend title XVIII of the Social Security Act to include, as a home health service, nutritional counseling provided by or under the supervision of a registered dietician; to the Committee on Finance.

By Mr. MATHIAS:

S. 1117. A bill reimburse the city of Frederick, Maryland, for money paid by the citizens of such city to save and hold harmless valuable military and hospital supplies owned by the U.S. Government; to the Committee on the Judiciary.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 1118. A bill to amend the Internal Revenue Code of 1954 to provide for specific dollar amounts for the reporting of winnings from bingo, keno, and slot machines; to the Committee on Finance.

By Mr. YOUNG:

S. 1119. A bill to amend the Food Stamp Act of 1964, as amended, to provide for both the continuation and tribal administration of the food stamp and commodity distribution programs on Indian reservations, and for other purposes directly related to the administration of the food stamp and commodity distribution programs on Indian reservations; to implement the Federal responsibility for the care and nutrition of the Indian people by improving services, facilities, and self-determination of Federal food assistance programs and encouraging maximum participation of Indians in such programs; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HUMPHREY:

By Mr. THURMOND:

S. 1128. A bill to amend the International Security Assistance and Arms Export Control Act of 1976 by extending the deadline for submitting the results of a study on the effects of certain arms export controls; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McGOVERN:

S. 1116. A bill to amend title XVIII of the Social Security Act to include, as a home health service, nutritional counseling provided by or under the supervision of a registered dietitian; to the Committee on Finance.

MEDICARE AND HOME NUTRITION SERVICES

Mr. McGOVERN. Mr. President, today I am introducing legislation for nutritional counseling as a home health service under medicare. Under existing law, home health visits are reimbursable for nursing, physical therapy, occupational therapy, speech therapy, and medical social services, but not for nutritional counseling. This is one area where Government spends more by doing less.

In the hospital, medicare patients are eligible for nutritional counseling. After they are discharged, they receive care through a home health agency, but that care does not include nutritional counseling. The denial of such counseling is not only a mistake in human terms, but a needless expense in two ways. First, nutritional deficiencies, which could be corrected by counseling, lead to health problems which must be treated at far greater cost later. We know that 6 of the 10 leading causes of death have been connected to the diet. Second, the more restricted benefits of home health care encourage over-reliance on the more expensive hospitalization of recipients. Reimbursements for home health visits now represent less than 1 percent of the total budget for medicare. Inpatient hospital care is the greatest reason for its escalating costs.

The recently published "Forward Plan for Health, Fiscal Year 1978-82," of the Department of Health, Education and Welfare, cites, as a major priority, the integration of nutritional concerns into the planning, organization, and implementation of health care systems, in the training of all health-related personnel, including stressing the role of nutrition in the promotion of health.

The "Fiscal Year 1977–81 Forward Plan for Health," emphasizes the vital relation between nutrition and health, and concludes:

Nutritional care, including dietary counseling, should be integrated into the preventive, diagnostic and restorative health services of all PHS programs for all family members.

Mr. President, the need is clear. This legislation is a major step toward meeting that need. Its cost will begin to save Federal money almost immediately. So this is the kind of cost-conscious legislation which administration officials should accept without reluctance, if they mean what they say about securing the maximum return for our social expenditures.

I ask unanimous consent that the relevant testimony of the American Dietetic Association before the House Committee on Ways and Means be printed at this point in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

SUMMARY OF TESTIMONY—SPECIFIC MEDICARE ISSUES

(By The American Dietetic Association)

REVISIONS IN HOME HEALTH CARE PROVISIONS

The full range of nutrition services is available to the Medicare patient as long as he is in the hospital. Upon discharge to a home health agency, his eligibility for the services of a dietitian through home health visits is denied under existing law.

Not all beneficiaries of home health services need dietary counseling, but there are those who do need it but are not receiving it under the present Medicare legislation.

Home health services account for less than one percent of the Medicare dollar. It is estimated that the extension of home health benefits to include nutritional care would cost less than $5 million. This cost would be offset by decreased hospitalization and rehospitalization for those suffering from nutritionally related diseases such as diabetes.

The American Dietetic Association's position is that the inclusion of nutrition services as a reimbursable service under the Home Health Care provisions of Medicare will significantly reduce the number of people requiring sick care services in institutions.

REVISIONS IN PROFESSIONAL STANDARDS REVIEW ORGANIZATION PROVISIONS

Quality assurance accompanied by cost containment are the keystones of the Professional Standards Review legislation. Medical care review is the prime factor considered in the provisions and this emphasis is placed on the hospitalized patient with a specific disease.

The American Dietetic Association believes that nutritional assessment of all patients performed by a dietitian would address itself to prevention and diagnostic services as well as curative and restorative care. As long as the system continues to devote itself to crisis intervention with little or no recognition of contributing influences on the total health of individuals cost containment will not be fully achieved.

THE AMERICAN DIETETIC ASSOCIATION FACT SHEET NUTRITIONAL CARE-DIETARY COUNSELING

The American Dietetic Association in commitment to professional and social responsibilities for the promotion of optimal nutritional health recommends that adequately funded prgrams of nutritional care be an integral part of all health care programs.

WHAT IS NUTRITIONAL CARE?

Nutritional care is the application of the science of nutrition to the health care of people. Nutritional care is not complete without dietary counseling.

WHAT IS DIETARY COUNSELING?

Dietary counseling is the process of providing individualized, professional guidance to assist people in adjusting their daily food consumption to meet their health needs.

The objective of dietary counseling is modification of behavior. This objective is accomplished when individuals understand how to make wise food choices.

WHAT DOES DIETARY COUNSELING SERVICE PROVIDE?

Dietary counseling is a component of a nutritional care program in which a registered dietitian gives professional guidance to an individual as part of a physician's treatment plan. The service includes:

1. Assessing present food habits, eating practices and related factors.
2. Developing a written plan for appropriate dietary counseling.
3. Translating the detailed plan with the individual.
4. Planning follow-up care and evaluating achievement of objectives.
5. Using records and reports for sharing pertinent information with other health professionals concerned with the individual's care.

Dietary counseling includes the exploration of the patterns of food intake, socio-economic factors and ethnic beliefs which may influence the individual's choice of food.

WHO IS RESPONSIBLE FOR NUTRITIONAL CARE?

The Dietitian: The American Dietetic Association believes that nutrition is an integral part of total health and life care and urges that all efforts in nutrition and health be multidisciplinary.

The American Dietetic Association believes that registered dietitians, as the only professionally educated group whose primary concern is the application of nutrition science to the health care of people, should be involved in the planning and execution of all health care programs.

The Consumers: As consumers become more aware that nutrition is a cornerstone of positive health, they will realize that it is their right to expect professional guidance and dietary counseling to assist them in developing and maintaining sound "nutritional" habits. It is their responsibility to assure the inclusion of nutritional care in all health programs.

The Government: As the government becomes more deeply involved in legislation to meet the health care needs of the population, it has a responsibility to provide nutritional care for both individuals and groups. Dietary counseling should be a part of every nutritional care program. Increasing costs for both inpatient and ambulatory care make it mandatory that attention be turned to programs that will prepare citizens to assume more personal responsibility for their nutritional well-being.

To neglect the opportunity to insure more positive health for the population is not being totally responsive to a major health concern in this country. Health care legislation for the 70's must provide access to nutritional care.

The American Dietetic Association recommends that nutritional care, including dietary counseling, be integrated into preventive, diagnostic, curative and restorative health services provided under all national health programs and that nutritional care, as a component of health care, be available to all people on a continuing and coordinated basis. The Association recommends further that the planning and supervision of nutritional care be under the direction of persons professionally educated in nutrition as it relates to human health needs.

For further information. Coordinator, Legislative Activities, The American Diabetes Association, 430 North Michigan Avenue, Chicago, Illinois 60611.

STATEMENT OF THE AMERICAN DIETETIC ASSOCIATION ON SPECIFIC MEDICARE ISSUES BEFORE THE SUBCOMMITTEE ON HEALTH, COMMITTEE ON WAYS AND MEANS, U.S. HOUSE OF REPRESENTATIVES, SEPTEMBER 19, 1975

Mr. Chairman and members of the Committe. I am Annie Galbraith, a registered dietitian, and I am employed as Associate Director of the Dietary Department and Dietetic Internship at Massachusetts General Hospital in Boston. I am President-Elect of The American Dietetic Association whose headquarters is located in Chicago. It is on behalf of the Association that I am presenting this statement today.

I appreciate the extremely busy time schedule which the Committee has today. For this reason a summary of my testimony is attached as Appendix A, along with a Fact Sheet explaining our definition and position relative to Nutritional Care-Dietary Counseling, Appendix B, and The American Dietetic Association's Position Paper on "The Nutrition Component of Health Services Delivery Systems," Appendix C.

HOME HEALTH CARE PROVISIONS

To fulfill the objectives of The American Dietetic Association as stated in its Constitution, i.e., "To improve the nutrition of human beings; to advance the science of dietetics and nutrition; and to improve education in these and allied areas," the Association recommends that: Nutrition services under the supervision of qualified nutrition personnel should be a component of all health and health related programs and should be designed to reach the total population with priority to such nutritionally vulnerable groups as infants, children and youth in the growing years, women in the child bearings years, and the older age population. was enacted in 1965 it was one of the most progressive pieces of social-health care program ever adopted. But, it did not take into consideration the fact that nutrition is a critical factor in the promotion of health and prevention of disease as well as in recovery and rehabilitation from illness or injury.

In the ten years since the original law was passed there have been three White House Conferences in which the need for greater emphasis on nutritional care has been recognized: The White House Conference on Food, Nutrition and Health, The White House Conference on Children and and Youth and The White House Conference on Aging. The reports and recommendations from each of these meetings indicate that the public recognizes the inadequacies in our present system of nutritional care-dietary counseling and is desirous of legislation that will provide professional guidance and dietary counseling to assist them in developing sound nutritional habits.

Since 1968, the Senate Select Committee on Nutrition and Human Needs has held hearings and published reports where again we can find recommendations citing the need for improved nutritional care which would benefit the public throughout the life cycle.

What is Medicare doing presently to provide continuity of nutritional care; care that is organized and administered to provide maximum health service for dollars expended?

As long as the Medicare patient is in the hospital the full range of nutrition services is made available. Upon discharge to a home health agency his eligibility for the services

of a dietitian through home health visits is denied under existing law.

Let me quote one of our members who recently wrote us as follows:

"I enthusiastically urge the need for diet counseling in the home. In my 7 years experience consulting with a home health agency, I have found that though hospital diet instructions are vital and important, patients often have questions or problems when they return home or need help adjusting diet plans to their own particular needs."

Dietitians would agree with you that not all patients who are the beneficiaries of home health services need nutritional care. But, there are those who do need it: the diabetic, the cardiac, the grossly obese, to give but a few examples. They need it and they are not receiving it under the present Medicare legislation.

The American Dietetic Association's position is that the inclusion of nutrition as a component of home health care will significantly reduce the number of people requiring sick care service and, therefore, contribute directly to:

1. A relief in the strain on the nation's health care delivery system;

2. A decrease in the escalating rate of health care costs; and

3. An increase in physical, mental and social well-being of people so that they may achieve and maintain productive and independent lives.

Home health services account for less than one percent of the Medicare dollar. It is estimated that the extension of home health benefits to include nutritional care would cost less than $5 million. We believe that offering such service should offset this cost by decreased hospital utilization. In 1973 reimbursement for home health services amounted to only $52 million as compared with inpatient services at $6.3 billion.

Revisions in home health care provisions to include nutritional care as we define it in Appendix B, should do much to improve the continuity of health care, to improve the quality of home health services and to assist in cost containment through the prevention of hospitalization and re-hospitalization of those suffering from chronic, nutrition related disease.

The Congress has shown its awareness of the value of maintaining the sick and the aged in their own homes rather than in institutions by introducing such bills as S. 1163 and H.R. 4772 that would improve the home health services program. An amendment is needed to specify that dietary counseling-nutritional care provided under the supervision of a registered dietitian is a covered home health service.

We recommend that Sec. 1861(m) of the Social Security Act be amended by renumbering subsections (2) through (7) as (3) through (8) and inserting the following new subsection immediately after subsection (1):

"(2) nutritional care furnished by or under the supervision of a registered dietitian."

PROFESSIONAL STANDARDS REVIEW ORGANIZATION PROVISIONS

The American Dietetic Association is aware of the current health care crisis in the United States and the effort that is being made in both the public and private sectors to restructure health care delivery systems so that there may be high quality care available for all provided at reasonable cost with optimal utilization of health personnel. The end objective is consumer protection and consumer satisfaction.

The profession of dietetics is committed to helping meet the challenge of changing patterns in health care. We are committed to the principle that the inclusion of nutritional care in comprehensive health care is positively related to the maintenance of health and the reduction of sick care costs and services.

Nutritional care includes at least the following essential services, combined and coordinated to meet individual and family needs:

1. Assessment of food practices and dietary status;

2. Nutrition education and counseling to meet normal and therapeutic needs; and

3. Provision of, or referral to, resources for appropriate food service, special feeding equipment, and/or supplemental food assistance.

Perhaps it is because food and nutrition are accepted as such an integral part of life that special mention of nutritional care has been overlooked as basic to quality health care with the consequent diminishing of the scope of such service. We recommend that all patients have the advantage of nutritional assessment performed by a dietitian who can refer for corroboration and provide data for patient information systems.

We believe that the nutritional care components of any patient care should be integrated with medical and multidisciplinary support services. The dietitian should participate with other members of the health team in overall planning for patient care. Nutrition personnel should help to monitor and evaluate the efficiency and effectiveness of the health care provided to the patient.

Quality assurance accompanied by cost containments are the keystones of the Professional Standards Review Program. Medical care review is the prime factor considered in the provisions and emphasis is placed on the review of the quality of care provided to the hospitalized patient with a specific disease.

The American Dietetic Association believes that nutritional assessment of all patients performed by a dietitian would address itself to diagnostic services and prevention as well as curative and restorative care. Concern with cost of health care emphasizes the need for prevention of rehospitalization whenever possible. We recommend that the role of the "non-physician health practitioner," in this case the dietitian, be given more visibility in total patient care.

As long as the system continues to devote itself to crisis intervention with little or no recognition of contributing influences to the total health of individuals cost containment will not be fully achieved.

On behalf of the twenty six thousand members of the American Dietetic Association I want to thank you for this opportunity to present this statement. I would be happy to answer any questions that the members of the Committee may have.

THE AMERICAN DIETETIC ASSOCIATION POSITION PAPER ON THE NUTRITION COMPONENT OF HEALTH SERVICES DELIVERY SYSTEMS

(NOTE.—One of the main problems resulting from the lack of nutrition training in the nation's medical schools is that however much individual physicians in the federal or state planning agencies may protest their interest, nutrition almost invariably ends up being left out as a component of health-care delivery systems. Indeed, less than two years after the White House Conference on Food, Nutrition and Health, the two strongest nutrition bureaus at the state health level (New York and California) are threatened with extinction.

With government at all levels responsible for an ever increasing proportion of health expenditures, with these expenditures mounting without appreciable effect on the health statistics of the nation, it is becoming obvious that emphasis must be shifted from purely curative to prevention and rehabilitation. This means that nutrition should assume even more importance than in the past. In terms of money—as in terms of human suffering—one can well argue that every dollar spent on nutrition instruction may save tens of dollars in later medical care.

I am delighted to see that The American Dietetic Association has once again asserted its leadership in human nutrition by preparing and endorsing a position paper which outlines clearly the necessary nutrition services to be included in comprehensive health schemes. The paper also clearly describes the need for nutrition input at the planning stages if nutrition services are to be properly structured. At present, the United States Department of Agriculture is operating a gigantic (over $3 billion) food program with what many think is much too small a nutrition component. Present indications are that the Department of Health, Education and Welfare is similarly casual about nutrition. I commend this position paper to health planners at all levels.—*Jean Mayer, Ph. D., S. Sc., A.M. (hon), M.D. (hon), Professor of Nutrition, Harvard School of Public Health, and Chairman, White House Conference on Food, Nutrition and Health.*)

"Nutrition services under the supervision of qualified nutrition personnel should be a component of *all* health and health-related programs and should be designed to reach the total population with priority given to such nutritionally vulnerable groups as infants, children, and youth in the growing years, women in the child-bearing years, and the older age population." (1). The need for the Association to interpret and expand this policy statement is based on a recognition and concern that:

(a) The need and demand for quality health care by the population is not being met by, and is critically straining, the current health care delivery system.

(b) The alarming increase in the cost of medical care mandates a review and evaluation of the present health care delivery system.

The American Dietetic Association's position is that inclusion of nutrition as a component of health care will significantly reduce the number of people requiring sick care service and, therefore, contribute directly to:

(a) A relief of strain on the nation's health care delivery system;

(b) A decrease in the escalating rate of health care costs;

(c) An increase in physical, mental, and social well-being of people so that they may achieve and maintain productive and independent lives.

Nutrition is a critical factor in the promotion of health and prevention of disease and in recovery and rehabilitation from illness or injury. Evidence mounts that Americans who fail to attain a diet optimal for health can be found at every socio-economic level. The reasons are many and complex, but the impact on the health of the nation is seen in the increased risk of complications of pregnancy in the poorly nourished woman, in the chance that her infant may be of low weight with accompanying risk of retarded physical and mental development; in the high incidence of overweight and underweight in school-age children and in adults; in the debilitation of the malnourished elderly; in dental disease, widespread in the total population; and in the high incidence of chronic illnesses that require dietary treatment, monitoring, and follow-up. Since it is apparent that improvements in the nutrition of people will have a direct effect on the level of health and the resulting need for health services The American Dietetic Association recommends that:

I. Nutritional care, as a component of health care, be available to all people on a continuing and coordinated basis. *Nutritional care* is the application of nutrition science to the health care of people. In its broadest sense, nutritional care is provided to the general population through studies

of food consumption and nutritional health, mass education, and food assistants programs. As applied to patient care, it has the same components (assessment of food practices and nutritional status, nutrition education, and food assistance) plus dietary counseling and the service of appropriate food. These nutritional care services must be combined and coordinated to meet individual needs.

II. Nutritional care be integrated into preventive, diagnostic, curative, and restorative health services. Any contemplated health services delivery system should include a nutrition component in its preventive as well as remedial services, if the maximum benefits to health are to be achieved. The following example illustrates the application of this recommendation:

HEALTH SERVICES AND NUTRITIONAL CARE

Public health service—health promotion: mass nutrition education; supplemental food assistance.

Health-testing service (7): assessment of food intake and other indexes of nutritional status.

Health care service; nutrition education and counseling, food assistance, appropriate food service.

Preventive, maintenance service: dietary counseling, food assistance, appropriate food service.

Sick-care service: for all levels of inpatient care, appropriate food service, diet therapy, dietary counseling.

III. The planning and supervision of nutritional care be under the direction of persons professionally educated in nutrition as it relates to human health needs. Dietitians and public health nutritionists, with their educated knowledge of foods and nutrition, are the health professionals who are prepared specifically to help individuals and groups improve their diets and their nutritional status. (In this paper, the term *dietitian* shall be interpreted to mean either a public health nutritionist or a dietitian who is qualified for registration in The American Dietetic Association.) Supportive personnel (dietetic technicians, dietetic assistants) extend the knowledge and skills of dietitians to greater numbers of people.

IV. Dietitians function at the planning and policy-making level of federal, regional, state, and local comprehensive health planning bodies to assure that an appropriate nutritional care component is incorporated into all comprehensive health care planning.

V. Comprehensive health care plans include appropriate administrative placement of the nutrition care component; staffing patterns and qualifications for personnel; identification of nature and extent of nutrition problems, standards of nutritional care; methods to be used for delivery of nutrition service; and evaluation.

VI. To assure that a supply of the dietitians is available and accessible to those in need of nutritional care, steps should be taken to:

A. Support the expansion of existing education and training facilities in nutrition and dietetics and the development of new facilities.

B. Increase support available to students of education and training in nutrition by means of scholarships, loans, and other financial mechanisms.

C. Explore and establish new approaches to undergraduate, graduate, and technical education.

D. Utilize supportive dietetic personnel and improve their career development and status in the health care system.

E. Explore other means to increase the dietetic manpower supply through such mechanisms as proficiency and equivalency examinations and other recruiting efforts.

VII. Dietitians be eligible for payments as providers of health care services. Future health care legislation should stipulate dietary counseling services as an eligible service for third party payment.

VIII. Adequate funding for preventive as well as curative nutritional care services be provided. Until such time as the nation is geared to deliver comprehensive family health care, nutrition services should be supported in existing specialized programs and services, such as: health services for mothers and children; the elderly, special groups, such as migrant agricultural workers and low-income families; family planning programs; chronic disease control services; home health services; rehabilitation services for drug and alcohol addicts; and group care services in facilities such as hospitals, nursing homes, extended care facilities, day-care centers, and residential institutions, detention centers, detoxification centers, and prisons.

XI. A careful appraisal be made by the economic benefits of nutritional care in a comprehensive medical care system. Such an appraisal should also include evaluation of the effectiveness of preventive nutritional care as well as remedial services, on such variables as cost, absenteeism, worker productivity, and so on.

X. Any national health insurance program adopted include incentives for the development of preventive health services. Nutritional care should be identified in the legislation as an essential component of preventive health care service.

XI. Standards for nutritional care services be included in all federal and state guidelines and regulations for health care.

By Mr. MATHIAS:

S. 1117. A bill to reimburse the city of Frederick, Md., for money paid by the citizens of such city to save and hold harmless valuable military and hospital supplies owned by the U.S. Government; to the Committee on the Judiciary.

FREDERICK REIMBURSEMENT

Mr. MATHIAS. Mr. President, I rise to perform an act which has come to be almost a ritual. I now introduce for the ninth consecutive Congress a bill to recompense the people of Frederick, Md., for a debt incurred in 1864 by their great grandparents in the service of our Nation—a debt borne by successive generations of Frederick citizens until finally in 1951 it was paid off out of the taxes levied on them.

When I say that this has become a ritual, I do not mean to suggest that I introduce this bill for ceremonial purposes only. On the contrary, I am deeply committed to seeing that justice is done in this case no matter how long it may take. The ritual aspects of the situation derive from the fact that no Congress thus far has acted to redress the grievous injustice done the citizens of Frederick which my bill would remedy.

I will now relate for the ninth time in the U.S. Congress the ungarnished facts of the case, facts which I think might convince everyone that were it not for the unstinting generosity and unflinching patriotism of the citizens of Frederick we might not be meeting as we now are.

I am confident that the wisdom and the sense of justice of my colleagues in this 95th Congress will work together to resolve this claim once and for all time.

July 9, 1864, the day of the Battle of the Monocacy, was an eventful day for Frederick. On the morning of that day, the city officials received a message from Lt. Gen. Jubal Early, commanding general of the Confederate Armed Forces, who was on his way to the Monocacy ready for battle. The message demanded of Frederick and its citizens $200,000 or in the alternative, medical, commissary, ordnance, and quarter master supplies valued at $50,000 each and equal in value to $200,000. The general surrounded the city with his approximately 20,000 troops and there were rumored threats that all property in the city would be destroyed unless the demand was met.

If the city officials gave the Confederates the Government supplies, it would strengthen their forces for the ensuing battle and thus contribute to a possible Confederate victory. These were the considerations—all of them weighed and balanced under the imminent threat of total destruction to their city. The best to be expected was accomplished; the city officials delayed payment and collected $200,000 from local banks under the promise that the citizens of Frederick would be taxed over the years to reimburse the banks. The debt was finally liquidated in 1951 through a series of bond issues. The stubborn resistance

of the city of Frederick cost the Confederate Armed Forces a day in the march upon Washington, thus giving the union army additional time to successfully defend the Capital City. In addition, their efforts prevented the destruction of Government property.

These are the events which outline the creation of a just and equitable claim by the people of Frederick against their Federal Government, a claim which has gone unfulfilled, a claim which is a blemish on the record of justice we value as a Nation.

The people of Frederick, despite the possible adverse consequences to themselves, saved these vital union supplies. This act of patriotism was costly to the people of Frederick. With a town tax revenue of only $8,000 per year at the time, they nevertheless pledged the ransom in order that Government supplies valued between $1 million and $1.5 million remain unmolested by the Confederacy. The city of Frederick carried the financial burden of the Government supply ransom for 87 years and the cost to the city of the forced debt entailed deprivation of municipal services except through higher taxes and borrowed money. I know of no other city, north or south, which can make this claim.

The time has come for the Federal Government to reimburse Frederick. The Federal Government should pay Frederick value for the value it received as a result of the patriotic acts of this city. The bill I introduce today will allow such payment and right this long overdue injustice.

Mr. President, Frederick is not making a claim for the value of private property damaged or destroyed by the enemy, although Congress has enacted bills on numerous occasions authorizing the claims of private citizens for the value of their private property destroyed by the enemy. Frederick protected and saved very valuable Government property.

The Congress has for many years recognized the merits of claims by the American Indian that arise from colonial days and has reimbursed owners of fishing vessels for fines which had to be paid for the violation of fishing area limitations of various South American countries.

Frederick is justly entitled to reimbursement for the actual costs of the following items:

First. Bonds and certificates issued to the five banks from which the general early money was obtained as security for the loan to the city on July 9, 1864, held by banks, 1868–88.

Second. Interest paid at 6 percent per annum by the city upon the bonds and certificates to the banks, 1868–88, such interest being derived from taxes imposed by the city.

Third. Interest on the tax loss to pay interest 1868–88, at 4 percent per year.

Fourth. Tax exemption granted five banks from general special tax levy of 20 cents per $100 on capital stock, 1868–88.

Fifth. Interest at 4 percent on tax loss in granting exemption to banks, 1868–88.

Sixth. Interest at 4 percent per annum on above costs to city to repay five banks for their respective loans, the bank loans having been made to the city 1864, and compromise settlement agreement on debt payment of $125,225.21 of above bonds and certificates accepted July 1, 1968, paid July 1, 1888, by refunding debt, 1888–1970.

Seventh. Interest paid by city on 24 percent of refunding bond issues of 1888 in amount of $512,500 at 4 percent interest, bank bonds refunded in amount of $123,000, 1888–1917.

Tax loss to pay interest on 24 percent at 4 percent, 1888–1917.

Eighth. Interest at 4 percent per annum on tax loss to pay 24 percent of interest 1888–1917, bonds having been partially amortized, 1888–1917.

Ninth. Interest at 4 percent on interest paid on bonds and on tax loss incurred to pay interest, 1917–70.

Tenth. Interest paid on 24 percent of refunding bond issue of October 1, 1917, at 4½ percent, attributable to refunded bank bonds, of issue of $380,000, October 1, 1917, to October 1951.

Tax loss to pay interest on 24 percent at 4½ percent, 1917–51.

Eleventh. Interest at 4 percent on interest paid on bonds and on tax loss incurred to pay interest, 1951–70.

History records that many cities were destroyed during the Civil War, yet few of them incurred such a prodigious debt as that of Frederick in its attempt to protect supplies for which there was a dire need. Frederick sacrificed money which it did not have in order to defend Federal supplies at a time when President Lincoln indicated to Union generals the critical need of clothing and supplies for Union troops engaged in defensive deployment.

The bill I propose will terminate the financial obligation for the genuine service to the country by the city of Frederick. Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1117

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the city of Frederick, Maryland, a sum not to exceed the actual cost to the city, including interest thereon when incurred, to make the payment as hereinafter stated, on the debt incurred until October 1, 1951, and simple interest at the rate of 4 per centum per annum on the cost to the city to liquidate the debt as incurred, until reimbursement is paid of the amount determined by the Secretary of the Treasury to be due as defined herein, as of the date of payment in full satisfaction of the claim of the city against the United States for reimbursement for the money paid by the city on July 9, 1864, upon demand of Lieutenant General Jubal A. Early (commanding general of the Confederate Armed Forces of over twenty thousand troops then surrounding the city) and under rumored threats that all property in the city would be destroyed; the demand having specified $200,000 at current prices, commissary supplies to the same the demand having specified $200,000, and in the alternative medical supplies of $50,000 amount, ordnance supplies with the same, and quartermaster's supplies of a like amount (all of such being the property of the United States Government as part of the supply depot and hospital of the command headquarters of the Union Armed Forces in Frederick for the deployment of Union troops at strategic points along the Maryland shores of the Potomac River in western Maryland as a defense against invasion by Confederate troops across the Potomac and in defense of Washington from attack through Maryland, and to supply Union troops moved through the command area during the war; none of such demanded supplies being the property of Frederick) and with all Federal troops (including advance guard and their mobility supplies) having evacuated the city to be deployed for the imminent battle of the Monocacy, the city and the Government supply depot being left defenseless; after pleading negotiations throughout the day with the Confederate command, which failed, and under stress of the rumored threats of destruction, the city demanded the money required of the banks of the city to be delivered to the Confederate general, the city promising the lending banks that the citizens of the city would be taxed to reimburse the banks, and taxes were imposed over a long period by the city to amortize the debt and through a series of refunding bond issues of the city, finally liquidated in the year 1951, at rates of interest of 6 per centum, 4 per centum, and 4½ per centum and upon delivery of the money by the banks to the city and delivered to the Confederate general late in the day, by orders of the Confederate general none of the Government property was destroyed nor molested, and not only was Government property saved harmless, but the daylong negotiations, between city officials and Confederate officers, gave time for better strategic deployment of the limited Union Armed Forces at the Monocacy and the arrival of some reinforcements, and most importantly the relatively short battle of Monocacy, together with the stubborn resistance and difficulty of Frederick in raising the $200,000 demanded, lost a day in the march upon Washington by the Confederate Armed Forces and gave time for the successful reinforcement of the Union defense of Washington—thus the claim of Frederick is for action taken not only to save United States Government property from being destroyed, but also, at great financial cost to the citizens of Frederick to carry the debt, which contributed greatly in saving Washington from direct attack by over twenty thousand of the Confederate Armed Forces and allowed time for arrival of reinforcements for the Union Armed Forces for the defense of Washington.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 1118. A bill to amend the Internal Revenue Code of 1954 to provide for specific dollar amounts for the reporting of winnings from bingo, keno, and slot machines; to the Committee on Finance.

Mr. CANNON. Mr. President, I introduce this bill for myself and Senator LAXALT, my colleague from Nevada. The purpose of our legislation is to reverse the effect of a temporary Internal Revenue Service regulation requiring information reporting with respect to winnings from Keno, bingo, and slot machine play of $1,000 or more.

Last year in the Tax Reform Act the Congress directed the IRS to conduct a study of the reporting of gaming win-

nings on Keno, bingo, and slot machines. This data was to be evaluated and considered in the Service's recommendation on whether or not Congress should move to require an on-the-spot withholding upon these gaming winnings. I am familiar with the directive in the last committee report because I recall quite well that the IRS requested the language in view of the fact that Congress has acted not to require withholding on Keno, bingo, and slots. I agreed to the language and so indicated to Chairman Long of the Senate Finance Committee as well as the IRS.

In agreeing to the study which called for a recommendation within 2 years, I did not anticipate that the IRS would move within a matter of months to issue new reporting regulations. Quite frankly I thought the Internal Revenue Service would be evaluating the reporting taking place under the old 1099's.

The new level of reporting as required by the temporary IRS regulation raises the level of reporting on bingo and Keno and imposes a new requirement as to slot machines. The new regulation imposes still another bureaucratic nightmare upon hotels and casinos in Nevada. It means more paperwork and quite frankly I believe it is going to adversely affect gaming in Nevada and in the end result in a sharp decline in revenue dollars to the U.S. Treasury.

Another very serious inequity of the temporary IRS regulation is that it does not contain any guidelines for a taxpayer to establish losses from participation in these games. Traditionally, under various sections of the code taxpayers have been able to offset their losses, but in this instance the Service has elected not to permit the established practice.

The bill we offer today does not eliminate the reporting requirement completely, but it does change the level of reporting that would be required. Our bill establishes different reporting thresholds for each of the affected games instead of the first $1,000 level mandated by the IRS. Hotels and casinos would only report winnings over $1,500 for bingo, $2,500 for Keno, and $5,000 for slots. Almost equally important this bill permits the player to deduct losses to the extent such losses can be demonstrated by the player.

I might add here that the gaming industry has met with IRS officials regarding the regulation and that after much discussion with the IRS, the Nevada delegation, and gaming officials, we are still seeking a solution. I, of course, still hope that this dispute can be resolved without legislation and I will continue to work toward that end. In the interim, I hope that this legislation can be considered by the Senate Finance Committee at the earliest opportunity so that the approach proposed here today might be fully considered.

By Mr. YOUNG:

S. 1119. A bill to amend the Food Stamp Act of 1964, as amended, to provide for both the continuation and tribal administration of the food stamp and commodity distribution programs on Indian reservations, and for other purposes directly related to the administration of the food stamp and commodity distribution programs on Indian reservations; to implement the Federal responsibility for the care and nutrition of the Indian people by improving services, facilities, and self-determination of Federal food assistance programs and encouraging maximum participation of Indians in such programs; to the Committee on Agriculture, Nutrition, and Forestry.

INDIAN FOOD PROGRAM AMENDMENTS OF 1977

Mr. YOUNG. Mr. President, today I am pleased to introduce a bill which seeks to correct serious food problems confronting Indian people throughout the country. I introduced similar legislation in the 93d Congress and that bill passed the Senate. However, no action was taken in the House.

Under current law, Indian households are eligible for food stamps and they are subject basically to the same rules that are used for any applicant household. Indian reservations, however, have been granted an extension which permits them to continue operating commodity distribution programs through September of this year. My bill would extend the Commodity program to Indian people beyond this year. This is a program which is very popular with them, and one which they want to continue.

My bill would make it easier for Indian people to participate in the food stamp and commodity distribution programs. One of the problems many Indian people have is that they live great distances from commodity food distribution centers as well as the offices which certify and issue food stamps. Many members of the Sioux Tribe on the Standing Rock Indian Reservation in North Dakota must travel round trip distances of 70 to 100 miles.

Mr. President, I ask unanimous consent to have an analysis of this bill printed in the RECORD as a part of my remarks.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF THE PROVISIONS OF THE "INDIAN FOOD PROGRAM AMENDMENTS OF 1977"

SECTION 1

Section 1(a) of the bill amends section 3(h) of the Act by broadening the term "State agency" (as defined herein) to permit the official governing bodies of Indian tribes, or tribally-authorized inter-tribal organizations to be considered administrative agencies for purposes of the Act.

Section 1(b) of the bill amends section 3(j) of the Act by broadening the term "State" (as defined therein) to include any Indian tribe, or a tribally-authorized inter-tribal organization which requests to administer its own program(s) under the Act.

Section 1(c) of the bill amends section 3 of the Act by adding at the end thereof a new subsection (o) which defines the term "tribe" (as used throughout the bill) in a manner sufficiently broad to encompass Alaskan Indian people as well as Indian people recognized by the Secretary of the Interior or any Tribe holding a treaty with the Federal or state government or any Tribe which has been established by executive order.

SECTION 2

Section 2 of the bill amends section 4(b) of the Act to allow for the operation of the Food Stamp and Commodity Distribution Program(s) separately or concurrently when a request for separate or dual operation is made by the official governing body of an Indian tribe.

Current law provides that in those areas where the food stamp program is in operation, no distribution of federally donated foods to households under the authority of any other law may be made, except (1) during temporary emergency situations; (2) during a period of time necessary to effectuate an orderly transition in an area converting to the food stamp program from another plan; and (3) at the request of the State agency. (P.L. 93-86, 87 Stat. 246 (August 10, 1973))

The primary reason why dual operation of the food stamp and commodity distribution programs is required to make the food programs work on Indian reservations is that no two reservations are alike and what may work for one reservation often does not work for another. Likewise, even within individual reservations themselves, where the food stamp program is accessible for those persons on one end of the reservation (because of reasonable distances to food stores and certification and issuance centers), it may be totally inaccessible to those persons residing on another part of that same reservation.

SECTION 3

Section 3 of the bill amends section 17 of the Act by allowing members of eligible Indian households (under specified conditions) to purchase certain hunting and fishing equipment with their food coupons.

SECTION 4

Section 4 of the bill amends the Act by adding, at the end thereof, a new section 18. New Section 18(a) mandates the Secretary (when requested by the officials governing body of an Indian tribe) to provide for the implementation of separate or dual operation of the food stamp and commodity distribution program(s) upon the request of the official governing bodies of each tribe.

New Section 18(b)(1) permits tribal administration of the food stamp program with assurances of no lapse in services, prompt transition and adequate training to attain successful administration.

New Section 18(b)(2) mandates continued state agency administration (in the absence of a tribal request to administer the food stamp program) according to an agreement entered into between the tribe and the state within which the tribe is located.

New Section 18(c) increases the federal share of administrative costs to facilitate tribal administration and raise the nutritional well-being of the American Indian people in the following three ways: First, the administering agency (i.e., state or tribe) shall receive 100 per cent of the costs necessary to pay for all standard administrative costs. Second, provides for the tribal establishment of non-profit food sales systems (e.g., mobile grocery stores) in areas where food stores are inaccessible due to unreasonably long distances and poor roads. Third, directs the Secretary to promulgate regulations to provide for transportation allowances to Indians who must travel unreasonably long distances to pick up their commodities or food stamps or to purchase food with their food stamps.

Available data on the operation of the federal food programs demonstrate that the situation and needs on Indian reservations vary considerably according to a variety of factors. The intent of this subsection is to provide sufficient flexibility in the type of approaches which are taken to adapt the pro-

grams to the realities of Indian tribal life in the most workable manner possible.

New Section 18(d) directs the Secretary to undertake a comprehensive study to determine whether the food stamp and commodity distribution programs are really meeting the special nutritional needs of Indian people and, if not, to take corrective action to remedy situations where it is determined that the current programs are not providing Indian people with access to nutritionally adequate diets. Such actions might include an increase in the food stamp coupon allotments in Indian areas when food prices are substantially higher than neighboring geographical entities.

SECTION 5

This section amends section 4(a) of the Agriculture and Consumer Information Act of 1973 (P.L. 93-86, 87 Stat. 246 (August 10, 1973)) by extending the authority of the Secretary of Agriculture to continue buying surplus and non-surplus commodities to provide a nutritionally adequate diet to Indians based on their ethnic food preferences.

Typically, Indians subsist on diets high in carbohydrates and fats and low in proteins, vitamins and minerals. Thus, diabetes, obesity and hypertension are common problems for Indian people. Excessive delivery of commodities high in carbohydrates (e.g., corn syrup) tends to aggravate Indian health problems. Hence, commodities provided to Indian people must be nutritionally balanced selections rather than simply surplus farm products.

By Mr. HUMPHREY:

S. 1120. A bill to amend the Rehabilitation Act of 1973 to expand the comprehensive systems approach to treatment of spinal cord injuries, and for other purposes; to the Committee on Human Resources.

SUPPORT FOR SPINAL CORD INJURY CENTERS

Mr. HUMPHREY. Mr. President, more than 125,000 Americans have been paralyzed as a result of spinal cord injuries, and the toll of injured is swelled each year by an additional 8,000 to 10,000 victims.

The costs of care for victims of these injuries are estimated at $2.4 billion annually, much higher than that of other neurologic conditions. This disproportionate cost reflects a number of factors:

The Rehabilitation Services Administration estimates that 80 percent of spinal cord injuries occur in the 15- to 30-year range, many as the result of motor vehicle, sports and industrial accidents, and violence such as gunshot wounds.

Success in extending the life expectancy for spinal cord injured has brought with it increased costs.

A spinal cord injury, particularly to the upper spine, affects most bodily organ systems and requires the intervention of a variety of specialists.

The proportion of quadriplegics has increased in relation to paraplegics, from a 65-35 ratio to at least 50-50. A conservative estimate of the lifetime care of an average quadriplegic is between $325,000 and $400,000.

Along with the staggering economic impact are less quantifiable costs to independence and happiness. This type of injury has proven resistant to rehabilitation, and many victims spend months in hospitals and live out the remainder of their lives in nursing homes. Only a small number achieve self-sufficiency, social adjustment, and satisfactory vocational achievement.

Now we have good reason to believe we can change these discouraging statistics. Progress is being made not only in treating and rehabilitating these patients, but in reducing the high economic cost as well. I want to describe today a program that many of my colleagues have watched and supported from its inception—the demonstration program of model regional systems designed to improve the delivery of services to the spinal cord injured.

The first research grant for this purpose was awarded in June 1970. Since then, RSA has supported 10 additional regional systems with the common objectives of rapid case finding and referral, early rehabilitation, coordination of all community resources, and long-term followup to consolidate and build on rehabilitation gains.

Congress has provided legislative language in section 304(b)(1) of the Rehabilitation Act authorizing the continued development of the model systems. I believe our experience now justifies amending that section to provide the financial commitment and guidelines for an expanded program leading to a nationwide network of effective spinal cord injury services.

SYSTEMS APPROACH

Let me summarize briefly the objectives and experience under the model system approach. The objectives are:

To provide a focus of comprehensive rehabilitation services, from point of injury through acute care to rehabilitation;

To develop and evaluate improved methods and equipment for care and rehabilitation of spinal cord injuries;

To improve treatment methods; and

To mobilize community resources to help the patient to achieve productive integration into his community.

The data developed throughout the system is gathered for analysis by the original model system which has been designated as the National SCI Data Research Center. The trends identified by this analysis show that the systems approach is appropriate, beneficial, and more cost effective than alternatives. Although only the original model system in Phoenix has been collecting data for 5 years, results from the 10 other projects appear to generally confirm the findings.

Preliminary results show:

A reduction in the length of initial hospitalization and rehabilitation from 180 to 240 days, to an average of 103;

An average cost for initial hospitalization and rehabilitation of $13,000, compared to $36,000 for first hospitalization in a nonsystem;

Forty percent of injuries have the potential for some neurological recovery. Improved medical and surgical techniques are increasing functional recovery at a saving of $150,000 per case;

A drop in annual medical costs from $4,000 to $6,000, to less than $1,000, through followup after rehabilitation; and

The vocational rehabilitation rate and successful community adjustment can exceed 75 percent of all surviving SCI cases.

THE NEXT STEP

I propose that we act now to apply this cost-effective knowledge more widely. Currently, established model systems can serve only 750 new referrals a year, a smal percentage of the estimated 8,000 to 10,000 new injuries.

The management and institutional capacity exists to permit the addition of five new systems each year. The legislation that I introduce today would authorize startup funding of $250,000 each for five new centers each year in fiscal years 1978, 1979, and 1980. This is the cost of developing a system, and does not include construction costs, patient care, or clinical personnel.

At the same time, I propose to increase the level of funding for existing systems from $250,000 to $350,000 to allow them to provide technical assistance to developing systems, and to build on their achievements.

This amendment would also increase funds available under section 202 for rehabilitation research, training, engineering, and spinal cord injury research from $29 million to $35 million, with at least $2.5 million specifically earmarked for the model spinal cord injury centers to insure dissemination of research findings, and close working and information exchange relations with the National Institute for Neurological Diseases and Stroke, the Veterans' Administration SCI centers, regional medical programs, and the emergency medical services.

Mr. President, ever-mounting costs of initial hospitalization and lifetime care for spinal injuries plus lost earning capacity and reduced productivity represent billions of dollars each year. A successful program to lessen the severe social and economic costs of spinal cord injuries requires the simultaneous development of research and service delivery.

Spinal cord injuries centers are working. They offer a model for similar systems of care for other chronic or severe physical disabilities. They complement the vital knowledge produced by NINCDS supported research with a system for applying therapeutic advances.

I urge my colleagues to join in this effort to strengthen our Nation's human resources through an effective and efficient system of care for the victims of spinal cord injury.

Mr. President, I ask unanimous consent that the text of my bill be printed at this point in the RECORD, together with a report by Dr. Theodore M. Cole, project director for Minnesota's spinal cord injury center.

There being no objection, the bill and report were ordered to be printed in the RECORD, as follows:

S. 1120

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201(a)(1) of the Rehabilitation Act of 1973 (87 Stat. 355), as amended by Public Law 93-516 (88 Stat. 1617) and Public Law 94-230 (90 Stat. 211), is further amended by—

(1) striking "and for the fiscal years ending September 31, 1977, and September 30,

1978, such sums as the Congress may determine to be necessary.", and substituting "and for the fiscal year ending September 30, 1977, such sums as the Congress may determine to be necessary, and $35,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980."; and

(2) adding at the end thereof the following new sentence: "Of the sums appropriated under this paragraph not less than $2,500,000 shall be available in each succeeding fiscal year for the purpose of carrying out activities under section 202(b)(3).".

SEC. 2. (a) Section 304(a)(1) of the Rehabilitation Act of 1973 (87 Stat. 355), as amended by P.L. 93-516 (88 Stat. 1617) and P.L. 94-230 (90 Stat. 211), is further amended by—

(1) striking "and for the fiscal years ending September 30, 1977, and September 30, 1978, such sums as the Congress may determine to be necessary.", and substituting "and for the fiscal year ending September 30, 1977, such sums as the Congress may determine to be necessary, and $22,350,000 for the fiscal year ending September 30, 1978, $24,100,000 for the fiscal year ending September 30, 1979, and $25,850,000 for the fiscal year ending September 30, 1980,"; and

(2) adding at the end thereof the following new sentence: "Of the sums appropriated under this paragraph not less than $5,100,000 shall be available in the fiscal year ending September 30, 1978, $6,850,000 shall be available in the fiscal year ending September 30, 1979, and $8,600,000 shall be available in the fiscal year ending September 30, 1980 for the purpose of carrying out the activities under subsection (b) of this section, as amended, for funding existing and new spinal cord centers, including $350,000 for funding each existing spinal cord centers, and $250,000 for funding each new spinal cord center.".

(b) Subsection (b) of section 304 of such Act is amended by striking "Projects and demonstrations providing services to individuals with spinal cord injuries shall include provisions to—" and substituting "Not less than 5 regional comprehensive treatment centers shall be established in each of fiscal years 1978, 1979 and 1980 to provide services to individuals with spinal cord injuries; such projects, including existing regional comprehensive treatment centers, shall include provisions to—".

SEC. 3. If the sums appropriated for any fiscal year, under authorizations established by the amendments made by this Act, are not sufficient to pay in full the total amounts which have been provided for, then such amounts shall be reduced ratably. In case additional funds become available for the purposes of the amendments made by this Act, such reduced amounts shall be increased on the same basis that they were reduced.

SPINAL CORD INJURY AND COST ACCOUNTING: A PRELIMINARY REPORT

(By Theodore M. Cole, M.D., professor, Department of Physical Medicine and Rehabilitation, University of Minnesota Medical School)

INTRODUCTION

Spinal cord injury with paralysis almost always elicits feelings of hopelessness and foreboding. The first recorded reference to the injured spinal cord was found in the Edwin Smith Surgical Papyrus,[6] written about 2500-3000 B.C. "Thou shouldst say concerning him, one having a dislocation of the vertebra of his neck while he is unconscious of his two legs and two arms and his urine dribbles, an ailment not to be treated." Almost five millennia later in his novel, "All the King's Men (1946), Robert Penn Warren described the quadriplegic life as one of helplessness, hopelessness and impending death.

World War I greatly added to the number of patients with spinal cord injuries. However, the medical attitude of hopelessness persisted. In his review of the literature, Dick[5] pointed out that until World War II, paraplegic patients were neither able nor encouraged to be independent in self-care. The general attitude of hopelessness led many to become addicted to narcotics and the few that survived did so as pathetic wrecks, dependent and helpless, needing care in homes or hospitals for the chronically sick.

In recent years, a basic change in the approach to spinal cord injury care has begun to emerge. The roots of this change can be in this country and abroad.[9, 2, 14, 4] Several factors contributed to the change in the United States. Most notable among them was the increasing pressure exerted by the consumer of spinal cord health services—the paraplegic or quadriplegic himself. Working through such national organizations as the Paralyzed Veterans of America and the National Paraplegia Foundation, thousands of paralyzed people succeeded in calling attention to some of the elements of acute and rehabilitative care which they believed important. For many these services had made the difference between a successful adjustment to residual disability and a lifetime of medical complications and psychosocial failures. Further, they helped convince the government to undertake research and demonstration projects to test the hypothesis that comprehensive systems rather than fragmented nonsystems of spinal cord injury care yield better outcomes at lower costs. Crisis-oriented care with either strictly medical or vocational objectives came under fire.

Pressures for change were also building from the fiscal intermediaries, private and public. The Liberty Mutual Insurance Company[7] has supported efforts to better understand the problems associated with spinal cord injury. It has also supported research to solve problems through preventive and therapeutic techniques.

Spurred on by Carter[3] and Young and Wilcox,[16] et al.,[15] the Department of Health, Education, and Welfare became interested in encouraging systems of spinal cord care and measuring the cost and outcomes of systematic versus nonsystematic care on a nationwide basis. Carter's figures were sobering. Although the national estimated annual mortality of 1800-3000 cases of spinal cord injury falls well below that of stroke, for example, the annualized estimate of 2.4 billion dollars for spinal cord injury care far outstripped the cost for treatment of the commoner neurological impairments such as stroke, epilepsy, multiple sclerosis and Parkinson's disease. He showed that the estimated medical expenses of an individual case of traumatic paraplegia at age 29.5 years with a normal life expectancy of 41.4 years was $65,089. The economic cost of traumatic paraplegia over a lifetime was in excess of $300,000.

The impact of the high cost is compounded when one considers that even after it is paid, neither the patient nor society is benefited by a cure. The disability persists and in the case of the typical young male patient with a high spinal cord injury, virtualy every organ system in the body remains affected for a lifetime. Clearly, a reexamination of spinal cord injury care was in order.

SPINAL CORD INJURY CENTERS

Under support from the Rehabilitation Services Administration, Department of Health, Education and Welfare, a national network of Spinal Cord Injury Centers is now established to demonstrate, within defined regions in the country, a multi-discipline system of comprehensive services extending from the time of detection and evacuation of the injured through acute care and rehabilitation management to community and job placement and long-term followup.

There are 11 systems, all charged with providing integrated services from the surgical and physiatric disciplines, acute and rehabilitation nursing, vocational counseling, psychology, physical therapy, occupational therapy, social service and others as needed.

TABLE 1.—*Consortium of spinal cord injury centers*

Alabama: University of Alabama, Birmingham, Alabama.

Arizona: Good Samaritan Hospital, Phoenix, Arizona.

California: Santa Clara Valley Medical Center, San Jose, California.

Colorado: Craig Rehabilitation Center, Englewood, Colorado.

Illinois: Northwestern Memorial Hospital, Rehabilitation Institute of Chicago, Chicago, Illinois.

Massachusetts: University Hospital, Boston University Medical Center, Boston, Massachusetts.

Minnesota: University of Minnesota Hospitals, Minneapolis, Minnesota.

New York: Institute of Rehabilitation Medicine, New York, New York.

Texas: Texas Institute of Rehabilitation and Research, Houston, Texas.

Virginia: Woodrow Wilson Rehabilitation Center, Fishersville, Virginia.

Washington: University of Washington Hospital, Seattle, Washington.

Each system must be able to provide detection and evacuation services which can travel to the location of the injury and transport the patient to a medical facility for emergency evaluation. Whether the patient is transported to a local facility or a regional center depends upon his medical status and ability to tolerate travel. It is assumed that well-trained emergency medical services personnel are available to make the transfer of the patient as safe as possible.

Following emergency evaluation, he will be jointly evaluated by specialists in neurosurgery, orthopedics, urology and rehabilitation who will seek to stabilize the medical-surgical problems. During this period of consultation and communication, other members of the spinal cord injury team will also see the family and the patient as appropriate. They will set into motion a tentative plan for long-range goals and prepare the rehabilitation staff and the patient to work with each other. Issues which may not become paramount until some time in the future will be anticipated even at this early date and resources will be identified for later use.

Following medical and surgical stabilization, intensive rehabilitation commences. The focus of care is less and less on medical need and more and more on self-care, mobility, psychosocial and vocational-educational issues. The entire rehabilitation process can be regarded as an educational effort directed by a physician, utilizing all members of the spinal cord injury team and aimed at training the patient and his family to cope effectively with disability in an environment of maximum independence.

Discharge from the hospital, whether to an independent or supportive living situation, does not end the spinal cord team's involvement. Since the disability is often permanent, so too is the need for followup. Paraplegics and quadriplegics are not rehabilitated in the sense that they achieve an optimum level of function and stay there. The nature of their disability places them at an increased risk of medical, psychological, social or vocational deterioration, making desirable lifelong enlightened followup.

NEUROLOGICAL LEVEL AND FUNCTION

A patient's outcome will depend in large measure upon the level at which the spinal cord is injured. Most clinicians [11, 10] recognize

---

Footnotes at end of article.

about 7 critical levels of spinal cord injury. Beginning with the 4th cervical segment, the addition of each successive critical segment adds an important increment to the muscle power of the patient. The quadriplegic who retains the 4th cervical segment will continue to have function in the sternomastoids, upper cervical paraspinal muscles and the trapezius muscles. Voluntary use of the arms, trunk and lower extremities are absent but he may benefit from training in the use of extremity power devices to achieve some useful function of the arms. He can control his head position which in turn assists in balancing the trunk while sitting in the wheelchair. Many such patients find an adaptive tool held in the mouth for typing, writing, page turning, etc. to be more useful than adaptive devices attached to the denervated arms.

When the 5th cervical segment is preserved, the deltoid and biceps muscles continue to function as do the external rotators of the shoulder. These muscles usually remain weak, however, and frequently require external assistance in order to accomplish useful work. He will lack elbow, forearm and hand control, making it necessary to continue use of assistive devices if he is to engage in useful upper extremity activity. He may be able to do some self-feeding and grooming and to assist in dressing activities. However, he will be unable to manually push his wheelchair and will require a motorized wheelchair. He will also be unable to assist in transferring himself to or from chairs, bed and toilets.

When the 6th cervical segment is retained, the patient may gain some voluntary strength in the shoulder depressors, the scapula stabilizers and shoulder adductors, internal rotators and radial wrist extensors. These muscles enhance the ability to perform activities of daily living. The wrist extensor mechanism is especially important. It can be harnessed through a special tenodesis splint which drives the fingers into flexion.

He is more capable of pushing his wheelchair if the wheels have adaptive devices to allow his hands to grasp the rims. With training he can often learn to lean on his arms and periodically shift weight off his buttocks thus increasing his sitting tolerance to 6–8 hours. He can be more useful in dressing himself and assisting others in transferring him from bed to chair, etc. Some patients with 6th cervical segment function intact are able to safely operate an automobile with special adaptive equipment.

When the 7th cervical segment is retained, the patient gains some voluntary control over his elbow extensors. Wrist and finger extension may become stronger and he may gain some use of his finger flexors. He is now able to do pushups on the arms of his wheelchair and therefore his sitting tolerance can be expected to increase to the limit of his overall physical indurance. Most importantly hand fuction is sufficient to allow him to grasp and release voluntarily. This adds important control over activities of daily living as well as greatly increases his potential for vocational activity. He is thus independent in his wheelchair and should need no motorized assistance. With training he can harness his hand control to irrigate his catheter or stimulate his rectum for bowel movement.

When the lesion is at the upper thoracic level, the patient has full control of his upper extremities and is therefore more properly called paraplegic than quadriplegic. He is completely independent in his wheelchair. With motivation and skills, he is able to work full time and can live independently in a community wtihout major architectural barriers to his wheelchair. He is independent in managing his urinary drainage apparatus and in inserting rectal suppositories or a gloved finger for stool extraction.

The next critical level is the lower thoracic or upper lumbar segments. This paraplegic has full abdominal, upper back and respiratory control. He can do all the activities listed above and more. Because of his increased trunk innervation, his sitting balance is improved, allowing him greater capabilities for wheelchair operation, athletics and other skills.

When the lower lumbar spinal cord is transected, the patient may retain the use of his hip flexors and knee extensors. However, voluntary control over hip extensors and abductors may be lacking. He may be able to walk with proper bracing and training but the energy required for functional ambulation is so high as to make it necessary for many such patients to retain the use of a wheelchair on certain occasions.

THE DATA COLLECTION SYSTEM

The spinal cord centers listed earlier are cooperating in a broad data collection system. The information they collect is biographical, medical, psycho-social, sexual and vocational-educational. Information is also collected relating to mobility and self-care. The data items themselves have been selected on the basis of collectability, reliability, and meaningfulness.

One set of data reflects the time interval between the onset of spinal cord injury and discharge from comprehensive rehabilitation. Another set is collected on each anniversary of the spinal cord injury. The information is gathered from the spinal cord injury system hospital and from all other hospitals and health care professionals from whom the patient has received care. Additional information is gathered from community agencies and from the patient himself. Examples of issues being addressed are: (1) costs of spinal cord injury, both human and economic, (2) preventative maintenance services, (3) efficiency of a system approach to treatment. In addition, similar data will be gathered on approximately 500 patients from other nonsystem hospitals, rehabilitation centers and insurance companies. This information will serve as a comparison to the data collected from system hospitals. Cost effectiveness conclusions can then be drawn.

The system hospitals are also attempting to separate system from nonsystem patients. System patients are defined as those who receive the full impact of systematized care from the time of the traumatic event and remain in the system throughout followup. Nonsystem patients are those who enter the system hospital at some time other than immediately after the traumatic event, who leave the system before completion of their rehabilitation or who elect not to be followed by the system hospital.

HOSPITALIZATION DATA

Only preliminary information is now available from this collaborative study. Tabulation included in the remainder of this report comes from the Southwest Regional System for Treatment of Spinal Injury and the National Spinal Cord Injury Data Research Center, Phoenix, Arizona,[8] the Midwest Regional Spinal Cord Injury Care System, Northwestern University, Chicago, Illinois,[13] and the Regional Spinal Cord Injury System in Minneapolis, Minnesota, University of Minnesota.

The mean age of onset of spinal cord injury is 31 years. Some centers are experiencing a bimodal curve with a peak in the 16–25 year age group and another in the 31–35 year age group. At Northwestern Memorial Hospital in Chicago where the Illinois State Trauma System has a highly developed subsystem for evacuating patients, 65% of the patients were admitted less than 9 hours after the injury in 1975. Twenty percent were admitted in the first week after injury and the remaining 15% were admitted less than one month after injury.

Footnotes at end of article.

The percentage of quadriplegic and paraplegic patients varies from one center to another. In 1970–71 the Southwest Regional System's inpatients were 27.8% quadriplegics and 72.8% paraplegics. In 1975 at Northwestern Memorial Hospital, 53% of the patients were quadriplegics and 47% were paraplegics. In the first 10 months of 1976 at the University of Minnesota, 59% of the spinal cord injured patients were quadriplegics and 41% were paraplegics.

The percentage of patients who die in the first few weeks varies from center to center and seems to fall as each center gains more experience. In 1971, Phoenix reported a 10% early death rate. Northwestern has experienced a 7% early death rate overall since 1972, and for the first 10 months of 1976, Minnesota reported a 2% early death rate.

The length of stay in the hospital following spinal cord injury has dropped dramatically in the last 25 years. In 1950, it was common for a patient to be hospitalized one year after injury. By 1960, 240 days was typical and by 1970, 150 days. For the first 10 months of this year, the University of Minnesota has found that system quadriplegics remain in the hospital an average of 54 days and nonsystem quadriplegics an average of 94 days. System paraplegics remain in the hospital 52 days and nonsystem paraplegics 84 days. Although these data suggest continued progress toward shortening the period of hospitalization from injury to home, a wait-and-see attitude is necessary to determine if patients discharged in such a short period fare well during the subsequent years of follow up. Certainly this preliminary data suggests that the average period of time from injury to home may be shortened to perhaps 3–4 months. However, long term adjustment, family education, bladder training, etc., cannot be accomplished in all patients in such a short time. Subsequent short hospitalizations may be preferable for achieving these goals and at the same time allowing time away from the hospital for integration of the need to learn with available services for training. It therefore appears that not only are we learning how to shorten the duration of hospitalization but also we are shortening the duration of hospitalization for system patients more than we are for those who do not receive systematized care.

The complications of spinal cord injury are myriad. Among the most common are skin pressure ulcers and urinary tract infections. Over the years 1973, 74 and 75 at the Midwest Regional Spinal Cord Injury Care System in Chicago, a difference was found between the prevalence of decubitus ulcers in system patients as compared to nonsystem patients. Twenty-nine percent of system patients developed decubitus ulcers whereas 56% of nonsystem patients developed them. With regard to urinary tract infections, virtually all patients treated at Northwestern Memorial Hospital in 1975 developed urinary tract infections, 92% of the system patients and 88% of the nonsystem patients. Considering the expense of these complications, their reduction would greatly reduce the overall cost and improve the health of patients.

Measures of physical function are made during hospitalization and in the followup period as well. The Barthel index measures independence in individual subtasks of mobility and activities of daily living. The maximum score is 100 units for the patient who is entirely independent in these tasks. At Northwestern Memorial Hospital in 1975, the average spinal cord injured patient was admitted with a score of 26. At discharge his function had increased to 58 units and at the end of one year post-injury it was 71 units for 98 patients. Although the system patients were 5 units higher at discharge and 2 units higher at one year fol-

lowup than the nonsystem patients, these differences are probably not significant.

VOCATIONAL-EDUCATION PLACEMENT DATA

Post discharge vocational-education placement of the spinal cord injured patient has been of great concern to society which ultimately must accept the cost of reduced productivity. In 1975, 200 vocationally-aged eligible spinal cord injured patients came into the vocational rehabilitation unit of the spinal cord injury center at Northwestern Memorial Hospital. Of these, 134 cases have been closed with 67% being placed, but not all gainfully. Of those placed, 29% were gainfully placed and went to work; 59% to college, high school or vocational training programs; 10% are functioning homemakers and 2% in sheltered workshops. The number of persons gainfully placed increases with the time following discharge. The Midwest Regional Spinal Cord Injury System followed its patients from earlier years and concluded that maximum placement level is not reached even at 2–3 years after injury. By the fourth year following injury, 67% of the patients were gainfully placed. By the third year 46% and in the first year 21%. This pattern implies a long-term placement process and shows the benefits of aggressive vocational followup.

KIDNEY FOLLOWUP DATA

There is an almost infinite number of parameters which one could analyze in the late followup of the spinal cord injured patients. This report will focus on only a few. One of the major medical concerns in the long-term management of spinal man is renal function. Price [15] has conducted an ongoing project to study renal function in patients with spinal cord injury. In the 8th year of her 10-year continuing study, she reported that 78% of patients had good function, 13% mild deterioration and only 4% moderate deterioration. Five percent had severe deterioration of kidney function. Her studies are based upon glomerular filtration rate, renal plasma flow and maximal tubular excretory capacity using inulin and sodium hippurate clearances and tubular saturation with PAH. This data stands in sharp contrast to the expectations of only 30 years ago when renal deterioration was thought to be the primary cause for late demise in spinal injured people. She found that the duration of the spinal cord lesion appeared to have little influence on renal deterioration. She also found bladder drainage hard to assess since all patients had at some time or another used an indwelling catheter and had accompanying bacteriuria. Factors which did appear to be predictive in renal function assessment were vesicoureteral reflux demonstrated by cystoureterography, kidney stones, blunting of the calycaeal pattern as observed by intravenous pyelography and the development of multiple decubiti.

SOCIAL ADJUSTMENT DATA

The lightening bolt-like change in the body's motor and sensory function following spinal cord injury is so devastating that most patients must invest a great deal of energy and receive much assistance in achieving a satisfactory adjustment for themselves and their families. An insight into the need for counseling is seen by reviewing some of the outcomes that a representative group of adults with paralysis can anticipate. The following are data selected from studies by Athelstan, et al,[16] at the Research and Training Center, University of Minnesota and continued at the Regional Spinal Cord Injury Center. Two hundred and fifty-six patients from 2–22 years post-injury responded to questionnaires to provide data on their status. The age and sex distribution and levels of injury were representative for a typical population of spinal injured adults. Approximately 4 out of 5 were males and the modal age group was below 30 years. Approximately half were paraplegics and the other half quadriplegics. An examination of these data provides a realistic framework for the future following discharge from the hospital. These expectations for the future in turn can serve as guidelines for the physician who is answering the patient's questions about the future. The counseling process is, of course, the bridge between the present, the patient's expectations and realities of life in the future.

Social adjustment can be understood in part by examining marital and dating status, living arrangements and frequency of getting out of the home. Figure 1 shows that less than half of this group of former patients is married. Slightly more of them date members of the opposite sex with slightly over a third dating with any frequency. With respect to living arrangements, 18% of them are living either in a nursing home or receiving care from an attendant. Thirty-seven percent are living with a spouse while 25% have returned to their parent's home. Only 12% are living alone. A measure of social adjustment as opposed to social withdrawal is the frequency with which the former patient gets out of the home. Almost ⅔ of them are seen to get out of the home at least once a week which suggests that they are continuing to interact socially with their environment. One third are getting out of their home rarely or less than once a week and it is this group who are probably experiencing moderate to severe social withdrawal.

Athelstan found that only 44% of the women and 39% of the men in his group reported themselves as working. In Figure 3 the annual income and reasons given by the nonworkers for not working are analyzed. Two thirds of the former patients are earning below a level of income which would be considered adequate for the average person. However, approximately 16% are earning greater than $10,000 a year. Of those who do not work, physical limitations is the reason given by 35% of them. This coupled with 11% who give medical problems as reasons for not working suggest that almost half of the unemployed former patients attribute their reason for not working to the spinal cord injury.

Lastly, an overall rating of patient satisfaction is seen in Figure 4. Not surprising, the patient's financial situation is the least satisfactory aspect of his life following spinal cord injury. Also interestingly, sex life is listed as the second most dissatisfied area studied. Both of these measures fell below the neutral point in the satisfaction-dissatisfaction scale.

COST DATA

Ultimately, the cost of all benefits, complications and treatments must be measured to determine cost effectiveness. The National Spinal Cord Injury Data Research Center in Phoenix, Arizona, has been collecting and storing data submitted by the consortium of 11 spinal cord injury systems. Although this data is only in its earliest stages of assembly, a preliminary look at it is of interest.

Table 2 breaks out the cost data on a combined population of paraplegics and quadriplegics for three variables during initial spinal cord injury system hospitalization and seven variables during a typical anniversary year after spinal cord injury. The data represents information gathered on system patients only and compares the combined experience of the consortium of 11 centers with the experience of the Minnesota Center alone. The Minnesota data is for the first anniversary year which is an average of ten months. It should be noted that median figures, shown in 500 dollar increments, rather than mean figures are used. This was done because the mean value was often inflated with high costs sustained by a comparatively few number of patients. Only actual dollar figures were used. No estimates were accepted.

It can be seen that on a national average, the combined median cost of the three variables listed during the initial spinal cord injury hospitalization is $16,750. Additional expenses incurred over the first anniversary year add $3500 to this figure giving a total of $20,250 as a median cost for the year following spinal cord injury. The Minnesota experience is only slightly different. The combined median cost of the three variables during the initial spinal cord injury system is $13,250. To this is added $4000 of cost incurred during the first anniversary year yielding a grand total of $17,250. These costs might be anticipated for the average paraplegic-quadriplegic over the course of one year after spinal cord injury.

THE SURGEON AS FACILITATOR

The neurosurgeon or orthopedic surgeon who has first contact with newly spinal cord injury patients is in a unique position to initiate the complex interactions of the comprehensive spinal cord injury treatment program. He is also in a position to help the patient and patient's family to understand and begin to accept the fact of the spinal cord injury and the need to look beyond the immediate medical and surgical problems to a lifetime of education and training which are necessary to cope with the chronic disability.

The surgeon can aid the patient by projecting a positive yet realistic attitude towards the disability. To the extent that the surgeon deals directly with the sequelae of spinal cord injury, the patient is positively encouraged to begin the process of self-reassessment which will lead to the necessary changes. If the surgeon avoids a direct and informative approach with the patient, no matter how sensitive the subject area, the patient may be reinforced to begin construction of defense barriers to protect himself from the psychological impact of the injury. Later, removal of these barriers by the rehabilitation staff often requires extensive work. Sometimes the barriers cannot be removed. It has been our experience that patients benefit from being fully informed about their neurological prognosis and the medical and surgical procedures which may be necessary. They also benefit from being encouraged to deal with the disability forthrightly with their own families.

The surgeon is usually in charge of the patient immediately after injury. He can also benefit the patient by making it possible for the multi-disciplined spinal cord injury team to have its effect. This means that most spinal cord injured patients should be seen immediately by physicians from other specialities such as rehabilitation medicine, urological surgery and when necessary, respiratory medicine, general surgery and internal medicine. The patient should also be evaluated immediately by physical and occupational therapists, a counseling psychologist, a social worker and a vocational rehabilitation counselor. These people bring to the patient the foundations for a broad education which will be necessary for an optimum outcome. Provisions must also be made for these professionals to interact with other members of the spinal cord injury team including the physicians. In this way, a uniform presentation is made to the patient who receives consistent messages. Not to do this is to risk individual interpretations by each member of the team with the patient being caught in the middle of mixed and sometimes conflicting information. All of this should be started as soon as the patient is medically and surgically stable.

Later, when the patient leaves the acute surgical area and goes on to rehabilitation,

Footnotes at end of article.

it is vital that the surgeon continue to follow him. This provides continuity of physician services which the patient needs. It also assures the rehabilitation team of the continued expert opinion of the surgeon in the after care of fracture and spinal instability.

The surgeon will be responsible during the time when decisions are made which deal with life and death and partial or complete recovery of neurological function. However, this period in the patient's evolution as a paraplegic or quadriplegic is extremely short when compared with the lifelong process of adjustment and education. The surgeon does well to remember that soon the major therapeutic mode which will benefit the patient is an educational one and not a medical or surgical one. The timely turning over of responsibilities for care to those whose skills and interests lie in this area is one of the hallmarks of the complete surgeon.

TABLE 2.—SELECTED COST DATA ON SYSTEM PARAPLEGIC AND QUADRIPLEGIC PATIENTS

Variable	11 centers combined		Minnesota only	
	Number of patients	Median cost (dollars)	Number of patients	Median cost (dollars)
Initial SCI system hospitalization:				
Hospitalization expense	222	14,750	36	11,750
Physician fees	109	1,250	33	1,250
Equipment expense	191	750	38	250
Subtotal		16,750		13,250
Anniversary year:				
Hospitalization expense	81	500	12	1,000
Physician fees	42	500	12	500
Outpatient therapies	47	500	12	500
Outpatient medications and supplies	35	500	11	500
Attendant care expenses	76	500	11	500
Custodial care expenses	77	500	12	500
Vocational rehabilitation expenses	59	500	12	500
Subtotal		3,500		4,000
Total		20,250		17,250

By Mr. THURMOND (for himself, Mr. HARRY F. BYRD, JR., Mr. DOMENICI, Mr. EASTLAND, Mr. GARN, Mr. GOLDWATER, Mr. HELMS, Mr. LAXALT, and Mr. YOUNG):

S. 1122. A bill to amend the Occupational Safety and Health Act of 1970 to insure equal protection of the laws for small business and to provide that any employer who successfully contests a citation or penalty shall be awarded a reasonable attorney's fee and other reasonable litigation costs; to the Committee on Human Resources.

Mr. THURMOND. Mr. President, I am today introducing legislation to provide that any employer who successfully contests a citation or penalty under the Occupational Safety and Health Act of 1970—OSHA—shall be awarded a reasonable attorney's fee and other reasonable litigation costs.

As I watch small business struggle for its survival, it is clear to me that Congress has failed miserably in the effort to come to grips with overregulation and government power.

While OSHA embodies the worthy goal of improved health and safety in industry, it has also served as an excellent example of government excess in the regulatory field.

The OSHA laws are 31 pages long and there are over 800 pages of regulations. OSHA laws are complex, and small businessmen have found OSHA compliance procedures particularly burdensome. Additionally, the heavy hand of OSHA enforcement has caused economic hardship for many small businessmen.

Unfortunately, adequate communication is unavailable for small industry to consult with OSHA compliance officers for advice and consultation without being subject to penalty. Uncertainty exists about employer obligations and standards. Inconsistent treatment by different compliance officers, limited access to safety and health advisory services, and lack of knowledge about how to contest citations have added to the burden. In many instances, small employers are still unaware of OSHA rules and regulations, and significant doubt exists as to the effort OSHA has made to supply employers with precise information about employer responsibility.

To compound these problems, a legal and policy interpretation by the Department precludes Federal onsite consultation procedures.

In addition to the problems of bureaucratic administration, small businessmen have been at a significant disadvantage in their efforts to contest citations and pay for other litigation costs involving OSHA. Expenses involved in contesting an OSHA citation amount to hundreds of dollars, and in many cases, small businessmen have had to forgo litigation because of the cost involved.

Mr. President, I am, therefore, introducing legislation to aid small businessmen in their efforts to get a fair deal from the Federal bureaucracy in OSHA legal actions. My bill will amend the OSHA laws to provide that employers be reimbursed for reasonable attorney's fees and other litigation costs when they successfully contest OSHA actions which have been brought against them.

Large corporations have no problems in financing their legal services. It is the small businessman, who operates with great overhead, who has suffered most in assuring that his legal rights are protected. I am hopeful that this legislation will encourage small businessmen to stand up for their rights when they feel they have been jeopardized by the Federal bureauracy. These attorney's fees will not be available where employers contest an OSHA citation unsuccessfully. Where there is no legitimate case, there would be little reason for employers to contest a citation since they inevitably will have to bear the litigation costs.

I believe this is a fair approach. It should enable small businessmen to protect their legal rights. I hope it will receive favorable consideration in this Congress.

I am pleased that Senators BYRD of Virginia, YOUNG, HELMS, GARN, GOLDWATER, DOMENICI, LAXALT, and EASTLAND have joined me in sponsoring this important legislation.

Mr. President, I send this bill to the desk so it can be appropriately referred, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1122

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 10(c) of the Occupational Safety and Health Act of 1970 is amended by inserting immediately after the second sentence thereof the following new sentence: "In any case where the Secretary's citation or proposed penalty is vacated, such order shall include an assessment against the United States of a reasonable attorney's fee and other reasonable litigation costs in connection with contesting the citation or proposed penalty, which shall be paid to the employer contesting the citation or proposed penalty.".

(b) The first sentence of section 11(a) of such Act is amended by inserting immediately after "section 10" the following: ", or any employer seeking enforcement of an order

of the Commission issued under such subsection for assessment against the United States of attorney's fees and other litigation costs,", by inserting "or enforcement, as the case may be," immediately after "review", and by inserting immediately before the period "or enforced".

(c) Section 11(a) of such Act is amended by immediately after the third sentence the following: "In any case in which an order affirming or modifying a citation or proposed penalty is set aside by the court, such decree shall include an assessment against the United States of a reasonable attorney's fee and other reasonable litigation costs in connection with contesting the citation or proposed penalty and seeking review of such order, which shall be paid to the employer contesting the citation or proposed penalty and seeking review of such order.".

(d) Section 11 of such Act is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding section 2408 of title 28, United States Code, costs assessed against the United States under subsection (a) or under section 10(c) shall be paid from funds appropriated under section 33.".

By Mr. NUNN:

S. 1123. A bill to amend the Social Security Act to authorize the issuance of regulations for section 459, and for other purposes; to the Committee on Finance.

CHILD SUPPORT PROGRAM

Mr. NUNN. Mr. President, today I am introducing legislation to amend title IV–D of the Social Security Act relating to the child support program which was established in Public Law 93–647. With a few modifications, these amendments passed the Senate during the 94th Congress; however, they did not receive final congressional approval.

The Federal child support program is based on the belief that all children have the right to receive support from their fathers. This law has been on the books for only 2 years and full implementation has been slow; however, thousands of children have already benefited from the child support collected by this program and the taxpayers have already received some relief through the reduction of the welfare rolls.

Data is still incomplete on the first full year of operation of the child support program; however, available information shows that 23,000 families left the AFDC rolls as a result of child support collections in the first three quarters of fiscal year 1976. The majority of these were in six States, therefore, indicating enormous potential for the program when other States have their programs fully implemented. Other statistics for this period show that support was collected for 325,000 families and 106,000 absent parents were located.

The child support enforcement program became operational on August 1, 1975.

The total reported AFDC child support collections was $208 million for fiscal year 1976 and $76 million for the transitional quarter, a total of $284 million for the period. This amounts to a monthly average of $20.3 million for the 14 months. These reported AFDC collections are about $80 million less than what the States actually received in child support collections primarily due to delayed reporting by California and to support payments made directly to these families. The States also reported collections of $383 million for children not on welfare during this 14-month period, an average of $27 million a month.

The administrative costs for the Federal, State, and local agencies for this period was $178 million.

These figures do not show the savings which result from families having been completely removed from dependency on AFDC or not needing to apply for AFDC as a result of the child support program.

The estimated AFDC collections for fiscal year 1977 amount to $414 million at a cost of $235 million. In fiscal year 1978 the States expect to collect $525 million for AFDC child support at a cost of $227 million.

In my view, these figures are evidence that this program is beginning to work as Congress intended. The intent of these amendments that I am introducing today will be to clarify the garnishment provisions, to provide for administrative improvements and to aid in the evaluation of the program. I feel that these amendments will only add to the efficiency and effectiveness of the program.

Briefly, these amendments will accomplish the following:

First. A new section is added to title IV–D to authorize the issuance of garnishment regulations for the executive, legislative, and judicial branches. This title is also clarified to include employees of the District of Columbia under the garnishment provisions. It also establishes reasonable limits on the amount that can be garnished from a person's wages so that an individual, and his second family if there is one, will not be forced into financial ruin.

Second. Bonding will be required of State and local employees who handle collection or accounting of child support payments. The accounting and collecting procedures must also be handled by different individuals.

Third. The incentive payment to political subdivisions which collect child support for another governmental unit is simplified to a standard 15 percent of the amount retained by the governmental unit where the family lives. This should relieve administrative complications as well as encourage governmental units to continue to pursue older cases.

Fourth. The research and demonstration projects authorized under section 1115 of the Social Security Act are extended to include the child support program. These pilot projects should facilitate the development of more efficient and effective child support programs.

Fifth. The annual reporting requirements are amended to specify the kind of information that Congress needs from HEW to properly oversee and amend the program when necessary.

Sixth. A provision is also included to allow the State of Georgia time to resolve a problem regarding the treatment of child support collections for the purpose of reimbursement.

These amendments, which have only been slightly modified, received Senate approval during the 94th Congress. I hope that the Senate and the House will act expeditiously on these amendments so that needed clarifications and improvements can be enacted into law.

Mr. President, I ask unanimous consent that this bill and general explanation of its provisions be printed in the RECORD.

There being no objection, the bill and explanation were ordered to be printed in the RECORD, as follows:

S. 1123

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CLARIFICATION OF GARNISHMENT PROVISIONS

SECTION 1. (a) Section 459 of the Social Security Act is amended—

(1) by striking out "(including any agency or instrumentality thereof and any wholly owned Federal corporation)" and inserting in lieu thereof "or the District of Columbia (including any agency, subdivision, or instrumentality thereof)"; and

(2) by inserting "or the District of Columbia" immediately after "United States" where it appears the second time.

(b) Section 459 of such Act is further amended—

(1) by inserting "(a)" immediately after "SEC. 459.", and

(2) by adding at the end thereof the following new subsections:

"(b) Service of legal process brought for the enforcement of an individual's obligation to provide child support or make alimony payments shall be accomplished by certified or registered mail, return receipt requested, or by personal service, upon the appropriate agent designated for receipt of such service of process pursuant to regulations promulgated pursuant to section 461 (or, if no agent has been designated for the governmental entity having payment responsibility for the moneys involved, then upon the head of such governmental entity). Such process shall be accompanied by sufficient data to permit prompt identification of the individual and the moneys involved.

"(c) No Federal employee whose duties include responding to interrogatories pursuant to requirements imposed by section 461(b)(3) shall be subject under any law to any disciplinary action or civil or criminal liability or penalty for, or on account of, any disclosure of information made by him in connection with the carrying out of any of his duties which pertain (directly or indirectly) to the answering of any such interrogatory.

"(d) Whenever any person, who is designated by law or regulation to accept service of process to which the United States is subject under this section, is effectively served with any such process or with interrogatories relating to an individual's child support or alimony payment obligations, such person shall respond thereto within thirty days (or within such longer period as may be prescribed by applicable State law) after the date effective service thereof is made, and shall, as soon as possible but not later than fifteen days after the date effective service is so made of any such process, send written notice that such process has been so served (together with a copy thereof) to the individual whose moneys are affected thereby at his duty station or last-known home address.

"(e) Governmental entities affected by legal processes served for the enforcement of an individual's child support or alimony payment obligations shall not be required to vary their normal pay and disbursement cycles in order to comply with any such legal process.

"(f) Neither the United States, any dis-

bursing officer, nor governmental entity shall be liable with respect to any payment made from moneys due or payable from the United States to any individual pursuant to legal process regular on its face, if such payment is made in accordance with this section and the regulations issued to carry out this section.".

(c) Part D of title IV of such Act is further amended by adding at the end thereof the following new section:

"REGULATIONS PERTAINING TO GARNISHMENTS

"SEC. 461. (a) Authority to promulgate regulations for the implementation of the provisions of section 459 shall, insofar as the provisions of such section are applicable to moneys due from (or payable by)—

"(1) the executive branch of the Government (including in such branch, for the purposes of this subsection, the territories and possessions of the United States, the United States Postal Service, the Postal Rate Commission, any wholly owned Federal Corporation created by an Act of Congress, and the government of the District of Columbia), be vested in the President (or his designee),

"(2) the legislative branch of the government, be vested jointly in the President pro tempore of the Senate and the Speaker of the House of Representatives (or their designees), and

"(3) the judicial branch of the Government, be vested in the Chief Justice of the United States (or his designee).

"(b) Regulations promulgated pursuant to this section shall—

"(1) in the case of those promulgated by the executive branch of the Government, include a requirement that the head of each agency thereof shall cause to be published, in the appendix of the regulations so promulgated, (A) his designation of an agent or agents to accept service of process, identified by title of position, mailing address, and telephone number, and B) an indication of the data reasonably required in order for the agency promptly to identify the individual with respect to whose moneys the legal process is brought,

"(2) in the case of regulations promulgated for the legislative and judicial branches of the Government set forth, in the appendix to the regualtions so promulgated, (A) the name, position, address, and telephone number of the agent or agents who have been designated for service of process, and (B) an indication of the data reasonably required in order for such entity promptly to identify the individual with respect to whose moneys the legal process is brought,

"(3) provide that (A) in the case of regulations promulgated by the executive branch of the Government, that each head of a governmental entity (or his designee) shall respond to relevant interrogatories, if authorized by the law of the State in which legal process will issue, prior to formal issuance of such process, upon a showing of the applicant's entitlement to child support or alimony payments, and (B) in the case of regulations promulgated for the legislative and judicial branches of the Government, or the person or persons designated as agents for service of process in accordance with paragraph (2) shall respond to relevant interrogatories if authorized by the law of the State in which legal process will issue, prior to formal issuance of legal process, upon a showing of the applicant's entitlement to child support or alimony payments.

"(c) In the event that a governmental entity, which is authorized under this section or regulations issued to carry out this section to accept service of process, pursuant to the provisions of subsection (a), is served with more than one legal process with respect to the same moneys due or payable to any individual, then such moneys shall be available to satisfy such processes on a first-come first-served basis, with any such process being satisfied out of such moneys as remain after the satisfaction of all such processes which have been previously served.

(d) Part D of title IV of such Act is further amended by adding after section 461 (as added by subsection (c) of this section) the following new section:

"DEFINITIONS

"SEC. 462. For purposes of section 459—

"(a) The term 'United States' means the Federal Government of the United States, consisting of the legislative branch, the judicial branch, and the executive branch thereof, and each and every department, agency, or instrumentality of any such branch, including the United States Postal Service, the Postal Rate Commission, any wholly owned Federal coropration created by an Act of Congress, any office, commission, bureau, or other administrative subdivision or creature thereof, and the governments of the territories and possessions of the United States.

"(b) The term 'child support', when used in reference to the legal obligations of an individual to provide such support, means periodic payments of funds for the support and maintenance of a child or children with respect to which such individual has such an obligation, and (subject to and in accordance with State law) includes but is not limited to, payments to provide for health care, education, recreation, clothing, or to meet other specific needs of such a child or children; such term also includes attorney's fees, interest, and court costs, when and to the extent that the same are expressly made recoverable as such pursuant to a decree, order, or judgment issued in accordance with applicable State law by a court of competent jurisdiction.

"(c) The term 'alimony', when used in reference to the legal obligations of an individual to provide the same, means periodic payments of funds for the support and maintenance of the spouse (or former spouse) of such individual, and (subject to and in accordance with State law) includes but is not limited to, separate maintenance, alimony pendente life, maintenance, and spousal support; such term also includes attorney's fees, interest, and court costs when and to the extent that the same are expressly made recoverable as such pursuant to a decree, order, or judgment issued in accordance with applicable State law by a court competent jurisdiction. Such term does not include any payment or transfer of property or its value by an individual to his spouse or former spouse in compliance with any community property settlement, equitable distribution of property, or other division of property between spouses or former spouses.

"(d) The term 'private person' means a person who does not have sovereign or other special immunity or privilege which causes such person not to be subject to legal process.

"(e) The term 'legal process', when used in the context of section 459, means any writ, order, summons, or other similar process in the nature of garnishment, which—

"(1) is issued by (A) a court of competent jurisdiction within any State, territory, or possession of the United States, (B) a court of competent jurisdiction in any foreign country with which the United States has entered into an agreement which requires the United States to honor such process, or (C) an authorized official pursuant to an order of such a court of competent jurisdiction or pursuant to State or local law, and

"(2) is directed to, and the purpose of which is to compel, a governmental entity, which holds moneys which are otherwise payable to an individual, to make a payment from such moneys to another party in order to satisfy a legal obligation of such individual to provide child support or make alimony payments.

"(f) Entitlement of an individual to any money shall be deemed to be 'based upon remuneration for employment', if such money consists of—

"(1) compensation paid or payable for personal services of such individual, whether such compensation is denominated as wages, salary, commission, bonus, pay, or otherwise, and includes but is not limited to, severance pay, sick pay, and incentive pay, but does not include awards for making suggestions, or

"(2) periodic benefits (as defined in section 228(h)(3) of this Act) or other payments to such individual under the insurance system established by title II of this Act or any other system or fund established by the United States (as defined in subsection (a)) which provides for the payment of pensions, retirement or retired pay, annuities, dependents or survivors' benefits, or similar amounts payable on account of personal services performed by himself or any other individual (not including any payment as compensation for death under any Federal program, any payment under any Federal program established to provide 'black lung' benefits, any payment by the Veterans' Administration as pension, or any payment by the Veterans' Administration as compensation for a service-connected disability or death, except dependency and indemnity compensation paid under chapter 13 of title 38, United States Code, and any compensation paid by the Veterans' Administration to a former member of the Armed Forces who is in receipt of retired or retainer pay if such former member has waived a portion of his retired pay in order to receive such compensation), and does not consist of amounts paid, by way of reimbursement or otherwise, to such individual by his employer to defray expenses incurred by such individual in carrying out duties associated with his employment.

"(g) In determining the amount of any moneys due from, or payable by, the United States to any individual, there shall be excluded amounts which—

"(1) are owed by such individual to the United States,

"(2) are required by law to be, and are, deducted from the remuneration or other payment involved, including but not limited to, Federal employment taxes, and fines and forfeitures ordered by court-martial,

"(3) are properly withheld for Federal, State, or local, income tax purposes, if the withholding of such amounts is authorized or required by law and if amounts withheld are not greater than would be the case if such individual claimed all dependents to which he was entitled (the withholding of additional amounts pursuant to section 3402(i) of the Internal Revenue Code of 1954 may be permitted only when such individual presents evidence of a tax obligation which supports the additional withholding),

"(4) are deducted as health insurance premiums,

"(5) are deducted as normal retirement contributions (not including amounts deducted for supplementary coverage), and

"(6) are deducted as normal life insurance premiums from salary or other remuneration for employment (not including amounts deducted for supplementary coverage).".

(e)(1) Subsection (b) of section 303 of the Consumed Credit Protection Act (15 U.S.C. 1673(b)) is amended—

(A) by inserting "(1)" immediately after "(b)".

(B) by redesignating clauses (1), (2), and (3) thereof as clauses (A), (B), and (C), respectively, and

(C) by adding at the end thereof the following new paragraph:

"(2) The maximum part of the aggregate disposable earnings of an individual for any workweek which is subject to garnishment to enforce any order for the support of any person shall not exceed—

"(A) where such individual is supporting his spouse or dependent child (other than a spouse or child with respect to whose support such order is issued), 50 per centum of such individual's disposable earnings for this week, and

"(B) where such individual is not supporting such a spouse or dependent child described in clause (A), 60 per centum of such individual's disposable earnings for that week;

except that, with respect to the disposable earnings of any individual for any workweek, the 50 per centum specified in clause (A) shall be deemed to be 55 per centum and the 60 per centum specified in clause (B) shall be deemed to be 65 per centum, if and to the extent that such earnings are subject to garnishment to enforce a support order with respect to a period which is prior to the twelve-week period which ends with the beginning of such workweek.".

(2) The provision of section 303(b) of the Consumer Credit Protection Act which is redesignated under paragraph (1) as clause (A) is amended by striking out all that follows "any order" and inserting in lieu thereof the following: "for the support of any person issued by a court of competent jurisdiction or in accordance with an administrative procedure, which is established by State law, which affords substantial due process, and is subject to judicial review.".

(3) Section 303(c) of such Act is amended by inserting ", and no State (or officer or agency thereof)," immediately after "or any State".

(4) Section 305 of such Act is amended by inserting "and (b)(2)" immediately after "section 303(a)" each place it appears therein.

(5) The amendments made by this subsection shall take effect on the first day of the first calendar month which begins after the date of enactment of this Act.

BONDING OF CERTAIN STATE OR LOCAL EMPLOYEES; HANDLING OF CASH RECEIPTS

SEC. 2. (a) Section 454 of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (12),

(2) by striking out the period at the end of paragraph (13) and inserting a semicolon in lieu thereof, and

(3) by adding at the end thereof the following new paragraphs:

"(14) comply with such bonding requirements, for employees who receive, disburse, handle, or have access to, cash, as the Secretary shall by regulations prescribe; and

"(15) maintain methods of administration which are designed to assure that persons responsible for handling cash receipts shall not participate in accounting or operating functions which would permit them to conceal in the accounting records the misuse of cash receipts (except that the Secretary shall by regulations provide for exceptions to this requirement in the case of sparsely populated areas where the hiring of unreasonable additional staff would otherwise be necessary).".

(b) The amendments made by this subsection shall take effect on the first day of the day of the first calendar month which begins after the date of enactment of this Act.

INCENTIVE PAYMENTS TO STATES AND LOCALITIES

SEC. 3. (a)(1) Section 458(a) of the Social Security Act is amended by striking out "parent—" and all that follows and inserting in lieu thereof "parent an amount equal to 15 per centum of any amount collected and required to be distributed as provided in section 457 to reduce or repay assistance payments.".

(2) Section 458(b) of such Act is amended by striking out "paragraphs (1) and (2) of".

(b) The amendments made by subsection (a) shall be applicable with respect to amounts collected on and after October 1, 1977.

EXTENSION OF DEMONSTRATION PROJECTS TO CHILD SUPPORT

SEC. 4. (a) Section 1115 of the Social Security Act is amended—

(1) in the matter preceding clause (a), by striking out "part A" and inserting in lieu thereof "part A or D",

(2) in clause (a) thereof, by inserting "454", immediately after "402,",

(3) in clause (b) thereof, by inserting "455," immediately after "403,", and

(4) in the second sentence thereof, by striking out "$4,000,000" and inserting in lieu thereof "$6,000,000.".

(b) The amendments made by subsection (a) (other than the amendment made by clause (4) thereof) shall be effective on and after the date of enactment of this section, and the amendment made by such clause (4) shall be effective in the case of fiscal years which begin after September 30, 1977.

ANNUAL REPORT OF THE SECRETARY

SEC. 5. (a) Section 452(a)(10) of the Social Security Act is amended to read as follows:

"(10) not later than three months after the end of each fiscal year, beginning with the year 1977, submit to the Congress a full and complete report on all activities undertaken pursuant to the provisions of this part, which report shall include but not be limited to, the following:

"(A) total program costs and collections set forth in sufficient detail to show the cost to the States and the Federal Government, the distribution of collections to families, State and local governmental units, and the Federal Government; and an identification of the financial impact of the provisions of this part;

"(B) costs and staff associated with the Office of Child Support Enforcement;

"(C) the number of child support cases in each State immediately prior to the effective date of this part and the number of such cases added each quarter thereafter, and the disposition of such cases;

"(D) the status of all State plans under this part as of the end of the fiscal year last ending before the report is submitted, together with an explanation of any problems which are delaying or preventing approval of State plans under this part;

"(E) data, by State, on the use of the Federal Parent Locator Service, and the number of locate requests submitted without the absent parent's social security account number;

"(F) the number of cases, by State, in which an applicant for or recipient of aid under a State plan approved under part A has refused to cooperate in identifying and locating the absent parent and the number of cases in which refusal so to cooperate is based on good cause (as determined in accordance with the standards referred to in section 402(a)(26)(B)(ii)); and

"(G) data, by State, on the use of Federal courts and on use of the Internal Revenue Service for collections, the number of court orders on which collections were made, the number of paternity determinations made and the number of parents located, in sufficient detail to show the cost and benefits to the States and to the Federal Government; and

"(H) the major problems encountered which have delayed or prevented implementation of the provisions of this part during the fiscal year last ending prior to the submission of such report.".

(b) The amendment made by subsection (a) shall be effective in the case of reports, submitted by the Secretary of Health, Education, and Welfare, after 1976.

"(c) The Secretary of Health, Education, and Welfare shall submit to the Congress not later than June 30, 1977, a special supplemental report, with respect to activities undertaken pursuant to part D of title IV of the Social Security Act during the fiscal year ending June 30, 1976, and during the transitional period beginning July 1, 1976, and ending September 30, 1976. Such report shall, with respect to such transitional period, contain all the data and information specified in clauses (A) through (H) of section 452(a)(10) of such Act (as amended by subsection (a) of this section), and with respect to the fiscal year ending June 30, 1976, contain all such data and information which was not included in the report made by such Secretary to the Congress on June 30, 1976, pursuant to section 452(a)(10) of such Act, as in effect on such date.

"SEC. 6. For purposes of determining the amount payable to the State of Georgia under section 403(a) of the Social Security Act on account of expenditures made by such State as aid to families with dependent children under its State plan approved under part A of title IV of such Act during calendar quarters, beginning after June 30, 1975, and prior to January 1, 1977, there shall be included as an offset against such expenditures amounts which—

"(1) were collected as child support by the State pursuant to a plan approved under part D of such title IV, and

"(2) were retained by the State pursuant to, and in accordance with the provisions of, section 457(a)(2) or section 457(b)(1).".

GENERAL EXPLANATION OF THE BILL

A. CLARIFICATION OF GARNISHMENT PROVISIONS

(Section 1 of the bill)

The child support legislation enacted by the 93rd Congress (Public Law 93-647) provides for the garnishment of Federal payments for purposes of child support and alimony. Although the garnishment provision has been in effect since January 1, 1975, it has not yet been fully implemented by Federal agencies.

The following provisions in the bill are designed to authorize the issuance of regulations, clarify congressional intent and establish procedures to be followed in carrying out the law.

Inclusion of District of Columbia.—Section 459 of the Social Security Act provides that moneys due from, or payable by, the United States, including any agency or instrumentality thereof, shall be subject to legal process brought for the enforcement of legal obligations to provide child support or alimony payments. It was intended that employment with the District of Columbia be included. However, because a question has been raised about whether the language of the statute adequately states the intent of the Congress, section 1(a) of the bill would add specific reference to the District of Columbia.

Conditions and procedures.—The bill provides specific conditions and procedures to be followed under section 459. It specifies that service of legal process brought for the enforcement of an individual's obligation to provide child support or alimony is to be accomplished by certified or registered mail, or by personal service, upon the person designated to accept the service for a governmental entity. The process must be accomplished by sufficient data to permit prompt identification of the individual and the moneys which are involved. These provisions will permit inexpensive and expedited service and will enable the agency to respond in an efficient way.

Federal employees whose duties include re-

sponding to relevant interrogatories made prior to the issuance of legal process and authorized by law would not be subject to any disciplinary action, or civil or criminal liability or penalty for, or on account of, any disclosure of information made in connection with the answering of such interrogatories.

The bill also provides that the head of a governmental entity or his designee shall have 30 days (or a longer period if provided by applicable State law) from the effective date of service within which to respond to interrogatories or to legal process seeking the payment of child support or alimony obligations. The Federal Government is so large and its activities and offices are so numerous that a reasonable time for response is required to permit identification of the proper account, ascertainment of the sufficiency of process, and consultation with counsel.

As a protection to the employee, however, the bill also would require that the person who is served must, as soon as possible but no more than 15 days after the date of service, send written notice that the process has been served (together with a copy thereof) to the individual whose moneys are affected at his duty station or last known home address.

To avoid the problems which might ensue if Federal agencies were compelled to alter their disbursement cycles to accommodate payments due for child support or alimony, the bill specifically provides that government entities shall not be required to vary their normal pay and disbursement cycles in order to comply with any such legal process. Generally, disbursements of regular periodic payments of remuneration for employment are computerized. Process served upon an agency may unreasonably require that a pay check of a certain date be held up when in fact such process was not received in time to permit the reprogramming of the computer run affecting that particular check. In other instances a writ may call for deductions which are more or less frequent than the times the individual is actually paid. The provision in the bill would avoid very substantial additional costs to the Government and serious inconvenience or hardship to thousands of others affected by the computerized payrolls.

The bill provides that neither the United States, any disbursing officer, nor governmental entity shall be liable with respect to any payment made from money due an individual pursuant to legal process regular on its face, if the payment is made in accordance with the section and the regulations issued thereunder. This provision would protect the United States and its employees with regard to actions they are required to perform.

Issuance of regulations.—Section 459 has no provision specifically authorizing the issuance of regulations by the three branches of Government charged with administering the garnishment law. At this time, more than two years after the effective date, there are still no regulations relating to this statutory provision. The General Accounting Office has recommended that the law be amended to provide specific authority to issue regulations, commenting in a recent report that "the garnishment provision in section 459 should be expanded to specifically provide authority to one or more organizations to issue implementing regulations." The Attorney General sent to the 94th Congress a legislative proposal aimed at clarifying the regulatory authority. The bill would add a new section 461 to title IV which would vest the authority to issue regulations for section 459 in: (1) the President (or his designee) for the executive branch, including the territories and possessions of the United States, the United States Postal Service, the Postal Rate Commission, any wholly owned Federal corporation created by an Act of Congress, and the Government of the District of Columbia; (2) the President pro tempore of the Senate and the Speaker of the House of Representatives (or their designees) jointly for the legislative branch; and (3) the Chief Justice of the U.S. Supreme Court (or his designee) for the judicial branch.

The bill also provides that regulations issued for the three branches of Government are to include a requirement that the head of each governmental entity involved shall cause to be published in the appendix of the regulations (1) the designation of the agent or agents to accept service of process, identified by title of position, mailing address and telephone number, and (2) an indication of the data reasonably required in order for the governmental entity promptly to identify the individual with respect to whom legal process is being brought. This provision will eliminate the problems private attorneys have had in determining how to effect service of process in order that their clients may obtain the benefit of the garnishment statute. They will make it possible for the private attorney to easily locate the person who is to receive the process, and to know the kinds of information which must be provided to enable the Government entity to identify the employee concerned.

The bill would require that heads of governmental entities or their designees respond to relevant interrogatories, if authorized by the law of the State in which legal process will issue, prior to formal issuance of the process, upon a showing of the applicant's entitlement to child support or alimony payments.

The bill also makes clear the procedure to be used in case of disputes which may arise when two or more parties seek to attach the same payments with legal process issued from more than one source. It provides that if a governmental entity is served with more than one legal process with respect to money payable to any individual, then the money shall be available on a first-come-first-served basis. This simple approach to such situations should expedite agency action and eliminate the need for lengthy procedures during which the individual concerned will not have his income subject to garnishment from any source. Subsequent process will be satisfied out of money remaining after satisfying a prior process.

The bill does not include any specific requirements for reports by the separate branches of Government on the garnishment provision. However, in order to have information by which to evaluate the provision in the first years of its implementation, the committee requests that sufficient data be kept by each branch of Government so that a close estimate of the garnishment activity may be made and submitted to the Congress in a form which would enable the Congress to evaluate the impact and operation of the garnishment provision.

Definitions.—The bill would add a new section 462 to define the terms used in section 459.

(1) *United States.*—Present law provides that moneys due from or payable by "the United States * * * shall be subject to legal process brought for the enforcement of legal obligations to provide child support or alimony as though the United States were a private person." Because questions have been raised about what the term "United States" means for purposes of the provision, the bill adds a definition which makes clear that the term includes all three branches of Government—legislative, judicial and executive, and each and every department, agency, or instrumentality of any such branch, including the U.S. Postal Service, the Postal Rate Commission, any wholly-owned Federal corporation created by an act of Congress, any office, commission, bureau, or other administrative subdivision, and the Governments of the territories and possessions of the United States.

(2) *Child Support.*—The bill provides a definition of the term "child support" which states that it means, when used in reference to the legal obligations of an individual to provide such support, any periodic payment of funds for the support and maintenance of a child, and (subject to and in accordance with State law) includes (but is not limited to) payments to provide for health care, education, recreation, clothing, or other specific needs. Uncertainty as to whether agencies may pay court-ordered attorneys' fees, interest, and court costs is removed.

These are included when and to the extent they are recoverable pursuant to a decree, order, or judgment issued in accordance with applicable State law by a court of competent jurisdiction.

(3) *Alimony.*—The bill would define "alimony" for purposes of section 459, when used in reference to the legal obligations of an individual to provide the same, to mean periodic payments of funds for the support and maintenance of the spouse (or former spouse). It includes (subject to and in accordance with State law) separate maintenance, alimony pedente lite, maintenance, and spousal support. This definition is in keeping with the increasing State use of "support" terminology instead of "alimony." The same provisions relating to attorneys' fees, interest, and court costs as are provided with regard to "child support" are also included with regard to alimony. The bill also clarifies the committee intent that "alimony" does not include payments or transfers of property made in compliance with any community property settlement, equitable distribution of property, or other division of property between spouses.

(4) *Private person.*—The definition provides that "private person" means a person who does not have sovereign or other special immunity or privilege which causes the person not to be subject to legal process.

(5) *Legal process.*—This term is defined for purposes of section 459 to mean under normal circumstances any writ, order, summons or other similar process in the nature of garnishment which is issued by a court of competent jurisdiction, or by an authorized official pursuant to a court order or pursuant to State or local law, and which is directed to, with the purpose of compelling, a governmental entity which holds moneys otherwise payable to an individual to make a payment to another party in order to satisfy a legal obligation for child support or alimony payments. Thus, legal process includes the statutory remedy for recovery of support and maintenance under the Aid to Families with Dependent Children program which is provided in the law of the State of Washington, and other States which have similar statutes.

The reference to domestic courts in the definition 'legal process' is not, however, intended to preclude the United States from honoring its obligations under Article 34 of the German Supplementary Agreement to comply with writs of garnishment, or other similar process in the nature of garnishment, issued by the courts of the Federal Republic of Germany for the purpose of enforcing the legal obligations of military members or civilian employees of our forces stationed in Germany to pay child support or alimony.

(6) *Moneys, the entitlement to which is based on remuneration for employment.*—When the Finance Committee made its report on the child support amendments in 1974, it stated:

The committee bill would specifically provide that the wages of Federal employees, including military personnel, would be sub-

ject to garnishment in support and alimony cases. In addition, annuities and other payments under Federal programs in which entitlement is based on employment would also be subject to attachment for support and alimony payments. This provision would be applicable whether or not the family upon whose behalf the proceeding is brought is on the welfare rolls. It would also override provisions in various social insurance or retirement statutes which prohibit attachment or garnishment. (S. Rept. 93–1356).

Although the intent of the Congress would appear to be clear from this report language, questions as o the applicability of the statute to social insurance and retirement statutes have arisen. Other questions as to the kinds of remuneration which are covered by the statute, such as commissions or bonuses, have also been raised. To remove the possibility of confusion, the bill adds a definition of "remuneration for employment" which covers compensation paid or payable for personal services of an individual, whether as wages, salary, commission, bonus, pay, or otherwise, and includes but is not limited to severance pay, sick pay and incentive pay, but does not include awards for making suggestions. It also includes periodic benefits (as defined in section 228(h)(3) of the Social Security Act) or other payments to an individual under the insurance system established by title II, or any other system or fund established by the United States which provides for the payment of pensions, retirement or retired pay, annunities, dependents or survivors' benefits, or similar amounts payable on account of personal services performed by an individual. It excludes any payment as compensation for death under any Federal program, any payment under any program established to provide "black lung" benefits, any payment by the Veterans' Administration as pension, or any payment by the Veterans' Administration as compensation for service-connected disability or death. Such exclusion, however, does not apply to dependency and indemnity compensation paid under chapter 13 of title 38, United States Code, and any compensation paid by the Veterans' Administration to a former member of the armed forces who is in receipt of retired or retainer pay if such former member has waived a portion of his retired pay in order to receive such compensation.

Thus, the provisions of section 459 would apply, in addition to those already mentioned, to payments under: (1) The civil service retirement program; (2) the retirement and disability system established for employees of the Foreign Service; (3) the various retirement, annuity, and survivor benefit plans and programs established for members of the Armed Services or employees of the United States; (4) the Railroad Retirement Act, and the Railroad Unemployment Insurance program; (5) beneficiaries of life insurance policies provided under Government programs where the amount of coverage is directly or indirectly based (wholly or in part) on the amount of remuneration for the employment involved; (6) the Federal program for compensation for work injuries of Federal employees (but not death benefits thereunder); and (7) the Longshoremen's and Harbor Workers' Compensation Act (but only in cases where the payments are made by the United States).

The provision would not apply to reimbursement of expenses incurred by an individual in connection with employment or allowances in lieu thereof, e.g., per diem, mileage allowance, travel and transportation allowances, cost-of-living allowances, military quarters and subsistence allowances, uniform and clothing allowances, overeas station allowances, Armed Forces health profession scholarship stipends, and other similar work-related expenses or allowances.

It would not apply to State or locally administered programs even though such programs have been established under Federal auspices and there is Federal participation in the costs thereof simply because the benefits paid out are not paid by the Federal Government. The State unemployment compensation programs are prime examples of this category.

It should be emphasized that the fact that section 459 is applicable to particular moneys does not necessarily mean that those moneys will be subject to legal process; it merely means that the question of whether such moneys will be subject to legal process will be determined in accordance with State law in like manner as if the United States were a private person.

The bill would also provide for exclusions which are to be made in determining the amount of money due from or payable by the United States to any individual for purposes of section 459. Thus there would be excluded from garnishment any amounts which are owed by an individual to the United States; are required to be, and are, deducted from the remuneration or other payment involved, including, but not limited to, Federal employment taxes, survivor benefit program contributions, fines and forfeitures ordered by court-martial; and are properly withheld for Federal, State or local income tax purposes, if the withholding is authorized or required by law and if amounts withheld are not greater than would be the case if the individual claimed all dependents to which he was entitled (the withholding of additional amounts pursuant to section 3402(i) of the Internal Revenue Code of 1954 may be permitted only when such individual presents evidence of a tax obligation which supports the additional withholding); are deducted as health insurance premiums; are deducted as normal retirement contributions (without supplementary coverage); and are deducted as normal life insurance premiums (without supplementary coverage).

Limitation on percentage of wages subject to legal process.—There is no limit in Federal law on the percentage of wages or other employment-related income which may be garnisheed for child support or alimony under court order. Many States allow garnishment of 100 percent of earnings and others provide that 100 percent of wages may be subject to wage assignment. Because of the arrearages that have resulted through incomplete payments (or no payments) of child support and alimony orders, the wages or the annuities of a number of people have been garnisheed at 100 percent for periods of many months and even years. This has sometimes caused the second families of the fathers in those cases to face financial ruin. It would be of questionable equity to place a limit on section 459 which affects only Federal employees and do nothing for other persons faced with financial ruin which cannot be avoided even under the bankruptcy provisions since both child support and alimony are exempt from bankruptcy. To provide equal treatment to all persons who are subject to garnishment under State laws, including persons affected by section 459, the bill would, therefore, modify the provisions of the Consumer Credit Protection Act (15 USC 1673(b)) which now permit 100 percent of earnings and other employment-related income to be garnisheed for child support and alimony, by setting a limit of 50 percent on the amount which is subject to garnishment for child support and alimony for a person supporting a second family and 60 percent for a person who is not—plus an additional 5 percent in each situation if there are outstanding arrearages over twelve weeks old.

The Consumer Credit Protection Act would also be modified to cover garnishment provided under State administrative procedures, as well as under court orders for child support. The administrative procedures would have to be established by State law, afford substantial due process, and be subject to judicial review. At present, the Act refers only to garnishment under court orders. However, in recent years, the legislatures of at least six States—Florida, Georgia, Maine, Utah, Virginia and Washington—have enacted legislation providing for the use of certain administrative procedures for the enforcement of support for financially dependent minor children. States have enacted these laws generally because they have found existing common law and statutory remedies to be insufficiently effective and efficient. These procedures are clearly included in the definition of "legal process" for purposes of section 459 of the Social Security Act. In the view of the committee, these procedures are equally appropriate for inclusion under title III of the Consumer Credit Protection Act and will make the two laws consistent.

The amendment to the Consumer Credit Protection Act would become effective on the first day of the first calendar month beginning after the date of enactment.

A spokesman for the Department of Justice stated before the Finance Committee on September 22, 1976 that his Department strongly endorsed the enactment of the garnishment provisions.

B. BONDING OF STATE AND LOCAL EMPLOYEES

(Section 2 of the bill)

The new child support legislation is expected to result in the collection by State and local agencies of increasingly large amounts of money. Although normal procedures would seem to call for the bonding of employees who are responsible for handling this money, it has come to the committee's attention that this is not the case in all instances. My bill would therefore require bonding of all State and local employees, or employees of contractors used by agencies, who handle the collection of or accounting for child support payments.

The bill would also provide for the separation of functions of collection of money from accounting by requiring that individuals responsible for handling the money not be the same individuals who are responsible for the accounting of such money. The principles, standards, and related requirements prescribed by the U.S. Comptroller General concerning control over collection of funds require that persons responsible for handling cash receipts should not participate in accounting or operating functions which would permit them to conceal in the accounting records the misuses of cash receipts. Again, however, the committee is aware that these procedures are not always followed.

The bill would make clear in the law that this kind of precaution must be taken in all States and localities, with only limited exceptions. The Secretary of HEW would be required to prescribe by regulation exceptions to this requirement for sparsely populated geographic areas where the hiring of unreasonable additional staff would otherwise be necessary.

C. INCENTIVE PAYMENTS TO STATES AND LOCALITIES

(Section 3 of the bill)

Section 458 of the Social Security Act provides for incentive payments to States and localities for the purpose of encouraging broader participation in the child support program. It provides that if a political subdivision of a State or another State collects the child support payment, it is entitled, for the first 12 months of collections, to 25 percent of the amount retained by the State in which the recipient family lives. This 25 percent is paid from the Federal share. After the first year the collecting unit of Government is entitled to 10 percent of the amount

retained. This provision has two potentially negative features: it encourages States to concentrate on new cases in order to get the higher percentage payment at the expense of older cases; and it creates serious administrative complications in calculating the amounts payable. The bill would change this provision to allow the payment of a single uniform percentage of 15 percent for all incentive payments, without regard to the time period of collections.

D. DEMONSTRATION PROJECTS

(Section 4 of the bill)

The basic research and demonstration authorization for health and welfare programs under the Social Security Act is in section 1115. However, the provisions of that section do not apply to part D of title IV. This means that there is no authorization for experimental, pilot, or demonstration projects relating to the child support program. Such projects could be particularly useful in promoting the development and more effective implementation of this new program by the States, and therefore, the bill would extend this provision to include projects under part D. The amount of money now authorized for purposes of section 1115 is $4 million. The bill would increase the authorization to $6 million to insure adequate funds for the new child support projects. The new authorized amount would be effective in the case of fiscal years beginning after September 30, 1977.

E. REPORTING REQUIREMENTS

(Section 5 of the bill)

Present law requires that the Secretary of HEW submit an annual report to the Congress on all activities under the child support program. The law does not specify, however, the kinds of information which should be included in these reports. The bill spells out in the law some of the kinds of information which are necessary for program evaluation. Examples are data (for both AFDC and non-AFDC families) on program costs, collections, court support orders, paternity determinations, and parents located in sufficient detail to show the cost and benefits to the States and Federal Government of child support programs; costs and staff associated with the Office of Child Support Enforcement; and data showing use by States of the Federal Parent Locator Service, use of provisions for IRS collections, use of Federal courts, and the number of cases by State in which AFDC applicants and recipients refuse to cooperate in identifying and locating the absent parent.

The bill also provides that annual reports be submitted to the Congress within three months of the end of each fiscal year to assure the possibility of prompt and current evaluation of program developments. The second annual report would be due December 31, 1977, three months after the end of fiscal year 1977.

Due to the various problems encountered in establishing the new child support enforcement program, the first annual report submitted to Congress on June 30, 1976, did not show a complete picture of the first year's total activities. The committee, therefore, has provided that a special supplemental report on fiscal year 1976 be provided by June 30, 1977, which will also include a report on the transitional quarter July 1 through September 30, 1976.

F. EXCEPTION TO THE DISTRIBUTION OF COLLECTIONS PROVISIONS RELATING TO CURRENT MONTH CHILD SUPPORT COLLECTIONS

(Section 6 of the bill)

The bill also includes a provision which would give the State of Georgia until the end of calendar year 1976 to straighten out a problem of interpretation that State has concerning the treatment of child support collections for purposes of reimbursement. It validates a letter of exception by HEW to Georgia dated January 22, 1976, and its scope is the same as authorized in that letter.

By Mr. KENNEDY (for himself and Mr. JAVITS):

S. 1124. A bill to amend the Foreign Assistance Act of 1961 to provide relief, rehabilitation, and reconstruction assistance to the people who have been victimized by the recent earthquake in Romania; to the Committee on Foreign Relations.

ROMANIAN EARTHQUAKE ASSISTANCE

Mr. KENNEDY. Mr. President, I am introducing today, for myself and the distinguished Senator from New York (Mr. JAVITS), a bill to provide $20 million in rehabilitation and reconstruction assistance for the earthquake victims in Romania.

Mr. President, the Congress is clearly on record in support of humanitarian assistance to Romania. On March 14, the Senate adopted Senate Concurrent Resolution 12, sponsored by Senator JAVITS and myself and additional cosponsors, which expresses the deep sympathy of all Americans to the people of Romania. The resolution also resolves:

That the United States should do all that is possible to assist the people of Romania in their hour of need following the terrible natural disaster which has just afflicted them . . .

On March 17, the House concurred in this resolution.

Mr. President, the relief phase of the internationally supported assistance effort in Romania is now ending. And reports suggest that there are adequate emergency supplies within the country to meet the daily needs of displaced persons and other victims of the earthquake. The United States has contributed some $500,000 in medicine and food supplies to help meet emergency needs, and we have also dispatched to the field a team of seismological experts to assist the Romanian Government in preparing its plans for rehabilitation and reconstruction.

The bill we are introducing today continues American assistance to Romania and gives additional substance to the resolution recently passed by Congress. The bill was drawn up in consultation with the Department of State and others, and provides tangible support for rebuilding efforts in the health field and other public sectors which touch the daily lives of the Romanian people.

Mr. President, given the urgent needs in Romania, we are hopeful that early action can be taken on this bill in the context of supplemental appropriations for the current fiscal year.

Additionally, we are hopeful that Congress and the administration will fully consider other kinds of assistance to Romania which may be appropriate to help its people overcome the human and social and economic hardships produced by the earthquake. Officials in the Department of State and the Agency for International Development have indicated to us that such assistance might include housing guarantee credits, low interest loans, and Public Law 480 commodities. If such assistance is provided by the United States and requires additional legislation, we are prepared to support its enactment.

For now, however, it is important that Congress and the administration move ahead on the bill we are introducing today.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1124

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Romania Earthquake Relief and Rehabilitation Act of 1977".

SEC. 2. Chapter 9 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 495–. Romania Earthquake Relief and Rehabilitation.—(a) Notwithstanding any other provision of law, the President is authorized to provide assistance, on such terms and conditions as he may determine, for relief, rehabilitation, and reconstruction purposes among the people who have been victimized by the recent earthquake in Romania. There is authorized to be appropriated to the President to carry out the purposes of this section $20,000,000 for the fiscal year 1977, which amount is authorized to remain available until expended.

"(b) Notwithstanding any other provision of law, the amount authorized to be appropriated in subsection (a) of this section may be used only for the purposes specified in this section. The authority contained in section 610(a) of this Act may not be used to transfer funds made available under this section.".

By Mr. JAVITS (for himself and Mr. MOYNIHAN):

S. 1125. A bill to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes; to the Committee on Energy and Natural Resources.

ELEANOR ROOSEVELT NATIONAL HISTORIC SITE

Mr. JAVITS. Mr. President, I am introducing together with my distinguished colleague Senator MOYNIHAN a bill which would allow the National Park Service to designate the former home of Eleanor Roosevelt, Val-Kill, together with its adjoining lands and buildings which are located in the town of Hyde Park in New York State, as a national historic site.

Mrs. Roosevelt was an outstanding figure in American history and I believe it fitting to designate her estate as a site for the continuing study of the many humanitarian issues to which she devoted her life. The Val-Kill estate is located approximately a mile from the Hyde Park Estate which was established as a national historic site in 1945.

Congressman JONATHAN BINGHAM of New York is introducing the companion measure in the House today.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1125

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That in order to commemorate for the education, inspiration, and benefit of present and future generations the life and work of an outstanding woman in American history, Eleanor Roosevelt, to provide a site for continuing studies, lectures, seminars and other endeavors relating to the issues to which she devoted her considerable intellect and humanitarian concerns, and to conserve for public use and enjoyment in a manner compatible with the foregoing purposes an area of natural open space in an expanding urbanized environment, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to designate such lands, including the former home of Eleanor Roosevelt, Val-Kill, together with such appurtenant lands, buildings and other improvements thereon located in the Town of Hyde Park in the State of New York, as he deems appropriate, to establish the same as the Eleanor Roosevelt National Historic Site (hereinafter referred to as the "Site"), and to acquire such designated lands and interests therein by donation, purchase, exchange, condemnation or otherwise with donated funds, the acceptance of which for such purpose by the Secretary is hereby authorized, or with appropriated funds.

SEC. 2. (a) Except as otherwise provided in this Act, the Site shall be renovated, maintained and administered by the Secretary in accordance with the provisions of this Act, the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented, and the Act of August 21, 1935 (49 Stat. 666), as amended.

(b) The acquisition, renovation, administration and management of the Site and its conservation for public use and enjoyment shall be carried out by the Secretary and the studies, lectures, seminars and other endeavors relating to the issues to which Eleanor Roosevelt devoted her intellect and concern shall be carried out under cooperative agreements between the Secretary and qualified public or private entities. Such agreements shall contain provisions authorizing the Secretary or his designated representatives to enter upon the Site at all reasonable times for purposes of renovation, maintenance, administration, interpretation and visitor conduct, assuring that no changes or alterations are made to the Site inconsistent with its historic significance, and may include such other provisions assuring the conduct of studies, lectures, seminars and other endeavors as are mutually agreeable to the Secretary and the public or private entities responsible for conducting the same under such agreements.

SEC. 3. There is authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

Mr. MOYNIHAN. Mr. President, I am happy to join with my distinguished colleague, Senator JAVITS, in cosponsoring legislation which will, at long last, create an appropriate memorial to Eleanor Roosevelt. Let us hope that the Eleanor Roosevelt National Historic Site in the State of New York and its ongoing activities will infuse into our civic and cultural life some of the power of mind and of spirit which Mrs. Roosevelt exemplified. I applaud Senator JAVITS and our colleagues in the House of Representatives for their leadership and imagination in taking this important step.

By Mr. ROTH:

S. 1126. A bill to amend and strengthen the Equal Educational Opportunity Act of 1974; to the Committee on Human Resources.

EQUAL EDUCATIONAL OPPORTUNITY ACT AMENDMENT

Mr. ROTH. Mr. President, I send to the desk a bill which amends title II of the Education Amendments of 1974 dealing with equal educational opportunities and the transportation of students.

In 1974, the Congress, pursuant to the powers granted to it by the Constitution of the United States, enacted a comprehensive law establishing appropriate guidelines for fashioning remedies to dismantle dual school systems. The act declared it to be the policy of the United States that all children enrolled in public schools are entitled to equal educational opportunities without regard to race, color, sex, or national origin and that the neighborhood is the appropriate basis for determining public school assignments. The act properly differentiates de jure from de facto situations and specifically provides that failure of an educational agency to obtain a balance on the basis of race, color, sex, or national origin of students among schools shall not constitute a denial of equal educational opportunity, or equal protection of the laws.

The polls indicate that the vast majority of Americans favor desegregation yet oppose busing. The act establishes a priority of remedies consistent with the will of the American people that busing be a remedy of last resort. That priority of remedies is as follows:

First. Assigning students to schools closest to their homes, taking into account school capacity and natural physical barriers.

Second. Assigning students to schools closest to their homes, considering only school capacity.

Third. Permitting students to transfer from a majority to a minority student concentration of their race, color, or national origin.

Fourth. Creation or revision of attendance zones or grade structure without requiring transportation beyond the school next closest to the students home.

Fifth. Construction of new schools.

Sixth. Closing of inferior schools.

Seventh. Any other plan which is educationally sound and administratively feasible which does not require transportation beyond the next closest school or across district lines.

In formulating a remedy for a denial of equal educational opportunity, the act requires the court to consider and make specific findings on the efficacy of these remedies and requires implementation of the first remedy or first combination thereof which would redress the denial.

Unfortunately, some Federal courts have determined that this act is not applicable to the U.S. Judiciary. In 1975, the U.S. Court of Appeals for the Sixth Circuit determined that title II of the Education Amendments of 1974 was not applicable to the Federal courts, because of certain language contained in section 203(b). *Brinkman* v. *Gilligan,* 518 F.2d 853 (6th Cir. 1975). The purpose of my bill is to make clear that it is the intent of Congress that the courts of the United States apply title II of the Education Amendments of 1974. My bill would strike from section 203(b) the so-called Scott-Mansfield language which gave rise to the confusion, and permitted the courts to avoid applying the act.

Additionally, my bill would add a new section which would require proof of discriminatory intent or purpose as an essential element to establish a violation of the fifth or fourteenth amendments to the Constitution. This section is completely consistent with the recent Supreme Court decisions in Washington against Davis and Village of Arlington Heights against Metropolitan Housing Development Corporation. In those decisions, the Supreme Court made it clear that official action will not be held unconstitutional solely because it results in a racially disproportionate impact. These decisions require proof of a racially discriminatory intent or purpose as essential to establish a violation of the Constitution. My bill makes this discriminatory intent or purpose requirement applicable to all remedial orders not finalized prior to enactment.

While admittedly this is already the law of the land, I believe it is imperative to incorporate this language so as to insure that this standard is universally applied by all courts. A case in point is the recent action taken by the Justice Department in the Indianapolis and Wilmington cases. The two cases are identical. In both instances the courts struck down State statutes without any finding of discriminatory intent. While the Justice Department did advance the critical issue of discriminatory intent in the Indianapolis case it failed to do so in the Wilmington case.

I urge my colleagues to join me in assuring this bill is passed. I believe this bill, if enacted into law, would be welcomed by Americans of all races as a step toward sanity in national education policy.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1126

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 203(b) of the Equal Educational Opportunity Act of 1974 is amended by inserting a period after "dual school systems" and striking out the remainder of the sentence.

SEC. 2. (a) Section 213 of the Equal Educational Opportunity Act of 1974 is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) Proof of discriminatory intent or purpose is essential to establish a violation of the fifth or fourteenth amendments to the Constitution of the United States.".

(b) The amendment made by subsection (a) of this section shall take effect with respect to any order of a court, department, or agency of the United States, which is made after the date of enactment of this Act or which is made prior to such date but is not final on such date.

By Mr. BENTSEN:

S. 1127. A bill to amend the definition of the term "lawful bridge" in "An act to provide for the alteration of certain bridges over navigable waters of the United States," approved June 21, 1940 (54 Stat. 497), as amended, for the purpose of clarifying such definition; to the Committee on Environment and Public Works.

NAVIGATION ON GREENS BAYOU

Mr. BENTSEN. Mr. President, today I am introducing a bill to clarify a provision of the Truman-Hobbs Act dealing with eligibility for funding under the act. The Truman-Hobbs Act authorizes funds for altering bridges which are ruled obstructions to navigation by the U.S. Coast Guard.

The need for this legislation stems from what I consider to be an unduly strict interpretation of the act by the Coast Guard. The decision issued last year denied funds to owners of a bridge across Greens Bayou near Houston, Tex., for purposes of raising the bridge and improving navigation on the bayou.

Mr. President, when this bridge was originally constructed under Department of War and Corps of Engineers permits in 1930, it had an elevation of 27.6 feet. The 27.6 foot clearance was maintained for 20 years; however, since that time land subsidence has reduced the clearance to only 19.5 feet. As a result, barges and tugboats which once cleared the bridge easily now sometimes collide with the bridge. An application for funding to raise the bridge was submitted to the Coast Guard. In rejecting the request, the Coast Guard cited the following section of the law:

. . . it shall not be lawful to deviate from such plans either before or after completion of construction unless the modification of said plans has previously been submitted and received the approval of the Chief of Engineers and the Secretary of the Army.

The Coast Guard concluded that the lowering of the bridge as a result of land subsidence constituted a "deviation from the plans" without prior approval and thus disqualified the application for funding.

Mr. President, if this problem had come about because of negligence on the part of the bridge's owners, I would not be offering this legislation today. There was not an intentional deviation from the original plans by the owners that would have been susceptible to prior approval by the appropriate Government officials. The problem arose, rather, as a result of land subsidence—a condition clearly beyond the control of the owners. Land subsidence, a matter of growing concern in the gulf coast area of my State, is an unfortunate and damaging side effect of ground water withdrawals by surrounding residents and industries. One industry in particular, Mr. President, that is a major beneficiary of the underground water reserves in the area is the petroleum refining industry. The many consumers across the country who purchase gasoline and other products refined by a channel refinery also benefit indirectly from the ground water withdrawals.

Mr. President, my legislation would clarify the definition to insure that bridges, which were lawful at the time of construction but have undergone modification through no action or fault of the owner or users, are eligible for alteration funding.

Mr. President, for the reasons outlined above, I feel that a request for funding by the Federal Government in this instance is a reasonable request and urge acceptance of my bill to remedy the overly restrictive interpretation by the Coast Guard.

ADDITIONAL COSPONSORS

S. 8

At the request of Mr. DOLE, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 8, a bill to amend the Watershed Protection and Flood Prevention Act.

S. 12

At the request of Mr. DOLE, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 12, a bill to extend the Rural Fire Community Protection Act.

S. 248

At the request of Mr. DOLE, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 248, a bill to establish a National Agricultural Research Policy Advisory Board.

S. 311

At the request of Mr. ROTH, the Senator from Michigan (Mr. GRIFFIN) was added as a cosponsor of S. 311, a bill entitled "The College Tuition Tax Relief Act of 1977."

S. 317

At the request of Mr. MCGOVERN, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 317, a bill to provide service pensions for World War I veterans and their widows.

S. 380

At the request of Mr. DOLE, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 380, a bill to amend the Agricultural Trade Development and Assistance Act of 1954.

S. 497

At the request of Mr. DOLE, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 497, the Federal Crop Insurance Expansion Act of 1977.

S. 543

At the request of Mr. PELL, the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 543, to amend title VII of the Social Security Act to provide that benefit checks shall be mailed for delivery on the day preceeding a Saturday, Sunday, or legal public holiday, and to amend section 3020 of title 38, United States Code, relating to the time of delivery of benefit checks paid under laws administered by the Veterans' Administration.

S. 687

At the request of Mr. MAGNUSON, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 687, the National Oil Pollution Liability and Compensation Act of 1977.

S. 752

At the request of Mr. MCGOVERN, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 752, a bill to foster and continue the family farm in the United States by providing young farmers with necessary assistance to purchase family farm units, and for other purposes.

S. 802

At the request of Mr. TOWER, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 802, a bill to amend the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act Amendments of 1976 to provide that States will be assured of receiving grants at a level equal to that which was received prior to the date of enactment of such amendments.

S. 803

At the request of Mr. HELMS, the Senator from North Carolina (Mr. MORGAN) and the Senator from Arizona (Mr. GOLDWATER) were added as cosponsors of S. 803, a bill to amend the Internal Revenue Code of 1954 to provide that certain liens for taxes shall not be valid unless actually entered and recorded in the office in which the lien is filed.

S. 985

At the request of Mr. HUMPHREY, the Senator from Alabama (Mr. SPARKMAN) was added as a cosponsor of S. 985, to prohibit State and local law from permitting construction which interferes with sunlight necessary for solar energy equipment.

S. 991

At the request of Mr. RIBICOFF, the Senator from Iowa (Mr. CULVER) was added as a cosponsor of S. 991, a bill to establish a Department of Education, and for other purposes.

S. 1011

At the request of Mr. ROTH, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1011, a bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation.

S. 1040

At the request of Mr. ROTH, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1040, a bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation.

S. 1050

At the request of Mr. RANDOLPH, the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1050, to amend title 39 of the United States Code to extend the period during which there is a moratorium on the increase of any rates, the reduction in levels and types of postal services, and the closing of certain post offices.

SENATE RESOLUTION 120

At the request of Mr. HUMPHREY, the Senator from Nevada (Mr. GARN) was added as a cosponsor of Senate Resolution 120, relating to the ban on saccharin.

AMENDMENT NO. 146

At the request of Mr. STEVENSON, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of amendment No. 146, intended to be proposed to Senate Resolution 110, to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate, and for other purposes.

AMENDMENT NO. 147

At the request of Mr. WALLOP, the Senator from Wyoming (Mr. HANSEN), the Senator from Alabama (Mr. SPARKMAN), the Senator from Georgia (Mr. TALMADGE), the Senator from Oklahoma (Mr. BELLMON), the Senator from Mississippi (Mr. STENNIS), the Senator from Nebraska (Mr. CURTIS), the Senator from Indiana (Mr. LUGAR), and the Senator from Utah (Mr. HATCH) were added as cosponsors of amendment No. 147, intended to be proposed to Senate Resolution 110, to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate, and for other purposes.

SENATE RESOLUTION 125—SUBMISSION OF A RESOLUTION DISAPPROVING ENERGY ACTION NUMBERED 11

(Referred to the Committee on Energy and Natural Resources.)

Mr. JACKSON (for himself, Mr. DURKIN, Mr. METCALF, Mr. ABOUREZK, and Mr. CHURCH) submitted the following resolution:

S. RES. 125

Resolved, That the Senate does not favor the energy action numbered 11 transmitted to the Congress on March 15, 1977.

AMENDMENTS SUBMITTED FOR PRINTING

CODE OF OFFICIAL CONDUCT—S. RES. 110

AMENDMENT NO. 154

(Ordered to be printed and to lie on the table.)

Mr. WALLOP submitted an amendment intended to be proposed to Senate Resolution 110, to establish a Code of Official Conduct for Members, officers, and employees of the U.S. Senate, and for other purposes.

Mr. WALLOP. Mr. President, I am introducing an amendment in the nature of a substitute to Senate Resolution 110, the Senate Code of Official Conduct. This amendment deals only with title I of Senate Resolution 110, and leaves title II and title III standing as proposed in Senate Resolution 110.

I do not doubt, and I do not think that any of my colleagues in the Senate doubt, that the Committee on Official Conduct worked long and hard on Senate Resolution 110. The committee is to be commended for its dedication and perseverance to a difficult and delicate task.

But as I have stated before, and I know that I am joined in my sentiments by several other Senators, that this code tackles the laudatory goal of ethical conduct in the U.S. Senate in the wrong way, for the wrong reasons, and potentially with the wrong results. We have, in our effort to placate the public, the press, and other perceived commitments, lost sight of the objective which should be our guiding light in this matter; that we need and should have a code of conduct for the U.S. Senate because it is right to do so, and because it is correct to aspire toward ethical conduct. We should not have a code of conduct for the mere sake of appearances, or because we are trying to satisfy anyone else.

Senate Resolution 110 does not approach the subject of ethics by encouraging us to aspire to do the right thing at all. It is rather a shopping list of don'ts, a litany of what Senators cannot do rather than a proclamation of what they should do. It reeks with suspicion, and implies that we do not have the moral fortitude to resist temptation, or the wits to recognize it. I think that it debases, rather than inspires, the Senate with its constant implication that Senators are not honest men who know right from wrong. This code leaves us no pride; it gives us no responsibility to decide right from wrong on the individual merits of the case; it negates the trust bestowed on us by our constituents, who demonstrated their belief in our ability to make decisions on their behalf when they elected us in the first place.

Furthermore, Senate Resolution 110, as we each know in our hearts, is in too much part a reaction to outside forces and pressures. It is a sad tribute to this body that we will allow moral elitists and public polls to prescribe our ethical behavior, rather than determining it ourselves. We have all heard of the Harris poll, the fact that the House has enacted similar measures of ethics, and talk of being committed to this code because Congress quietly voted themselves an inordinate pay raise. Bending to these pressures, we have come up with and will probably adopt a code that is arbitrary and in many instances unenforceable. It is a code loaded with figures that make it advantageous to stay in arbitrary brackets, chock full of loopholes and unenforceable terms that in the end confirm that ethics cannot be legislated by rules and figures. Senator MUSKIE was absolutely right when he said that this code sends a few easy prey to the wolves, for it does precisely that to ease consciences, and we should be ashamed.

This code moves the U.S. Senate one step closer to becoming a body of elected bureaucrats, paid and kept by the public, and I question the wisdom of that direction. The foundation of our system of government lies in the British Parliament, which through its two Houses purposely represented various components of the British society such as the clergy, the universities, and so forth. Are we citizen legislators, representing our constituents' interests through our own expertise and experience, or are we political eunuchs in the words of another Senator, separate and apart from the concerns we represent?

I think that there are too many problems with Senate Resolution 110 for us to continue to try to patch it up with piecemeal amendments. Rather, I propose that we adopt another code, with another approach, which inspires us towards high ethical standards of behavior. For this reason I submit an amendment in the nature of a substitute made up of seven canons of conduct. Such canons have long been used by both the judicial and legal professions, and have proved most successful. The Code of Judicial Conduct has existed since 1923, while the lawyers' Code of Professional Responsibility dates back to 1908. Both are enforced by the respective profession through boards of review as prescribed by each separate State. Both are composed of broad, inspirational canons, supplemented by accompanying rules and commentary.

The Code of Conduct I propose for the Senate would pattern itself after these models. In adopting these seven canons, we would immediately have a code of conduct that is inspirational and noble. As provided by my amendment, the canons would then go to the Ethics Committee for further consideration and elaboration through the creation of accompanying regulations. Such regulations would govern specific situations and infractions and, when adopted by the Senate, carry the full authority of the canons and be enforced likewise. I believe that adoption of such a code would enable the Ethics Committee to implement many of the very fine suggestions that have been made during the debate on Senate Resolution 110. I further believe that every provision in Senate Resolution 110 could conceivably be included in the canon format, through appropriate regulations, although I would hope that with this additional time the committee may wish to modify some of the proposed provisions. If adopted, the amendment would further instruct the Ethics Committee to report back to the Senate by resolution within 40 days with the proposed regulations for Senate approval.

Mr. President, when our Founding Fathers wrote our Constitution, they wrote a document which would last, and that document has withstood the tests of time. Likewise, a code of ethics must also be designed with the future in mind. What we have here is a capricious and cosmetic response to immediate pressures. What we have here is a document which is designed to appease the public of 1977, with no forethought to 1978, 1980, or beyond. Senate Resolution 110 as written is a sham, a debasement of all that I and many others have aspired to in public life, and you expect me to justify this and rationalize it to my family, my friends, and the people of Wyoming.

I entered public life proud to represent Wyoming, proud to be an American, and proud to have the confidence of those I represent. This resolution makes me question that pride and even that confidence. I cannot be proud of a resolution which casts suspicion upon all that

I have stood for. My amendment, equally strong on ethics, equally harsh on those who break the public confidence, approaches the same problems from what I believe is a more positive, more inspiring perspective. It is a document which will last beyond 1977.

I would urge my colleagues to support this effort.

Mr. President, I submit the amendment in the nature of a substitute, No. 154, which I will in all probability not call up. I wish, therefore, to have the amendment printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 154

On page 1, beginning with line 1, strike out all through page 40, line 7, and insert in lieu thereof the following:

"That this resolution may be cited as the 'Official Conduct Amendments of 1977'.

"TITLE I—CODE OF OFFICIAL CONDUCT

"SEC. 101. The Standing Rules of the Senate are amended—

"(1) by striking out rules XLI, XLII, XLIII, and XLIV; and

"(2) by renumbering rule XLV as rule XLI, and by adding after such rule the following new rule which shall be known as the 'Senate Code of Official Conduct':

'RULE XLII—CODE OF OFFICIAL CONDUCT

Canon 1

'A Senator, and an officer or employee of the Senate, shall uphold the integrity, dignity, and independence of the Senate.

Canon 2

'A Senator, and an officer or employee of the Senate, shall avoid professional impropriety and the appearance of professional impropriety in all activities.

Canon 3

'A Senator, and an officer or employee of the Senate, shall perform the duties of office impartially and diligently.

Canon 4

'A Senator, and an officer or employee of the Senate, shall not receive any compensation, nor permit any compensation to accrue to his beneficial interest from any source, the receipt or accrual of which would occur by virtue of influence improperly exerted from his position as a Senator, officer, or employee.

Canon 5

'A Senator, and an officer or employee of the Senate, shall annually file reports disclosing assets, debts, gifts, and income as required by the Select Committee on Ethics.

Canon 6

'A Senator, and an officer or employee of the Senate, shall recognize at all times that he is a servant of the people of this nation.

Canon 7

'A Senator, and an officer or employee of the Senate, shall avoid expenditures of public funds that are wasteful or designed to obtain political advantage.'

"SEC. 102. The Select Committee on Ethics shall report to the Senate by resolution specific regulations as to the application of each Canon of the Senate Code of Official Conduct. After adoption of such regulations by the Senate, such regulations shall carry full effect as part of such Code."

AMENDMENT NO. 155

(Ordered to be printed and to lie on the table.)

Mr. BAKER submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

AMENDMENT NO. 156

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

AMENDMENT NO. 157

(Ordered to be printed and to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

AMENDMENT NO. 158

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER RESOURCES

Mr. RANDOLPH. Mr. President, the Subcommittee on Water Resources of the Committee on Environment and Public Works has scheduled hearings on national water policy.

The jurisdiction of the Committee on Environment and Public Works has been expanded to include water resources policy. This encompasses water resources research, the desalination program, and activities of the Water Resources Council.

While the main focus of the hearings will be on the drought situation in the Western United States, considerable emphasis will be placed on current Federal water policy and the efficient use of water. The subcommittee seeks to establish short- and long-term solutions to the water supply problems of this country.

Testimony will be received from interested State witnesses, Federal agencies, and public witnesses. Hearings are scheduled in Washington on March 31 and April 18. Other hearings will be held on April 6 in San Francisco, Calif.; April 7 in Denver, Colo.; April 11 in Albuquerque, N. Mex.; April 12 in Roswell, N. Mex.; and April 14 in Boise, Idaho.

Members of the Senate and other interested parties wishing to testify or submit statements for the record should have their staff contact Ann Garrabrant, professional staff member, Subcommittee on Water Resources, on extension 48426.

SUBCOMMITTEE ON THE HANDICAPPED

Mr. RANDOLPH. Mr. President, as chairman of the Subcommittee on the Handicapped, I announce that our subcommittee has scheduled oversight hearings on the Developmentally Disabled Assistance and Bill of Rights Act. The hearing will be held on Thursday, March 31, 1977 in room 6202 Dirksen Senate Office Building starting at 9:30 a.m.

Persons wishing to testify should contact Mrs. Patria Forsythe, staff director, 10–B Russell Senate Office Building, (202) 224–9075.

SUBCOMMITTEE ON LABOR

Mr. WILLIAMS. Mr. President, I wish to announce that the Labor Subcommittee of the Committee on Human Resources will hold an additional day of hearings on S. 717, the Federal Mine Safety and Health Amendments Act of 1977, on Friday, April 1, 1977, commencing at 10 a.m., in room 4232 of the Dirksen Senate Office Building. Any person seeking information or wishing to testify or submit a position for the record should contact Michael L. Goldberg of the Labor Subcommittee staff at room G–237, Dirksen Building, (202) 224–3674.

ADDITIONAL STATEMENTS

RELATIONS WITH CUBA

Mr. GARN. Mr. President, once again there is a push on to normalize relations with Cuba and reestablish full trade. With regard to the latter, I am aware that some American companies are unofficially studying potential trade agreements with Cuba—all the more avidly, perhaps, because of Fidel Castro's recent encouraging remarks during a television interview.

As I have often said, I am personally opposed to reestablishing either diplomatic ties or trade relations with Cuba unless a fundamental change takes place in the island. As I have pointed out, Fidel Castro apparently remains committed to fomenting communism around the world; within his own nation he is repressive toward the general citizenry and brutal in his treatment of political prisoners. For reasons of principle, if nothing else, I oppose making overtures to Castro.

There is another factor, moreover, which should discourage interest, specifically commercial interest, in the island: The increasingly apparent fact that from a financial point of view, Cuba is a risky undertaking.

Two articles have recently appeared on the subject which should be of interest to my colleagues, and of particular interest to the American business community. These totally unrelated articles deal with the problems which Canada and Japan, respectively, have had in their trade dealings with Cuba. The story is the same with regard to both countries: with the drop in sugar prices—and the corresponding decline in Cuba's purchasing power—specialized equipment ordered by Castro is gathering dust in Canadian and Japanese warehouses until some indefinite future date when Cuba can scrape together the money to pay for it.

In Japan some 200 companies are involved in this "$150 million pileup." In an effort to cut their losses, many of the smaller firms are now reconciled to absorbing the high storage costs, for fear that Castro will default totally. In Canada, where technical goods ordered by Cuba have been stored in Montreal warehouses since last April, it is expected the Government will have to guarantee loans to businesses facing trouble, because of assets tied up in Cuban orders. Corporations have found, moreover, that pressing Cuba for payment proves counterproductive. According to the article on Canada:

Companies complaining too much have been overlooked by Cuflet, the Cuban ship-

ping line making allocations and giving most of the instructions.

Mr. President, I want to empasize that these are just fragments of information which happened to come to my attention. I suspect that, far from being the whole story, they are only the tip of the iceberg, and that many of Cuba's trading partners are facing the same situation. It is understandable they would not want to publicize their problems; the situation must be highly embarrassing to them, if nothing else.

The question of reestablishing closer ties with Cuba must be considered very, very carefully, Mr. President, and full weight must be given to objective facts such as these.

For the present, I hope the sectors of the American business community advocating trade with Cuba will learn something from the experience of their counterparts abroad.

At this time, Mr. President, I ask unanimous consent that the articles I have discussed be printed in the RECORD. These are "Cuba in Trouble," from To the Point International, January 10, 1977, and a section from "Business Around the World," in U.S. News & World Report, February 21, 1977.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

CUBA IN TROUBLE

Strong rumours that the Cuban economy is once again in trouble have been confirmed indirectly by Canadians doing business with Havana trading corporations. Not only has Cuba become a slow payer, but specialised industrial equipment ordered last year has been lodged in Montreal warehouses since April.

Companies are reluctant to disclose details for fear of retaliation, however, and the situation only came to light when a senior trade and commerce department official said it was "prepared to talk to any branch manager of a bank" who might be concerned about the affairs of loan customers trading with Cuba.

Canadian Export Association executive James Moore says that even he does not know the size of the backlog or extent of the financial problems, explaining that corporation executives are "reluctant to talk since they might fall further in the pecking order." Apparently Cuban officials have been selective when choosing ordered goods and authorising payment. Companies complaining too much have been overlooked by Cufiet, the Cuban shipping line making allocations and giving most of the instructions.

Since the situation is deteriorating rapidly, Ottawa probably will guarantee bank loans to businesses facing trouble because of assets tied up in Cuban orders. Prime Minister Pierre Trudeau had encouraged trade with Cuba.

Fidel Castro's main problem is the collapse of world sugar prices, now around 7½ cents a pound on international markets against a peak of 60 cents two years ago. Lacking foreign exchange, his modernisation programme has come to a grinding halt. Falling production could also add to the sugar problem. Last February Cubans gave a 98 per cent majority to a new constitution, which calls for nationalisation of all small farms still in private hands. Visitors report that the 200,000 owners became so disheartened that output slumped sharply.

Anti-Castro Cubans at the time predicted this would happen and that state control would cripple the economy, since small farm productivity is five to six times greater than that of the large government-run plantations. With sugar accounting for 80 per cent of Cuba's export earnings, any shortfall is a disaster.

Apart from price and production headaches, there is also an internal administrative crisis. Because Cubans resented their country being run solely from Havana, a stronger provincial government system is being created. However, the headaches and chaos stemming from this changeover are thought to be highly injurious to the economy.

The outlook for 1977 looks bleaker. Canadian business analysts feel that exports to Havana will be well below the $220 million booked for this year, solely because of Cuba's economic crisis.

BUSINESS AROUND THE WORLD

In Japan, worldly-wise merchants are in a tizzy over trade with Cuba.

What irks them: Havana's agents went on a buying spree, then got stuck with insufficient funds when sugar prices fell. Strapped by a weak payments position, the Cubans have delayed for months picking up their orders in Japan.

This has left thousands of tons of steel, factory parts, motor vehicles, textiles and electrical appliances choking warehouses in Nippon.

It is a 150-million-dollar pile-up. Tokyo's commercial experts want the Cubans to move the freight by March—and foot a rapidly mounting bill for storage costs, financing charges, other expenses the Japanese have had to pay.

Havana's idea: Ease the goods out gradually—and forget those extra fees.

Of some 200 Japanese firms in this snarl, most of the smaller ones have given in, perhaps fearing contract cancellations. But Mitsubishi Corporation has a huge textile plant to go, keeps angling for Cuba to take it—and pay up.

The tie-up is expected to slow action on other proposed sales by Japan to Cuba. These include a Mitsui & Company fertilizer unit, a Hino Motors bus and truck-assembly factory, a polyester-fiber plant and a sugar refinery.

SECRETARY OF STATE CYRUS VANCE'S VIEWS ON FOREIGN AID AS INTEGRAL TO OVERALL U.S. FOREIGN POLICY

Mr. HUMPHREY. Mr. President, yesterday Secretary of State Cyrus Vance testified before the Senate Foreign Relations Committee in support of the administration's foreign assistance requests.

As the Secretary noted in his opening remarks:

This is the fourth time in the short period since this Administration took office that I have come before Committees of the Congress to describe and support our foreign assistance requests. This is a measure of the importance we give to these programs in the larger scheme of our foreign policy.

The Secretary emphasized the importance of these programs not only to the social, economic, and technological development in poor countries, but also to the economic welfare of the American populace.

The Secretary pointed out:

The expansion of our own economy is linked to the growth of demand abroad. Foreign buyers take some 40 percent of our grains; they take an eighth of everything we produce. The developing countries are increasingly vital markets for our induustries and firms. Over a third of our trade is with these countries; that amounts to more than our trade with the European Community. Our raw materials come more and more from foreign sources, especially from those developing countries we are now encouraging.

This is a very significant point, as I noted in hearings later that day before my Foreign Assistance Subcommittee. By virtue of the fact that the United States, with only 6 percent of the world's population, consumes 40 percent of the world's resources, we are highly dependent upon the global community for our own economic viability. We cannot ignore what happens in other parts of the world, least of all in the developing nations.

The President has called for a major expansion of our contributions to both bilateral and multilateral development efforts. As the Secretary pointed out, there is a growing economic crisis in the developing countries which began with the quadrupling of energy prices in 1974 which more than offset all assistance the developing countries received, and in 1975 their exports fell by almost $5 billion—the biggest drop in the postwar period.

In noting that the North-South dialog offers unprecedented opportunities for cooperation between the rich and poor regions of the world, Secretary Vance observed:

We must keep in mind the importance of the political as well as economic stakes in achieving this progress. This is obvious in terms of our bilateral relations. Additionally, the developing nations are more likely to cooperate with us in addressing such longer term global issues as halting the spread of nuclear weapons or protecting the environment if they are confident of our cooperation in addressing their economic difficulties.

The Secretary also called attention to two major foreign assistance initiatives being undertaken this year by the President:

The International Development Association now faces its fifth capital replenishment—a call to both the industrialized countries and the newly rich oil producers to address jointly the problems faced by the poorest countries. This is also the initial year of a multilateral long-term program to help develop the Sahelian region of Africa, which has been devastated by drought, but which now shows promise of recovery.

I might add the Sahelian program is a unique effort in development. It is a multidonor effort aimed at bringing the best expertise and technical assistance available in the donor community to bear in a coordinated manner on agricultural productivity of the region. Our experiences could serve as a basis for future development efforts, whose success will depend upon coordination rather than duplication. I will have more to say about this program at a later date.

The Secretary also pointed out that the administration proposes a total foreign assistance package of $7.2 billion in fiscal year 1978, an increase of nearly $1.7 billion over 1977.

However, the Secretary properly explained that the bulk of that increase—a billion dollars—resulted from a procedural change at the request of the Congress.

This procedural change is the requirement that the callable capital of the international financial institutions will now

be fully appropriated. In the past the callable capital was always authorized but not appropriated. I might also point out that none of the callable capital in the international financial institutions has ever been called.

In addition, our replenishments to the international financial institutions are multiyear authorizations which will be appropriated over an extended period of time. Thus, in light of these two factors, the outlays the Congress will be expected to make in fiscal year 1978 will be considerably less than the authorization requests.

The Secretary also emphasized the importance the administration attached to the bilateral aid program:

These bilateral programs are designed to address the basic human problems of food and agriculture, population and health and education and human resources development in the world's poor countries. These programs are the most direct way to put American skills and resources to work improving the human condition around the world, and spurring economic development.

The Secretary underscored that the bilateral programs complement the multilateral assistance programs and serve the same broad purpose:

These institutions are mechanisms for sharing the aid burden. Donors contribute according to their ability to provide aid; the share of the United States has actually declined over the years. For instance, our share of the initial subscription in the International Development Association was almost 42 percent. In the proposed fifth replenishment, it will be less than 32 percent.

I might also add that IDA was an initiative of the U.S. Congress. Its sole purpose was to establish a mechanism for burden-sharing in development efforts among the world's rich nations. As the Secretary pointed out—we have succeeded in this purpose.

I also agree that these institutions are valuable for the economic discipline they impose upon the recipient countries:

When developing countries borrow from the international financial institutions, they are expected to adopt sound economic policies, to provide significant amounts of their own resources towards the common goal, and to accept the discipline imposed by obligations to repay their loans.

Mr. President, I believe the Secretary's testimony before our committee yesterday was an effective and articulate expression of the administration's initiatives and concerns in the area of bilateral and multilateral foreign assistance. I commend the administration for its concern and sensitivity and will do all I can to see that these programs are supported by Congress.

Mr. President, I ask unanimous consent that the Secretary's testimony be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF THE HONORABLE CYRUS R. VANCE

Mr. Chairman, members of the Committee. This is the fourth time in the short period since this Administration took office that I have come before committees of the Congress to describe and support our foreign assistance requests. That is a measure of the importance we give to these programs in the larger scheme of our foreign policy.

In their diversity, our foreign assistance efforts meet a variety of American foreign policy objectives. But a unity and common purpose binds them together. The components of the program amount to a humanitarian investment in the social, economic, and technological development of poor countries. The result will be an expanding world economy with benefits for people of all countries—our own included.

It should be clear to us all that the way American workers and consumers live—our standards of living—depend in large part on supplies of food, energy and raw materials from the developing world—from countries we are helping to move ahead on their own courses of economic development. Furthermore, the expansion of our own economy is linked to the growth of demand abroad. Foreign buyers take some 40 percent of our grains; they take an eighth of everything we produce. The developing countries are increasingly vital markets for our industries and firms. Over a third of our trade is with these countries; that amounts to more than our trade with the European Community. Our raw materials come more and more from foreign sources, especially from those developing countries we are now encouraging.

We are investing in the cause of peace, as well, when our aid becomes part of an effort to resolve old—and potential—regional disputes. Our selective military and related security assistance programs can enable our friends and allies to expend less of their national energies on insuring their own security, and to concentrate instead on their own economic and social development.

We are investing through all aspects of our programs—bilateral assistance, multilateral assistance, security assistance—in a world that offers hope of decent lives and worthy goals to people whose common lot is privation and hunger. The danger of failing to address to legitimate aspirations of the developing world would be frustration in the poorer countries that could take violent forms. Terrorism and confrontational economic demands are symptoms of such malaise.

Support for economic development has become particularly necessary in the face of escalating energy costs and the effects of world recession. In 1974 the effect of quadrupled energy prices more than offset all assistance the developing countries received; and in 1975 their exports fell by almost $5 billion—the biggest drop in the postwar period.

At the same time, what is called "the North-South" dialogue offers unprecedented opportunities for cooperation between the rich and poor regions of the world. Dedication of our joint efforts now to an effective economic development strategy is essnetial to its progress. We must keep in mind the importance of the political as well as economic stakes in achieving this progress. This is obvious in terms of our bilateral relations. Additionally, the developing nations are more likely to cooperate with us in addressing such longer term, global issues as halting the spread of nuclear weapons or protecting the environment if they are confident of our cooperation in addressing their economic difficulties.

This may be a pivotal year. Particularly great opportunities bring with them greater demands on both our resources and the wisdom of our diplomacy.

The International Development Association now faces its fifth capital replenishment—a call to both the industrialized countries and the newly rich oil producers to address jointly the problems faced by the poorest countries. This is also the initial year of a multilateral long-term program to help develop the Sahelian region of Africa, which has been devastated by drought, but which now shows promise of recovery.

Private banks have helped the developing countries bridge their financial gaps during recent economic hard times, but at higher cost than most of these countries can sustain. A substantial increase in governmental and multilateral financing is necessary to sustain their development efforts and their access to private credit.

As this committee was early to see, the best way to judge our assistance efforts is by their effectiveness in meeting basic human needs. You were instrumental in charting "new directions" in bilateral foreign assistance. The Carter Administration concurs with them wholeheartedly. "New directions" call for greater emphasis on delivering aid directly to the poor people of the world. Similarly we are called upon to concern ourselves with the status of human rights in the countries we aid. We seek to meet both of these goals, fully mindful of the problems of implementation. How, for instance, are we to proceed in a case where our commitment to development and economic human rights may come into conflict with our commitment to principles of individual justice? No pat formula can resolve such a dilemma. We believe we can best deal with these questions on a case by-case, country-by-country basis, always applying the same set of general criteria. We hope that our example may influence other donors to multilateral aid organizations to adopt the pragmatic principles of "new directions". Meanwhile, we can and will strive for the most effective day-to-day administration of our assistance programs. We will judge our programs by their results, and not just in terms of this year's or next year's funding levels.

To do our part in responding to the needs of the world's poor and to meet new opportunities for development, we propose for Fiscal Year 1978 a total foreign assistance package of 7 billion 271 million dollars, an increase of one billion 670 million over 1977.

The bulk of that increase—a billion dollars, in fact—results from a procedural change. At the request of the Congress, we are in FY 1978 seeking appropriations for the callable capital of the international financial institutions, which in the immediate past was *authorized* but not appropriated. But as you know, none of the callable capital has ever been called, and the appropriations will probably never be spent. The remaining 670 million represents:

First, restoration of reductions made by the previous Administration in its request for security supporting assistance for the Middle East.

Second, substantial increases in our contributions to multilateral institutions.

And third, moderate increases in our bilateral development assistance program.

I submit a table for the record which outlines our budget request. We will be happy to provide more detail later if you wish. Now let me explain how the pieces of our aid proposals fit together, and why we believe each of them is important.

FOREIGN AID ITEMS INCLUDED IN FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATION ACT,[1] NEW BUDGET AUTHORITY

[In millions of dollars; fiscal years]

	1976 actual	1977 estimate	1978 Ford budget	1978 Proposed amendments	1978 Carter budget

[1] Excludes loan to Portugal and other items not considered "Foreign Aid."

BILATERAL DEVELOPMENT ASSISTANCE

While proposed increases in our bilateral development assistance programs are not so large as those for multilateral institutions, we believe that our bilateral programs are no less important an element in our general aid strategy. These bilateral programs are designed to address the basic human problems of food and agriculture, population and health and education and human resources development in the world's poor countries. These programs are the most direct way to put American skills and resources to work improving the human condition around the world, and spurring economic development. In concert with the recipient countries, we are seeking to promote growth with equity, and sound development policies. This is the core of the "new directions" approach. This effort is complemented by our bilateral food aid programs, which also are aimed primarily at poor countries.

MULTILATERAL ASSISTANCE

Our multilateral assistance programs through the international financial institutions complement the bilateral programs and serve the same broad purpose: to promote economic and social progress in the developing world. These institutions are mechanisms for sharing the aid burden. Donors contribute according to their ability to provide aid; the share of the United States has actually declined over the years. For instance, our share of the initial subscription in the International Development Association was almost 42 percent. In the proposed fifth replenishment, it will be less than 32 percent. Thus other nations are providing a steadily increasing share of the capital requirements of these banks.

These institutions also reinforce the concept of mutual responsibilities on the part of both developed and developing countries. When developing countries borrow from the international financial institutions, they are expected to adopt sound economic policies, to provide significant amounts of their own resources towards the common goal, and to accept the discipline imposed by obligations to repay their loans.

The financial structure of these institutions serves the purpose of development well. They borrow funds in capital markets to finance their "hard" lending operations at commercial rates. This capital is an important source of growth for middle-income developing countries that can service debt on commercial terms. These countries receive little U.S. capital assistance. The capital funds borrowed far exceed the capital contributed by donor members and are secured by pledges of callable capital. This year, as stated, we are for the first time seeking appropriations for this callable capital; these appropriations are unlikely to result in any budget outlays. For their "soft" loan operations to the poorest countries unable to borrow at commercial rates, these institutions rely on donor contributions.

Our leadership and influence in these institutions comes as a result of our sizeable contributions and the system of weighted voting linked to those contributions. Although our measure of control over the policies of the international financial institutions is less than over our own bilateral programs, this diminution of control is more than offset by the burden-sharing advantages that come with the participation of other major donors in these multilateral programs.

We will remain vigilant in encouraging these institutions to maintain their own financial soundness, and to invest their resources well.

We also want to expand our support of the UN Development program, and of the assistance given by the UN specialized agencies.

SECURITY SUPPORTING ASSISTANCE AND MILITARY ASSISTANCE

Our security supporting assistance is a vitally important part of our diplomatic efforts to achieve a just and lasting peace in the Middle East, and to provide the means to support a peaceful settlement in southern Africa.

Our Security Supporting Assistance request for Africa of $135 million includes these elements:

$100 million as our share in an international Zimbabwe Development Fund, to promote Zimbabwe's peaceful transition to majority rule. Its purposes would be rapid restructuring of the economy and of government services to provide more training, education, and economic opportunities for blacks, and the maintenance of confidence among skilled whites to encourage them not to abandon their jobs and homes. Our goal is to prevent a collapse of the Zimbabwe economy.

As part of our planning, we have consulted extensively with the British. We have solicited the views and support of 18 other potential donors. Initial responses have been encouraging.

Congressional support for this multilateral effort to promote economic development benefiting all segments of the Zimbabwe population could be a crucial factor in encouraging a negotiated political settlement. Its presence in this budget would be helpful in persuading other donors to contribute. We would, of course, consult closely with you as the outlines of the programs to be supported by this fund take shape, prior to any commitment of specific amounts.

We also seek $35 million for current development programs in Botswana, Lesotho, Swaziland and Zaire. These countries figure significantly in the political evolution underway in southern Africa. For this reason, these programs have been included under Security Supporting Assistance.

The United States has played a major role in efforts to achieve a peaceful transition to majority rule in southern Africa. It is critically important that this effort be reinforced by economic actions to promote political and economic stability, and to demonstrate that the U.S. can be counted upon to cooperate in a constructive manner. This aid program, therefore, is directly linked to our broader foreign policy objectives.

MILITARY ASSISTANCE

Our military security assistance programs enable friendly and allied countries to meet their basic security requirements, and thus add to our own security as well.

We consider the funds we are requesting essential to reassure our friends and allies of our reliability and consistency in their support.

In his address to the United Nations on March 17, President Carter spoke of the need for "a wider effort to reduce the flow of weapons to all the troubled spots of the globe." He promised American initiatives to limit the exports of conventional arms. The Administration has in fact embarked upon a thorough reexamination of our arms transfer policies.

We have already begun to make important changes in both our security assistance programs and our sales activities.

In support of the President's initiative, we have indicated to other supplier nations our intention to exercise restraint in exports and our hope that they will do so as well. We have also made clear to prospective buyers our hope that they will exercise their own restraint in turn.

We are taking steps to require arms manufacturers to seek State Department approval before they approach foreign governments about prospective sales. It is not our intention to restrict legitimate business activity. But we do have a responsibility to ensure that the sales promotion activities of private American firms in the sensitive area of arms and instruments of war do not conflict with our national security interests and foreign policy objectives.

Finally, we will provide the Congress with a statement justifying every Foreign Military Sales proposal. These justifications will provide you with the basis for the Administration's decision to approve the sale. We are now completing our review of pending sales cases.

It may well be that the review of arms transfer policies which we are conducting and our consultations with you will reveal the need for changes in existing legislation. In the meantime, I believe it would be imprudent to try to change parts of our evolving military assistance effort, and thus to threaten disruptive changes which could put heavy and unexpected burdens on our friends and allies.

CONCLUSION

I have welcomed this opportunity to present our foreign assistance programs. We believe they are coherent in concept and represent a justifiable level of effort.

HUMAN RIGHTS

Mr. CASE. Mr. President, there have been a number of expressions of concern for the cause of human rights in recent weeks, months, and years, but I would like to call to the attention of my colleagues an observation made recently.

We believe that a government that resorts to coercion and force against its own citizens demonstrates both its own weakness and its contempt for human integrity.

These words are from petitions signed by scores of persons attending an interfaith brotherhood meeting held last month by the Sanford Heights Presbyterian Church, Irvington, N.J., and the Beth David Jewish Center, of Newark, N.J.

The petitions to Soviet Party Leader Leonid Brezhnev and to the Soviet Ambassador to Washington, Anatoly Dobrynin, remind the Soviets of the human rights provisions of the U.N. charter and the 1975 Helsinski accord. The petitions, recently delivered to me in the form of two scrolls, also are an illustration of the concern Americans feel for the rights of individuals..

I ask unanimous consent that the text of the identical petitions be printed in the RECORD.

There being no objection, the petitions were ordered to be printed in the RECORD, as follows:

PETITION

FEBRUARY 15, 1977.

To: Leonid Brezhnev, First Secretary, CPSU.
To: Anatoly Dobrynin, Ambassador to the United States.

We, Christians and Jews, gathered tonight as friends and neighbors, are deeply grateful for the blessings of brotherhood, freedom and justice which we enjoy as a matter of right in our community and nation.

We assemble here to make known our profound anguish and concern about the Soviet Union's continuing denial of human rights of our coreligionists and other deprived groups and nationalities.

We believe that a government that resorts to coercion and force against its citizens demonstrates both its own weakness and its contempt for human integrity.

Therefore, we speak to you, a distinguished leader of the Soviet Union: respect the human rights provisions of the U.N. Charter—give your citizens their right to leave for countries of their choice, a right which is theirs under the U.N. Declaration of Human Rights; implement now those provisions of the Helsinki Agreement concerning freedom of thought, conscience, religion and belief as well as the right of people to emigrate.

NUCLEAR PROLIFERATION

Mr. RIBICOFF. Mr. President, I would like to call the attention of the Senate to an outstanding article on nuclear proliferation in the April issue of the Atlantic Monthly. The work is entitled "The Terrifying Prospect: Atomic Bombs Everywhere." The author is Prof. Daniel Yergin of the Harvard Business School.

The article deserves special attention for three reasons. It offers an excellent perspective on the history of the nuclear age from Hiroshima to the present. It explains in layman terms the scientific groundwork to understand the nuclear fuel cycle. But most importantly Prof. Yergin looks into the future and offers a warning of the dangers of nuclear proliferation. It is a sobering look which he calls the "terrifying prospect."

I am pleased that Professor Yergin has been startlingly frank yet constructive in offering suggestions for American policy. He suggests goals for nonproliferation, incentives for countries to avoid nuclear weapons capability, restrictions on uranium enrichment, restraint on the use of plutonium in reactors. and constructive commercial policies. Many of the goals will be considered tough and hard to accept. Yet they are realistic alternatives to unacceptable prospects.

Mr. President, Professor Yergin and editor Robert Manning of the Atlantic Monthly are to be commended for this piece of work. I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

THE TERRIFYING PROSPECT: ATOMIC BOMBS EVERYWHERE

In an automobile accident there is the long moment before impact when you see the other vehicle coming toward you, and you realize that a collision is imminent, and yet you cannot believe that it is going to happen. At last, you hear the sound of colliding metal, and you know that it is too late.

The people of the world are at such a moment, on course for a nuclear collision. The question is whether it is already too late to change direction. Nuclear warfare has been a possibility for more than three decades. But suddenly the threat has intensified—not because of political instability, but simply because of the prospect of widespread proliferation of nuclear armaments. It is not too much to say that we are entering the Second Nuclear Age—the age of proliferation.

While many countries use nuclear energy as a source of power, there are only six "nuclear weapon states" today—the United States, the Soviet Union, Britain, China, France, and India. But recent technical, economic, and political changes have brought nuclear weapons within easy reach of many others. Israel seems very close to a nuclear weapons capability though it feels safer being secretive on the subject. A host of other countries could soon qualify for admission to what newspapers call "the nuclear club"—countries such as South Korea, Iran, Pakistan, South Africa, Brazil, Argentina, Taiwan, and Spain. Turkey's defense minister has publicly discussed his country's developing nuclear weapons and the Yugoslav Communist party newspaper not long ago suggested that some atomic bombs would contribute to that nation's security. A number of Arab countries are exploring ways to obtain nuclear weapons. Libya's president has said that in the future "atomic weapons will be like traditional ones, possessed by every state according to its potential. We will have our share of this new weapon." So eager is Libya that a few years ago it actually went shopping for a bomb. Both France and China are reported to have refused to sell.

In the First Nuclear Age, a country that wanted a bomb had to mount an expensive, complex program. In the Second Nuclear Age, a country acquires the capability to produce a nuclear weapon with relative ease—as a by-product of developing nuclear power. According to present plans, some forty countries will have nuclear energy programs by 1985. Each program would produce enough nuclear material for three or more bombs. Most of them would have enough material for thirty or more bombs.

Looking to 1990, projections indicate that reactors in the Third World alone could be producing enough nuclear material for 3000 Hiroshima-sized bombs a year. In such circumstances, so-called "subnational" groups—terrorists—could take as hostages not planes but a reactor, or even an atomic bomb, or nuclear waste products, and then their terror would reach to an entire city or even a nation. The problem gets worse year by year In 1995, up to a hundred nations could have the knowledge, facilities, and raw materials that, with a little extra effort, would enable them to manufacture a bomb.

David Lilienthal is now seventy-seven years old. His experience with nuclear energy goes back almost to its beginnings. In 1946, he helped to draft America's first plan to control nuclear weapons and became the first chairman of the Atomic Energy Commission. He once shared the dream that the atom could bring good as well as bad into the world. But he now looks with something akin to horror at what is happening. He recently described the proliferated world as "the terrifying prospect for the young men and women who are looking forward to a future."

"I am glad," he added, "I am not a young man, and I am sorry for my children."

HOW WE GOT TO WHERE WE ARE

There were just three nuclear devices in the summer of 1945. The first, called "Trinity", was detonated in the New Mexico desert in July, proving that an atomic bomb would work. It was quickly followed by "Little Boy" over Hiroshima and "Fat Man" over Nagasaki. The American atomic arsenal was depleted, but it did not matter, for it had brought an end to the war with Japan. The First Nuclear Age had begun.

In 1945 there was still only one nuclear weapon state, the United States, which went on producing bombs. Right from the beginning, two questions dominated all considerations. Who else would develop a bomb? And when? American leaders tried to find a way to keep the fearful new invention under surveillance. By the end of 1946, it was clear that the United States and the Soviet Union would not be able to agree on an international control system.

President Truman confidently pronounced the American monopoly a "sacred trust." Most U.S. leaders assumed that it would take the Russians many years to achieve their own capability. (A number of scientists did not agree.) The illusion was shattered in early September 1949, when it was learned that the Russians had successfully detonated an atomic device in Siberia in late August. So then there were two nuclear powers, and a process of mutual deterrence was begun.

The British felt they had been deprived of

the payoff for their wartime collaboration on atomic developments with the United States. They could hardly be a Great Power without nuclear weapons. (The British chiefs of staffs had privately warned: "To have no share in what is recognized as the main deterrent in the Cold War and the only Allied offensive in a world war would seriously weaken British influence.") So on October 3, 1952, they tested a bomb on the Monte Bello islands off Australia. Now there were three atomic weapon states.

The French, especially under De Gaulle, also wanted to maintain the Great Power status, and they were not going to depend on the "Anglo-Saxons." They exploded their bomb in the Sahara on February 13, 1960. "Hurrah for France!" De Gaulle telegraphed the French minister in charge. Now there were four nuclear weapon states.

Between 1955 and 1959, the Soviets provided their Chinese comrades with nuclear know-how. In 1959, as the Sino-Soviet rift developed, the Russians withdrew their assistance, but it was too late. "Whether or not nuclear weapons help peace depends on who possesses them," the Chinese announced in 1963. And on October 16, 1964, the Chinese exploded their first nuclear weapon in the Takla Makan desert in the province of Sinkiang.

There were now five nuclear weapon states. They continued to test atomic and hydrogen bombs, to perfect them, and to increase their number. They developed stockpiles, as well as the planes and missiles required to deliver the bombs from the country of manufacture to their targets. But no new players joined the game. In the possession of nuclear weapons by these five, there seemed a kind of stability, a mutual deterrence. There was even something symmetrical and fitting about it, for the five were the Great Powers. Attention shifted to such issues as limited war, guerrillas, regional conflicts, nationalism, while proliferation and nuclear dangers receded as subjects of concern. That situation lasted for almost a decade after China's first explosion, that is, until May 18, 1974.

THE SECOND NUCLEAR AGE

On that day, shortly after nine in the morning, the Indian foreign minister received a phone message: "The Buddha is smiling." An hour or so earlier, in an underground site in the Rajasthan desert, a hundred miles from the Pakistan border, the Indian Atomic Energy Commission had set off a nuclear device. It was officially announced to the world as a "peaceful nuclear explosive experiment." But there is no discernible difference between a "peaceful nuclear explosion" and the detonation of a prototype for an atomic bomb. Indeed, no satisfactory peaceful use has yet been found for nuclear explosions. India had become, in the words of an official in the U.S. Arms Control and Disarmament Agency, "a fourth-rate nuclear power." The Indian device was similar in design and power to the Nagasaki bomb, and, while lacking a large arsenal or sophisticated delivery systems, India is certainly more advanced than the United States was after Hiroshima and Nagasaki.

Mrs. Gandhi congratulated her scientists: "They worked hard and have done a good, clean job." The Indian newspapers headlined, "Nation is Thrilled" and "Indian Genius Triumphs." Canada, which had shared its technology with India, expressed shock that a country with so many economic problems, and in the face of assurances it had given Canada, would divert precious resources in order to develop nuclear weapons. The Indians said they had not violated any assurances because they had used uranium mined in India to make the explosive. Canada suspended and then canceled its $100 million a year assistance program with India.

The Indian test in the Rajasthan desert ushered in the Second Nuclear Age. It dramatized the fact that we could soon be living in the midst of what has been called "a nuclear weapons crowd." As the director of the Indian Institute for Defense Studies reminded the rest of the world, "The nuclear powers thought they could simply lock up technology. It was absurd."

Powerful forces have promoted the spread of nuclear technology. To make sense of them, we need first to back up several months from the Indian explosion to the "October Revolution" effected by the OPEC oil cartel in the autumn of 1973. The October Revolution revealed several dangers to most industrial and developing countries. These countries were highly vulnerable for they were dependent primarily on a small number of Middle Eastern producers for their supplies. The price hikes delivered a stunning blow to their economies, and many people became convinced that the world will run out of oil within a few decades.

Fortunately, or so it seemed at the time, a "deus ex technologica" was standing in the wings to rescue the world from dependence on OPEC oil—nuclear power. "With the increase in the world of both population and industrialization, we will have no choice for the years after 2000 but to accept nuclear energy," observed a senior official concerned with energy for the European Community in the autumn of 1975. "Everybody is convinced that after 1980 nuclear energy will develop very quickly."

But as the renewed drive for nuclear power took shape, relatively few people were willing to face up to a most alarming fact—that when a country develops a nuclear capability, it is much of the way toward developing a nuclear device. "A great many countries," the strategic Albert Wohlstetter of the University of Chicago has pointed out, "as a result of their civilian nuclear energy programs and the policies of nuclear exporters, can come within days or hours of assembling nuclear explosives without plainly breaking any of their promises to abstain from making or receiving them."

"There are not two atoms, one peaceful and one military," he said. "They are the same atom."

THE PLUTONIUM ECONOMY

The central problem is the "nuclear fuel cycle." This term suggests something pleasing, fulfilling, natural. It is not natural, for it involves tampering with natural uranium to create a new form of uranium as well as a number of elements that do not exist in nature and are very dangerous.

The cycle has, depending on how detailed one gets, between seven and eleven steps. The first several involve the mining of uranium and its preparation for the reactor. Then comes its actual use as fuel. The last steps involve the storage and disposition of the nuclear waste—that is, the leftovers after the uranium has done its job.

Two points in this fuel cycle intersect with the manufacture of an atomic bomb. Both stages produce what is variously known as fissionable or "fissile" material, which could be used as an explosive rather than a source of nuclear power.

As it is mined, uranium is not quite suited for nuclear reactors. It consists mostly of the stable U–238, with typically a .7 percent concentration of the isotope U–235. It needs to be "enriched" to about 3 percent U–235 in order to sustain a controlled chain reaction in the type of reactor developed in the United States. A nation that has enrichment facilities can go ahead and enrich the uranium to a concentration of U–235 much higher than 3 percent. Then it is in a state suitable for use as the explosive core of an atomic bomb. Highly enriched uranium was the material used in the Hiroshima bomb.

Further along in the fuel cycle, at what is called the "back end," after the enriched uranium has been consumed, there is the nuclear waste or ash, containing many different radioactive and toxic materials. Some of these wastes can be "chemically separated" and used again as fuel in the reactor. The two principal materials so recoverable are uranium and plutonium, a man-made element. Plutonium was the substance of the Trinity and Nagasaki bombs.

The most intense concern today focuses on the plutonium at the back end. Uranium enrichment is a costly, complex process. While it is not easy to extract the plutonium from the other wastes, it can be done through what is now the rather standard and less costly process of chemical separation. So even nations dependent on outside sources of enriched uranium can use it to produce their own plutonium.

Plutonium is the nub of the proliferation problem today. It has two uses. It can be separated for use as a fuel in a reactor, and there are those who think such plutonium will become a major nuclear fuel in the future. (Currently, reprocessing for this purpose is being carried out only on a small-scale developmental basis in Europe and the United States. No one has yet found this procedure economical.) But plutonium can also be used as one of the two basic materials for an atomic bomb.

The important point is that no country need decide that it specifically *wants* to accumulate stocks of plutonium. In buying a reactor from country Y, country X does not have to make a conscious decision to acquire nuclear weapons. The thought can be a mere haze, neither analyzed by planners in the foreign ministry nor costed by the economists in the budget office. The opportunity is simply handed over with the keys to the reactor, All that needs to be done is to start up the reactor, and plutonium becomes one of the country's resources. The plutonium used in the core of the Indian bomb was chemically separated from the radioactive exhaust materials produced in reactors outside Bombay.

A good-sized but still standard reactor could produce 200 kilograms of plutonium a year, while a crude implosion bomb requires a mere ten kilograms of plutonium. It is the contrast between these two numbers that causes so much alarm. For they indicate that a satisfactorily operating atomic reactor would produce enough material for the explosive core of a bomb every two or three weeks. And in The Last Chance, his new book on proliferation, William Epstein suggests that a plant for separating plutonium for the purpose of making a bomb could be constructed for as little as $3 million. If current plans and developments for nuclear power go ahead, there will be such a plutonium glut—as a source of fuel, in international trade, and in waste products—that people have begun to speak of the dangers of a widespread "plutonium economy." Plutonium will become extravagantly widespread if the breeder reactor comes into use.

"The real problem of proliferation today is not that there are numerous countries 'chomping at the bit' to get nuclear weapons," Albert Wohlstetter noted. "But rather that all the non-nuclear nations, without making any conscious decision to build nuclear weapons, are drifting upward to higher categories of competence."

Of course, a nation that has neither enrichment nor reprocessing facilities would find it very difficult to do anything with its fissile material except use it as a source of power. Therefore, much of the thinking about proliferation focuses on ways to "safeguard" enrichment and reprocessing.

INCENTIVES

The October Revolution gave another kind of boost to atomic energy. The East–West split has been the historic impetus for the nuclear arms race of the last three decades. The United States, Britain, and France on

one side, and the Soviet Union and China on the other, built up their stockpiles primarily to deter the other side. (Although, in the last several years, China and Russia of course have also been deterring each other.) But the October Revolution dramatized a different division—between North and South—pitting the industrial world in the Northern Hemisphere against the Third World "developing nations" in the Southern Hemisphere. In the United Nations and many other councils, the Third World countries have been asserting their independence, declaiming on the subject of their equality, and, in general, blaming the First World for all their problems. Some of them believe that the acquisition of nuclear weapons is one of the most visible ways to assert their power and influence. It does no good for Westerners to express worry about the dangers for everybody in the spread of nuclear weapons, for the Third World snaps back (in the words of a leading Indian spokesman) that such concerns are merely "modern versions of the doctrine of the white man's burden." Nuclear weapons are taken as a sign of prestige and influence. After all, it was not Mrs. Gandhi but Charles de Gaulle who announced, on the day of its first nuclear explosion, that France was "stronger and prouder since this morning." But it is not only countries such as India that want to augment their prestige and influence with nuclear weapons. Now, as a result of the drastic increase in oil prices, a country such as Libya has not only the desire and egoism but also the wherewithal in cash to buy nuclear technology. It is unsettling, to say the least, to think of nuclear weapons in the hands of Libya's leader, Qaddafi, who even in the Arab world is thought of as erratic ("a mental case," Anwar Sadat has called him). "It is well known that Qaddafi would like to have an atomic weapon," said a CIA analyst. "Some people think he is too irrational and unstable but he has shown himself rational enough in managing Libya." Having failed to buy a bomb, Qaddafi is now reported to be trying to assemble Arab nuclear scientists to develop his own nuclear weapons capability.

There are more specific incentives at work as well. Such countries as India, Brazil, and Iran are striving for what is now known as "regional hegemony." Nuclear weapons are one way to assert their seigneurial rights. But such steps of course only encourage further proliferation. Just as China's nuclear test in 1964 helped induce India's effort to make the bomb, so India's test a decade later had much the same effect on Pakistan, whose prime minister warned that if India took any more steps in the direction of building an atomic arsenal, "We will eat leaves and grass, even go hungry, but we will have to get one of our own." Pakistan is now strenuously seeking to assure itself that it too has the weapons option. Iran has indicated that if other countries in the region come into possession of nuclear weapons, Iran will also develop them. The shah has said, "If every upstart in the region acquires atomic bombs, then Iran must have them as well."

For some there is the basic incentive to go nuclear—to buttress national survival. Three million Israelis face a mostly hostile Arab world of over 100 million people. The nuclear weapon is the deterrent of last resort, and Israel may now be only "a screwdriver's turn away" from having a nuclear capability. But the Israelis have never said they have any bombs, for that would only increase the Arab urgency to obtain their own. The Israelis have concluded that, for the time being, their best deterrent is one clothed in calculated ambiguity.

There is a final incentive. For decades a number of nations have lived and prospered under America's "nuclear umbrella." It has been understood, or implicitly guaranteed by treaty, that if their security is at stake, the U.S. nuclear arsenal stands behind them. But the umbrella has lost some of its covering in recent years. South Korea is not sure that it is protected anymore. Taiwan worries that it will soon be excluded. Therefore, as nations fear that they will be standing in an exposed place, they are sorely tempted to raise their own umbrellas, to develop an independent deterrent.

LIVING IN A NUCLEAR CROWD: BAD DREAMS

Even if we cannot predict how a conflict might occur, we can develop the likely possibilities.

(1) Undermining the balance of terror. So long as there was a sharp distinction between the nuclear weapon states and all the rest, a kind of stability—absurd but real—prevailed. The superpowers have, at least to date, been in agreement on an implicit rule to contain crisis. The closest they ever came to breaking that rule was over Cuba in 1962. But as more and more states acquire nuclear capability, more and more nations (including our own) will feel a heightened sense of insecurity. Nuclear proliferation raises havoc with all the calculations about the nuclear relationship between the United States and the Soviet Union. Current defense thinking is based on the notion that in order to have nuclear stability, there must be parity and balance between the two superpowers, so that no intelligent person will make a mistake.

"There cannot be a balance where there are many different parties with many different objectives, and with entirely different levels of technology," says scientist Herbert York, who has been involved in the American atomic weapons program since World War II. "So if there is—and there does seem to have been—a stability in the nuclear relationship between the United States and the Soviet Union, the stability will be wiped out by proliferation. Even its theoretical underpinnings will be wiped out."

On a visit to China before he became secretary of state, Cyrus Vance pointed to one form of the danger when, in a discussion with Teng Hsiao-p'ing, he said, "The hazards of accidental launch are real and could have devastating effects if one didn't know where the weapon was launched from. Accidental launching will become more likely with the indiscriminate spread of nuclear weapons."

(2) The chain reaction. One can easily imagine Israel being pushed to the wall. Arab forces are advancing on Tel Aviv. The Israelis begin assembling nuclear weapons. The Russians learn of this and dispatch warheads to Egypt. The United States in turn detects the Soviet warheads in transit. And the world is on the edge of destruction. But the chain can start with any client states. Both Iran and Iraq could become nuclear weapon states. A border clash between them could escalate into a nuclear exchange between the two countries, one of them a key American ally, the other tied by treaty to the Soviet Union. How long could the superpowers stay out? Where would it all end?

(3) The easing of the taboo. The world slowly becomes accustomed to the idea that nuclear weapons are not merely for deterrence, but actually of considerable value in a war. Perhaps India and Pakistan go to war, or Brazil and Argentina. Each side uses nuclear weapons, millions are killed, but one side emerges a decisive winner. While the superpowers are not drawn in, this spectacle reduces the taboo and makes it easier for other ambitious leaders to contemplate the use of nuclear weapons. There is also the Crazy State model. A Libya or a Uganda, almost like a terrorist, could in the future use its nuclear bombs as a bargaining chip to achieve some bizarre and self-aggrandizing aim.

(4) Microproliferation. A terrorist group or even the Mafia attempts to steal plutonium—despite the toxic risks—from either a power station or a reprocessing plant, or while it is in transit. This they use to blackmail one or more governments, either for money or for some political aim. Physical security is never perfect. Not long ago, a lunatic walked unnoticed into the control room of a French nuclear plant and randomly threw several switches before being detected. Such a danger is so real that in the United States guards now have shoot-to-kill orders at fourteen federal nuclear installations. As the number of power stations increases, as the trade in nuclear materials and the plutonium economy expand, and as a covert, semilegal "gray market" in sensitive items grows, the threats become so serious that they result in security measures that have a corrosive effect on democratic institutions, for people come to fear that the dangers could not be met without a more authoritarian political system.

The microproliferation threats, however, are more likely to occur in the unstable political systems of the Third World. Thomas Schelling of Harvard University engaged in some chilling speculations in a recent issue of the journal International Security. How different might the course of events have been in Lebanon in late 1975 and early 1976, he asked, had that country had even a small pilot plant for extracting plutonium from spent fuel? "Who would have guarded the facilities? Who would have destroyed them, from nearby or from afar, at the risk of spreading deadly plutonium locally to keep bomb material from falling into mischievous hands? What outside country might have invaded if the spoils of war would have included a nuclear-weapon capability, even only to deny that capability to some other greedy neighbor?

"One thing is certain: in years to come there will be military violence in countries that have sizable nuclear power industries."

Perhaps such possibilities will encourage some caution. Would the president of Egypt or the shah of Iran really want to live with the risk that a terrorist group, or some ambitious colonels, might seize control of the country's atomic bombs in the course of attempting a coup? Argentina has already had a foretaste of what microproliferation can mean. Not long ago a group of terrorists temporarily seized a nucelar power station (still under construction) some sixty miles north of Buenos Aires.

(5) New patterns. We still tend to think that all major nuclear developments will involve advanced industrial states. But one can see the outline of new "atomic alliances" crisscrossing the world. Already, it is reported, Argentinian scientists are at work in Iran's nuclear program, and Egyptian scientists are being trained at the nuclear facility that gave India its device. (India has also noted that after its test, it received discreet inquiries from several countries interested in buying a bomb. The Indians say they refuse to sell.)

AMERICA'S TWO ATOMS POLICY

From 1949, when the Americans realized that the Russians had the bomb, until 1974, when the Indians exploded their device and the Buddha smiled, proliferation was not of much concern in Washington. This omission seems very odd from the perspective of 1977. After all, one would think that the United States, as progenitor of nuclear weapons and nuclear power, would have had some proprietary interest in the subsequent spawning and that special attention would be given to the relationship between atomic power and the atomic bomb. Such was indeed the case in the years immediately after World War II. In 1946, Robert Oppenheimer pointed out that the "heart of the problem" of international control was "the close tech-

nical parallelism and interrelation of the peaceful and the military applications of atomic energy.

But this connection was quickly forgotten. After Hiroshima and Nagasaki, there was a powerful emotional drive to find peaceful uses, something good to do wtih the atom, in order, somehow, to compensate for its horrors. Furthermore, once the Russians had the bomb, the worst seemed to have happened, and fears about the spread were forgotten. There were also strong economic incentives. And so, in 1953, President Eisenhower proposed Project Plowshare and Atoms-for-Peace. The next year, the United States approved the export of nuclear power technology to other countries.

Thereafter, American interests in this realm were defined by a nuclear energy Establishment: government agencies such as the Atomic Energy Commission and the Defense Department; the congressional Joint Atomic Energy Committee; and such powerful industrial allies as Westinghouse and General Electric. Both the AEC and the Joint Committee were committed to the "maximum" utilization of atomic energy. The Joint Committee may well have been the most powerful congressional committee in history. It certainly did a masterful job of pushing a disproportionate share of government research funds into nuclear energy, to the detriment (as we know today) of other forms of energy research. Since the Establishment wanted to promote nuclear power on a worldwide basis, little thought was given to proliferation or to nuclear waste disposal. It has only recently been discovered that the Atomic Energy Commission lost track of sizable quantities of weapons-grade material leased to a score of foreign countries in the 1950s and 1960s. "For twenty years," said Victor Gilinsky, a member of the Nuclear Regulatory Commission, "[the nuclear export bureaucracy] has been freewheeling through the domains of diplomacy and international commerce—out of public view, and under the protection of a myopic Atomic Energy Commission and its own congressional committee."

When an organization or a group of organizations wants to "sell" something badly enough, whether it be nuclear power or a new drug, eyes tend to be shut to possible side effects, especially if they seem far off. Such is what happened with the Atoms-for-Peace program. "Many mistakes were made in the way we executed the idea," observed Fred Ikle, former director of the Arms Control and Disarmament Agency. "We now can see many forks in the road, many turning points where we could have taken a different technological direction. We could have chosen a course that might have greatly reduced the risks of nuclear proliferation without any loss in terms of economical operation of power reactors."

But we did not. The conventional American reactor, the so-called light-water reactor, is after all, a spin-off from the World War II atom project, for which plutonium was a highly desired end product, and, more directly, from the subsequent development of the Navy's nuclear-powered submarines. Habit was strong, and little thought was given to designing reactors that would not involve the dangerous steps in the fuel cycle.

"What is used for reactor design in the United States today is not the same design as for making plutonium for military purposes," said George Kistiakowsky, one of the most prominent scientists in the Manhattan Project, subsequently science adviser to President Eisenhower, and currently professor emeritus of chemistry at Harvard. "But our commercial light-water reactors are derivative copies of the submarine reactor This is the result of the AEC's having been staffed with people who had worked on Admiral Rickover's nuclear submarine program. There could have been other pathways. The Canadian design is in some ways less risky, because its spent fuel is not very desirable for plutonium extraction. The British design is different again. But there was a determined drive by the AEC to adopt the light-water reactor because people in the AEC were to a large degree Rickover's people." In addition, General Electric and Westinghouse were eager to capitalize commercially on their experience in the Navy's reactor program.

Those in the nuclear Establishment held to an underlying faith that the appropriate technological "fixes" would be found for all problems—at the appropriate time. Furthermore, proliferation dangers seemed pretty far away. By the 1960s, the United States was not much worried that its allies in the First World, beyond the French and the British, would seek their own nuclear arsenals. Certainly there was no need to worry that the Russians would be so reckless as to trust their potentially unreliable allies in Eastern Europe with nuclear weapons. And it was difficult to imagine in the 1950s and the 1960s that Third World nations would organize themselves sufficiently and acquire the wherewithal and skills to move on to a nuclear weapons capability. That was a severe miscalculation.

After the first Chinese test in 1964, President Johnson, at the instigation of Defense Secretary Robert McNamara, appointed a high-level committee under Roswell Gilpatric to assess the dangers of proliferation and recommend whether or not non-proliferation should be made a top priority of U.S. foreign policy. The preliminary international negotiations for a nuclear non-proliferation treaty (the NPT) had already begun. Johnson was also looking for gestures before the November presidential election that would show that he was "doing good."

One participant recalled what happened: "The committee worked through the fall of 1964 and the beginning of the winter. We had come up with what looked like a unanimous agreement that proliferation was very dangerous and should be made a very high priority concern. Shortly after Johnson's inauguration in 1965, we had a meeting with Johnson, McNamara, Rusk, and the chairman of the joint chiefs, where we presented our views. Then something very unpleasant happened. One of the most distinguished members of our committee announced that he would not read his part of the briefing papers, but instead would speak ad lib. Instead of speaking for the non-proliferation treaty, he argued that we should arm our NATO allies with nuclear weapons as part of the so-called multilateral force, that this was far more important than the NPT. This weakened the impact of all the other presentations. The impact was then destroyed totally by Dean Rusk, who violently attacked the whole idea of the NPT. He said our conclusions were very dangerous to the security of the United States, and that we should not prepare a written report because it would be leaked. Johnson himself was not very attentive. There was this business where he had a telephone under his desk. He dialed continuously and kept whispering into it. He did this dozens of times while we were talking. Rusk said that our report was unrealistic and unimportant. McNamara tried to defend it, but rather feebly. Johnson then curtly thanked us and ordered us not to write anything and not to discuss it. That was the end of that. Of course, two or three years later he changed his mind." A few crucial years had been lost.

HOW SAFE ARE SAFEGUARDS? OR WHY THE NPT IS ONLY A MEDIUM YIELD DEVICE

Finally, in 1968, the United States did reach agreement with the Soviet Union and other states on a non-proliferation treaty. It went into force in 1970. The International Atomic Energy Agency became the "executive" for the NPT. Headquartered in Vienna, the IAEA was founded in 1957 as a result of the drive to find a peaceful atom that would do good around the world. The agency was supposed to promote peaceful uses of atomic energy, but at the same time to apply "safeguards" to prevent the diversion of peaceful developments to military purposes.

Today, the IAEA is a relatively small, efficient body affiliated with, but not subject to, the United Nations. It is one of the last international organizations to have escaped the Third World agitation and politicking that has so disrupted the work of most other international organizations, including the UN General Assembly.

The IAEA's safeguard functions expanded with the non-proliferation treaty, and the IAEA is now the cornerstone of what might be called the NPT system.

Lately, there has been some tendency to judge too harshly the NPT system. Hedley Bull, a prominent arms control expert, has pointed out some of its accomplishments: "The NPT has made an important contribution to the control of proliferation by advertising the fact that the spread of nuclear weapons is not inevitable, and so strengthening the hand of antinuclear weapons forces in many countries; by enabling countries which wish to remain without nuclear weapons to reassure each other by an exchange of pledges; by contributing to the emergence of détente, especially in Europe; and by the encouragement it has given to the development of International Atomic Energy Agency safeguards. The treaty is not simply the instrument of the nuclear states that are parties to it, but also reflects the desire of many non-nuclear weapons parties to impose limitations on each other."

And an official of the United States Arms Control and Disarmament Agency added: It's indispensable. We couldn't be where we are without it."

All that is true, but it is also now clear that all that is not enough. Since the technological and economic barriers to proliferation are coming down, the effective potential barriers are political, and the most important is certainly the non-proliferation treaty. Unhappily, it is a product of the First Nuclear Age, and is not very effective in the Second.

The NPT system has a number of notable problems. While the IAEA has been getting stronger all the time, it is still not up to the new pressures thrust upon it. It was fine in a world of relatively few nuclear states, but it will need many more trained people to carry out safeguards in a world with hundreds of reactors, and it is not at all obvious where such people will come from.

One can also read too much into safeguards. The IAEA can evaluate plans for atomic facilities, review records of the movement and use of nuclear materials, and carry out inspection and surveillance of plants—where and when allowed by the host country. It is an accounting system. What this comes down to is a threat, "the deterrance of nuclear materials diversion by detection." But detection can be evaded, and agreements canceled. What would happen if cheating were discovered? IAEA officials have no definite channels for making their findings public. To whom would the information be conveyed? Who would be the policeman? That mysterious and often sluggish creature "world public opinion"? What would be the punishment? Even if the United States and the USSR got together to apply heavy pressure on the violator, would not many nations see this as rather hypocritical—as two nations with tens of thousands of nuclear weapons getting mad at some developing country that only wants two or three little ones?

There is another problem with safeguards: reprocessing large quantities of plutonium for commercial use in a reactor is still a relatively complicated and demanding undertak-

ing. But to reprocess for just a few bombs is a much easier task. The quantities needed are so much smaller. The requisite facility might require only a dozen people to operate it.

The rationale of safeguards—and here is the critical point—is that the diversion from peaceful use will be discovered well before the violator reaches a nuclear weapons capability, thus exposing him to the risk of international reaction. And yet when a nation has not only reactors and low-enriched uranium but also a stockpile of separated plutonium or facilities for separation, then the value of safeguards—accounting and inspection procedures—is greatly diminished. Even though safeguarded and stockpiled for peaceful future uses, this plutonium is only a short step away from use as an explosive.

"Should the owner decide, for whatever reason, on a sudden move to appropriate the material for illicit purposes," Victor Gilinsky has said, "the time between diversion of plutonium and complete weapons can be sharply reduced to what might be a matter of weeks, or conceivably days. Under these circumstances, even if it were assumed that IAEA inspection and monitoring systems were improved, it is hard to imagine that an international reaction could be mustered before the assembly of nuclear weapons was completed."

The second problem with the NPT is that although over a hundred countries have ratified the treaty, China, France, India, Argentina, Brazil, Pakistan, Saudi Arabia, Israel, and Spain have given no indication of signing.

The third problem is the NPT's two-tier structure. Under its definition, there are two kinds of states, nuclear weapon states and non-nuclear weapon states. A country that carried out an explosion before 1967 is officially a nuclear weapon state. This distinction rather freezes the relationships, and has caused non-weapon states to charge "discrimination." The weapon states do have special rights and privileges and can go on building up their nuclear arsenals. Thus discontent and permanent instability are built into the NPT system.

The fourth problem goes back to the essential issue. The NPT and the IAEA are caught in a contradiction. On the one hand, they aim to prevent the proliferation of nuclear weapons. On the other hand, they are charged with encouraging peaceful nuclear uses. But to repeat, there is only one atom. So the NPT system encourages the diffusion of the capability to become a nuclear weapon state swiftly, even while trying to prevent it. Also, a nation can opt out after having benefited from sharing the technology of other members. "I don't think withdrawal would be lightly treated," said one U.S. official much involved with the NPT. But after all, a country need give only ninety days' notice, and then it can legally quit the NPT.

THAT GERMAN-BRAZILIAN DEAL

In current nuclear lore the German-Brazilian deal ranks in importance with India's explosion. And this particular bargain shows how complex the whole problem of proliferation has become, how many different interests are involved.

On June 27, 1975, it was formally agreed that Brazil would purchase from West Germany an entire nuclear industry, that is, the technology required for the whole fuel cycle. Not only will this be the largest industrial nuclear deal ever, but it is also a huge deal in any terms—worth something over $8 billion to the Germans. In addition to reactors, Brazil will buy those gateways to becoming a nuclear weapon state: facilities for uranium enrichment and for chemical separation of plutonium. This means that Brazil will have two nuclear weapons options—to enrich uranium to bomb-level concentration, and to separate plutonium from the other wastes.

Rather late in the day, the United States realized what was happening: Germany was selling Brazil the wherewithal to manufacture atomic bombs. At one point, the American firm Bechtel had sought to team up with Westinghouse to offer a similar package, but the U.S. government had forbidden it, for techniques of uranium enrichment and chemical separation are considered too dangerous to export. To make matters worse, Brazil has refused to sign the NPT, and has signaled its interest at different times in acquiring atomic bombs.

Brazil had its own compelling motives for going ahead. The OPEC price hike had hit it very hard, and the Brazilians feared that their growing economy might soon be starved of adequate energy. In addition, there are enough uncertainties about U.S. policy on exporting enriched uranium that the Brazilians wanted to have their own source.

The Germans also had their good reasons to go ahead. They are worried about future sources of raw uranium. In this deal, they will share in putative Brazilian uranium strikes. They also regard American complaints as sour grapes—because an American company did not get the reactor business. The fierce, often mercantilist, economic rivalry to sell nuclear technology can be too easily overlooked. Where profits are the criteria, foreign policy considerations can be shoved to the background. The competition can get very rough. To get the business, the Brazilians made clear, the Germans had to sweeten the deal and do better than Westinghouse—and that meant adding the enrichment and reprocessing facilities that the U.S. government had stricken from the American offer.

The deal is of course of vast economic importance to the Germans, not only in terms of employment, but in providing orders for the troubled German reactor industry. "Wherever we look—in Italy, Spain, Sweden, Thailand, South Korea—the Americans have already been there." So rationalized an executive of the German reactor manufacturer. "The Third World is the only open market left. To fully exploit our nuclear power plant capacity, we have to land at least three contracts a year for delivery abroad. The market here is about saturated and the United States has cornered most of the rest of Europe, so we have to concentrate on the Third World."

The deal may still go ahead in its current form, though a number of major technical problems remain. As one joke has it, "The Germans have sold an enrichment process that does not work, to enrich Brazilian uranium that does not exist." The financial stability of the main German supplier is also questioned in some quarters. The Carter Administration is putting pressure on the West German government, as is a new anti-nuclear lobby within Germany. But at this stage, the deal is still on. Such things as this make large-scale proliferation seem inevitable, hardly to be stayed or deterred by reasonable fears.

AMERICA'S TWO ATOMS POLICY GOES UP IN SMOKE

The German-Brazilian deal caught the U.S. government mostly unawares. But the Indian explosion a year earlier had already severely shaken American complacency.

Initially several congressmen became alarmed at what was happening abroad—and what was not happening in Washington. "It became very apparent that no one was paying any attention," said Senator Abraham Ribicoff. "Here was an issue on which the United States and the Soviet Union saw eye to eye, but no one was trying to get them together. Meanwhile, France and West Germany were moving into the nuclear export business in a big way. No one cared very much about the issue in the U.S. government. It was out of sight of the State Department. The Atomic Energy Commission was not paying much attention to this stuff, nor was the Joint Atomic Energy Committee. I have no proof that the nuclear bureaucracy had a vested interest in keeping it quiet, but we certainly weren't doing anything."

The State Department and the Arms Control and Disarmament Agency joined the congressmen in taking up the issue.

The most important initiative was Henry Kissinger's convening of a "Suppliers Club" in London after the Indian test. It was composed of seven possible exporting nations—the United States, Russia, Britain, France, West Germany, Canada, and Japan. The Americans and the Russians were not far apart on the problem. As a Soviet arms controller said recently. "Our interests on proliferation are almost identical with you Americans." Indeed, a CIA analyst observed, "There is no more sincere antiproliferator than the USSR. One reason is that a number of the countries that might soon become nuclear weapon states are highly antagonistic to the Soviet Union and not too far away from it."

It was much more difficult for the Americans to work out a common position with the French and Germans, who suspected a plot by U.S. commercial interests to recapture the whole business. "The American case would be better if you still had your virginity," is the way a German diplomat put it recently. "You've had a good time for some years and now you want to be pure." After all, he might have added, it was the United States that had trained 1100 Indian nuclear scientists and engineers prior to 1974.

Nevertheless, a year ago, the seven supplier nations were able to arrive at a "code of conduct," an agreement of modest but significant impact. It provides for improved safeguards and agreement not to assist any nuclear explosions, even "peaceful" ones, and for more attention to physical security. "Frankly," said one ACDA official, "much more has been accomplished than could have been reasonably expected. It is a very useful process."

Last autumn the French indicated that their stance on proliferation was "parallel" to that of the United States and that they would cooperate with the other members of the Suppliers Club. "It has required more courage than you can imagine to change our policies," said an official in the French Foreign Ministry. "We have no domestic political pressure against proliferation, and very strong vested bureaucratic and commercial pressures for exports." The French have, though, refused to budge on the sale of a plutonium reprocessing plant to Pakistan despite U.S. pressure. "And Pakistan was a matter of principle. We can go ahead with you in the future. But we can't go back on deals we've already made. Pakistan is the main one. In any event, it is a very small reprocessing plant. Much more important is the German-Brazilian deal."

The original seven members in the Suppliers Club have now been joined by eight others—Belgium, the Netherlands, Sweden, Italy, East Germany, Czechoslovakia, Poland, and Switzerland—and their secret deliberations continue in London.

U.S. policy, however, has remained schizophrenic. Nuclear power has strong advocates. The core of the now-defunct Atomic Energy Commission resides in the Energy Research and Development Administration and, as one official put it, "There's a lot of inertia in ERDA." It took two years before the Ford Administration would admit that U.S. nuclear materials were used for the Indian explosion. Official policy projected 200 new

power plants in the United States by 1985—twenty a year—and encouraged exports. President Ford also wanted to invite private industry into the nuclear enrichment business (now a government monopoly), which would only have enlarged the constituency in favor of rapid expansion of the nuclear business.

The 1976 presidential election changed things. During the campaign, Jimmy Carter seemed to be personally involved with the proliferation issue. After all, he had once received a dangerous dose of radiation while helping to deactivate a damaged reactor in Canada. He spoke strongly about the dangers of proliferation, strongly enough to worry Ford. As a secret memorandum warned Ford in September, there was now "considerable sentiment for a forceful nonproliferation initiative domestically." On October 28, Ford announced a major shift in U.S. policy. He downgraded the emphasis on plutonium reprocessing. He said that future exports would go only to countries that have either signed the NPT or put their entire nuclear energy programs under international safeguards. He also promised that such nations would be guaranteed enriched uranium from the United States. While politics instigated the change, it was really the outcome of a rough struggle between two competing views. The first, representing the attitudes of the old nuclear bureaucracy, wanted to continue to push nuclear power development, especially the breeder reactor, which actually produces more plutonium than it consumes. On the other side was the new concern over proliferation, articulated by the Arms Control and Disarmament Agency. The vicissitudes of presidential politics helped to give ACDA a moderate victory.

The October 28 statement represented a substantial turn in U.S. policy, though hardly one of 180 degrees.

WHAT IS TO BE DONE?

"As forces for proliferation are rising, our historical leverage to impose restraints is eroding," warned the secret memorandum that was the basis for the turn-around by the Ford Administration last autumn. Such sentiments point to the crucial question facing the Carter Administration: How much power over proliferation does the United States have in the Second Nuclear Age?

Many argue that it is already too late. "The technology is not all that magical, and we're not a monopoly," William Anders, former chairman of the Nuclear Regulatory Commission, said last year. "The only way to have our way is to be involved, to not opt out to set the pace, to set the moral tone, if you will." Those who stand to make money from nuclear technology—industry—agree, and are even more outspoken. They argue that the best way we can continue to influence events is by competing aggressively in the marketplace.

This is a distortion. The United States continues to hold dominant power. "We are still *numero uno*," says NRC Commissioner Gilinsky. The United States holds about 70 percent of the nuclear business worldwide. The reactor industries of the other major exporters—France, West Germany, Canada—are all deeply involved with the U.S. industry and technology, and of course these nations are our partners in the Western security system. A United States that put "antiproliferationism" at the top of its agenda would have a profound effect. It is likely that many in the Carter Administration will try to do so.

There is no single solution, of course, but a great number of initiatives can be taken, in addition to those of the last two years, to induce dramatic change and help reduce dangers. (Deftness is also required, especially as the United States does not come to the subject with an unblemished record. "We have to work out a political approach that doesn't set us up as morally superior," says a State Department official. "The sledgehammer approach is not the best way of getting others to see the problems the way we do. In fact, it will have exactly the opposite effect of what we want.")

U.S. policy might work toward the following goals:

(1) Improve the nuclear non-proliferation treaty system and strengthen the International Atomic Energy Agency. Today, the safeguards mainly cover reactors; they should be expanded to the entire fuel cycle, the life of facilities, and research institutes, and they should be aimed not merely at "timely detection" but also at prevention of illicit activities.

(2) Provide incentives for nations to eschew a nuclear weapons capability. For instance, other countries must be confident that they can rely *completely* on the United States to deliver a steady supply of slightly enriched uranium—so long as they observe safeguards. It was lack of such confidence, in part, that drove the Brazilians into German arms. The United States should copy the Soviet Union and only "lease" the enriched uranium so that it can control the waste products.

(3) Keep uranium enrichment out of the hands of private enterprise—and thus avoid further economic incentive to export the makings of proliferation. Instead, cooperative international ventures could enrich uranium and handle the waste. This would make national nuclear programs much more visible. People would know what is happening.

(4) Discourage the belief that plutonium should be used in reactors. Evidence increasingly indicates that plutonium recycling may be uneconomic and impractical, and we should not let people think otherwise. Plutonium separation for power purposes in this country should not go forward. The federal government should, in particular, avoid any commitment to the breeder reactor.

(5) Prevent situations that allow a country to play suppliers off against each other to get the enrichment and reprocessing facilities that are required to make a bomb. One helpful device is the London Suppliers Club, which might give rise to a market-sharing arrangement—as proposed by Senator Ribicoff—that would reduce dangerous competition. Such an arrangement might also help to limit a "gray market," where suppliers with too much capacity or too much enriched uranium sell secretly at higher prices to countries that want a weapons capability.

(6) Tighten American export rules so that, in effect, the United States discriminates against countries that do not cooperate with the NPT system. Up to now, the United States has often seemed to discriminate in favor of the recalcitrants. We should no longer make available cheap credits to help spread nuclear power.

There are also a number of other political options.

(1) The demonstration effect. By one estimate, the United States has some 30,000 nuclear weapons. In current lingo, the accumulation of nuclear weapons is known as "vertical proliferation." Some of those most worried about "horizontal proliferation" scoff at the notion that vertical proliferation has any relevance to the problem. But, in the minds of Third World citizens, the connection is real. Why should they be denied nuclear weapons. Third World leaders ask themselves, when the superpowers cheerily go along building up their arsenals? Under the NPT, the superpowers are obligated to reduce their own nuclear arsenals, but this obligation has not exactly been observed. When James Schlesinger was secretary of defense, he talked about creating a "credible response"—that is, suggesting that nuclear weapons are not merely weapons of last resort but also have a rather precise role to play in limited battlefield conditions. This sounded as if the United States was saying that nuclear weapons are after all quite useful tools. If that is true for the United States, the Third World countries say, it is also true for them. A serious effort to control the nuclear arms race between the superpowers would have major meaning for the proliferation problem. As Michael Nacht of Harvard's Program in Science and International Affairs has said, "Progress in SALT will positively affect the perception of some 'have-nots' toward the 'haves' and should influence the domestic debate in threshold countries in favor of restraint."

(2) The prohibition effect. Prohibit all nuclear explosions, even the "peaceful" underground variety. The United States and the Soviet Union signed a treaty banning tests above a threshold of 150 kilotons in 1974. But this "theshold" is more than ten times higher than the strength of the Hiroshima bomb. Unfortunately, the Russians continue to hold the mistaken belief that "peaceful nuclear explosions" can work wonders, like changing the direction of Siberian rivers, although, increasingly, it seems that such explosions are uneconomic, unbelievably crude for the task at hand, and dangerous. If the United States and the USSR agreed to do away with all peaceful nuclear explosions, it would help to remove the cloak behind which India can disguise its weapons tests.

(3) The reliability quotient. Strengthen American security guarantees to our allies. This can greatly inhibit our allies' desire for nuclear weapons, even if it poses unattractive choices for us. For instance, if American troops are withdrawn from South Korea, South Korea is likely to grope for some different kind of security, perhaps a nuclear capability of its own. Then Japan would feel impelled to follow suit; then other nations in Asia.

(4) The "nuclear free zone" approach. It is feasible—difficult, but feasible—to contemplate treaty arrangements under which in certain regions nuclear weapons are forbidden.

(5) The instability factor. The case can be made that the acquisition of nuclear weapons by countries not now possessing them may invoke dangers that far outweigh any sense of security such weapons may imply. Many West Germans, for example, now realize that an independent German capability would make central Europe more unstable, not less. The same can certainly be said for a number of other countries.

THE DECISIVE STEP?

Yet all these proposals could very well prove inadequate. Even if they are all acted upon, we might nevertheless in the 1980s be living in a world glutted with plutonium. "At least we've reached the point where the people making decisions recognize the problem," observed Professor Irwin Bupp of the Harvard Business School's Energy Project, a leading analyst of the nuclear industry. "But they are putting more faith in institutional solutions than is justified. It's unlikely that you're going to be able to prevent further proliferation through international organizations and controls. The inevitable result of spreading nuclear power is a world of abundant plutonium, and that means a very high risk of malevolent use."

There is a final, bold step the United States could take—a retreat from nuclear power itself. A number of responsible observers have already called for such action. "We must hold back on a great expansion of nuclear power until the world gets better," said George Kistiakowsky. "It's just too damn risky right now."

When one looks at the decline in orders for new reactors in the United States in 1975 and 1976, one could conclude that such a re-

treat is already on. But the United States could go further and announce a moratorium on the new development of conventional fission nuclear power. (This would not preclude the continuing of research.) When all the doubts—about economics, safety, nuclear waste disposal, and proliferation—are added up, it becomes reasonable to ask whether fission power, at a billion dollars or so per reactor, is the wisest way to allocate resources for future needs.

An American moratorium could have a powerful demonstration effect, significantly slowing the spread of nuclear energy and thus the spread of nuclear weapons competence. A moratorium would announce that the world's technological leader, the progenitor of atomic power, had examined it and found it wanting. Then many other countries would surely recalculate their own programs and look in other directions. It is already clear that nuclear energy makes little sense for the Third World. (Several studies now suggest that it is nothing short of ludicrous for a developing country to make the huge capital investment required for nuclear power.) In Western Europe and Japan, as in the United States, nuclear developments lags far behind the expectations of only three or four years ago. As in the United States, the delays result from concern about cost, safety, and proliferation.

It is a commonplace that nuclear warfare could extinguish civilized life. Yet that fact today is imbued with new urgency. While there is no one way to stop proliferation, there are many things to be done that could help to manage the Second Nuclear Age. Even in sum, they may not be enough. Yet there is no choice but to try, and swiftly, when the alternative is the terrifying prospect of atomic bombs almost everywhere.

RIGHT TO PRIVACY IN COMMUNICATIONS

Mr. MATHIAS. Mr. President, I invite the attention of my colleagues to a speech that was delivered to the National Legislative Conference of the Communication Workers of America—CWA—by Representative CHARLES WHALEN.

The CWA, which is meeting in Washington this week, has been in the forefront of the fight to preserve our traditional right to privacy. It is for this reason that Congressman WHALEN was asked to discuss the topic of "Privacy and Service Monitoring" at the conference.

The main focus of his remarks was directed toward a frank discussion of how to balance the needs of the telephone companies to monitor service quality against the citizens' and employees' right to privacy. Currently, no specific restrictions exist with regard to the type or length of the interceptions that can be practiced by the telephone company. They are free to listen-in at will on any call for any period of time that they may choose, including private person-to-person calls as well as calls being handled by telephone company employees.

Our traditional right to privacy is central to our civil liberties. Our right to have a private conversation without the specter of the telephone company arbitrarily listening in should be beyond question. Unfortunately, this is not the case. To remedy this problem, Congressman WHALEN and I have introduced H.R. 215 and S. 14, respectively. We believe that this legislation, which covers not only service monitoring but the privacy of our bank records, credit card records as well as our telephone company records will go a long way toward providing the statutory protection so sorely needed in this area.

Mr. President, I ask unanimous consent that the text of Congressman WHALEN's speech before the CWA be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY CONGRESSMAN CHARLES W. WHALEN, JR.

PRIVACY AND SERVICE MONITORING

President Watts, members of the Communications Workers of America, I want to say, first of all, that this is a genuine pleasure for me. I know that there are many groups and organizations that are interested in the issue of rights to privacy, but few have been as vocal and as active as the CWA when it comes to seeking better protections for the privacy rights of American citizens.

So, I am here to thank you for your past efforts in the privacy protection area and to encourage you to continue in those efforts.

Specifically, this morning I would like to talk with you about a piece of legislation known as the Bill of Rights Procedures Act, H.R. 215 in this 95th Congress. Senator Charles Mathias and I are the chief sponsors of this legislation; in the last Congress it was authored by Senator Mathias and then-Congressman Charles Mosher.

H.R. 215 covers a rather broad spectrum of privacy problems: access to third party records, such as bank, telephone and credit records; regulation of the use of mail covers and pen registers; protection of the privacy of non-oral wire communications, such as telegrams and computer data transmissions; and restrictions on service monitoring.

We believe that in each of these instances the American people do have a reasonable expectation that their privacy will be protected. That is what they think, but the laws now on the books do not protect our privacy interests in any of those cases. Consequently, the Bill of Rights Procedures Act is designed not to create any new concepts in law; instead we are simply trying to give statutory protection to certain privacy rights which most Americans already assume.

I know that you, as communications workers, have a special, personal interest in the issue of service monitoring. Consequently, I shall devote most of the rest of my remarks to that subject.

You, of course, are aware of this problem area, but I wonder if the general public is. Personally, it is troubling to me to know that every day, in every state in the nation, hundreds, perhaps thousands of employees are, in effect, wiretapped by their employers; wiretapped without their specific prior knowledge and without a warrant. Those in the telephone industry seem to be especially vulnerable to this practice, but by no means are you alone.

This situation stems from a clause in the 1968 wiretap law, which states that telephone conversations can be intercepted by the corporation, at its own discretion and without any outside supervision, for the purposes of "mechanical or service quality control checks." The wiretap law also permits warrantless intercepts for the purpose of detecting toll fraud. These exceptions in the law were intended to permit the continuation of practices that were already fairly common and widespread at the time.

Now, on its face, these provisions sound reasonable enough, but I believe that the surreptitious monitoring of telephone conversations is sufficiently serious business to require some regulation and supervision by the government.

It seems to me to be appropriate for the telephone company to randomly check on the quality of transmissions on its lines and equipment. And some can make a good case for the need of any employer to check on the quality of work being performed by employees, especially those providing personal services to the consumer. But I do not think we should tolerate any longer the idea that the phone company should be allowed to intercept and monitor calls without restraint.

In H.R. 215 we approach this problem of restraint in several ways. First, we sharply limit the length of time a customer-to-customer phone call can be monitored for purposes of assuring technical quality. Experts have established that only a few seconds of interception are needed in order to check on transmission quality. Consequently, in this bill, we propose closing off the present, open-ended authority to monitor for service observing and instead say that if a service check runs longer than 10 seconds, a beep tone must be sounded periodically.

In the case of phone company interceptions of customer-to-customer calls for the purpose of detecting toll fraud, we provide a very strict requirement for detailed reporting about this kind of activity, so that the Congress and the FCC will in the future be able to measure more precisely and evaluate its worth.

Now, we have the matter of supervisory observing, in which the telephone company listens in on conversations between its operators and other persons. The stated purpose for this is to provide quality control on the service being provided by the company in general and also to aid in evaluating the performance of the individual employee.

You don't need to tell me that there is some controversy over whether or not this is an appropriate method for accomplishing this. I am well aware of this.

The approach that we take in the Bill of Rights Procedures Act is to require that any employee who is engaged in a job that is or will be subject to supervisory observing must be advised of this fact in advance and in writing. And we provide that any telephone line that is subject to periodic observation must be clearly labelled as such. Beyond this we feel that the fine-tuning, the establishment of the exact limits on how supervisory observing should be conducted, is properly a matter for labor-management negotiation.

I know that there is not yet a very good record of cooperation from management on this point, and we in the Congress recognize this. My understanding is that appropriate references will be made to this fact in any Congressional report on H.R. 215. And the committees and I will then certainly follow up to make sure that there is indeed good faith negotiation.

There are some who have proposed that we go further than this. It has been suggested, for instance, that the Congress just go ahead and ban service monitoring outright. Certainly, I can see how this might appear to be an attractive idea. But, frankly, from a congressional/legislative viewpoint, it is totally unrealistic.

In the first place, an outright ban on supervisory observing would appear to many, including me, to be an intrustion of the federal legislature into what is perceived by many to be a labor-management dispute. In fact, I note that the "CWA's 1977 Bell System Bargaining Council Resolution" includes reference to the need for negotiation with management on this point.

Secondly, we just never would be able to marshal the votes for an outright ban. And I believe the concept we are discussing is pressing enough that we should not sink it ourselves in an all-or-nothing dispute.

So, in H.R. 215, we have set out to establish and achieve a realistic goal of limiting and regulating service monitoring for the first time. We would not outlaw it, but we hope to bring it under control. The details will be left up to you and your company in the bargaining negotiations.

This approach is consistent with the tone and nature of the entire bill. As Senator Mathias and I have stated repeatedly, we are not trying to eliminate activities that are now permitted by law. Rather, we are trying to bring these practices out into the public eye and to assure that they are conducted in a manner that is appropriate to our democratic society.

For instance, Title I of the Bill of Rights Procedures Act deals with the problem of access to third party records. By going to banks, telephone companies and credit card issuers, investigators can find out whom you have called and when and how long you spoke with them; they can learn to whom you have written checks—what doctor you see, what magazines you read, which political activities you support financially; and they can get a pretty good picture of whatever travel you have done. Presently, there is no law that limits in any way the access that federal agents may have to these records.

I think this is wrong. If any of those same records were kept in your home, the government would have to get a search warrant, as is spelled out in the Fourth Amendment, in the Bill of Rights. But the courts have ruled that because the information is stored in computers at commercial institutions its confidentiality is not protected by the law. As I said, most Americans don't realize this.

Recognizing that there are legitimate reasons why the government should sometimes have access to such information, H.R. 215 sets about establishing procedures and guidelines to protect the privacy rights of the individual while also balancing the interests of the community. What we do is to establish that the citizen does have a legal interest in protecting the confidentiality of the records of his or her personal business transactions. And we establish processes by which the customer will be notified of any effort by the government to seek access to third party records, so that you could go to court and seek to stop such an invasion of your privacy if you think that the inspection is not justified.

Privacy laws always present us with a delicate balancing act to perform. On the one hand, we can come up with any number of reasons why the government or others should have information about what we are doing, even if it is done in private. On the other hand, we do have a fine tradition in this country of protecting the individual's right to privacy, of protecting what Justice Brandeis once identified as the individual's right to be left alone.

The Bill of Rights Procedures Act represents an attempt to find this proper balance, and to establish it in law, in a number of crucial areas. Last year, over 75 Members of Congress joined us as cosponsors of the bill and it was approved 5–0 by a House subcommittee before time ran out at the end of the 94th Congress.

Far more gratifying to the bill's sponsors and to all concerned civil libertarians, though, was the terrific outpouring of public support that we got. As you can see in the background sheet that was included in your convention packet, the Bill of Rights Procedures Act in the last Congress was endorsed by groups as diverse as the American Bankers Association and the Consumer Federation of America, the National Retail Merchants Association and the Retail Clerks International Association, the Republican Task Force on Privacy and the AFL–CIO, the American Express Company and Ralph Nader's Public Citizen group. And, of course, there were a number of newspaper endorsements. Already we've begun to get these endorsements again this year.

But the support that meant the most to us in the 94th Congress was that which was given by the Communications Workers of America. In 1975 yours became the first union to come out strongly in support of protecting the privacy rights of all citizens, and this was in keeping with long-standing traditions within your organization. And it was the CWA's representatives who suggested that the AFL–CIO's 1975 national convention should endorse the Bill of Rights Procedures Act; that is what was done, thanks to you.

The great example set by organized labor—of recognizing the importance of supporting a broad approach that will help protect the rights of all citizens, rather than focusing narrowly on just one single aspect of the privacy protection problem—enabled us later to win broad endorsements from the business and public interest communities.

So, I do want you to know how much the CWA's support has meant to those of us who are struggling to win greater protections for the privacy rights of American citizens. We are grateful for your past support, and we hope and trust that we can count on your continued support.

HEALTH COST CONCERNS

Mr. McGOVERN. Mr. President, an issue which has long been of concern to me is the need for bringing skyrocketing hospital costs under control. The National Governors' Conference Committee on Human Resources, which is chaired by South Dakota's Governor Richard F. Kneip, recently stressed the need for prompt action to control health cost increases. I believe that a statement issued by Governor Kneip merits wider dissemination. Mr. President, I ask unanimous consent that the statement be printed in the RECORD. There being no objection, the statement was ordered to be printed in the RECORD as follows:

STATEMENT BY GOVERNOR KNEIP

The Human Resources Committee is pleased that the President and Secretary Califano also recognize this need and we are encouraged by their proposal for an industry-wide cap on hospital cost increases as was outlined in President Carter's budget revisions presented last week.

While the development of the details of an effective cost control mechanism will require time and detailed consultation and cooperation with State and local governments as well as with health care providers and insurers, we believe that such a mechanism is necessary. The Committee commends the President and Secretary Califano for their proposal and we urge Congress to act promptly to provide the necessary legal authority for cost control measures.

Secretary Califano has indicated that the States will be fully involved in the development and implementation of these cost control measures and we look forward to working closely with HEW in this important project.

Many States have already taken significant steps to control health costs. We fully expect to continue to play a major role. As a result Federal/State cooperation in this area is vital.

COMMON SITUS

Mr. HATCH. Mr. President, for the advisement of my colleagues, the common situs picketing bill is speeding through the Senate Committee on Human Resources faster than a speeding bullet. Originally, the committee scheduled only one day of hearings on this complex proposal, which is designed to completely modify the secondary boycott law as it pertains to the construction industry. At my suggestion, the Subcommittee on Labor decided to hold further hearings to give opportunity for more persons to testify; however, it is fairly obvious to me after sitting in hearings for 2 days that another 2 weeks worth of hearings is warranted to determine with some assurance what this bill really provides and what effect it will have on the construction industry.

Unfortunately, the committee will conclude its hearings shortly, thereby denying opportunity for many persons to have their say on this landmark legislation. I am very disappointed that no private or public corporations have been permitted to testify on this legislation and representatives of the National Labor Relations Board, whose technical expertise is critical in this situation, have not been invited to testify on this proposal.

Be that as it may, the Labor Subcommittee has scheduled a markup session for March 23, to be followed by a full committee executive session on March 28, whereupon the common situs picketing legislation may be reported to the Senate. The bill could reach the floor as early as March 31, and it is certainly the aim of the sponsors of this legislation to have it considered by the Senate prior to the break for the Easter recess.

I, as a freshman Senator, do not quite understand the need for rushing this legislation through the committee and through the Senate, but I think I have some pretty good ideas as to why this legislation seems to be receiving priority treatment at this time.

Without doubt, this bill is one of the most important legislative items for the AFL–CIO this Congress. In my view, if the legislation succeeds in being passed, it will in fact open the floodgates for other repressive labor legislation. This issue is therefore a bellwether for both construction industry and construction unions with of course the rank-and-file employee being caught in the middle.

Construction unions know that with the passage of time the public will be informed as to this legislation and will rise up en mass to oppose the enactment of this bill. That has been the history of this legislation in the 94th Congress and organized labor feels as though if they can exercise "blitzkrieg" type tactics with this legislation they can avoid the overwhelming grassroots position which will likely be forthcoming on this bill. Hence, this is the motivation to ram this bill down the throats of those Senators who earnestly see this as being totally detrimental to the construction industry. To demonstrate how badly the construction unions want this bill, the building trades department commissioned a survey of attitudes toward this bill. It very proudly announced that indeed a majority of those surveyed including union and nonunion persons favored the enactment of this change in the law. This did not

seem to jibe with other polls which I have seen conducted by such reputable pollsters as Opinion Research Corp. and Roper. Those polls conclusively demonstrate that a majority of the American public indeed does not favor the enactment of this legislation.

The Opinion Research Corp., a well-experienced and well-respected polling service, conducted a nationwide survey of the American public in May 1976, and in it was the following question: On building sites many unions represent different kinds of employees of contractors working there—electricians, carpenters, plumbers, and so forth. When one of the unions is striking against one of the contractors, which of these two rules do you think should apply? Rule (a)—the union should only be allowed to picket the work of the contractor with whom it has a dispute and not the whole building site. Rule (b)—the union should be allowed to picket the whole building site, even if it stops work of all of the contractors and employees.

In surveying the results from the general public 72 percent of those asked favored rule (a), while 17 percent favored rule (b) and 11 percent had no opinion. Of those union members asked, 54 percent favored rule (a), 39 percent favored rule (b) and 7 percent had no opinion.

I submit that the question, as presented, was very fair on its face and set forth with a great deal of accuracy the situation that situs picketing presents: whether one union who has a dispute on a construction project with its employer ought to be able to picket the entire job site with the resulting work stoppage of all other contractors and employees on the site.

The ORC survey, which I submit is entirely creditable, was confirmed recently by the Roper organization when on the question of common situs picketing it conducted 2,004 field interviews. The Roper poll, like the ORC poll, shows that the overwhelming majority of all Americans from all walks of life do not believe that building trades unions should be allowed to picket contractors with whom they have no direct dispute. In fact, according to the Roper study, only 12 percent of the American people favor the kind of picketing that would be legalized by S. 924. Among the various groups that the study looked at, only 30 percent of the union members indicated their support for the expanded picketing, only 14 percent of all Democrats and only 14 percent of the people who described themselves as liberal. I submit that the results of both the Roper and ORC polls prove conclusively that the majority of all Americans do not favor this legislation and have expressed their feelings in these various polling surveys.

On the other hand, the AFL–CIO is doing everything humanly possible to rush this legislation through committee and onto the floor for expected final passage. The building trades unions have commissioned a poll that was prepared by the Ruttenberg organization of Washington, D.C. The title of the Ruttenberg poll is "Survey of Equal Treatment for Construction and Industrial Workers."

At some recent hearings involving the common situs picketing proposal, I elicited information from the building trades unions that Mr. Ruttenberg was in fact a former employee of the AFL–CIO and held a high-level job with the Department of Labor at some point during his career. I then had an opportunity to look at the poll that Mr. Ruttenberg prepared. For the information of my colleagues I refer at this point to the question that was asked some 1,000 respondents across the United States on the question of equal treatment under law of U.S. residents. The question reads as follows:

There is also a difference in labor laws, depending on the job.

In an industrial plant, if people on one type of work have a legal dispute with their employer, they are permitted by law to appeal to people on other types of work in the same plant to join them in withholding their services.

There is a different situation on a construction job. Here, if people on one type of work have a legal dispute with their employer, they are prohibited by law from asking people doing other types of work on the same construction to join them in withholding their services.

Some people say that the labor laws should be changed so that construction workers will have equal treatment with industrial workers. Other people say the present situation should remain as it is.

How do you feel about this? Should the labor laws be changed or should they remain as they are?

Mr. President, I am by no means an expert in analyzing polls, but I submit that one need not be an expert to determine with relative certainty that the question so asked by Ruttenberg is loaded. Who is not going to be for equal treatment of employees? Who is not going to be for allowing some workers who have a dispute from asking other people to join them in withholding their services? In the same vein, who can be against motherhood and apple pie?

But, unfortunately, the Ruttenberg survey does not really reach the issue which is under active consideration by the Human Resources Committee, that being, whether we ought to allow a change in the law which would authorize secondary boycotts and secondary picketing which has heretofore been unlawful in the construction industry. Notice in the Ruttenberg survey there is no mention of picketing in the text of the question.

It is fairly obvious to the untrained observer that the Ruttenberg poll is useless. It has been conclusively demonstrated on the other hand through such organizations as Roper and Opinion Research Corp. that the overwhelming majority of Americans want no part of changing this law to permit common situs picketing. In my judgment, the U.S. Senate ought to be mindful that this proposal is rejected by the American people, and I challenge every Senator, assuming this bill is not disposed of before the recess, to go to a construction site and ask the rank-and-file employees as to whether they want this bill. I think it will be demonstrated to everyone's satisfaction that this indeed is not a bill to benefit the rank-and-file employee but is designed solely to increase the power base of the labor officials here in Washington who will be the only intended beneficiaries of this proposal.

SOME INSIGHTS INTO THE ALL-VOLUNTEER FORCES

Mr. PROXMIRE. Mr. President, recently two thought-provoking articles have been published concerning the performance of the All-Volunteer Forces and the possibility of a return to the draft, or the institution of a national service. Each approaches the subject from a different perspective and each, in its own way, reinforces my belief that the All-Volunteer Force is working.

The first article is a Washington Post column written by George Will. Mr. Will describes the current representativeness and quality of the armed services in complimentary terms.

According to the figures cited by Mr. Will, today's AVF accuratley reflects the Nation's composition in regard to regional, racial, or financial standards. For example, 26.3 percent of families and 26.9 percent of recruits are in the under $8,000 income group, while 21.8 percent of families and 16 percent of recruits are in the $20,000 plus group.

Concerning regional composition of the AVF, 53 percent of today's recruits are produced by the 10 most populous States, which contain 53 percent of the Nation's male youths.

Mr. Will also suggests that any potential recruiting problems that the armed services might face can be offset by a few military policy changes, such as the increased use of women.

The second article is written by Nicholas von Hoffman. Mr. von Hoffman suggests that we must pay more attention to the perspective of personal liberty while we discuss a possible return to the draft or the institution of a national service requirement.

Both of these articles provide insight for our discussions of the performance of the All-Volunteer Forces.

Mr. President, I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the columns were ordered to be printed in the RECORD. as follows:

[From the Washington Post, Jan. 30, 1977]

PROFILE OF AN ARMY

(By George F. Will)

Frost and fire are not more different than the persons—Sens. John Stennis of Mississippi, Sam Nunn of Georgia, Edward Kennedy of Massachusetts, and Joseph Califano, Secretary of Health, Education, and Welfare—who have been most consistently critical of the all-volunteer armed forces. But they all are Democrats.

Some critics dislike the all-volunteer idea; they regard compulsory national service as good for the soul of the citizenry. Most critics have predicted that volunteer forces would be disproportionately poor, "excessively" black, of low quality and unreasonably expensive.

Actually, today's volunteers are remarkably representative of the nation in terms of region, race and family income.

The 10 most populous states have 53 per cent of the nation's male youths and produce 53 per cent of recruits; the 20 most

populous states have 75 per cent of male youths and produce 75 per cent of recruits. Contrary to Califano's and others' emphatic predictions, the all-volunteer forces are not "poor men's forces":

26.3 per cent of families and 26.9 per cent of recruits are in the under $8,000 income group.

29.3 per cent of families and 35.1 per cent of recruits are in the $8,000–$13,999 income group.

22.3 per cent of families and 22 per cent of recruits are in the $14,000–$19,999 group.

21.8 per cent of families and 16 per cent of recruits are in the $20,000-plus group.

In 1964, blacks were 10.6 per cent of armed forces' recruits. In 1976, they were 16.9 per cent. The figures for the Army were 13.7 in 1964 and 24.4 in 1976. Obviously a moderately larger percentage of blacks than of whites find that the armed forces provides an attractive opportunity. So what? The government has no reason—and no right—to worry about whether there are "too many" blacks in the armed forces.

The quality of today's recruits, as measured by education levels and scores on standardized tests, is better than the quality of recruits in 1964, the last pre-Vietnam year. In 1964, 68 per cent of volunteers were high school graduates; in 1976, 69 per cent were. In 1964, 42 per cent of volunteers had test scores placing them in the top two of four mental categories; in the most recent quarter the figure was 44.1 per cent.

True, personnel costs have risen from 47 per cent of defense outlays in fiscal 1964 to 58 per cent in fiscal 1977. But that is primarily because military pay has been raised to comparability with private sector employment. But if the nation returned to conscription, comparability would be a requirement of justice. Without conscription, comparability obviously is necessary as well as just.

Few persons who criticize the all-volunteer forces as "unreasonably expensive" favor returning to the scandalous pay rates of 1971. Then many military families were on welfare. And if, today, pay for junior enlisted men was reduced to the federal minimum wage, the government would save just $1.7 billion.

A few easy, reasonable reforms (for example, seeking more women recruits and converting 50,000 military positions to civilian positions) should compensate for any increased recruiting difficulties in years when unemployment is less than it is today, and the number of persons between ages 17 and 22 is smaller.

The most serious predicted skill shortage, of physicians, has not occurred. There are shortages of some skills, and of reserves, but these are problems less substantial than the political and social problems that would be part of any attempt to return to conscription.

Persons who favor military conscription, or other mandatory national service, usually do so for reasons of political philosophy that are independent of the performance of the all-volunteer forces. Suffice it to note that universal military training would produce an absurd surplus of trained manpower over projected military requirements. And a year of mandatory national service for all youths would cost $50 billion annually, if only the minimum wage were paid, and would involve a revolution in national priorities, and values: The U.S. government has never asserted a right, unrelated to national security, to conscript citizens' lives.

My friend Richard Scammon, the elections expert, says that nothing ails the Republican Party that 12 per cent inflation won't cure. But Republicans also can benefit from Democratic criticism of the all-volunteer forces, which are perhaps the finest achievements of the recent Republican years. Most such criticism underscores two Democratic tendencies—statism and casualness about coercion.

[From the Washington Post]

ON DRAFTING PEOPLE INSTEAD OF MONEY

(By Nicholas von Hoffman)

The talk grows on Capitol Hill and elsewhere that it is necessary to bring back the draft. The timing must be fortuitous to be sure, but it is a fact that the revival of conscription coincides with a tacit, bi-partisan admission that nobody here knows of a safe and practical way to bring unemployment down much faster than Jerry Ford said he could. Depending on how large the recently decried Russian arms build-up is determined to be, and therefore how big our Army should be, one or two percentage points could be knocked off those damnable monthly unemployment numbers.

Some of the rascals who want to reintroduce this form of involuntary servitude are quite open about its sanguine effects on joblessness. These are the people who don't want a mere draft for the Army but a National Service Corps in which all 18-to-20-year-olds, male and female, will have to give two years of labor to the fatherland either playing soldier or emptying bed pans in hospitals or tromping about, a la the New Deal's Civilian Conservation Corps, in the Rocky Mountains planting little pine trees.

The arguments to do this are many and varied, ranging from the nasty pragmatic to idealistic. The most ignoble is that the voluntary army costs too much money, money we'd rather spend on new bombers and aircraft carriers for admirals to strut on, so make the kids work for nothing or next to it. Some of the same people who talk this way will shortly vote to give themselves and the rest of the upper echelons in government huge pay raises.

As ever is the case, they'll conscript people but not capital, not money. This gives a certain piquancy to another pro-conscription argument: The volunteer army is "unfair" because it tends to recruit black youths in a higher proportion than they exist in the general population.

Whether or not a racial slur is intended, that's what it sounds like when pro-draft speakers tell us: 1) the Army is getting blacker and 2) the quality of the personnel is in decline. The argument that ought to get the biggest chuckle is the one that insists the "volunteer" army is becoming mercenary. The men and women signing up, so say the conscription advocates, aren't doing it out of love and a desire to submerge themselves in the larger greatness through service and obedience to the fatherland. No, the urchins want money! Shall we apply the same set of standards of selflessness to Lockheed? If the boys and girls are to serve for love, not money, shouldn't the munitions manufacturers sell their products at cost?

Well, perhaps not, because another reason advanced for the draft is that it's good for the soul. Our young people are soft, overindulged and so pampered that not only are the hard virtues like perseverance and fortitude unknown to them, but they are prey to nervous disorders and frightening insanities. In the old days they said the Army built character even if it did increase a boy's chance of contracting a venereal disease; now they tell us it cures neuroses, as anyone can tell by looking at the low, low figures for alcoholism and drug addiction in the service.

But none of the inconsistencies and airy assertions concerning the benefits of the draft is really that important. If every argument made for the draft were valid and convincing, it still wouldn't abrogate Amendment XVIII of our Constitution: "Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States or any place subject to their jurisdiction."

It is reasonable to say that Amendment XIII can be licitly suspending in time of war, especially if the enemy is at the gates, if the United States is immediately and directly threatened, but a peacetime draft is a different proposition altogether. To deny millions their liberty, millions who have committed no crime, who have been convicted by no court, to slap them into involuntary servitude to fight unemployment or because the older part of the population doesn't want to pay the tax bill is to threaten liberty herself.

What if Congress said, "Let's draft the teachers. Their salaries are too high, and the garbage collectors and firemen?" Nobody would stand for it because everyone would see it for the threat it is. In the long run it is no less of a threat to steal young people's liberty, and if you doubt it, see how America has changed as the draft has stayed with us longer and longer.

In 1917 and 1940 it was looked on as a dire, exceptional act in an emergency situation. People were actutely conscious that millions of young nonfelons, noncriminals were having their liberty taken from them. After the decades of conscription following the Korean War, the gravity of the draft was lost, and it came to be looked on as just something the government does like taxes or price controls or highway construction.

To mask the fact that people in power had come to be this casual about depriving their fellow citizens of their liberty, the doctrine of service to the state evolved. The notion of owing your country was propagated, the idea that it is more blessed to give to Washington than to receive. The older idea vanished that we are not here to serve the state, but for the state to serve us, and if it doesn't it should be destroyed.

S. 924, COMMON SITUS PICKETING AND CONSTRUCTION COLLECTIVE BARGAINING

Mr. HATCH. Mr. President, S. 924, this year's version of an old subject, common situs picketing, admittedly deals with a very complex section of our labor laws. That section involves the Taft-Hartley Act secondary boycotts which are defined as unlawful acts occurring when a labor organization having a dispute with one employer—the primary employer—extends that dispute to a neutral third party—the secondary employer. The object of the secondary activity is to force the neutral to cease doing business with the primary employer, thereby applying pressure designed to force the primary employer to give in to the union's demands.

I have now sat through 3 days of hearings on this bill and I have heard much rhetoric about what this bill does and does not do. At this point I am not convinced in my own mind that anyone really knows all of the legal ramifications of what will undoubtedly become the Labor Lawyers Relief Act of 1977 if this bill is enacted.

One of the best prepared statements on this bill that I have seen is one submitted to the Human Resources Committee by Attorney Vincent J. Apruzzese, a practicing labor lawyer in Springfield, N.J., on behalf of the Chamber of Commerce of the United States. Mr. Apruzzese brings his 20 plus years of experience in construction labor relations to provide a complete concise analysis deal-

ing with many of the troublesome areas of this proposed legislation. I commend his review to the attention of all of my colleagues who earnestly want to know about the bill, and I ask unanimous consent to have Mr. Apruzzese's statement printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY VINCENT J. APRUZZESE

I am Vincent J. Apruzzese, senior partner in the law firm of Apruzzese & McDermott, of Springfield, New Jersey. I serve as a member of the Labor Relations Committee of the Chamber of Commerce of the United States. In my labor management relations practice, I have had extensive experience in construction industry labor matters including representation of the Associated General Contractors of America, National Home Builders, various AGC Chapters and major construction companies.

I am appearing before this Committee on behalf of the Chamber of Commerce of the United States, the largest association of business and professional organizations in the United States, and the principal spokesman for the American business community. The National Chamber represents over 3,500 trade associations and chambers of commerce. It has a direct membership of over 62,000 business firms. I wish to thank the Committee for this opportunity to present the National Chamber's views on S. 924, a bill to amend the secondary boycott provision—Section 8 (b) (4)—of the National Labor Relations Act and to revise construction industry collective bargaining. For reasons that I will develop in this statement, the Chamber opposes both the situs picketing (Title I) and collective bargaining (Title II) provisions of this bill.

TITLE I

Section 8(b)(4) outlaws secondary boycotts by all labor organizations. Stripped to its essentials, S. 924 would legalize secondary boycotts by construction unions at construction sites. Secondary boycotts occur when a labor organization having a dispute with one employer—the "primary" employer—extends that dispute to a neutral third party—the "secondary" employer. The objective of a secondary boycott is to compel the neutral employer to cease doing business with the primary employer, thereby applying pressure designed to force the primary employer to give in to the union's demands.

This bill is special interest legislation designed to give an unfair advantage to AFL–CIO building trades unions. The effects of Title I of this proposed legislation exempting a few powerful unions from the general prohibitions on secondary activities would be detrimental to the interests of employers, employees and the general public. By permitting a small dispute to envelop all workers on a project, S. 924 throws another obstacle into the path of the construction industry—an industry which is vital to our recovery from the recession but which has not recovered as rapidly as expected, in part because of high construction costs which S. 924 would force even higher. Not only would home buyers suffer but also secondary employers and workers and suppliers of construction materials and their employees. This Committee should not treat lightly the broader adverse economic impacts that this bill would have on the housing industry in particular and the economy and inflation in general at a time when forecasts of this year's economic activity have been revised downward. With unemployment at its present high levels, is this Committee willing to accept responsibility for the even higher unemployment that would inevitably result from S. 924?

The construction industry is particularly vulnerable to the pressures of a secondary boycott because the efforts of a number of independent employers are commonly required to construct a single project. In our highly specialized economy it is quite common for a large number of independent employers to contribute to a finished product. For example, the efforts and the products of many independent employers such as steel, tire, plastics, aluminum, glass and electrical suppliers, are necessary for the production of one automobile. Likewise, it is not uncommon for a dozen or more independent employers to contribute to the construction of one office building. As in the case of the automobile, the office building could not be built without the contributions of each independent employer. But, unlike the automobile, most of the parts of an office building must be built at the site where the building will be located. The practical effect of the location of all employers and all empolyees involved at a given construction project at one place at one time is that secondary pressures can be exerted by a union easily, effectively and inexpensively.

Labor disputes leading to picketing can arise in three areas: an economic dispute, a work preservation disagreement and an organizing campaign. Due to the presence of multiple employers on a construction site, a building project is unusually susceptible to labor disputes of each type. An example will demonstrate how this might occur. Suppose that on a large construction project, where thousands of workers doing a wide variety of jobs are employed by numerous subcontractors, a group of 50 tile setters get into a dispute with their employer who has contracted for all tile setting work. Under S. 924 these 50 tile setters would not only be permitted to picket their employer but they would be allowed to picket the entire construction site. A chain reaction of work stoppages by the thousands of other employees on the project would follow, and, eventually, all work on the project would be brought to a standstill. If the primary tile setter employer refused to give in to the union's demand, the general contractor would be forced to replace him with a subcontractor having no dispute with the union to get the job moving again. Regardless of the outcome of such a union squeeze play, many innocent persons would be hurt, a great deal of money would be lost by purchasers of construction (including the government) and suppliers, and there would be little possibility of the primary employer obtaining a just resolution of the original controversy under such tremendous pressure. Furthermore, one union successfully using secondary pressure will lead others to follow that approach, adding to instability in the industry. Moreover, local unions can be uncontrollable at times and may seek unreasonable wage increases using the additional power given them by S. 924.

Secondary boycotts detract from national labor policy

S. 924 is drastic legislation—drastic not only because it would extend unjust, final and unnecessary power to the building trades unions but also because it represents a radical departure from the philosophy of our long established national labor policy.

One of the express purposes of the National Labor Relations Act is to promote industrial stability by eliminating or minimizing the causes of industrial strife. By their very nature, however, secondary boycotts detract from this purpose. As they reach out to ensnare neutral employers and employees, they cast into jeopardy that many more businesses and jobs. Secondary boycotts undermine existing employment relationships and are clearly designed to jeopardize, if not eliminate, the free choice of employees in representation matters and any possibility of equitable resolution of labor disputes.

When Congress acted in 1947 to specifically outlaw the type of secondary boycott activity contemplated by S. 924, it acted out of a firm conviction that secondary boycotts—by any unions—are against the public interest. That conviction stemmed from concern over the obvious evil of such boycotts—injury to wholly innocent parties. That evil is as real today as it was then and should, in and of itself, be reason enough for rejection of S. 924.

Trade unions already have adequate picketing rights

The alleged purpose of S. 924 is to protect the economic rights of labor in the building and construction industry by providing for equal treatment of craft and industrial workers. But there is no need for this special interest legislation because the building trades unions operate at no disadvantage under the present law. In fact, under the present law certain exceptional powers such as those in § 8(e) (hot cargo) and § 8(f) (hiring agreement) of the NLRA, are given solely to construction unions.

All unions have the same right to picket at any common work situs. The National Labor Relations Board and the courts have carefully formulated exact standards which permit primary picketing and at the same time protect innocent third parties who are also performing work at the common work at situs. These safeguards were established in the *Moore Dry Dock* case, 92 N.L.R.B. 547, and apply to all unions. They are:

1. The picket signs must clearly indicate the employer with whom the dispute exists;
2. Picketing at the job site may be carried on only when the primary employer or his employees are engaged in their normal business at the situs;
3. The picketing must be limited to times when the situs or physical site of the dispute is located on the secondary employer's premises; and
4. The picketing must be limited to places reasonably close to the situs.

It must be emphasized that these restrictions apply to all industrial or craft unions engaged in a dispute at a common work situs and that the restrictions justly balance what the U.S. Supreme Court called the "dual Congressional objectives of preserving the rights of labor organizations to bring pressure to bear on an offending employer in primary labor disputes and of shielding unoffending employers and others from pressures in controversies not their own." *N.L.R.B.* v. *Denver Building and Construction Trades Council*, 341 U.S. 675 (1951). Since reasonable criteria already exist to balance the picketing rights of all unions with those of neutral parties, it would be unconscionable to destroy this balance with special interest legislation favoring the construction unions.

"Joint venturers" fiction

For a number of years, those who stand to benefit by unrestrained secondary picketing have resorted to a number of fictions to justify their position. The foremost of these fictions is that all employers at a construction site are "joint venturers", and that none of them can consequently be considered neutral to a union dispute with any of the others.

This argument is legally and realistically unsound. The Supreme Court itself rejected it in the *Denver Building Trades* case, pointing out that the fact that a contractor and subcontractor were engaged in work on the same construction project "did not eliminate the status of each as an independent contractor or make the employees of one the employees of the other." (341 U.S. at 689, 690.) Moreover, as anyone even remotely familiar with the realities of construction

project work knows, the general contractor and each subcontractor at a construction project are in every sense of the word separate entities.

They deal with each other at arm's length and on a practical, businesslike basis. Subcontractors may be small businesses, but they can also be large specialized companies that invest considerable money, equipment and personnel in a job, and operate with little day to day contact with the general or prime contractor. Subcontractors often compete with each other in the same field, and they each independently negotiate the wages and working conditions of their own employees. The individual problems of each subcontractor control his ability to determine wages and working conditions of his own employees. Each subcontracting firm is independently responsible for his own profits and losses and the completion of that part of the project for which he is responsible. And frequently there will be numerous contractors on a job who deal directly with the owner of the building rather than with one another or with the general contractor. Moreover, with many contractors on a job, many labor contracts will be expiring at different times. This fact increases the chance of a succession of labor-management disputes which S. 924 would magnify.

The situation on a construction site, in other words, bears no similarity to that of a single manufacturer who employs workers from different trades. Whereas the manufacturer controls the wages and working conditions of all his employees, contractors and subcontractors on a construction site have nothing to do with the terms of employment of the other employees. The only way they can affect each other's terms of employment is by ceasing to do business on the same site as the struck employer, thereby forcing the struck employer either immediately to capitulate to union demands or be replaced by another contractor.

The folly of lumping all contractors and subcontractors on a construction site into one labor relations category becomes clear when the common objective—and the all too frequent result—of common situs picketing is examined. That goal, of course, is the removal from the construction site of any employer offensive to the union. That objective has been demonstrated frequently where an open or merit shop (non-union) contractor performs work on a construction site where the other employers are parties to local union agreements. Time after time, the unions have picketed the open shop employer to "advise the public that this employer does not comply with area standards" without ever attempting to organize the employees of that subcontractor. The clear objective is to have that employer removed from the job site and replaced with an employer who is a party to the local union agreement and who employs persons who are already members of the union. This common event completely contradicts the fiction urged in support of S. 924 that all employers on the common situs are "joint venturers." The objective of having a particular employer eliminated clearly demonstrates that the unions understand that the general contractor ordinarily has a choice between a number of firms competing for a particular subcontract and that the relationship between contractor and subcontractor is no more intertwined than the relationship between the buyer and the seller of any other service.

Perhaps the best way to expose the weakness of the building trades unions' "joint venturer" argument is to carry it to its logical conclusion. In essence, the argument would justify secondary boycotts against any employer who, like a subcontractor, contributes to the creation of a single "product."

For example, the mining company which produces iron ore, the steel company which processes it into steel, and the automobile company which makes it into cars all play a part in producing the end product, just as contractors do on construction sites. Under the trades unions' argument, all of these employers should be deemed "joint venturers", and picketing should be permitted against all of them when only one is involved in a labor dispute.

It is evident, of course, that these employers are not "joint venturers", and that picketing in a dispute with one cannot be visited upon the others under current national policy. It should be equally obvious to those who care to look beyond the fact of their mere physical proximity on a construction project that the prime contractor and the sub-contractors also are not "joint venturers", and likewise should not be embroiled in each other's disputes. Any contrary conclusion would be highly unrealistic.

S. 924 would tilt the scales, not balance them

Another fiction advanced by the proponents of S. 924 is the claim that building trades unions do not now enjoy the same rights as other unions with respect to the right to strike. If unions in the contruction industry have been denied the right to engage in primary picketing in labor disputes, there might be some merit to this claim. But, as we have already shown, this is not the case. Construction unions have always had the same right to engage in primary strike activity as other unions. The proviso in Section 8(b)(4)(B), in fact, specifically states that "nothing contained in this clause (b) shall be construed to make unlawful where not otherwise unlawful any primary strike or primary picketing."

So what the building trades unions would get through S. 924 is more power than other unions now possess.

They would get, for example, the power to bring picketing pressure to bear on an entire group of construction site employers whenever the employees of one choose either to be non-union or to affiliate with a non-AFL–CIO union. This power would effectively enable them to eliminate from the construction scene all employers but those using AFL–CIO labor. Alternatively, an independent union might picket an AFL–CIO job site in an effort to gain employment for its members. By the time token, it would destroy the right of the worker to make a free choice over whether or not to join a union and having made the choice, to be free to work without penalty for it. And, as an AFL–CIO trades union official himself admitted during prior-year hearings on this same legislation, it would give them the power to "destroy independent unions" (C. J. Haggerty, President, Building Construction Trades Department, AFL–CIO, in Hearings before the Special Subcommittee on Labor, House Committee on Education and Labor, 90th Cong., 1st Sess. 1967, p. 86).

Trades unions' wages are proof of power

The success of the building trades unions in securing wage increases is sufficient proof that the existing laws in no way place them at a disadvantage. For example, the average building trades union rate was $11.55 (including fringes) as of January 3, 1977. (USDL Release BLS 77–108, 10 Feb. 1977.)

Electricians in Chicago average $13.76 per hour. In San Francisco, carpenters get $14.24 and in Detroit, the plasterers receive $13.07 In Seattle, plumbers receive $15.28 per hour (including fringes).

These are revealing examples but they cannot be classified as exceptions to the general rule. The Department of Labor reports (for the most recent period recorded) that the average weekly wage in electrical construction in October 1976 was $350.35 for a 38.5 hour average work week. This contrasts with an average of $220.05 weekly in manufacturing for a 40.6 hour work week. The average hourly wage in contract construction rose to $7.91 in December 1976, compared to $5.41 in manufacturing in 1976 (rates exclusive of fringes). (Source: BLS "Employment and Earnings" Vol. 24, No. 2, Feb. '77 and "Current Wage Developments" Jan. 1977.)

The building trades unions have been successful in obtaining the highest overall hourly rates in American industry and it seems reasonable to expect that this construction wage pattern will continue in the future. Construction workers have historically been paid more than manufacturing workers and the gap has been brought about in large part because of the powers of the building trades unions—powers that triggered the wage spiral that resulted in the formation of a Constitution Industry Stabilization Committee and ultimately in the 1971 wage-price freeze. Vesting even more power in the building trades creates a very real danger of starting a new inflationary spiral of wages and prices and a consequent recession and higher general unemployment. Aside from other considerations, this alone is ample reason for the bills rejection.

Seasonality of construction does not explain high wage rates

The building trades unions, of course, attempt to defend such large wage settlements on the grounds of the seasonality of construction work. However, it must be noted that the unions which have won some of the most substantial wage increases perform essentially indoor work protected from the weather. Plumbers, electricians, and sheet metal workers, for example, generally have a roof over their heads and are rarely put out of work by bad weather. Yet these unions are paid top dollar. For example, BLS data show plumbers in large cities currently averaging $13.20 per hour in wages and fringes!

It has been years since the seasonality of construction was a significant factor, if in fact, it ever was such a factor. Studies show that, for example, in 1974 the average number of workers in construction ranged from a low of 3,280,000 in January to a high of 3,847,000 in August, suggesting that relatively few construction workers were out of work during the winter months. The fluctuation is probably even less for union members since work on commercial building projects, where most union members are employed, continues around the calendar.

Under these circumstances, the claimed seasonal aspects of construction fail to justify the wage gains that the trades unions have recorded and certainly do not support giving additional powers to those unions.

In plain language, the building trades unions are not suffering under our present law. If that law really hindered them, the high wages we have noted could not exist. Wages such as these could not be achieved by handicapped unions. To the contrary, such wage rates and gains can be attributed only to the tremendous power the building trades unions obviously enjoy. It would be a catastrophe for the construction industry—indeed, for the nation—if the secondary boycott power were to be added to the already formidable powers at the command of these unions.

S. 924 not the answer to construction industry problems

Beset by high costs and weak demand, construction has been truly one of the industries most adversely affected by the recession and the unusually severe winter weather. Construction unemployment averages 22.9% and is almost 100% for some trades in some areas. Why should society be forced to face the possibility of expanded work stoppages and increased construction costs that S. 924 offers? S. 924 creates no new

jobs. Quite to the contrary, if enacted, the bill would stand to eliminate some existing jobs as small disputes escalated to envelop entire projects. In fact, because the term "site" is undefined it would seem that a union picketing under S. 924 could carry the dispute to every construction site where their subcontractor employer has operations. Moreover, due to total picketing of a job site, markets for construction materials will shrink, displacing employees of suppliers as a result of production cutbacks.

Construction industry efficiency is increasing, and the competition offered union contractors by merit shop contractors has been one factor in encouraging unions to reassess and occasionally revise the operation of restrictive union work rules, such as limiting the width of paint brushes, hand trowelling of cement before and after machine finishing, and excess manning requirements for equipment. For example, here in Washington, D.C. a group of building trades unions has signed an agreement for a major project limiting the right to strike, and foregoing some union work rules in an effort to be more competitive with non-union workers. Had they not agreed, the project would probably have been built open shop or not at all! But with common situs powers, the beneficial competitive influence of non-union workers so helpful to consumers would be blocked out. S. 924 would snuff out that competition, because it is designed to separate union and non-union contractors and subcontractors.

S. 924 would increase sex and minority discrimination

Like any other type of discrimination, that encouraged by S. 924 is unfair and is contrary to the American free market system which entitles each business to be judged on the merits of its prices and the quality of its goods or services and offers employment opportunities to all qualified applicants regardless of race or sex. In areas of the country where union and non-union craftsmen work side by side, general contractors and construction purchasers will use either all union or all non-union subcontractors, and deny employment to the "wrong" kinds of contractors. In parts of the country, or on jobs, where union workers are in the minority, union workers may be kept off the job completely.

S. 924 prohibits common situs picketing in support of "race, sex, creed, color or religious" discrimination but the bill allows picketing to get (or keep) non-union persons off the job which, due to years of union refusal to admit them, are likely to be female and/or minority. This will enable unions to perpetuate their past discrimination against such Americans.

Furthermore, since minority subcontractors are likely to be small businesses, and small businesses are likely to be non-union, the bill would allow building trades unionists to picket a site at which a non-union minority subcontractor was operating. The picketing would be aimed at the non-union aspect of the subcontractor, but the effect would be anti-minority. For example, the Washington AFL–CIO Building and Construction Trades Council strenuously objected to the use of minority non-union contractors on the Metro subway system. ["Unions Fight Metro Rule on Contracts for Blacks," Washington Post, p. A–34, (22 August 1974); also see *Washington Post*, p. A–1, A–7, (29 August 1974).] If common situs picketing had been legal at that time, any minority non-union subcontractors on the job would have been prime union targets. Thus, due to its potential impact on female and minority workers and subcontractors, S. 924 is contrary to national policies of non-discrimination and should not be enacted.

S. 924 would hit hardest in areas of high unemployment

Another negative aspect to Title I of S. 924 would be its likely impact on areas already suffering from high unemployment. As many witnesses, union and management, have agreed, the bill would polarize the nation's construction industry into all union and all non-union regions. The all union areas would be in the Northeast and in the large cities where unemployment is already at high levels. Common situs picketing would be most effective, of course, in those all union areas. An employer considering expansion of an old facility or construction of a new one would necessarily consider the higher cost of construction in areas which would be most affected by common situs picketing, compared to the lower cost of construction without situs picketing and with non-union contractors unrestricted by union work rules in areas that were "polarized" open shop. Faced with those two choices, employers might well decide to do their construction in the open shop regions, leaving behind in the all union areas common situs picketing and the urban jobless who might have found work in the new or expanded facilities.

This is a serious matter. Our large cities and other urban areas have high unemployment and desperately need to attract employers. Common situs picketing will not only not attract new employers, it may well cause existing ones to go elsewhere when their present facility is in need of substantial improvement.

Technical comments

We are extremely concerned about the introductory phrase in the bill, line 7, to the effect "that nothing contained in this *subsection (b)* shall be construed to prohibit any strikes . . ." (emphasis added). The subsection (b) referred to is apparently the entire § 8(b) subsection of § 8. The phrasing seems to exempt construction unions from all unfair practices in § 8(b). We note that H.R. 5900/S. 1479 was limited specifically to § 8(b)4(B).

"That nothing contained in *clause (b) of this paragraph (4)* shall be construed to prohibit any strike . . ." (H.R. 5900/S. 1479, 94th Congress) (emphasis added)

There is no reason to exempt the building trades unions from § 8(b). On the contrary, their predilection for secondary pressure, violence and other improper practices indicates that more control, not less, is needed.

We presume that even the supporters of common situs powers would not support a wholesale exemption of the construction unions from § 8(b) of the Act. Our other technical comments follow.

Technical comments on title I

1. S. 924 not only overrules the *Denver Building Trades* case, it creates a new economic weapon for organized labor to use on all-union jobs. As each of the many contracts covering a multitude of unions working on a large project expires, shut-downs would occur frequently under full site picketing.

2. S. 924 does not define "site of construction." Thus, if all employers on a site are considered one "person" (also not defined), that person could be picketed, under labor law principles, wherever found—at all sites.

3. Although S. 924 does not authorize strikes in violation of collective bargaining agreements, many stoppages would be expected to occur due to expiration of the contract or presence of non-union workers on the site. Moreover, since the Supreme Court decision in *Buffalo Forge Co.* v. *Steelworkers*, there is doubt as to whether a valid contractual no-strike clause can be enforced to make one union cross the picket lines of a striking union.

4. The bill allows construction unions to picket a site where a non-union specialty contractor is working (i.e., computer installers, etc.), or the site owner is having its non-union employees do its own construction work. In addition, there is no specific protection for ongoing industrial operations at a construction site being picketed by building trades unions.

5. S. 924 ostensibly disallows picketing on the basis of race, sex, creed, color or national origin, but in fact, historical union bias has limited the opportunities of minority and females to gain union membership, and non-union workers can be picketed off the site.

6. Although direct product picketing is not authorized by S. 924, once site wide picketing is legalized, it could be used sub rosa for product control purposes.

7. An exemption to the "joint venturer" fiction in S. 924 is made for states having separate bids and awards for various parts of a project. Private projects using the same procedures should be treated no differently than a public project.

8. Exculpation of an international union from civil and criminal liability for authorizing site wide picketing, unless there is actual knowledge of willful unlawful purpose, is a standard extremely difficult to meet to prove a violation.

9. Prior notice of intent to picket at military installations does not prevent picketing of vital defense projects.

10. Because Title I of S. 924 would become effective 90 days after enactment, project estimates figured without allowing for increased costs due to common situs picketing would fail to predict actual expenses, causing losses to owners and contractors.

Title I of S. 924 will harm rather than benefit the construction industry, and we strongly believe it would not be enacted.

TITLE II

The business community is vitally concerned with collective bargaining in the construction industry. Disruptions in construction due to labor disputes touch the lives of every citizen. The skyrocketing costs of construction ultimately are borne by the users and the general public. We are discussing a problem national in scope. If the solution lies in legislation then all affected interests should be heard. If the solution lies in legislation then we respectfully submit that the bills which are now being rushed through the Congress are not the answer.

Collective bargaining has been going on in the construction industry for decades. While many of the settlements being negotiated are outrageously excessive and no doubt highly inflationary, they did not exactly appear overnight. To be sure, the unionized sector of the construction industry has its problems. But they are not new. The fragmentation of the industry and the divisions of labor along craft lines date back for generations. This problem is too complex and its implications are too far-reaching to be dealt with by the Congress in such a superficial, cursory fashion. A matter of this importance demands more careful consideration and study. If there is to be legislation, and we seriously question the need for this type legislation, then it must be precise, it must be backed up by thorough and appropriate legislative history and it must contain carefully devised safeguards against abuse of power.

Summary of title II

The purpose of Title II, which is virtually identical to the provisions developed in August 1975 by then Secretary of Labor Dunlop, is to revise the structure of collective bargaining in the construction industry. The bill creates a new federal agency called the Construction Industry Collective Bargaining

Committee. The parties to collective bargaining agreements in the construction industry are required to give notice to the Committee 60 days prior to the expiration or reopening of existing contracts, and the Committee may assert jurisdiction and intervene in such negotiations, or it may request that national craft boards or national labor and management organizations become involved in the dispute. In the event the Committee intervenes in a dispute, no strike or lockout would be permitted within 90 days of the time that Committee received notice from the parties. In the event the Committee requests national labor and management organizations to participate, no contract could be put into effect until it is approved by the national labor organization.

Almost all international building trades unions now have the power to intervene in local disputes if they choose to do so. Any benefits that could be obtained from the intervention of internationals into local negotiations could be accomplished without additional legislation. The extent to which the present power to intervene, and even veto local settlements, is not exercised by the international unions no doubt is dictated by international union political pressures. But S. 924 will not remove these internal political pressures and it leaves participation in local negotiations by the international union entirely optional. Therefore, it is unreasonable to expect any additional benefits will be obtained from the statutorily sanctioned participation of international unions in local negotiations.

The power this bill would give to national labor organizations is a veto over changes in local working agreements. As stated, many of these organizations already have this power by virtue of their own constitutions, however, they just don't choose to exercise it very often. Section 205(e) of the bill provides that when the Construction Industry Collective Bargaining Committee takes jurisdiction over a dispute and requests the participation of the international unions,

"No new collective bargaining agreement . . . shall be of any force or effect unless such new agreement or revision is approved in writing by the standard national construction labor organization with which the local labor organization or other subordinate body is affiliated. Prior to such approval the parties shall make no change in the terms or conditions of employment."

No one can predict how the power which this legislation grants would be used by the international unions. But we do know that, after the hearings of the so-called McClellan Committee in 1957,[1] Congress determined that excessive power in the hands of international unions was so dangerous that Congress passed the Labor Management Reporting and Disclosure Act of 1959 limiting the power of international unions and including the union members' Bill of Rights. S. 924 represents a step in the opposite direction, a step which increases the probability of the unreasonable abuse of power by the international building trades unions.

We will not attempt to predict the manner in which the power of the internationals created by this bill could be abused by an international wishing to take action against an unpopular local union or a local union which appears to have the misfortune of being led by political opponents of the international officers. Suffice it to say that the power would be there as a matter of law.

We do feel it is appropriate to indicate some ways in which this legal weapon would be used against the employers. The power to veto a settlement agreement should be equated with the power to dictate the terms of a collective bargaining agreement, and this bill contains no limitation on the type of terms which an international union could insist upon being included in local contracts. For example, the Operating Engineers could refuse to approve any contract which did not contain a provision requiring that an operator be assigned to automatic equipment. The painters could veto any local settlement which did not include a prohibition on the use of rollers to apply paint. Examples such as these are endless.

There seems to be an impression that this bill would automatically serve to restrain excessive wage settlements and eliminate restrictive work practices and featherbedding in the construction industry. There is no mandate in the bill to this effect, as AFL–CIO President George Meany recognized at a press conference, commenting on the earlier identical bill "There's really nothing mandatory in it." And in response to a question on wage levels, Mr. Meany noted that "they don't have the power to decide [what is reasonable]." (AFL–CIO News Release, August 31, 1975, p. 7.) There certainly is no restriction upon the veto power to be given to the internationals to this effect. There is just as much power to dictate higher settlements and more restrictive work practices as there is to do the opposite. We are being asked, in effect, to assume that everyone who exercises this newly created, legal power will do so with high purpose and the best intentions. Even if this utopia could be achieved there is plenty of room for honest disagreement over what is good for the trade, the industry or the society. Inherent in S. 924 is a proposition that those who have exercised some of these powers in the past have acted irresponsibily and contrary to the public interest. Who is to say that others with even more power can be expected to do otherwise?

An international union could insist on a subcontracting clause which prohibits subcontracting to open shop contractors. Likewise, an international could insist on a clause requiring contractors to agree not to operate on an "open shop" basis in other jurisdictions or even to subcontract to "open shop" contractors in other jurisdictions. The potential for abuse of the non-union contractor or even contractors who perform work in some areas on a non-union basis is very real. "Open shop" contractors are becoming more of a competitive threat to union contractors as they expand the types of construction they perform and the areas in which they operate. Likewise, the international unions are faced with increasing competition for jobs from non-union workers who make up a majority of the work force in construction in this country. "Open shop" contractors, sub-contractors and their employees could suffer most from the exercise of this new power given to the international unions. The unrestricted power proposed by this bill could and would serve as a weapon to limit competition in the industry.

The basic defect in this bill cannot be cured. Only a few possibilities exist for the improvement of the major deficiencies in this proposed legislation, and none of the possibilities are acceptable to any of the parties to collective bargaining, since they gravitate toward governmental dictation of the terms of collective bargaining agreements. Neither Congress nor the American public would find the cure acceptable if we are to maintain a system of free collective bargaining.

It has long been national labor policy that the parties to collective bargaining cannot be forced to agree to anything, but this bill with the power it gives to the Construction Industry Collective Bargaining Committee represents a major step in the direction of federal dictation of the terms of collective bargaining agreements. Even if it appeared to be desirable to regulate collective bargaining in the construction industry on a short term basis, this bill would establish a precedent for federal dictation of the terms of collective bargaining agreements which could easily be extended beyond the construction industry.

This bill is both an extension of the power of the federal bureaucracy and an extension of federal regulation. The Congress is aware of the public sentiment against the further extension of federal regulation into additional areas of the lives and business of Americans. This expansion of the power and scope of federal regulation is reason enough to oppose this bill.

As the bill is written, the only power of this agency is to "jawbone" in an attempt to accomplish its goals. Already cries have gone up for the addition of enforcement powers to this legislation and eventually Congress will be faced with proposals to make the agency permanent and to give it the power to force the desires of the bureaucracy upon the parties to collective bargaining. This always seems to be the trend once a regulatory agency is established. Why open that door again?

In spite of the year and a half since employers appeared before Congress to reject S. 924's legislative ancestor, Congress made one change in the bill. In fact, it is acting with such haste that it could easily pass this vague and poorly written bill which will be widely misunderstood. Needless to say, the potential for clarifying litigation, as the bill is now written, is breathtaking.

For example, the standards under which the committee could intervene in a dispute provide glaring examples of the vague and imprecise language of the bill. Section 206 provides that the Collective Bargaining Committee can intervene in a dispute, if in its sole discretion it believes such action would:

(1) "facilitate collective bargaining in the construction industry, improvements in the structure of such bargaining, agreements covering more appropriate geographical areas or agreements more accurately reflecting the condition of various branches of the industry;

(2) promote stability of employment;

(3) encourage collective bargaining agreements embodying appropriate expiration dates;

(4) promote practices consistent with appropriate apprenticeship, training and skill level differentials among the various crafts or branches;

(5) promote voluntary procedure for dispute settlements; or

(6) otherwise be consistent with the purposes of this Act."

The only reasonable reading of this language is that the Committee may take action in almost any situation which may arise if it, in the exercise of its sole discretion, decides to assert its jurisdiction. The legal effect of an assertion of jurisdiction raises many questions. The bill provides very limited enforcement procedures, apparently to the exclusion of remedies already available under other laws. There is great potential for conflict with established principles, practices and procedures under the National Labor Relations Act, as amended. The simple question of who will be authorized to bring actions in court is at best uncertain. The restrictions placed upon a court reviewing the conduct and activities of the Committee are about as broad as can be written and amount to practically no review at all.

It is shocking to find a total absolution of civil and criminal liability provided in § 205(f) to the national unions and contractor groups arising out of participation in the implementation of the proposed law. This provision alone should raise clear warning as to the probability of abuse of the power granted national unions by this bill.

[1] Senate Committee on Improper Activities in Labor Management Relations, 1957–58.

The unions already enjoy too many immunities from the laws which apply to others.

The rulemaking powers granted to the committee are another example of the unacceptable language of the bill which imposes no limitations and no guidelines on the power of this Committee to adopt and enforce rules. In fact, the bill exempts the Committee from the Administrative Procedures Act under which it would be required to publish its rules for comment in the Federal Register. The rulemaking power granted the proposed Committee is as broad as Congress can grant. The point is that this bill creates a new agency with broad powers but no standards to be applied in determining when or how these powers will be exercised.

Solving construction industry problems without additional legislation

In his statement to the House Subcommittee, Secretary of Labor Marshall correctly characterized the collective bargaining structure of the construction industry as highly fragmented, unstable and subject to wage rate leap-frogging. It is a fair summary of that statement to say that the fragmented nature of bargaining is construction's basic problem which this bill is designed to solve. But Title II of S. 924 does not directly address itself to this problem. No such assurance can be given. This bill is completely unnecessary. Both informal procedures and formal legal machinery now exist which could be used to consolidate and broaden bargaining units in the construction industry if the parties desire to avail themselves of such machinery.

As pointed out above, the international unions have the power to intervene in local negotiations. In fact, the internationals now commonly bargain on a nationwide basis with a number of construction companies. Furthermore, these national unions have exercised their existing power and bargained with employers on a multicraft basis. This procedure of negotiating directly with the international unions on a multicraft basis is not uncommon and could be expanded to solve the problems Secretary Marshall sees in the construction industry. There could be many other non-legislative possibilities for improving bargaining in the construction industry if the effort were made.

Those who believe that formal legal machinery is necessary to solve these problems should review the powers of the National Labor Relations Board (NLRB) before they advocate additional legislation. The Board has the power to determine and define units appropriate for collective bargaining. The Board has the power to order bargaining in a broad geographic area—even an area covering several states, and the Board has the power to order bargaining on either a single craft or a multicraft basis. Few NLRB certifications exist in the construction industry, but under the Board's rules, the unions or the employers could petition for a certification that would eliminate or reduce the fragmented nature of bargaining in the industry. In the haste to pass this bill, the fact that the NLRB already has the power and the expertise to go a long way toward solving the legal problems of collective bargaining in the construction industry has been overlooked or ignored. The parties themselves have the power and the ability to solve their own problems without another law and another government program.

Conclusion

The construction industry is the largest single industry in the United States today and is responsible for approximately 9% of the Gross National Product as well as about 4% of the employment. If the United States is to meet the increasing need for construction of facilities efficiently and at reasonable cost, the construction industry must not be upset by cost-increasing legislation like S. 924.

As the amount of construction needed continues to increase, the cost to the public of unnecessary work stoppages at construction sites increases dramatically. A substantial portion of this high cost has been caused by unnecessary and frequent illegal work stoppages on construction sites due to the power already in the hands of the building trades unions. For example, of the 3.5 million workers engaged in construction in 1975, 308,000 were involved in stoppages but of the 18.3 million manufacturing workers, only 463,000 took part in stoppages. (Source: BLS) This trend would continue under S. 924 and would encourage the extension of labor disputes to innocent contractors and their employees and would also affect building materials suppliers' access to their markets. Make no mistake: this bill would dramatically increase the already high cost of construction.

What good purpose would be served by S. 924? According to the building trades unions, it would serve the purpose of balancing their picketing rights with those of industrial unions. We have seen that the imbalance to which they refer is wholly imaginary and the result of a misconception of the employment situations in manufacturing and construction.

Thus, there is no "good" purpose behind S. 924. In fact, it is hard to conceive of a purpose so worthwhile as to offset the host of evil consequences of this legislation—consequences such as:

The closing of mammoth construction projects over a trivial dispute with one small subcontractor; a result that would be detrimental not only to all of the parties working on the project, but also the public interest—as in the case of low income housing, for example—or even our national security—as in the case of a missile site project;

The extension of labor disputes to innocent parties—a result that would clearly jeopardize the stability of existing employment relationships;

The destruction of employee free choice over union membership and the elimination of independent unions—a result that could not only rob employees of a basic right, but also give the AFL-CIO trades unions a monopoly of craftsmen in the construction trades;

The expansion of union power to permit trades unions to control work assignment in jurisdictional disputes; and

The certain upward pressure in costs resulting from vesting even more power in the building trades unions at a time when their wage settlements and restrictive work rules are already restraining industry productivity.

The immeasurable harm that would result from the secondary boycott exemption proposed by Title I of this bill clearly demonstrates that it is even more important today than it was when the Taft-Hartley law was enacted in 1947 for us to realize that there is only one kind of secondary boycott—a bad one. To unleash this evil for the singular benefit of the building trades unions is unconscionable. For these reasons, the National Chamber is firmly opposed to Title I.

Not only is Title I of S. 924 a bad piece of legislation, but Title II should not be enacted either. It is wholly unnecessary, it is vague and poorly drafted, and it needlessly expands the scope and power of the federal bureaucracy. From the point of view of the users of construction who ultimately bear the cost of collective agreements in the construction industry, this bill is completely unacceptable because it will increase the cost and price of construction without offering any offsetting solution to the real problems of the industry.

If the sole purpose behind Title II of S. 924 is to obtain passage of the "common situs picketing" bill, then it should be rejected forthwith. If Title II represents a genuine concern for the status of construction collective bargaining, then instead of being passed in haste, it and the real problems of construction bargaining should be carefully examined and proposed remedies discussed. Under the present circumstances, S. 924, with or without Title II, should be rejected.

THE GENOCIDE CONVENTION AND INTERNATIONAL LAW

Mr. PROXMIRE. Mr. President, for 200 years our Nation has been governed by the rule of law. Our basic assumption is that all men are equal under the law and no man is above the law. I think this system has served our country well.

In the international realm, the world body of nations is also slowly moving to a system of international law. Through treaties, conventions and world conferences, the world's nations are attempting to establish a system of ground rules under which all nations can operate.

The Genocide Convention is one aspect of this international body of law. It outlaws the mass extermination of any group of people based on cultural, ethnic, or racial grounds. I think that we can achieve a national consensus agreeing that this attempt to make genocide an international crime is an admirable goal.

There are some observers, however, who contend that the ratification of such a convention would do nothing to eradicate genocide. They argue that the Genocide Convention, like many international laws and agreements, would be ignored by national leaders who saw their interests otherwise.

These critics are probably correct. Our ratification of the Genocide Convention would probably not have prevented the atrocities being committed by Idi Amin's government. Like most international treaties, the Genocide Convention has no real enforcement body.

But ratification of the Genocide Treaty is a first step in the direction of establishing international rules prohibiting the commission of such crimes against human freedoms.

The Genocide Convention, like most other international agreements, is part of a growing skeleton of international law. Once the skeleton is built, the body can then be completed.

In other words, ratification of the Genocide Convention represents progress in the right direction. It is a step toward international protection of human rights. It is a step that our Nation must take. I urge ratification of the Genocide Convention.

UNIVERSITY OF MARYLAND JUVENILE LAW CLINIC

Mr. MATHIAS. Mr. President, as an alumnus of the University of Maryland School of Law, I take special pride and pleasure in the favorable notice being given the school's juvenile law clinic. This innovative and constructive project—an educational effort of the highest quality—is designed to train young

men and women in the practical, real life skills of client advocacy.

An article in the Baltimore Sun on March 13, 1977, described this program as one of such high repute that it is keenly watched by other lawyers. The clinic, which is run by Prof. Peter Smith and Phillip Dantes, is only 4 years old but already has achieved many firsts within the field of juvenile justice in Maryland.

Mr. President, in view of the importance of training good minds in the arts and skills of client advocacy and representation, I wish to commend this program to the attention of my colleagues. Perhaps with more training of this type and better quality representation, our citizens will regain confidence in the law's ability to mete out justice for all.

Mr. President, I ask unanimous consent that the text of the Baltimore Sun article be printed in the RECORD.

LEGAL CLINIC AT THE UM IS A MARYLAND NOVELTY

(By Edward Coltman)

Whenever the idea of a clinical education for lawyers-to-be comes up, the discussion has to it the ring of novelty—of an idea whose time has not quite come—even though clinical training has been a commonplace in the education of doctors for the last century.

And when the name of the University of Maryland's Juvenile Law Clinic appears on an appellate brief, many criminal and constitutional lawyers sit up and take notice, because it means that a highly unusual 4-year-old "law firm" has put more effort into its preparation than most law firms could ever afford to and because the clinic may well be headed toward another in a string of far-reaching legal coups.

Earlier this winter, the clinic moved into new quarters at the university's downtown Baltimore campus, bringing the 165-year-old law school back—for the first time in 45 years—to the first building it called its own in 1884.

Created out of the old law school lecture hall, which in recent days has been used by the Medical School for dissecting cadavers, the clinic's offices look like those of any low-budget law firm, with a book-lined library and a rabbit-warren of sparsely furnished individual offices.

But this "law firm," with 2 "partners" (Professors Peter Smith and Phillip Dantes) and 10 "associates" (third-year law students who work full-time in the semester-long clinical program), is first and foremost an educational institution for the training of competent young lawyers.

Maryland is one of only five law schools in the nation that offer full-time clinical programs. Two other clinics—one in general civil law (the successor to Piper & Marbury's storefront poverty law clinic) and the other in law relating to handicapped children—have been established by the law school, but neither is a full-time program yet.

In a way, these clinics hark back to the predominant form of legal training in this country before the Civil War and the advent of modern law schools—the apprenticeship.

But the difference is that, although the clinics practice real law with real clients and real cases, no one's livelihood is dependent on that practice, allowing a caseload that is a mere fraction of what a law firm the clinic's size would have to handle to stay out of red ink.

The small caseload—and 2 "partners" for only 10 "associates"—means that a lot of the "partners'" time can be spent in helping the apprentices learn both the law and legal skills.

Professor Smith, who began the Juvenile Law Clinic in the spring of 1973, described why he believes clinical education for lawyers is essential as a replacement for, or at least a major supplement to, the standard Socratic lecture-and-casebook method of law school education.

"The theory was that, by taking actual cases, you force a student to learn how to analyze cases, but in many law schools, there's not much Socratic method left, so while, on the one hand, we say we are teaching analysis, on the other hand, we shift very easily to the shoveling out of substance, to seeing how much a student can remember from a collection of carefully edited cases.

"There is very little exchange between a professor and student about how he has briefed a case and why he had briefed it in that way, whether his notes are too long or incomplete. I don't doubt that the ability to analyze cases might develop from reading a lot of cases, but we overdo it—in most law schools, that's all we do for three years."

What the clinic provides instead is personal, intensive supervision in the practice of law, with everything from videotaped training sessions in the counseling of clients, negotiation of plea bargains, and cross-examination of witnesses, to the actual representation of clients in state and federal courts.

And throughout all that runs the constant individual review of research and writing, with drafts of petitions and memoranda, briefs and proposed orders thrown back to the student again and again for polishing.

"The learning process, as far as I'm concerned," Professor Smith said, "doesn't begin until the student puts pen to paper for his second draft. Then, he's beginning to learn from his mistakes."

"That's why this is an expensive program," he said. "We spend literally hundreds of hours every semester in meetings with one or two students."

And it is an expensive program. Adding up just faculty and secretarial salaries and normal operating expenses exclusive of the cost of office space, Professor Smith estimated that the program costs $65,000 a year—for the training of only 10 students a semester.

When the clinic began, it was financed by a grant from the Governor's Commission on Law Enforcement and the Administration of Justice. Now, with the strong support of Dean Michael J. Kelly, it is funded as a regular part of the university's budget.

Most lawyers are familiar only with some of the important cases the clinic has won on appeal, but the clients and cases that the clinic deals with are varied, limited only by the rules on student practice of the Bar of the Maryland Court of Appeals—primarily that the clients must be indigent.

The federal courts in Baltimore and Washington refer cases to the clinic, and by special arrangement with the city's Juvenile Court, the clinic has access to the docket listings and may solicit clients (a practice that is forbidden for members of the Bar.)

"You can tell a lot from just the name, age and address of a suspect, the kind of crime he's charged with, and the time and place it occurred," Professor Smith said. "You can usually tell whether it's going to be a factual dispute or will get into constitutional issues."

"We plea-bargain less often and much later in the game than the criminal defense bar of this city usually does, but we can do that because we have a low caseload," he said. "I'm not bothered at all about taking cases that are negotiated to a settlement before trial. A student may be bothered because, to them, the trial is the glory, but sometimes those are very good cases to take."

The choice of cases and the issues raised by the clinic's lawyers and law students during litigation have led to a number of major changes in juvenile law in Maryland during the last few years.

A case that challenged a difference in procedures between the courts of Montgomery county and those in the rest of the state led to a comprehensive revision of the juvenile laws by the General Assembly.

"To a certain extent, law reform issues come up just by doing the very best job that you can for your client," Professor Smith said. "But how far beyond that should we go? We have some obligation in general to try to improve the law."

The consequences of some of the clinic's work for its clients in terms of greater legal rights for young offenders—have generated some opposition.

Part of the problem, Professor Smith said, is the "anti-establishment" nature of providing what he called "the General Motors treatment" to the poor—giving the clinic's clients the time and effort that in normal legal practice only large corporations can afford.

"Then, too," he said "our clients commit the kinds of crimes that concern people far more than the kinds of crime committed by the clients of the largest, most respected firms in town.

"I think it is inevitable if you run an aggressive practice in which you don't conform to the system . . . you're going to create enemies."

But he emphasized that the clinic's purpose is not primarily to change the law or challenge the system—it is to teach students by representing clients:

"We can't let our teaching get in the way of the interests of our clients, but so far that hasn't been a problem, and the purpose of this program is not to turn out experts in juvenile law. It is to teach lawyering skills and attitudes. I want a student to have an idea of what a standard of good law practice is.

"He can cut corners—as you have to in real life—knowing that he's cutting corners, knowing which corner it's best to cut, and knowing that he still shouldn't be cutting corners. Hows' he ever going to know what the cutting of a corner is if he's never walked around a square edge? That's what we're trying to teach."

PRESIDENT CARTER'S ELECTION LAW REFORM MEASURES

Mr. THURMOND. Mr. President, I rise today to comment on a recent White House news release dated March 22, 1977, which reported that President Carter is advocating several measures which could have grave and deleterious effects on our representative form of Government.

First. President Carter has recommended the abolishment of the electoral college, replacing it with a direct popular election for the offices of President and Vice President. I believe this is unwise and violative of the wishes of our Nation's Founding Fathers who foresaw the possibility of unfair representation in popular elections and consequently devised the electoral college.

Because the President is supposed to represent a national constituency, he should be elected by the people in all parts of the country and not just by certain vastly populated metropolitan areas which would dominate any election based solely on popular vote.

Second. This official White House news release reports that President Carter has asked for the easing of the 1939 Hatch

Act restrictions on Federal employees. Again, I believe this is unwise because career Government workers could fall prey to the political influences and chicanery exerted by self-serving, high level Federal workers.

The Hatch Act for nearly 40 years has been the barrier between American Federal workers and "boss" politics. It has protected not only the individual employee's rights but, more importantly, the rights of the public in general.

Influence peddling and coercion could present themselves in such ways that the employee would be hard pressed to resist. If he did, his career interests might be jeopardized. Such a situation must not be allowed to exist.

Mr. President, the freedom of the public to deal with Federal employees without consideration for partisan positions must be maintained. This Nation's Government is so large that each citizen has to deal with it directly on many occasions in their lives. If the Hatch Act were upset, Americans might become less willing to carry their governmental problems to the necessary public administrators. In other words, free expression and fair play could be affected by the "chilling hand" of Federal officials who have been influenced by organized political interest. This, I believe, would be unacceptable to the vast majority of Americans.

Third. President Carter has indicated that he favors a method of voter registration whereby citizens could register at the polling place and then vote—that same day—in Federal elections.

I believe this procedure is unwise, impracticable and an open door for fraudulent practices.

The basic guarantee of this country provides that all qualified citizens have a constitutionally protected right to vote and to have their votes counted equally. This right to vote for the candidate of one's choice is the essence of a free society. I realize that any irrational or unreasonable restriction on that right strikes at the heart of representative Government. However, the Supreme Court has determined that it is neither irrational nor unreasonable to require prospective voters to register several weeks prior to election day, thereby allowing the States to exercise their constitutional role in the election process. It is imperative that the integrity of our election process be protected and the "purity of the ballot box" be maintained. Any voter registration legislation, such as that advocated by President Carter, strikes at the heart of the very integrity and purity that is necessary for our Government to remain truly representative.

Mr. President, this Nation has grown and prospered as a Republic consisting of three separate and equal branches of Government. Each has its own duties, responsibilities, and obligations. The area of election reform is properly within the purview of the U.S. Congress, the legislative branch, subject only to interpretations by the Supreme Court upon consideration of justiciable cases and controversies, and similar constitutional provisions.

Mr. President, all Members of Congress are responsible to the people and, therefore, should reflect the views of those constituents who elected them. I believe that it is proper for Congress, exercising its role as representatives, to voice the wishes of the people should they desire election law reform. To do otherwise, would be for Congress to shirk its duties and responsibilities, thereby permitting another branch of Government to subsume these election reform measures.

Fourth. President Carter has called for public financing of all House and Senate elections in the same manner that Presidential elections are now funded out of the Federal Treasury. Although Congress, in 1974, established the system of public financing for Presidential races, I believe it is wrong to extend this system to House and Senate candidates.

The American taxpayer is burdened enough without having the added expenses of financing the House and Senate races of candidates who they may not approve. I believe that any candidate with a sufficiently broad constituency can produce the needed funds for a successful campaign. Also, Mr. President, pursuant to the recent Federal election laws and the full disclosure requirements of both the House and Senate Codes of Conduct, it will be practically impossible for Members or candidates to engage in questionable financial activity without the American public becoming apprised of such activity.

Mr. President, for these reasons and others, I believe that this body should reject any such radical departure from our established national election laws and procedures.

HELPING THE AGED AND THEIR FAMILIES

Mr. McGOVERN. Mr. President, we have heard and read so much in recent times about the failure of the American family that it is reassuring to find an area in which the family is successful. An article in the March 5 issue of the National Observer by Dr. Robert N. Butler, Director of the National Institute on Aging of the National Institutes of Health, outlines the facts on family care of the aged and suggests some policies that will help make it easier for them to provide that care. He points out that many of the programs that are intended to help the aged often have the opposite effect, actually forcing many of them to leave their families and seek institutional care.

I commend this article to my colleagues and hope that Dr. Butler's observations will be kept in mind as we deal with the problems he addresses.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HELPING THE AGED AND THEIR FAMILIES

(By Robert N. Butler, M.D.)

I often receive the question: How many of those over 65 years old are in institutions—in nursing homes, homes for the aged, various chronic-care facilities?

The answer is about 5 per cent: 1.2 million out of 23 million Americans over 65, with most of those in nursing homes. The percentage is about the same in Britain, even though that country has created a panoply of home health and help services by and large not yet available to the American elderly.

Five per cent is probably an irreducible minimum of those who have to be institutionalized because of some serious physical or mental impairment. Ninety-five per cent of our aged (and the emphasis is deliberate because this is a demythologizing statistic) are not in institutions and are either alone or, more commonly, being cared for by relatives—spouses, children, nephews and nieces, or someone part of an extended family who is close enough and caring enough.

In effect, a tenet of U.S. policy toward the aged—alternatives to institutionalization—is already a partial reality. One would, therefore, expect that governmental policies, primarily those having to do with the provision of services needed by the elderly, would support and strengthen what already exists. But that is not yet the case. Indeed, some of our policies—such as the payment mechanisms of Medicare—have had at times the counterproductive effect of encouraging institutionalization.

As Representative Barber B. Conable, Jr., (R-N.Y.) has noted, "Institutions are not only physicially visible, they can also be easily counted, grouped, compared, and evaluated on a series of crude scales such as length of stay, qualified staff, and physical plant; they can be inspected and reimbursed in a way that makes us comfortable and assures us that the money spent can be truly accounted for. But, obviously, a consequence of this approach is that we have created incentives, for our aged (and their families) to seek out institutional care, even in those cases where institutional care is neither socially desirable nor medically appropriate."

The point is not that we don't need nursing homes and similar institutions. Rather we need to balance policies that support those institutions with at least comparable support for the primary unit of care in America—the family.

I am talking about more income for the elderly; Social Security, supplemental security income mechanisms are helping. I am talking about relieving the crushing burdens, financial and emotional, on many of the families that care for their aged.

TAX RELIEF PLAN

We could, for example, provide tax relief to a family that builds an extra room for an aged parent or helps with the rent on a nearby apartment. We could provide a comprehensive array of health and social services: someone to prepare or bring a lunch while the rest of the family is at work or school; to exercise a paralyzed arm or leg; to change a dressing; to help an emphysema victim breathe; to teach self-care; or to provide mental-health counseling, not only to the aged, but also, when needed, to their caring families.

Sociologist George L. Maddox points out that "preoccupation with the cost factor . . . may divert us from the central issue—the co-ordination of services for older persons." And there are seemingly interminable arguments on whether investing in comprehensive services to enable the elderly to stay out of institutions would be too expensive.

The argument remains unsettled and, to my mind, probably based on the wrong questions. We now pay out staggering amounts for a bewildering array of medical insurance programs, various time maintenance schemes—both public and private—and institutional care facilities.

We ought to at least consider whether part of that money could be effectively redirected. In October of 1975 New York State paid out

$833 for a Medicaid bed—$10,000 a year. Suppose $833, provided either directly or via tax mechanisms, went to a family to help it care for its aged. Would that be money better used? Of course these binary questions of either/or are simplistic; but they ought at least to be posed and addressed if we are going to think deeply on how best to help the aged and those who care for them.

FAMILY'S BAD PRESS

The family is getting a bad press in America. Soaring divorce and remarriage rates get attention, as do the tales of child abuse, of teen-age violence, of a restless search for values, and of exaggerated accusations that families "eject" or "dump" their elders into nursing homes.

The facts are quite to the contrary. The family cares for most of our aged. It does that without much help. It does that despite government policies that may encourage them to put their parents in institutions.

BYELORUSSIAN INDEPENDENCE

Mr. DOLE. Mr. President, on March 25, 1918, the people of Byelorussia declared their independence and established the Byelorussia Democratic Republic. This week Americans of Byelorussian ancestry are commemorating the 59th anniversary of that event with appropriate observances throughout the United States.

In their commemorations, Byelorussian Americans will no doubt note that Byelorussian independence was short-lived. Soviet troops invaded free Byelorussia and forcibly incorporated the young republic into the Union of Soviet Socialist Republics.

As we reflect on these events, we should be mindful of the fact that it has always been Soviet policy to ignore not only human rights but national rights as well. Despite the fact that the Soviet Constitution guarantees national and cultural autonomy, Byelorussia has been forced to endure an intensive Russification campaign which has only one purpose—the total obliteration of Byelorussian ethno-national consciousness.

Byelorussia, however, lives on through its courageous people both in the United States and in the Soviet Union. It is important that we express our admiration at this time for their many contributions to American life and for their valor in resisting Soviet Russian oppression.

THE TEAMSTERS PENSION FUND

Mr. GRIFFIN. Mr. President, for too many years, clouds of suspicion and scandal have swirled around the Teamsters Union—apparent assassination of Jimmy Hoffa more than a year and a half ago was a brutal reminder of ills that continue to plague the Nation's largest labor organization.

The announcement on March 13 that Teamsters' President Frank Fitzsimmons and three others will resign as trustees of the troubled Central States Pension Fund was welcome news—not only to many in Government who have been urging reform, but also to thousands of union members who fear that past mismanagement of the fund threatens their future financial security.

The announcement of those resignations was the good news. But, unfortunately, now comes the bad news.

In an article last week Saul Friedman, of Knight Newspapers, reported that the leading candidates to take over management of the Central States Pension Fund are a pair of Dallas millionaires who, from their backgrounds, appear to be wholly unqualified to be independent managers.

They are: Jess Hay, chief executive officer of Loman & Nettleton Financial Corp., the leading mortgage banker in the country; and Trammell Crow, the Nation's largest real estate developer, whose farflung enterprises include hundreds of partnerships and corporations.

On the surface, those credentials may look impressive until you discover, as Saul Friedman did, what lies underneath.

Mr. Hay, for example, raised $300,000 for Jimmy Carter in the Texas primary last year, and has been asked, reportedly, by President Carter, to become national finance chairman of the Democratic Party.

Then there is Mr. Crow—whose reported overinvestment in real estate brought him to the brink of bankruptcy not long ago. In addition, he has borrowed more than $2.2 million from the pension fund, which he would be administering.

Apparently, Mr. Crow has sold his interest in the borrowing company—after Mr. Fitzsimmons approached him last fall about becoming a pension fund manager. However, since then, we are told, Mr. Crow has been paid some $300,000 in consulting fees by the Teamsters.

It happens that Mr. Crow was a supporter of President Ford—indicating apparently that the Teamsters leaders are hedging their political bets.

The final decision on these appointments is to be made by the other pension trustees—but the Labor Department must give its approval.

I heartily agree with the Detroit Free Press, which in a lead editorial last Friday said this:

> Under no circumstances should the Labor Department accept, or be a party to promoting, the apparent choice of the Teamsters' leadership for the job of "independent" investment managers for the Central States Pension Fund. . . .
>
> . . . this is something that needs to be headed off at the pass. As long as these things are worked out on the basis of cozy relationships and mutual backscratching, the membership will have an uncertain guarantee that the fund is sound and well protected by the trustees and ultimately by the government.

Mr. President, I ask unanimous consent that Mr. Friedman's article, appearing in the March 17 edition of the Detroit Free Press, as well as the Free Press editorial of March 18 be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRIFFIN. Mr. President, recent revelations confirm fears I have been expressing for a long time about the Central States Pension Fund.

The fund's executive director Daniel J. Shannon estimates that its unfunded liability is about $6.5 billion. If this deficit is not made up over the next few years—through increased contributions and more prudent investment decisions—thousands of Teamster Union members who expect to draw full pensions in future years may be sadly disappointed.

Obviously, the resignation of Fitzsimmons and others is the fruit of work that has been done by a joint Labor and Justice Department task force, which began probing the Central States Pension Fund more than a year ago. I am pleased that some steps have been taken to clean up the fund and to put it back on the right track.

While I commend the task force for its work, it should not be overlooked that difficulties associated with the Central States Pension Fund are only symptomatic of wider and more serious problems. We can applaud the task force's limited accomplishments, but we should not relax. I continue to believe that an intensive top-to-bottom Senate investigation of abuses in this field is badly needed.

The permanent Subcommittee on Investigations has made a modest beginning.

As part of its work, the subcommittee this week reported another shocking example of corruption in Teamsters financial affairs that threatens the well-being of union members.

In this instance—according to the subcommittee's report—a convicted felon and his associates were permitted to squeeze unconscionable commissions and fees from some Teamsters severance trust funds through a life insurance scheme.

At local 299 in Detroit, for example—the home local of Jimmy Hoffa and of current Teamsters President Frank Fitzsimmons—nearly 80 percent of the fund's life insurance payout was sidetracked into fees and commissions between 1971 and 1974.

Among those involved were two of Mr. Fitzsimmons' sons, Donald, business agent for local 614, and Richard, an official of local 299 who was indicted last month by a Federal grand jury in Detroit on charges of conspiracy and embezzlement relating to the insurance scheme.

I ask unanimous consent that a Detroit News article by Seth Kantor which appeared March 21, 1977, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TEAMSTER FUND DIVERTED MILLIONS, REPORT SAYS

(By Seth Kantor)

WASHINGTON.—Teamsters President Frank E. Fitzsimmons failed to notify members of Local 299 that an insurance plan operated by convicted racketeer Louis C. Ostrer and pushed by Fitzsimmons' sons, Donald and Richard, was "detrimental to the financial interests of rank and file" members of the large Detroit local, a U.S. Senate report charges.

The 50-page report of the Permanent Investigations Subcommittee, released today, calls for action on Capitol Hill and by the

Labor Department to toughen regulations covering management and marketing of such union employe benefit plans as the one at Local 299.

The report is the result of a behind-the-scenes Senate probe into how the so-called Ostrer Plan was franchised at Teamsters locals in Detroit, St. Louis and several East Coast cities.

An Ostrer Plan has the appearance of a severance trust fund—a fund set up to deliver nest-egg cash to employes if they quit their jobs, are fired or are laid off.

But an Ostrer Plan carries with it a life insurance policy scheme which has siphoned off millions of dollars in commissions and fees from a dozen Teamsters severance trust funds.

In Detroit's Local 299, nearly 80 percent of the fund's life insurance payout was being sidetracked into commissions and fees between the start of 1971 and mid-1974, Senate probers found.

As a result, more than 450 Local 299 office workers signed a petition in 1975, protesting the handling of the fund by its trustees because, "we do not want our money to be used to purchase life insurance which we do not need or want."

After the protest, the Ostrer Plan for the office workers was not included in the 1976 contract with their employers.

A report last summer by the same Senate panel responsible for today's report charged that Ostrer had piloted his plan at New York Teamsters Local 295—where, it said, "the life insurance feature of the plan unnecessarily and seriously depleted the Local's severance pay fund."

Ostrer and his associates "participated not only in unconscionable insurance commissions and excessive administrative fees" at Local 295 but also milked the severance funds at other locals, including Detroit's powerful 299, according to the report issued today.

Ten years ago, Ostrer's insurance agent's license was lifted by New York authorities who said he had "improperly diverted" more than $700,000 from the Canadian Life Assurance Co. Two years later, he pleaded guilty to a charge of grand larceny related to the Canadian Life case.

Six years ago, Ostrer and labor racketeer "Johnny Dio" Dioguardi were charged by a federal grand jury with 40 counts of fraud and Ostrer was found guilty in 1973 on 11 of the counts. Dioguardi was convicted on four counts.

In 1971, the same year he and Dioguardi were indicted, Ostrer met with Donald Fitzsimmons, business agent for Teamsters Local 614.

Donald Fitzsimmons told Senate investigators he signed an agreement with Ostrer's business associate, Seymour Greenfield, to promote the Ostrer Plan in Teamsters locals.

Senate probers say they now have developed evidence showing Ostrer and the younger Fitzsimmons sought the assistance of Allen Dorfman in marketing the Ostrer Plan.

Dorfman, an ex-convict and Chicago insurance operator, has been a longtime kingpin in the manipulations of the Teamsters Central States Pension Fund, riddled with mob associations.

By April 1972, Ostrer and Greenfield were presented by Teamsters President Frank Fitzsimmons to members of the union's general executive board, meeting in Phoenix.

Ostrer and Greenfield told the influential board members about the benefits of the Ostrer Plan, being run through Fringe Programs, Inc.

Fringe Programs, a New York company owned and operated by Dina Gelman, Ostrer's sister, was the company through which Donald Fitzsimmons worked.

Donald Fitzsimmons told the investigators he was paid approximately $25,000 through Fringe Programs. Then, on March 29, 1973, he ended his agreement with that company.

"State of Michigan records show that, on the same day, a new firm authorized to administer fringe benefit plans—Severance Plans, Inc.—was formed by Ronald Prebenda, a Detroit lawyer," according to the Senate report issued today.

Prebenda has maintained Teamsters ties in the past. The company he formed replaced Fringe Programs as administrator of the Local 299 trust.

Richard Fitzsimmons, Donald's brother and an official with Local 299, told Senate investigators that he asked Prebenda to administer the trust and to hire Donald.

At the same time, Richard Fitzsimmons arranged to have the trust get its insurance through Jackson National Life Insurance, according to Jackson's president, Athanase Pasant.

Pasant has told Senate investigators, it was revealed today, that the Fitzsimmons brothers "indicated they had the blessings from Frank E. Fitzsimmons, who desired a local company to be involved."

When Local 299's office workers protested about the bad management of the severance plan in 1975, they were protesting the plan initiated by Richard Fitzsimmons, as chairman of the 1,400-member Michigan state office workers division of the Teamsters.

Last month, a federal grand jury in Detroit indicted Richard Fitzsimmons and Anthony Sciarrotta for conspiracy, embezzlement and conversion "to their own use and to the use of others the sum of $5,000 from the Local 299 Severance Trust Fund to pay premiums on life insurance policies for Teamsters Local 299 officers and business agents," according to the report.

Mr. GRIFFIN. Mr. President, I wish to commend the permanent Subcommittee on Investigations for its work. But worthwhile as these findings are, I think it is clear that far more work must be done if we are to fully understand the pervasive abuse of power that these examples illustrate.

In November 1975, I introduced—and urged the Senate to adopt—a resolution to establish a Select Committee to investigate improper and criminal activities in labor-management relations.

That resolution, Senate Resolution 302, languished on the calendar for the rest of the 94th Congress.

On February 21 of this year, I reintroduced an identical resolution—Senate Resolution 89—and once again, I commend it to the Senate as an appropriate and tested way to deal with this very serious situation.

ONE A CARTER ALLY, ONE A DEBTOR: TWO TEXANS IN LINE FOR TEAMSTER FUND

(By Saul Friedman)

WASHINGTON.—Management of the Teamsters' troubled $1.4 billion pension fund may be taken over by one Texas millionaire deeply involved in Democratic Party fundraising activities and another who has had financial problems of his own and has borrowed $2.2 million from the fund.

The two leading candidates to become "Independent" investment managers for the union's Central States Pension Fund are Trammell Crow of Dallas, the nation's largest real estate developer, and Jess Hay, also of Dallas, chief executive of Lomas & Nettleton Financial Corp., the nation's leading mortgage banker.

The final decision will be made by the pension trustees, subject to approval by the Labor Department.

Hay, who raised $300,000 for Jimmy Carter in the Texas primary last year, has been asked by the president to become national finance chairman for the Democratic Party.

His position as manager of the huge Teamsters pension fund, which has had great political clout in the past, could bode Democrats. Hay would be making loan and investment decisions effecting hundreds of businessmen from whom party contributions are sought.

Crow, who was a friend and political fund raiser for President Ford, was along with his son and other partners a founder of Crow Pacific Development Corp. of Newport Beach Calif.

In 1975 the company—one of 600 partnerships and corporations in which Crow is involved—purchased from the pension fund a tract of land in California with a $2,292,000 note payable to the fund.

Last November, soon after Crow began talks with Teamsters President Frank Fritzsimmons about managing the pension fund investments, Crow sold his stock in Crow Pacific.

Nevertheless, his deal with the pension fund as well as other possible relations with the Teamsters may raise questions about his independence as a fund manager.

Little more than a year ago, according to Forbes magazine, a business journal, Crow and his vast network of warehouses, shopping centers, hotels, apartments, condominiums and office buildings, then worth an estimated $1.6 billion, were near the brink of bankruptcy.

He and his companies owed an estimated $384 million and along with his partners, Crow was forced to sell off and borrow on properties to raise more than $150 million to tide him and his companies over.

According to Crow's associates, Crow had invested too heavily in real estate that was not paying off. And when the recession and high interest rates of 1974 closed in, Crow was far out on a limb.

The Teamsters pension fund has a similar problem of being overextended in real estate, driving it near the point of insolvency.

One source at pension fund headquarters in Chicago questioned whether Crow, who wheels and deals in real estate throughout the nation, should manage the shaky $922 million investments the pension fund has in real estate.

Furthermore, it was learned that Fitzsimmons, who was pressed by the Labor Department into resigning from the fund's board of trustees, picked Crow and Lomas & Nettleton to manage the fund's investments after visiting their offices in Dallas and throwing some business Crow's way.

Crow said in a telephone interview that Fitzsimmons and a teamster attorney, Charles Morin of Washington, visited him "to see our operations and to see if we had the competence to help manage the real estate in the fund. That's our business."

It was after the visit that Crow sold his interest in Crow Pacific Development Corp. and was retained by the pension fund to appraise and analyze properties.

So far Crow has received about $300,000 for analyzing a federal complex in Austin, which is leased from the pension fund, and property in Florida owned by a Las Vegas hotel and casino company.

The pension fund received these properties, incidentally, as a result of foreclosing on loans that had been given to men associated with organized crime.

The pension fund has substantial real estate holdings in Dallas and other cities, which could have an effect on the fortunes of the many Crow companies.

The law requires that any pension fund manager keep the fund's assets entirely separate from his own. But control of the Teamsters' investment would give Lomas & Nettleton and Crow added clout in general in the real estate marketplace.

The revelations about the new directors came as the Teamsters worked out a new pension arrangement in a Chicago session Wednesday.

The new pension plan, which will cover all of the fund's 380,000 active Central States participants, is subject to approval by the Internal Revenue Service, a Teamsters spokesman said.

The new plan was adopted at a closed-door meeting of the trustees in which Fitzsimmons actively participated, a spokesman said. The plan can raise maximum pension benefits as much as $181 above current levels, to $711 a month, he said.

FITZ TO STAY AS BOSS

CHICAGO.—Frank Fitzsimmons said Wednesday that he will not resign as president of the Teamsters Union and will be a candidate for re-election when his current term expires in 1981.

Fitzsimmons spoke to newsmen during a break in a Wednesday meeting where directors of the Teamsters Central States Pension Fund announced a new plan to go into effect Jan. 1.

In a deal struck with the Labor Department and the Internal Revenue Service, Fitzsimmons and three others agreed to resign as trustees of the pension fund by April 30.

Fitzsimmons said Wednesday, however, that the agreement does not mean he is giving up his top post in the union.

He noted there have been rumors that he would resign but said, "I was elected by a unanimous vote in Las Vegas at our 1976 convention, and I will serve my full term . . . and I will be a candidate for re-election. There is no way I am going to resign."

[From the Detroit Free Press, March 18, 1977]

TEAMSTERS' FUND PICKS ARE HARDLY "INDEPENDENT"

Under no circumstances should the Labor Department accept, or be a party to promoting, the apparent favorite choice of the Teamsters' leadership for the job of "Independent" investment managers for the Central States Pension Fund.

Enough questions have been raised about the independence of Trammell Crow of Dallas and Jess Hay, also of Dallas, chief executive of Lomas & Nettleton Financial Corp, to make such a selection a dubious gain. Crow, the nation's largest real estate developer, and Lomas & Nettleton Financial Corp. the nation's leading mortgage banker, obviously have the requisite skills. But do they have the independence of either the Carter administration or the Teamsters Union itself to provide the reform intended?

Under an agreement reached this week between the trustees of the Central States Fund and the Labor Department two employer and two Teamster trustees must resign and be replaced by independent trustees. The trustees must then appoint an outside real estate investment management firm to advise the trustees, an effort to correct the mismanagement and possible corruption of the fund's operation in the past. Mr. Hay, however, raised $300,000 for Jimmy Carter in Texas and has been asked by the president to be national finance chairman for the Democratic Party. And Mr. Crow has borrowed $2.2 million from the pension fund and was himself described a year ago as being on the verge of bankruptcy.

While the two firms may be perfectly capable of handling the mechanics of pension fund management (though even that is surely in doubt given Mr. Crow's own experience), this scarcely constitutes the bright new beginning needed for the Central States Pension Fund.

At this point, to be sure, no formal nomination of outside investment advisors has been made, and there is no indication that the Labor Department would either seek or accept the nomination of Mr. Crow or Mr. Hay's firm or both. But this is something that needs to be headed off at the pass. As long as these things are worked out on the basis of cozy relationships and mutual back-scratching, the membership will have an uncertain guarantee that the fund is sound and well protected by the trustees and ultimately by the government.

IMPORTANCE OF ECONOMICS IN FOREIGN POLICY

Mr. PELL. Mr. President, for some time I have been arguing that a new U.S. foreign policy is needed. We can no longer look at events only in terms of democracy versus communism nor can we rely so heavily on military power to accomplish our goals as we did in the past. Coming to grips with today's world requires that we view it realistically and as it is now. To do so, we must cease looking at it in terms of poles or absolutes and instead think in more sophisticated terms. The view I have advocated suggests thinking in terms of expansion and contraction—expanding those activities which are urgently required to meet today's challenges and contracting others which respond to yesterday's challenges. One of the most obvious changes in the world is the growth of economic interdependence. This change dictates, in my view, the expansion of the role of economics in foreign policy.

Arnold Saltzman, a distinguished American businesman who has also served his government in a variety of important positions, most recently as Chairman of the Advisory Commission on National Growth Policy Processes, has written a very perceptive article in the December 12, 1976 issue of Newsday which makes much the same point. He correctly points out that—

The world has shrunk very rapidly, producing both greater interdependence and yet greater conflict at the same time.

That—

. . . a substantial and rapidly increasing portion of the world economy escapes the political control of any individual nation and yet at the same time represents an accelerating portion of each nation's total economy.

And finally that—

What must capture the immediate attention of the entire new Administration, including the State Department, is the recognition that decisions made from an interpretation of recent historical perspectives no longer apply. We need new mechanisms, new capability in our decisionmaking . . .

Mr. President, I commend Mr. Saltzman's article to the attention of my distinguished colleagues in the Senate as well as to that of the administration, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Newsday, Dec. 17, 1976]

FACTORING THE DOLLAR INTO DIPLOMACY

(By Arnold Saltzman)

The end of Henry Kissinger's reign as shaper of America's foreign policy provides an opportunity for reappraisal and change. I refer not so much to his oftmentioned personal diplomacy contrasted with the more conventional, institutionalized technique of negotiations that Cyrus Vance will reintroduce in the State Department and which is a matter of style—but rather to fundamental policy approaches.

Our foreign policy, both before and during Kissinger's administration, has been based previously on political and military considerations without proper emphasis on economic implications. We have been frustrated or damaged time after time by the inadequacies and rigidities of such military and political solutions. There was a time in our recent past when it would have been impossible for Kuwait or Saudi Arabia to quadruple the price of oil and temporarily withhold shipments to us, or for Jamaica to threaten supplies of bauxite for our aluminum plants. Military force would have been threatened or invoked—especially since American capital investments were also arbitrarily diminished. The potential risk of nuclear war spreading from any international conflict has—and indeed most appropriately—virtually eliminated "gunboat diplomacy" as a reliable foreign policy tool, but what worthwhile alternatives have we developed?

Politically, the world is in ferment, reflecting the scores of new emerging countries, many using their natural resources with sledgehammer nationalistic effect against us. We also face adversary positions of both potential enemies or allies competing with us for scarcer natural resources or greater world trade. The orthodox, rigid, political diplomacy of power bloc alliances is diminished in a world reflecting new economic evolution accompanied by heightened nationalism.

President Ford tried to reach for this concept in his debate with Jimmy Carter in discussing Eastern European Communist nations, but failed. It is appropriate to say that communism does not produce a political monolithic structure of nations just as capitalism does not. Indeed our relations with Rumania or Yugoslavia are more cordial than with Hungary or East Germany. In fact Communist Yugoslavia has been possibly less troublesome to us over the last 10 years than capitalist France. There are serious cracks in both the NATO alliance and the Warsaw Pact—which goes double for the relations between Communist Russia and Communist China.

Jimmy Carter scored better in the television debate in stating that a strong and successful American policy abroad was not possible without a strong America at home. What remains to be said is (a) how will that policy abroad be altered and (b) what changes have occurred in recent years which suggest a reappraisal of our basic approach to the world of nations?

Our nation and the world have changed enormously in the last 15 years. Our government has not kept pace. Governmental institutions and processes have not responded to changes in the environment we are supposed to first understand and then manage. We are backing into the future, stumbling as we go.

The world has shrunk very rapidly, producing both greater interdependence and yet greater conflict at the same time. What is one man's transportation, the Concorde of Britain and France, is another's man's jet noise in Long Island. A hydrogen bomb explosion in China carries with it the threat of contaminated milk in Wisconsin or Long Island. Not too long ago, problems tended to be contained—with a city, then a state,

then a nation. Now, almost everything in the world relates to everything else—and someplace else.

Growing world trade in recent decades has cemented global interdependence while spurring prosperity. Between 1960 and 1974, the U.S. gross national product tripled but the value of its exports and imports increased sixfold. In 1960 exports and imports each totaled approximately $25 billion; in 1974 both exceeded $140 billion. Today 10 per cent of all American goods and services are intended for use overseas, and 10 per cent of what America consumes originates outside our borders. It is symptomatic of this changing world that transnational corporations have recently grown at an annual rate of 10 per cent, twice the rate of the world's economics as a whole. By 1980 it is expected that sales of transnational corporations will equal 16 per cent of the gross world product.

Thus a substantial and rapidly increasing portion of the world economy escapes the political control of any individual nation and yet at the same time represents an accelerating portion of each nation's total economy. The new Carter administration is confronted by the fact that (a) increasingly, economic considerations affect our foreign relations and in turn require better economic policy-making capability in our State Department; (b) that we must have a coordinated set of economic policy objectives, both as to foreign and domestic considerations, in the absence of which we will perform inadequately both at home and abroad; and (c) that the recent dislocations in prices or supply of the world's materials and commodities, coupled with a 200,000 person per-day increase in the world's population imply the need of a major overhaul of our policy objectives.

What must capture the immediate attention of the entire new administration, including the State Department, is the recognition that decisions made from an interpretation of recent historical perspectives no longer apply. We need new mechanisms, new capability in our decision-making, if we are to avoid the drift of a nonenergy policy, of no policy to deal with the simultaneous plagues of unemployment and inflation, of no plan to deal with our negative international trade balances or the inadequate rate of growth of our economy vis-a-vis other developed nations of the world, and a host of other ills. To all of these problems or crises we have been responding with ad hoc, piecemeal, noncoordinated policy.

Our federal policy-making performance has suffered from two major shortcomings: (a) a lack of integration which has resulted in our tackling problems in bits and pieces, often producing results favorable in one area and counterproductive in another, and (b) a lack of foresight in averting problems because we lack mechanisms to anticipate, analyze or understand them.

We need to create a longer range analysis capability (an early warning system) to anticipate problems before they descend on us and to suggest to Congress, the President and the public alternative solutions for both domestic and foreign policy issues. This would give the American people—with the help of the media—the opportunity to understand what threatens us, to debate the various alternatives and thus truly influence the legislative or executive decision-making process.

Two years ago President Giscard d'Estaing of France said, "The world is unhappy because it does not know where it is going. It is unhappy because it senses that if it knew, it would discover that it was heading for disaster." We see the same cynicism and fear in our country expressed in the growing distrust Americans feel for their government. This is what we must address ourselves to and reverse.

THE 100TH NIGHT

Mr. GOLDWATER. Mr. President, on February 26 it was my distinct honor to have been the speaker at the 100th night dining out at the U.S. Air Force Academy. This marked the resumption of the recognition by the cadet corps that only 100 nights remained before they were commissioned second lieutenants. I ask unanimous consent that my comments be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

100TH NIGHT DINING OUT U.S.A.F. ACADEMY

General Allen, other distinguished guests of the Academy, members of the cadet corps, your girls, instructors: it's a real pleasure for me to be here and I have a strange, nasty suspicion that I was the speaker at the last 100th night, and I don't want that to happen again.

Standing here before you gentlemen who will shortly be Second Lieutenants always reminds me of one of the funniest things that ever happened to me in my life, because it involved just that:

I had gotten back from World War II and was asked by my Governor to organize the Arizona Air National Guard. I was a Lieutenant Colonel at the time in the Reserve, but the highest rank in the Guard was Captain. So I took the demotion and first thing I knew I was asked to fly to the National Guard Convention in Columbus, Ohio. I remember landing at Tinker in a P-51 and had to refuel there. While I was at the operations desk filling out my form No. 26, which was clearance, I had on my old leather jacket, I was gray then and wrinkled and I wore glasses. Standing next to me was this young, smartly dressed Second Lieutenant in a clean flight suit, and I knew he was looking at my Captain's bars and my gray hair and all the wrinkles.

Finally he couldn't stand it any longer and he finally said, "Pardon me, Captain, but where did you screw up?" I just mention that because there might be times when you Second Lieutenants think there is a long road ahead. I'll tell you it is long, but looking back on it now, if I had kept on as I wanted to in 1930 when I became a Second Lieutenant, I'd either be a retired general or a dead one. So keep at it.

It's not easy for a man in my position to know what to discuss with a group like you, young men who are going to carry on the traditions of our Air Force, young men who are going to play a prominent part in the military future of our country. But I have always felt that there is only one thing about getting older that's worth a darn, and that is that you can pile up a few hours of experience. If you have learned anything or think you have, it's wise, I think, to try to pass it on to younger people.

What I would like to mention just briefly tonight is in that general field, because in the last two weeks in Washington, in fact, for the last month or so, we have been subjected to a new Administration, which I'm not complaining about, but we have been busy on the Armed Services Committee and the Intelligence Committee and the Space Subcommittee listening to the new appointees, and one in particular, which I won't mention, forced me the other day to get on this subject, because I have been feeling more and more—in the last several months, maybe a year, that we are going through a repetitive period. I would remind you that all of history is just that. "What is Past is Prologue, Study the Past."

That is engraved above the steps of the National Archives Building in Washington. There isn't a thing that we are going through today as a nation or as a world, that we haven't gone through before. The dangerous thing in history is that man has never learned lessons. Man has never learned that he can be wrong and be willing to admit it, and either go to something that is sensible or learn something that's sensible.

I recall, as a young man, how we stumbled into World War I. A war that was not necessary, but we were not prepared and neither was the rest of the world so we went through that. We won the war, but we really lost it, because the country didn't learn from it. I recall in the 1920's when the Congress would not appropriate funds for a proper military position, when they would not make it attractive for young men to come into the services, and as a result of that we went into the 1930's a very, very weak nation. We didn't have tanks, guns, I think there were 1,300 men in the Air Corps in 1939. Yet England, who was certainly one of the large, powerful countries of the world at that time, was playing around with the idea that the world could live with Adolph Hitler.

I'll never forget the concessions that Mr. Chamberlain made coming back to London, announcing to the world that "peace" was to be ours, and within days, World War II started. We did not learn from that. We went into Korea, I think, correctly. I think the decision of President Truman was right, but I don't think the decision not to win in Korea was right, because it allowed the Chinese to become militarily strong.

We went into Vietnam, not for the purpose of war. We went there because President Eisenhower felt that, under the terms of the agreements reached in Geneva in 1954, to which we were not signators, we owed the South Vietnamese some help. It turned into a war, again. We didn't know what we were doing because our troops were sent there with orders not to shoot back. I can tell you the experiences of some of the airmen right in this room who were not allowed to shoot or destroy targets because of Vietnam, not because of the man in uniform, not because of any failure on the part of our military academies, or our other sources of officers and enlisted men; we failed because we had men in civilian clothes in Washington who didn't understand that when you decide to fight, you with the same breath decide to win, or don't fight. That applies to you in your daily lives, in your business lives, in your military lives but particularly does it apply to a country such as ours.

Now the questions come to me as I listen to people talk in Washington about getting along with the Soviets, about settling the SALT talks, about giving in on the B-1, about giving up on some weapons systems, because they may be offensive to the Soviets.

I wonder, where are we now? Where are we tonight, as you gentlemen in 100 days will put on your gold bars and the blue uniform of the Air Force and step out to responsibility? I think we are back in the 30's. I have that feeling—I think there is too much of a willingness to give in, too much of a willingness to yield, too much of a willingness to be weak, because weakness has an appeal to it. The attitude that I sense among some of these men who are supposedly going to represent us in negotiating an arms control, is pretty much the feeling that I can remember in the 30's when Mr. Chamberlain visited Hitler, and we got into war.

Then I wonder, too, as I sit in committee meetings listening to the men who are

trained in the business of the military, the chiefs, those experts on weaponry, the Chairman of the Joint Chiefs, all those who come to us from research and development in the Pentagon and from the academic field. I wonder who we are going to listen to? The people who know or the people who don't know, but sort of hope. We hear arguments against weapons, for example, like the B–1.

Now it doesn't do any good to argue with these people that we have crews flying B–52's who weren't even born when the B–52 first rolled down the runway. It's an old, tired airplane. Oh, it's a good airplane, but we need a new bomber.

We watched our fighters be cut back, just this week, without any explanation as to what the force level is going to be in five years. We don't mind a little cut here and there, but we want you gentlemen who are going to fly to be flying the best—not something that is 20 or 21 years old, something that is brand new. We haven't had a new battle tank, a main battle tank since World War II. And we haven't even formally let the contract yet.

We haven't had a new artillery piece since World War II. And we are hearing strong arguments against what I think is a definite trend in the direction of wars being fought with a minimum of people. This particular piece of equipment is called the AWACS. It will enable our commanders, the commanders of NATO or any other field of activity in this world to see the battlefield and control our weapons from an aircraft. Yet we we are told that it is not needed. Just last week, I visited the Boeing factory.

This is interesting to me because the week before I did a television show on the B–1 and the interviewer wanted to know if I thought we would ever see the day when we didn't need eyes. That's one of my big arguments about the bomber. Somebody has to get in that bird and fly over the target to see if we hit it. I'm not all that confident that our missiles are that accurate. We've never fired one at a target and never fired one with a warhead added.

So until I can see it splashed down on the target, I'm going to want a bomber to go over and take a look to see if we hit. The man asked me if I thought that we would ever see the day when we wouldn't need "eyes" in an aircraft to see the results. I thought, well, anything can happen. I said, maybe yes, in 25 or 50 years and, by golly, the next day we were up at Boeing and saw a remotely piloted vehicle that had stayed aloft for 28 hours at mach 65 and their target is over 50 hours.

So we will have, before you gentlemen probably get promoted, we will have a remotely piloted vehicle which can do some of those chores, and I'm not talking about just where'd you screw up. I'm talking about normal affairs. Then we have a third point which concerns me, although I sense that corrections are being made. It's the attitude of the Congress versus the attitude of the American people. Now the polls and the discussions that I get into with people wherever I go indicate that the American people are concerned about the rapid rate that the Soviets have been catching us and passing us in some areas of the military. The Congress isn't quite awake to that fact yet. I hope that they will be come this summer when it's time to vote on authorization and appropriation.

So we get down again to this business of history and "what is past is prologue." Here we are with the Soviets ahead of us in the Navy, ahead of us on the ground, and we are ahead of them in the air only because of the quality of our men in the air and the men on the ground who support the men in the air. This goes across the board in the Air Force, Army Air, Marines and the Navy, but as anyone can tell you and as you will learn, you can get experience in the air, probably faster than anyplace else.

But here we are again, like we were in the 30's, with a country or a philosophy, I won't say a country because I have never been convinced that the Russians are "bad people." I think those all live in the Kremlin and I don't even know if the Russian people understand what is going on there. But here we are faced with a philosophy that is determined to destroy our concept of life. Our concept of life is based on one thing and that's "freedom." There is no other reason for this country being here, except for freedom. That freedom came, I must remind you, as a "gift from God," and it's your responsibility and mine to protect that freedom, before it goes.

Ten years ago 35 percent of the people of this world lived under some kind of freedom. Last year it was 20 percent. The latest polls show 17 percent. We're not winning this war, and we can't allow the people of this country to watch its government allow the country to become a weak country, militarily, economically or, let me suggest, morally. So where will we be? Where will we be when your sons are sitting here at their 100th Night? Will they be here as free men? Will there even be an Academy? Will we even have a free system of government? I am an eternal optimist, and I think we will.

I think maybe we are going to be the exception in a whole long history of nations who seem to have gotten so far in their civilization and culture, when something happened. We don't know exactly what it is. I have a sense that, when 50 percent of the people have to support the other 50 percent of the people—whether the other 50 percent want to work or not, that we are reaching that stage that Rome met, that ancient Greece met, that ancient Babylon met and if we are, we are going to know about it in a short time.

So really what I am trying to say to you is that, with history being repetition and with ourselves living history all over again in these years, it is pretty much up to what you and I and the other people who live in this country want this country to be. I'm afraid that you may be disappointed at times, as you go out in your uniforms and find that the attitude toward your uniform is not what you think it should be . . . Let me tell you that we have all been through that before several times, and we'll all go through it again. I'm just standing here tonight sort of reminiscing off the top of my head about things that I think might be wise for you to think about. I just want you to know that I am very, very proud of this school, I'm proud of all the Academies, and I'm proud of the men that these Academies have turned out. I won't say that I have always liked them or gotten along with them, but I have never known a graduate of an Academy, in my life of service to the military of this country, who ever told me a lie.

Oh, they might try to steal your girl, or they might try to steal your car, but they will never tell you a lie, and that's the important thing.

So as you go out to represent, not the Academy, but our country, do so with a great deal of pride, because America has a great deal of pride in you.

CIVIL RIGHTS

Mr. HATCH. Mr. President, a recent letter has come to my attention by our colleague, Senator STROM THURMOND, in answer to questions from a Whitesboro, N.Y., college student on the subject of civil rights. It is an excellent letter and I should like to commend it to the attention of all Members of the Senate.

In his reply, Senator THURMOND spelled out in clear detail his strong, lifelong support of freedom and opportunity for all Americans. At the same time he pointed out with equal clarity the reason for his votes against a series of bills, primarily in the 1950's and 1960's, designed to insure civil rights.

Since I was not in the Senate when these various bills were debated and decided, I found the contents of this letter very informative. While Senator THURMOND's votes may have been misconstrued by some as indicative of bias, his letter shows otherwise. Instead, it shows that his votes against these bills—and, indeed, probably the votes of all who opposed them—were rooted in what Senator THURMOND and many others believed was sound constitutional law which is the basis of all our freedoms.

Mr. President, since Senator THURMOND's letter established his position on such questions so decisively and so well, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON ARMED SERVICES,
Washington, D.C., March 17, 1977.

Mr. RICHARD RODRIGO,
53 Bedford Drive,
Whitesboro, N.Y.

DEAR MR. RODRIGO: I have received the recent letter concerning your studies about civil rights and I am very pleased to respond to your inquiry. Of course, the subject you have raised is one which could be discussed at great length. In fact, it is difficult to give a definitive answer to such a broad topic in a brief letter, but I will try to give you a concise review of this matter.

My opposition to the series of bills which were raised over a period of years in the name of civil rights was based on the fact that they are inherently unconstitutional. While the goal of greater opportunity for American citizens is surely commendable, the means for achieving these worthy ends should be equally as commendable. In short, the series of bills to which you referred violated our system of Constitutional law and that system is the base from which all of us maintain our freedom.

I will not undertake to analyze each of the bills mentioned in your letter, but will review two of them as typical.

First, the 1957 act was one designed to bring certain civil rights litigation directly before a Federal District Judge, without a jury. In other words, the time-honored Constitutional guarantee of trial by jury was being denied by this legislation. If jury trials can be denied in civil rights cases, they can be denied in other cases. At some time in the future, when public sentiment is aroused by certain events, this cherished Constitutional guarantee might again be waived as an expedient to more quickly reach a specific goal. I believe the rights of all Americans are endangered when any of the guarantees in our Constitution are suspended, even in search of worthy objects.

Second, the 1965 act on voting rights was unconstitutional since the qualifications for voting are left by the Constitution to the States. However, the greatest inequity in the bill is its simple unfairness to certain states, including my home state of South Carolina. Instead of making this act applicable to all states on an equal basis, it only applied to

a handful of Southern States and Arizona. Thereafter, all elections and state election laws in the affected states came under the purview of the U.S. Justice Department for final approval. No state law affecting elections in these states, down to those affecting only local jurisdictions, can be changed even to the most minimal or technical degree without approval of the Civil Rights Division of the Justice Department. Only the few states which were singled out by this law have to abide by this Federal encroachment into its laws. The triggering device of the Voting Rights Act which makes it applicable to a state is simply the number of persons registered at the time of passage. If fewer than half of the states population over 21 years of age was registered at the time, the Federal government then became the watchdog and final judge of all election matters in that state. It had nothing to do with existing state laws or practices.

While, historically, there were state laws prior to the landmark court cases of the late 1940s and early 1950s which discriminated on the basis of race, there were none at the time of the Voting Rights Act of 1965. Blacks in my states registered freely and voted freely at the time. The fact that insufficient numbers of them had yet registered to satisfy the quota established by the 1965 act should not have placed the state under Federal jurisdiction. Black citizens of South Carolina, for example, began registering at will by the late 1940s when, by the way, I was Governor. Their numbers increased steadily through the years and the 1965 act was not necessary to ensure their participation in the elective process. The bill is unfair to those few states to which it is applicable, since it does not apply to all states, and it does not meet the test of the Constitution.

With respect to your question about my position through the years on civil rights, I do not feel that I have changed my basic position. I am for full participation and opportunity for all citizens and I always have been. For example, as Governor, I led the successful fight to repeal the state's former requirement for the payment of poll taxes as a prerequisite to voting. This action came long before Federal legislation repealed this requirement nationwide. In earlier times, the requirement for paying poll taxes in order to vote was an indirect device used to exclude some citizens from the electoral process. It most frequently affected black citizens of that era. However, repeal of this law combined with the court decisions affecting voter participation removed all barriers to full voting rights by all citizens.

My record of support for complete opportunity and individual liberty for all Americans is as long as my public career. Again referring to my Administration as Governor, it was my program for establishing a state system of job training which later became the current Technical Education System. It was this program, particularly in its earlier days, which provided so many black citizens a chance to upgrade their skills and their opportunity for better jobs.

Throughout my public career, I have followed the course of keeping the government consistent with individual liberty and opportunity, while in tune with the Constitution. As a matter of fact, I was the first member of Congress from the South to appoint black staff members in my office. I was also the first to successfully recommend and sponsor the appointment of a Southern black person to a Federal judgeship.

As a private matter, I established many years ago The Strom Thurmond Foundation to provide scholarship funds for needy, worthy South Carolinians. Many of the students receiving aid from this Foundation have been black students.

Unfortunately, the votes I cast against civil rights bills created the false impression with some people that I was opposed to blacks or civil rights for all people. Such an impression, where it existed, was, indeed, false then as it is today.

I am for the full freedom of every American citizen, so long as the exercise of that freedom does not infringe on someone else's freedom. That is what the Constitution guarantees. In my view, the various acts to which you referred violate the Constitution and infringe on the general population's guaranteed freedom of Federal control.

Good luck in your college work.

With kindest regards and best wishes,

Very truly,

STROM THURMOND.

THE ROBERT J. COLLIER TROPHY

Mr. GOLDWATER. Mr. President, today the National Aeronautic Association, of which I am proud to be a member, met to decide who would be the winner of the Robert J. Collier Trophy for 1976. This probably is America's most prestigious aeronautics and astronautics award and whoever receives it has had to excel in the field dominated by the very best in the business. At this point in my remarks, I ask unanimous consent that the description of this trophy be printed in the RECORD, and following that a list of the recipients of the trophy dating back to 1911.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE ROBERT J. COLLIER TROPHY

ORIGIN

The Robert J. Collier Trophy was established in 1912 as the "Aero Club of America Trophy" by Robert J. Collier. In 1922 the Aero Club of America was incorporated as the National Aeronautic Association. At that time NAA assumed administration of this Trophy and in 1944 renamed it the "Robert J. Collier Trophy." Since the Trophy is awarded for achievement in the year prior to actual presentation, the Trophy was first presented in 1912 to Glenn H. Curtiss for his achievements in 1911.

AWARDED TO

The Robert J. Collier Trophy is awarded annually "for the greatest achievement in aeronautics or astronautics in America, with respect to improving the performance, efficiency or safety of air or space vehicles, the value of which has been thoroughly demonstrated by actual use during the preceding year."

COMMITTEE

The Robert J. Collier Trophy Committee is appointed annually by the President of the National Aeronautic Association. The size of the membership of the Committee is determined by the President of NAA.

PRESENTATION

The Robert J. Collier Trophy has, in most instances, been presented by the President of the United States at a ceremony in the White House. It is permissible to present the Trophy outside of the White House, and the presentation may be made by whomever is selected by the National Aeronautic Association.

RECIPIENTS OF THE ROBERT J. COLLIER TROPHY: CHRONOLOGY

1911: Glenn H. Curtiss, for development of the hydro-aeroplane.

1912: Glenn H. Curtiss, for the flying boat.

1913: Orville Wright, for development of the automatic stabilizer.

1914: Elmer A. Sperry, for gyroscopic control.

1915: W. Sterling Burgess, for the Burgess-Dunner hydro-aeroplane.

1916: Elmer A. Sperry, for drift indicator.

1917–1920: No awards because of war.

1921: Grover Loening, for development of the aerial yacht.

1922: Personnel of the United States Air Mail Service.

1923: Personnel of the United States Air Mail Service for night flying.

1924: The United States Army.

1925: S. Albert Reed, for development of the metal propeller.

1926: Major E. L. Hoffman, for development of a practical parachute.

1927: Charles L. Lawrence, for his radial air-cooled engine.

1928: Aeronautics Branch of the Department of Commerce, for development of airways and air navigation facilities.

1929: The National Advisory Committee for Aeronautics, for the NACA cowling.

1930: Harold Pitcairn and his staff, for their autogiro.

1931: The Packard Motor Car Company, for the aircraft diesel engine.

1932: Glenn L. Martin, for development of an outstanding bi-engined, high-speed, weight-carrying airplane.

1933: The Hamilton Standard Propeller Company and Chief Engineer, Frank W. Caldwell, for the controllable pitch propeller.

1934: Major Albert F. Hegenberger, for blind landing experimentation.

1935: Donald Douglas and his staff, for development of the DC–2.

1936: Pan American Airways, for its trans-Pacific and overwater operations.

1937: The Army Air Corps, for design and equipment of a sub-stratosphere airplane.

1938: Howard Hughes and his Crew, for his round-the-world flight.

1939: Airlines of the United States, for their record of safety in air travel.

1940: Dr. Sanford Moss and the Army Air Corps, for development of the turbo-supercharger.

1941: The Air Forces and the Airlines, for the world-wide operations typified in the routes of the Air Transport Command.

1942: General H. H. Arnold, for organization and leadership of the mightiest air force in the world.

1943: Captain Luis de Florez, USNR, for development of synthetic training devices for flyers.

1944: General Carl A. Spaatz, for demonstrating the air power concept through employment of American aviation in the war against Germany.

1945: Dr. Louis W. Alvarez, for development of the ground controlled approach radar landing system.

1946: Lewis A. Rodert, for development of thermal ice-prevention system.

1947: John Stack, Lawrence D. Bell, and Captain Charles E. Yeager, for supersonic flight.

1948: Radio Technical Commission for Aeronautics, for the development of a system of air traffic control to permit safe and unlimited operations under all-weather conditions.

1949: William P. Lear, for the development of the Lear F–5 automatic pilot and automatic control coupler system.

1950: The Helicopter Industry, the Military Services, and the Coast Guard, for development and use of rotary-wing aircraft for air rescue operations.

1951: John Stack and Associates at the Langley Aeronautical Laboratory, NACA, for the conception, development, and practical application of the transonic wind tunnel throat.

1952: Leonard S. Hobbs of United Aircraft Corporation, for design, development, and production of the J–57 jet engine.

1953: James H. Kindelberger and Edward

H. Heinemann, for development of the first supersonic airplanes in service.

1954: Richard Travis Whitcomb, NACA Research Scientist, for discovery and experimental verification of the area rule, yielding higher speed and greater range with same power.

1955: William M. Allen and the Boeing Airplane Company and to General Nathan F. Twining and the United States Air Force, for development and operational use of the B–52.

1956: Charles J. McCarthy and Associates of Chance-Vought Aircraft, Inc. and to Vice Admiral James S. Russell and Associates of the U.S. Navy Bureau of Aeronautics, for conception, design, and development of the F–8U Crusader.

1957: Edward P. Curtis, for his report entitled, "Aviation Facilities Planning," developed which he was Special Assistant to the President of the United States.

1958: The United States Air Force and Industry Team responsible for the F–104 Interceptor: Clarence L. Johnson of Lockheed Aircraft Corporation for design of the airframe; Neil Burgess and to Gerhard Neumann of the Flight Propulsion Division, General Electric Company, for development of its J–79 turbojet engines; Major Howard C. Johnson, USAF, for establishing a World Landplane Altitude Record, and Captain Walter L. Irwin, USAF, for establishing a World Straightaway Speed Record.

1959: The United States Air Force, the Convair Division of General Dynamics Corporation, and to Space Technology Laboratories, Inc., for developing, testing, producing, and putting into operation the Atlas—America's first intercontinental ballistic missile.

1960: Vice Admiral William F. Raborn, under whose direction the United States Navy, Science and Industry created the operational Fleet Ballistic Missile Weapon System—Polaris.

1961: Major Robert M. White, Joseph A. Walker, A. Scott Crossfield, and Commander Forrest Petersen, representing the United States Air Force, National Aeronautics and Space Administration, North American Aviation, and the United States Navy, respectively, for invaluable technological contributions to the advancement of flight and for great skills and courage as test pilots of the X–15.

1962: Lt. Cmdr. M. Scott Carpenter, USN; Major L. Gordon Cooper, USAF; Lt. Col. John H. Glenn, Jr., USMC; Major Virgil I. Grissom, USAF; Cmdr. Walter M. Shirra, Jr., USN; Cmdr. Alan B. Shepard, Jr., USN; and Major Donald K. Slayton, USAF, for pioneering manned space flight in the United States.

1963: Clarence L. "Kelly" Johnson, for designing and directing the development of the USAF A–11 Mach 3 aircraft.

1964: General Curtis E. LeMay, for contributing great achievements with respect to our air vehicles and our national defense.

1965: James E. Webb and Hugh L. Dryden, representing all of the Gemini program teams which significantly advanced human experience in space flight.

1966: James S. McDonnell, for his leadership and perseverance in advancing aeronautics and astronautics exemplified by the F–4 Phantom aircraft and the Gemini space vehicles.

1967: Lawrence A. Hyland, representing the Surveyor Program Team at Hughes Aircraft Company, the Jet Propulsion Laboratory, and associated organizations that put the eyes and hands of the United States on the Moon.

1968: Col. Frank Borman, USAF; Capt. James A. Lovell, Jr., USN; and Lt. Col. William A. Anders, USAF, as the crew of Apollo 8 and representing the entire United States space flight team for the successful and flawless execution of the first manned lunar orbit mission in history.

1969: Neil A. Armstrong; Col. Edwin E. Aldrin, Jr., USAF; and Col. Michael Collins, USAF, for the epic flight of Apollo 11 and the first landing of man on the surface of the Moon, July 20, 1969.

1970: The Boeing Company, as leader of the Industry-Airline-Government team which successfully introduced the 747 into commercial service with particular recognition to Pratt and Whitney Division of United Aircraft Corportion and to Pan American World Airways.

1971: Col. David R. Scott, USAF; Col. James B. Irwin, USAF; and Lt. Col. Alfred M. Worden, USAF, for demonstrating superb skill and courage and to Dr. Robert R. Gilruth as representative of the engineering genius of the manned space flight team, culminating in Apollo 15—man's most prolonged and scientifically productive lunar mission.

1972: Admiral Thomas H. Moorer, USN, representing the Officers and Men of the 7th and 8th Air Forces of the United States Air Force and Task Force 77 of the United States Navy for "Operation Linebacker II."

1973: The Skylab Program, with special recognition to William C. Schneider, Program Director, and the three Skylab Astronaut Crews for proving beyond question the value of man in future explorations of space and the production of data of benefit to all the people on Earth.

1974: Dr. John F. Clark, NASA, and Daniel J. Fink, General Electric Company, representing the NASA/Industry Team responsible for the Earth Resources Technology Satellite Program—LANDSAT—for proving in 1974 the value of U.S. space technology in the management of the earth's resources and environment for the benefit of all mankind, with special recognition to Hughes Aircraft Company and RCA.

1975: David S. Lewis, General Dynamics Corporation, and the F–16 Air Force-Industry Team, for significant advancements in aviation technology leading to innovative fighter aircraft effectiveness.

Mr. GOLDWATER. Mr. President, this year after a very close vote the award was given to the B–1 bomber and its people who were and are responsible for its achievements. I think it would be of great interest to the readers of the CONGRESSIONAL RECORD to be able to know a little more about this great aircraft that many of us feel is of such extreme importance to the future safety of our country. Therefore, once again I ask unanimous consent that a breakdown of the reasoning for this award being given to the B–1 be printed in the RECORD.

There being no objection, the breakdown was ordered to be printed in the RECORD, as follows:

1976 ROBERT J. COLLIER TROPHY

NOMINEE

The "B–1 team" consisting of the United States Air Force, prime contractor Rockwell International, and associate contractors General Electric Company, the Boeing Company, Airborne Instruments Laboratory Division of Cutler Hammer Inc., and the more than 3,000 subcontractors and suppliers.

By Rockwell International for the design, development, and integration of technologies and subsystems resulting in the B–1 weapons system that met all Air Force mission requirements during a stringent ground and flight test schedule. This resulted in a decision on December 2, 1976 by the Department of Defense to begin production. In addition, the successful melding of many of the most modern technological advancements in aerodynamics systems innovations and integration, propulsion, materials selections through fracture mechanics processes, and metal joining and fabrication techniques should have a great impact in the performance and efficiency of future large turbofan powered aircraft.

JUSTIFICATION

The B-1 program was the first "fly before buy" project started under former Deputy Secretary of Defense David Packard, which resulted in demonstration of both the flying characteristics and structural integrity of the aircraft. From a flight test standpoint three aspects unique to large aircraft test porgrams resulted: (1) Demonstration of the operational mission capabilities at the earliest possible date, (2) A concurrent structures test program that would result in two lifetimes of fatigue testing for critical airframe structures prior to production decision, (3) A team approach for flight testing with both the Air Force and contractors participating from conception to execution, which would include mission planning, actual crew manning, and maintenance, and data analysis.

All of the above goals were met or exceeded prior to the planned production decision announced on December 2, 1976. At this time the Department of Defense authorized the construction of the first three operational B–1s and the purchase of "long lead" items and material for eight additional aircraft.

The three prototype B–1s logged nearly 40% more flying hours at the end of Phase I of flight testing than were required by the Department of Defense before a production decision. During that time, the efficient cost effective management exercised by the USAF/Contractor team resulted in a B–1 flight test program whose performance will become the measuring standard for future aircraft programs. The test team concept was evident in planning and implementing the flight test program in all areas. All flights had joint crews except those specifically designated initial operational test and evaluation (IOT&E which were SAC/AFTEC personnel.

The program was accomplished with a perfect safety record while attaining the following significant achievements:

1. Automatic terrain following, 0.85 Mn/200 feet over "local" terrain and 400 feet over remote mountainous ranges.
2. Maximum speed, in excess of 2.1 Mn.
3. Maximum altitude, 50,000 feet.
4. Extensive experience (40 hours) at low altitude/high speed, i.e. below 10,000 feet/above 0.80 Mn.
5. Maximum gross weight take-off (on eighth flight).
6. Operation of weapon doors, high speed, supersonic 1.5 Mn, low altitude subsonic 0.85/1500 feet.
7. Stores separation, SRAM, Mk 82 Snakeye.
8. Routine aerial refueling, including loading to maximum inflight gross weight.
9. Night flight, including aerial refueling.
10. Airloads, initial testing complete.
11. Manned/unmanned alert demonstration, SAC/AFTEC.

AIRCRAFT DESCRIPTION

The B–1 Strategic Weapon System embodies the integration of selected advanced technologies and design concepts developed through government and industry efforts throughout the late 1960's and early 1970's. The design criteria for this weapon system were evolved from numerous studies, such as the AMSA (Advanced Manned Strategic Aircraft) Series. These studies established the stringent requirements for a cost effective air vehicle with high aerodynamic, propulsive and structural efficiency.

The B–1 aerodynamic design has incorporated blended body/wing features together with a variable sweep wing to provide high payload capability from short runways. The air vehicle has the ability to carry these payloads at high subsonic speeds at low altitudes as well as high supersonic speeds at high altitudes over extremely long ranges. The propulsion system installation has been

integrated into this aerodynamic configuration to minimize the aircraft cross section while efficiently supplying the required propulsive effort with low specific fuel consumption. A durable, damage tolerant structure with a high structural efficiency of 24.9 percent (structural weight/gross weight) has been achieved. The level of structural durability was enhanced by the utilization of high fracture tough materials.

Reliability has been maximized by a careful utilization of redundant, highly reliable components. This reliability and redundancy has been demonstrated by testing including failure simulation. The result of this high reliability is decreased maintenance and safe aircraft operation.

The unique manner in which these features have been combined into the B–1 has advanced air vehicle design a quantum step.

AERODYNAMIC EFFICIENCY

The operational characteristics of the B–1 have met the requirements for minimum length runways and intercontinental range combined with the capability for both high speed, low altitude penetration and sustained Mach 2 plus high altitude cruise. This has resulted from a high level of aerodynamic efficiency. As is strikingly visible, the B–1 has met the challenge through an optimized combination of the area rule to a blended fuselage/wing configuration and a variable sweep wing to provide high efficiency and flexibility through the wide range of design operating conditions. Good short field take off and landing characteristics were achieved through the use of large area single slotted flaps, variable wing sweep and full span segmented leading edge slats.

Pitch and roll requirements have been met by all movable horizontal tail surfaces mounted high on the vertical fin combined with wing spoilers to augment roll control at low speeds. The spoilers function as speed brakes for descent and landing. The high level of aerodynamic efficiency achieved by the B–1 aerodynamic configuration has been demonstrated by one of the most extensive wind tunnel programs yet conducted including nearly 17,000 hours of aerodynamic performance and flying qualities testing.

The overall efficiency of the B–1 configuration is evident when it is noted that although significantly smaller and lighter than the B–52 it is intended to replace, the B–1 carries nearly twice the payload. Further, the careful aerodynamic shaping of the blended wing-body in addition to high aerodynamic efficiency, results in a radar image only a small fraction of that presented by existing weapon systems—a very significant advantage in penetrating a hostile environment.

STRUCTURAL INTEGRITY

The design and development of the basic structure for the B–1 is characterized by many innovative concepts for achieving the durability required for advanced aircraft. These concepts have combined, for the first time in aircraft design, the principles of fracture mechanics, redundant load path and fatigue resistance practices. The capability to meet these challenging goals has been demonstrated by an extensive structural test program.

The resulting design has progressed successfully through a structural integrity test program of greater depth than any previously developed aircraft. The development of fracture toughness material specifications resulted from over 2,000 fracture mechanics material properties specimens as well as 300 crack growth element tests. The materials selected from these tests were integrated into the structural design and a series of over 600 design development tests were completed prior to the final basic structural drawing release.

The soundness of the design evolved from this process has been further demonstrated by design verification testing to ultimate static loads for the following major sections: wing outer panel, wing pivot, wing center section, forward intermediate fuselage, aft intermediate fuselage, aft fuselage, horizontal stabilizer, vertical stabilizer, landing gear, nacelle support, flaps and slats.

Acoustic testing (11 major sections), ground vibration testing (complete air vehicle) and surface free-play tests (complete air vehicle) have all been completed to provide additional confidence in achieving the structural durability necessary for the mission requirements.

The efficiency of this design is best illustrated by comparing the structural weight ratios (structural weight/gross weight), of some recent aircraft:

[In percent]

B–1	24.9
FB–111A	23.0
C–5A	28.4
C–141	24.6

This structural efficiency has been accomplished while still achieving durability, long fatigue life (13,500 hours times 4 lives), and high static strength.

SUBSYSTEM TECHNOLOGY

The B–1 subsystems installation provide a level of safety and performance for exceeding any comparable aircraft. The incorporation of a high level of redundancy has been a keynote in the subsystems design. This redundancy along with selective application of the lastest advanced technologies has been utilized to maximize safety, reliability and maintainability. These subsystems have gone through prequalification testing and demonstrated their contribution to the total, fully integrated air vehicle. No other aircraft has so fully integrated these new technologies in their design to achieve as high a degree of safety, reliability (96.8%), and maintainability (21.7 maintenance man hours/flight hour). Some representative examples of these advancements are presented in the following.

One of the most advanced electrical control systems designed for large aircraft is operational on the B–1. The system, called Electrical Multiplex System (EMUX), controls many of the aircraft's major subsystems, permitting the elimination of approximately 30 percent of the air vehicle wiring. The reliability of the system was thoroughly demonstrated in thousands of hours of laboratory testing and it was fully operational during the first flight of the B–1. The system affords greater simplicity in installation and maintenance. Actual use has demonstrated a Mean-Time-Between-Corrective-Action of 40 hours and a positive reliability growth which will result in EMUX exceeding its specification requirements.

The B–1 flight control system has integrated the advanced aerodynamic features of the aircraft with the latest technological achievements in flight control augmentation systems to provide safe, reliable, air vehicle handling qualities throughout the varied mission requirements of low altitude high subsonic flight to high altitude supersonic flight. These design features include a fail-operational/fail safe control system, safe flight after dual failures, mission completion after single failure and no degradation of basic air vehicle structural damping. The flight controls design redundancy has achieved a higher level of safe and reliable controls than has been previously possible on past aircraft designs. Extensive flight simulator testing (2.1 million cycles in 1974), flight mission simulator testing, and prequalification testing has been accomplished on the flight control ssytems to demonstrate high confidence in the advanced safety and reliability concepts.

The wide range of operational requirements of the B–1 demands high thrust as well as high efficiency from the propulsion system at both low and high altitude and for both subsonic cruise speeds and sustained Mach 2, plus operation. Meeting these inherently contradictory criteria required the careful combination of an advanced technology engine with specifically tailored nacelle features. The two spool F–101 engine developed by the General Electric Company combines a 2:1 bypass ratio 2 stage fan, with a high pressure ratio core gas turbine and mixed flow completely throttleable afterburner to achieve high efficiency with high thrust potential for both subsonic and supersonic operation. Overall propulsive efficiency is maximized by mounting the F–101 engine in dual nacelles with external compression variable geometry inlets incorporating bypass and boundary layer bleed control, good transient response and front face distortion free flow distribution. Moveable outer inlet lips are also provided to boost mass flow for takeoff. Overall nacelle configuration is optimized to favor the primary subsonic mission slightly as well as to insure satisfactory engine/inlet compatibility throughout the B–1 operating and maneuver envelope.

Outstanding compatibility and better than design performance has been demonstrated by over 10,000 hours of wind tunnel testing including testing of a full scale inlet and engine in the 16-foot transonic and supersonic tunnels at the Arnold Engineering Development Center (AEDC). The integration of the engine and aircraft secondary power systems has been validated in the Secondary Power/Engine Integration (SP/EI) simulation facility. Over 400 hours of combined engine and secondary power systems operations were completed before first flight in December 1974.

B–1 FACTSHEET

Primary function: Strategic heavy bomber to modernize, the bomber force.

Powerplant: Four General Electric F–101 turbofan engines (30,000 pounds thrust class).

Maximum speed: Over Mach 2 at high altitude; high subsonic on the deck.

Range (unrefueled): Intercontinental.

Tanker support: Compatible with existing KC–135.

Crew: Four: pilot, copilot, and two systems operators (with provisions for two instructors).

Maximum gross takeoff weight: 350,000 to 400,000 pounds.

Weapons payload: Approximately twice as great as B–52.

Dimensions: Approximately 2/3 the size of B–52.

Wing span: wings forward, 137 ft.; wing swept, 78 ft.

Length: 151 ft.

Height: 34 ft.

Runway requirements: Significantly shorter than B–52.

JULIUS HOBSON

Mr. KENNEDY. Mr. President, Julius Hobson, a man of tremendous courage, strength of spirit, and determination died yesterday.

Julius Hobson's untiring efforts to bring an end to racial discrimination earned him the respect of both blacks and whites in Washington. He struggled to improve the quality and responsiveness of the District public school system, to improve the housing of low-income District residents, and to enhance the opportunities available to the poor in this city he loved.

Julius was always there, a voice that would not be muffled. Like a mirror, he stood as a reminder of those who were

in positions of authority and needed to see their image clearly.

I worked with him on the issue of D.C. representation in Congress. He felt very deeply the truth in the slogan that the District of Columbia is America's last colony. He supported our constitutional amendment to provide full voting representation in the Senate and the House of Representatives for the people of the District. But he did not think we went far enough. He believed in statehood as the only credible solution, and singlehandedly he made statehood a credible solution for the District.

In everything he did, his eloquence and his passion, his intellect and his inexhaustible commitment shone through. And his courage against his illness was an inspiration to all who knew him. He was a great leader in this city, and we shall miss him as we carry on his work.

I know that many in this Chamber join me in offering to the Hobson family our shared sense of loss, even as we pay tribute to him for his enormous achievements for the benefit of this city.

I ask unanimous consent that an editorial and series of articles from today's Washington Post may be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 24, 1977]

JULIUS W. HOBSON SR.

To the last, Julius W. Hobson Sr. remained the uncompromising curmudgeon, refusing to go quietly from his six-year battle against a cancer for which there's yet no cure. Typically, when he first learned that he was terminally ill, he said he counted on defying the illness for just about this many years—and he went on, shunning sympathy, battling complacency, infuriating some people, inspiring others.

Until his death yesterday at the age of 54, Mr. Hobson—with his wife, Tina, and a loyal city council staff—never let the business of this community drop in deference to his waning energy or to the enormous pain that he would suffer. Rather—as councilman-at-large and sole representative of the Statehood Party in the city's first elected council of the century—Mr. Hobson was still refusing to let things be. He was pushing his own legislative agenda for 1977, a list of bills covering a broad range of local subjects from statehood to a state fair.

For 25 hell-raising years, Mr. Hobson shook Washington in unorthodox, unpredictable ways. As often as not, he was the lone frontline fighter against some aspect of racial discrimination, the gruff-and-ready stickler for equal education. He was always fast with an irreverent quip, and he never let up on his lawsuits, his books, his thorough research, his provocative political activities and his extraordinary ability to intimate, embarrass or fool officialdom into doing something about civil rights.

In truth, though, it wasn't until the news of his illness in 1971 that the great majority of citizens paused long enough to begin appreciating the measure of the man. There was the lawsuit ending rigid tracking of public school students and Mr. Hobson's picketing and other protests that had relentlessly bulldozed down color barriers everywhere—in housing, hiring, education and anything else Mr. Hobson confronted. And just as he championed the civil rights of black people, Mr. Hobson, with equal adamance, insisted that reverse racial innuendo be challenged.

"I sleep mad," Mr. Hobson used to say, and you believed it. Still, for all his strident bluster, Julius Hobson was a deeply compassionate, gentle, generous and astonishingly candid man. His death is an enormous loss to the community. But the memory of that hat, that pipe, that freewheeling Alabama twang and the legacy of Julius Hobson will remain to be cherished.

[From the Washington Post, Mar. 24, 1977]

HOBSON HELPED CHANGE THE CITY HE LIVED IN

(By Richard Cohen)

If you came to Washington when I did, which was after Julius Hobson had done much of his work, you might have found it hard to understand the man. From the eyes of one newly arrived the city looked just fine. Julius Hobson looked at it and raged. It took a while to understand. He saw things others didn't. He saw the history of the place.

You have to know that to understand Hobson. This town is a funny place. It has managed to hide its history and when you come here from the North or the West you would think that Washington is much like the place you left. It isn't, or at least it wasn't. This was once a Jim Crow town and people like Hobson knew there was work to be done here.

If you stay here long enough, the history of the place starts to seep out. Someone will mention a civil rights march. Once there was an old woman in Silver Spring who told me how she used to take the bus downtown to picket some store. She would march around the place until it was time to take the bus home to prepare her husband's dinner. She sensed the puzzlement in my eyes. Yes, in Washington, she said. The stores would not hire blacks.

Sometimes the history comes out in other ways. A native might refer to some school and say something like "colored" or "white". Sometimes an old cab driver will be talking and he'll refer to a park by race—the way things used to be. Things are no longer that way. Julius Hobson is one of the reasons.

He did not fight alone and he did not fight without making enemies and he did not, Lord knows, fight anonymously. But he was usually out in front and he was usually right and he was usually, if you'll pardon the expression, the biggest mouth around. He would open it and this gift of a voice would come out—deep and strong with a timbre to it that said very clearly that this man was not to be messed with. He had something else—a look. There was something in his eyes. Sometimes they danced with delight and sometimes they fixed you hard, telling you that you had just asked another fool question.

He was elected to the first elected school board and later to the City Council. You could see him up at the City Council dais, a head peeping up at you, his spine crumbled and the man himself dying, and you had to ask yourself why he was there. He was a leader, a troublemaker, born to march at the head of a column, to excite the imagination of journalists. Now he was dealing with zoning and on one particular day with whether smoking should be permitted in public places. He was by then a crippled man, but when he opened his mouth, the voice was still there—loud, proud and saying things that were well worth listening to.

Civil Action No. 82-66 was his towering achievement. The popular name varied. Some gave credit to the judge and called it the Wright decision. Others called it Hobson vs. Hansen. Call it what you want, it was the lawsuit that Julius Hobson had brought in behalf of his son and daughter and when he was finished the Washington school system was not the same.

You have to understand the school system to appreciate what Hobson did. You have to understand a system that would not return phone calls, that would tell you things that were not true, that could put you on hold until hell froze over and then transfer you to an office that couldn't possibly know what you wanted. This was a system that could tell you attendance was no problem when you could see for yourself that the classrooms were half empty. If you questioned, you were given proof. The records showed attendance was good.

Julius Hobson waded into this system and got answers from it. He did much of his own research, mastering the numbers and terms that befogged the issues. He studied and he worked and he compiled his facts. When he was finished and had presented his case in court, this is what the judge had to say: "In sum, all the evidence in this case tends to show that the Washington school system is a monument to the cynicism of the power structure which governs the voteless capital of the greatest country on earth."

So now he is dead and now is the time for eulogies. Some will recall the time he came into Georgetown with rats from the ghetto and some will recall the flamboyant way he could lead a demonstration. All this will be shown on television because all this is great film. But the film will not show a man working alone, going over the figures and the reports, the graphs and the jargon, until the back ached and the eyes watered and he had to ask himself, as he did, whether it was worth it—whether he could make a difference.

It was and he did.

HOBSON WON RESPECT AS FREEDOM FIGHTER, "GREAT HUMAN"

(By Milton Coleman)

For many of those with whom Julius Hobson worked in city government, news of his passing yesterday meant the loss of someone who was sometimes an adversary, but also considered a warrior, freedom fighter, pioneer and "great human being."

"We may have differed with him from time to time. But you never lost respect for Julius Hobson," said Mayor Walter E. Washington.

"All of us on the Council will miss the guy," said City Council Chairman Sterling Tucker. "He was a real man."

Mr. Hobson, an at-large city councilman and member of the D.C. Statehood Party, died yesterday at George Washington University Hospital after suffering from leukemia. He was 54.

His death had been anticipated for many weeks, and already yesterday speculation was beginning among some members of the party's 23-percent Statehood Central Committee as to who would succeed Mr. Hobson on the Council.

City law gives the Statehood Committee the right to choose a temporary successor for Mr. Hobson until a special election can be held, probably in mid-July, to complete the remaining 18 months of Mr. Hobson's four-year term.

Mr. Hobson's immediate successor is likely to come from among four persons, according to some Statehood Party sources: Mr. Hobson's wife, Tina (his stated choice to succeed him); his son Julius Jr., who is a Washington school board member; Hilda Mason, who also serves on the school board; and recently elected Statehood Party chairperson Josephine (Jo) Butler.

Several of Mr. Hobson's 12 colleagues on the City Council were surprised to learn of his passing. Even though it was uncertain how long he would live, he had only Tuesday been among them at Tuesday's regular Council meeting.

"Even though we knew that Julius had an incurable illness, we regret his leaving," said Council member Marion Barry.

"I'm just glad that he didn't have to suffer

a great deal," said Council member John A. Wilson.

Many of the Council members saw themselves as being active in different sectors of the same struggles that marked Mr. Hobson's career, and they eulogized him in terms that reflected those struggles.

"Before the cause of social and racial justice came in vogue, his strong but lone voice could be heard," said Council member David A. Clarke. "When many joined in the campaign, he provided the leadership of a pioneer. And, when the focus shifted, Julius fought on."

In the last days of his service on the Council, Mr. Hobson had become concerned that many of those he had struggled beside had somehow betrayed the trust of the voters.

At a recent press conference introducing legislation that would allow elected officials to be recalled from office by the voters, he said politics had gotten too involved in City Council activities and that was enough to drive him out.

It was shortly after Mr. Hobson's doctors told him in January that he might die within six months, that the Statehood Party held its first convention in two years to prepare for his possible passing.

Anton Wood, a member of the party's central committee and former party chairman, said yesterday that it is not certain yet how the party will select the successor to Mr. Hobson.

The central committee could choose a replacement immediately on its own, Wood said, or the selection could be made through some kind of poll of the 1,800 people who are registered to vote as Statehood Party members in D.C. elections.

If the 23-person committee makes the decision alone, sources said, chairperson Butler—a 56-year-old health educator for the D.C. Lung Association—would have an edge.

Some of the central committee members worked in her unsuccessful campaign for at-large council member last fall, and she also has broad support among party members because of her longtime involvement in the party, according to the source.

Mr. Hobson had told the recent convention he would prefer that his wife succeed him. But several party members said yesterday that Mrs. Hobson might not be chosen, or could be picked to fill the spot temporarily, but not be nominated to run in the special election.

Mr. Hobson's son said yesterday that he had often discussed becoming a council member with his father. "I think he really wanted me to do it," Hobson Jr. said. "He said on several occasions that he would like for me to follow in his footsteps."

Mrs. Mason was unavailable for comment yesterday.

The special election to choose a person to complete Mr. Hobson's term will mark the first time that the city's fledgling home-rule government will have to fill a City Council vacancy in midterm, and some of the peculiarities of the election law could be important.

For example, the law provides that only two of the four at-large seats on the Council may be held by Democrats, and Democrats already hold two.

Thus, only independents, Republican and Statehood Party members will be able to run in the election to fill the Hobson vacancy.

If Hobson Jr. or Mason is nominated to run in that special election or chosen to succeed Hobson Sr., either would have to relinquish the school board seat. The board then would choose a successor.

If Hobson Jr. or Mason were defeated in a special election, either still could be reappointed to the school board or run in a special election to fill the vacancy either's resignation created, according to a lawyer for the Board of Election and Ethics.

Mr. Hobson's successor as chairman of the Council's Committee on Education, Recreation and Youth Affairs is expected to be William Spaulding (D.-five), who is now vice chairman of that committee.

JULIUS HOBSON SR. DIES—ACTIVIST STIRRED UP CITY FOR 25 YEARS

(By Cynthia Gorney)

Julius Hobson Sr. died yesterday at age 54 of the cancer that would not let him fight any more.

When he died he was a city councilman—the at-large representative of the party seeking statehood for the District of Columbia. He worked almost full-time until the day before his death, when he attended his last City Council meeting.

Behind him stretched an extraordinary record of achievement in local civil rights and educational reform: the lawsuit that ended tracking in Washington schools, the picket lines that opened downtown hiring to blacks, the demonstrations and speeches and pointed theatrics that unsettled Washington for 25 years.

"I sleep mad," Mr. Hobson used to say. A Marxist who never learned the fine political art of moral compromise—and never wanted to—he spent his adult life waging an unorthodox and often lonely war on the racism that had shaped his childhood. His weapons were publicity, statistics, the American legal system, and an implacable refusal to let things be.

His death shortly after noon yesterday at George Washington University Hospital came six years after Mr. Hobson learned he was sick—first with multiple myeloma, a cancer of the spine, and then with acute leukemia, which sapped his resistance to infection and allowed internal complications to finally kill him. It was an illness he loathed, not because he knew it would kill him, but rather because it ate away at the enormous and angry energy that was the essence of Julius Hobson.

Exhorting and prodding, manipulating the press and ignoring the hesitant, Mr. Hobson infuriated as many as he inspired. He was told that he wanted too much, that he pushed too hard, that he didn't understand people. He was called a maverick, an egomaniac, a gadfly, a hero, Mr. Hobson knew all that. "When you take the negative position and you're always screaming," he reflected, a few months before his death, "people are going to brand you as they see fit."

There are no real victories, Mr. Hobson would tell people, no comfortable resting places. He believed there is no God to make things better in the end. There is only the here and now, and the small successes that propel you to the next fight.

For 20 years his presence rocked Washington: Mr. Hobson climbing into a hospital bed in a white ward and refusing to leave. Mr. Hobson stepping onto a wooden crate in Lincoln Park and demanding that people listen. Mr. Hobson driving toward Georgetown with a cage full of rats on the roof of his car, suggesting the rich share a problem they said was unsolvable, and then stealing away from the television cameras to drown the rats in the Potomac River. Mr. Hobson under picket signs, behind microphones, in police vans—always with his hat and his pipe (or cigar) and his rich, strident Alabama voice.

And there was the private Julius Hobson, who seemed to draw sustenance from conflict and the certainty that he could not be pushed. The husband who emerged from furious protests so invigorated he would do all the grocery shopping and lunge into the preparation of dinner. The soldier who memorized poetry while flying World War II artillery spotters and continued to recite the words of this private music 20 years later. The Alabama kid who, way back around 1930, sat by the window on rainy days with Lewis Carroll's "Through the Looking Glass," reading the scene where a mad queen mocks justice by crying, "Sentence first! Verdict afterward!"

"I understood it even then," he later recalled.

Mr. Hobson was born in 1922 in Birmingham, Ala., where there were streets where blacks could not walk. The church of Mr. Hobson's christening, the church still attended by his mother, Irma Reynolds, shocked much of white America into an awareness of the civil rights movement in 1963 when it was shattered by a bomb that killed four children.

Mr. Hobson's father had died when Julius was very young. The young Hobson's stepfather ran a drycleaning plant and drugstore, and his mother was a school-teacher and principal. His background has been called middle class, a term Mr. Hobson found irritating.

"I don't see how you can grow up middle class and be black," he said not long before he died. "A man who can't go into public parks, can't go into a store and try on a suit, can't drink from a public fountain, can't ride in front of a public vehicle like a streetcar—how are you going to call him middle class?"

It was a home, Mr. Hobson said, where education mattered deeply, where the dinner table talk was of learning and schools. He worked in the public library as a boy, where he could sweep the floors but could not check out books, according to library rules.

So he stole one. The book was the Home Book of Verse of the English Speaking World, a 3,900-page anthology of the poems he learned by heart and recited quietly to himself for the rest of his life. Forty years later, wearing a bathrobe and the neck brace that eased the pain of spinal cancer, Mr. Hobson could gaze out the window of his Southwest Washington apartment and remember "The Prisoner of Chillon," the Lord Byron poem he loved: "There are seven pillars of Gothic mold/in Chillon's dungeons deep and old . . ."

In Birmingham, Mr. Hobson attended what was then called Industrial High School, the only black high school in the city's segregated school system. At his graduation, as he told the story later, the school superintendent stopped by and listened to the class sing spirituals. "When we got through singing, this white superintendent was mopping tears from his eyes," Mr. Hobson recalled. "He said, 'I'm sure God's got a place set aside in heaven for you people.' That did it. I never sang another spiritual."

Mr. Hobson went to Tuskegee Institute after graduation, but was called away to World War II. As an Army pilot he flew 35 missions in Europe, according to the 1944 Army Times, and was awarded three bronze stars and a number of other medals.

He never returned to live in Alabama. For a while he lived in Harlem, looking for "the promised land of New York and how everybody was getting rich and so forth," as he said in a 1972 series of Washington Post interviews. But, after a disappointing few months at Columbia University, he gave up, took the train to Washington, and registered at Howard University.

Howard was an electric place when Mr. Hobson arrived, churning with political debate in the pre-McCarthy years. As he recalled it, many of the professors whose most excited him during his graduate study of economics were subsequently fired for their leftist politics. Mr. Hobson found a job in

economics when he left Howard, as a researcher for the Library of Congress, and he said later that during those years of preparing papers he developed many of the painstaking research techniques that became part of his political arsenal.

In 1947, he married Carol Smith, whom he had met at Howard, and by the time he left his Library of Congress job to go to work at the Social Security Administration, the couple had their first child, Julius Hobson Jr. The son's schooling began in the early 1950s, when the city's schools were segregated, and as Mr. Hobson walked his son past the all-white neighborhood school to Slowe Elementary in Northeast every morning, the anger inside him began to distill.

"That was just about the first fight I got involved in," Mr. Hobson said. He became president of the school PTA, arguing that white schools should be used for students at overcrowded black schools. He joined the local civic association—later becoming vice president of the Federation of Civic Asociations—and then became a member of the executive committee of the NAACP, "each organization theoretically becoming more radical as I went along," he later said.

His style was sharpening. In 1954, he spoke to the first meeting of the newly desegregated Woodbridge Elementary School PTA: "My boy washes with the same Ivory soap your kids use," Mr. Hodson said. "His color won't rub off, and he's coming here for the same reason your kids do—to get an education." In 1957, when a Hobson-initiated NAACP suit against the Metropolitan Police Department documented racism in the promotion of officers to sergeant, Washington began to taste the blend of research and confrontation that became Mr. Hobson's trademark.

In the midst of these first years of activism Mr. Hobson suffered a heart attack. He was hospitalized briefly, in January, 1955, and from the unfamiliar quiet of his hospital bed he wrote to his mother in Birmingham, "They say that between the ages of 35 and 50 a man begins to examine himself. I guess I have started a little early."

He told his mother his heart was all right, but his spirit was troubled.

"I feel as though the world will have been no better off by my having been here," he wrote. "I feel ashamed when other men have sacrificed, gone to jail, or even been executed for mankind ... it's just that the injustice, suffering and chating and all of man's inhumanity to man seems to be my personal problem. I cannot divorce myself from it. I will be ever unhappy if I cannot do something about it. I just hope this heart will last long enough for me to strike one blow at all the things around me which I detest."

In 1961, having watched him grow increasingly active in local desegregation battles, the Washington chapter of the Congress of Racial Equality asked Mr. Hobson to become president of the organization. "From then on," Mr. Hobson recalled, "I was locked into the whole business of protest."

For three years Mr. Hobson led CORE members, both black and white, on an unprecedented series of demonstrations and marches here. They walked the streets of downtown Washington with picket signs, asking shoppers to boycott merchants who employed only whites. By the time they let up, about 120 retail stores had hired blacks. They threatened a boycott of the bus company for employment discrimination, and the company hired 44 black drivers and clerks. They staged "live-ins" at privately owned buildings that rented only to whites, and then organized a march of about 4,500 persons to the District Building to demand a fair housing law. They got it: shortly after the march, the D.C. Commissioners enacted the housing ordinance desegregating D.C. rentals.

CORE picketed automobile dealerships that sold to black customers but would not hire black clerks. It conducted a sit-in at the Washington Hospital Center, during which Mr. Hobson walked upstairs to an all-white ward, climbed into bed, and announced that they would have to arrest him to make him leave. The hospital obliged, the newspapers wrote it up, and not long afterward Washington Hospital Center desegregated its wards.

It was a tumultuous period for both CORE and the city, and the restless pipe-smoking man from Alabama dominated the drama. Some civil rights leaders both inside and outside CORE called Mr. Hobson a crazy man, an egotistical tyrant who would do things only his own way and could not abide dissent.

When the hospital center was desegregated, as one of the demonstrators recalls, it was said they could have achieved the same results through quieter meetings with officials. When the pickets marched downtown, another former CORE member said, some people objected that a few targets of the boycott were businessmen who had been generally cooperative toward the black community.

But Mr. Hobson was not a patient man. What he wanted was visibility and results, and he had little use for those who thought he was going about it in the wrong way. Mr. Hobson would argue his tactics up to a point, associates remember, and then he pulled rank. "All in favor of this proposal, say 'Aye,'" he would announce, goodnaturedly. "The rest get the hell out of here."

He used both the law and the press to his advantage, saying arrests drew attention and attention brought change. Sometimes they would call the police before a demonstration, remembered former CORE member Charles Cassell recently, and warn them that really serious militants were coming, that Stokely Carmichael or Malcolm X might show up and set off a bomb or something. "That meant we didn't have to engage in too much PR ourselves," Cassell said.

And when CORE picketed Royal Motors on Georgia Avenue for hiring only white salesmen, Cassell recalled, he and Mr. Hobson spent a while researching city ordinances to figure out how to break the law. "We found out that a picket was legal, but that if you sang or talked, that was disturbing the peace," Cassell said. So the demonstrators sang, loudly and cheerfully, belting out "We Shall Overcome and a little jingle they had made up about the racist auto dealer. They were arrested. Royal Motors hired a black salesman.

"Hobson would never countenance any challenge or opposition," Cassell said. "Hobson was an Alabama boy. He'd had to put up with compromise for so long ... his attitude did turn people off from time to time."

The national CORE leadership was growing increasingly irritated with Mr. Hobson, both as a tactician and as a CORE leader. In 1964, calling the Washington chapter a "dictatorship," CORE expelled him from the organization.

When Mr. Hobson left CORE, he took his closest associates with him, and together they formed a new organization called Associated Community Teams (ACT). The activism was as flamboyant as ever, although sometimes ACT focused as much debate on Mr. Hobson as it did on the problem.

As a member of the Advisory Committee to the Chief of Police, Hobson built a long-range microphone and drove around after police officers, recording their abuse of civilians. Police and city officials protested, but the tapes proved his point.

When Mr. Hobson suggested in August, 1964, that Georgetown share the city's rat problem—and then drove through the city displaying a cageful of possum-sized rats, which he said would be released in Georgetown—the city expended far more energy trying to stop Hobson's forays than it did killing rats. But people noticed. They watched the cages cruise by and knew the rats had come from the ghetto. Shaking up the complacent was much of what Julius Hobson had in mind.

Besides, there was a far more serious project under way. Armed with graphs and statistics compiled after months of research, Mr. Hobson was suing the Washington public schools. The suit, called Hobson vs. Hansen (then city school Supt. Carl F. Hansen), argued that more than a decade after desegregation, the school system was discriminating against black students by channeling them into the lower rungs of rigid academic tracks that received inadequate resources and discouraged achievement.

On June 19, 1967, the federal court agreed. In a sweeping decision then labeled one of the most important school rulings since desegregation, U.S. Circuit Court of Appeals Judge James Skelly Wright abolished the track system and ordered substantial integration of school students and faculty, specifying that students from overcrowded black schools should be bused to the undercapacity white schools west of Rock Creek Park. The state of the public schools here, Wright declared, was "a monument to the cynicism of the power structure which governs the voteless capital of the greatest country on earth."

Mr. Hobson, who had shifted his own 10-year-old daughter Jean from public to private school after she was assigned to the lowest track, was jubilant. He ran for the school board a year later, in the first local elections held in Washington during this century, and received so many votes that he was the only candidate who did not have to enter a runoff. Mr. Hobson carried six of the city's eight wards, losing only in the predominantly white areas in Southwest and west of Rock Creek Park.

Mr. Hobson's private life had suffered as his public life grew. In 1966 his wife Carol filed for divorce. Mr. Hobson and his son later said the marriage had been troubled by religious differences and Mr. Hobson's commitment to activism at the occasional expense of his family.

Mr. Hobson lived alone for a while, and then three months after the 1967 Wright decision he invited Tina Lower, then a National Institute for Public Affairs employee with whom he had lunched once, to his apartment for dinner. He fixed her a steak with homemade barbecue sauce, drove her to her apartment in Georgetown, and asked her to marry him.

"I want you to know that my intentions in taking you out are perfectly proper," Tina Hobson remembered him saying. A divorcee with two sons, Tina Lower had grown up "middle class white," as Mr. Hobson used to say, in Southern California. They saw each other for two years, ignoring the comments of some local activists that Hobson "talked black but dated white." In 1969, they announced their engagement—on the night Hobson lost his bid for re-election to the school board.

"If there was anything he lost that he felt he should have won, it was that election," Mrs. Hobson said. "Otherwise, I don't think he ever felt anybody owed him anything."

Mr. Hobson had spent a stormy year on the school board, pushing the adoption of black studies and a students' due process procedure so controversial that at one point teachers walked out in protest, saying discipline had fallen apart. But as in the past, much of his time was spent soberly collecting data for a legal attack on District schools. The school system, Hobson charged,

was spending far more on some schools than on others.

Again Judge Wright agreed. In September, 1970, Wright declared that "the richest and whitest area of the city is being substantially favored over poorer and blacker areas." The judge answered Mr. Hobson's second complaint by ordering the city to equalize per-pupil spending for teachers' salaries at all elementary schools. The reshuffling that followed moved a number of teachers from mostly white schools west of Rock Creek Park to poorer schools in the rest of the city.

Mr. Hobson's public response to his school board election defeat was typically brusque: "I got sidetracked and thought I was part of the power structure. The rabbit's back in the briar patch."

For four years, while still working at the Social Security Administration, Mr. Hobson functioned as a kind of agitator-at-large. Already the coauthor of a black history called "Black Pride," he prepared two guides to the use of statistical data as an activists' tool—"The Damned Children" and "The Damned Information." The books were published under the auspices of an organization Hobson called the Washington Institute for Quality Education.

Mr. Hobson joined antiwar demonstrators every time they marched on the Capitol. He denounced a statement by local blacks that the antiwar movement was racist. He was nominated by the People's Party to be vice president of the United States, as a running mate to its presidential candidate, Dr. Benjamin Spock.

He also found out he was dying.

The pain began in early 1971, one friend remembered, a backache that sometimes made Mr. Hobson stoop when he stood up. That autumn he went to the doctor, saying he needed a back brace. When his wife came home that night he said there was something wrong with the blood cells in his bone marrow.

"Don't worry," he told her. "It's not cancer." But it was. Mr. Hobson had multiple myeloma, a cancer that attacks the spine. Doctors said then, in 1971, that he could die in six months.

"I had my crying time, you know," Mr. Hobson told The Washington Post in 1972. He struggled with the pain, with the morphine he took to ease it, with the unfamiliar dependence of illness. "I don't want to go on my knees," Mr. Hobson said. "I'd like to go standing up."

In November, 1972, 2,000 people crowded into a room of the Sheraton Park Hotel to honor the man who had spent 20 years stirring up Washington. In the audience were his family, his admirers, and many of the local Washington figures Mr. Hobson had fought for years. Hobson was so sick that he lay on a couch for most of the evening, but he still smoked a cigar.

"My first wake," Mr. Hobson would later call that testimonial, because for a long time afterward he beat back the disease. In 1974, after a campaign conducted mostly from his wheelchair, Mr. Hobson was elected as an at-large member of what he had often referred to as the "so-called City Council." He represented the Statehood Party, ridiculing what he said was the District's colonial status, promising that statehood would be his first goal.

In January, 1975, for the first time in his life, Mr. Hobson looked down at the City Council chambers from the official side of the desk. He had become a councilman. He had a special license plate and a separate entrance to the chambers. His politics were now supposed to be packaged as motions, or substitute motions, or amendments to substitute motions. The mayor was now his colleague.

It was a sudden respectability that made Mr. Hobson uneasy. He chafed under dictates of parliamentary procedure, sometimes interrupting other Council members in midmotion when he thought they had strayed from the issue. He would leave Council meetings impatient and angry, muttering to his aides about the self-indulgent posturing that went on in the name of government. But he always went back, and one by one the issues that mattered to Mr. Hobson began to appear as bills and resolutions.

He sponsored an Initiative and Referendum Act, which would allow citizens to draft legislation and then place it on the ballot. His Non-Criminal Police Surveillance Act would curtail surveillance of D.C. individual and group political activity. An Educational Accountability Act would implement minimum standards of student competency for promotion and graduation. All this legislation is now pending.

Mr. Hobson didn't think much of the Council as an institution—"a small and exclusive club," he called it. And he hated being labeled a dying man. "I don't have any enemies now," Mr Hobson said not long ago, and there was wistfulness in his voice "I can't find anybody that's willing to attack Julius Hobson. I'm not used to that. I'm used to being attacked all day, every day and defending. In fact, I used to thrive on it, but now in recent years, nobody's attacked Hobson."

Mr. Hobson had sat through Tuesday morning's Council meeting, alert and apparently in good spirits, and had chatted with his legislative aide Sandy Brown, about the initiative and referendum bill as they visited the George Washington Hospital outpatient clinic for a routine checkup. Tuesday evening in his apartment in Southwest, Hobson developed digestive problems He spent the night at home. But by yesterday morning, he was so uncomfortable that Mrs. Hobson drove him back to the hospital.

He was admitted to the hospital about 10:30 a.m. with infections and internal bleeding. Two hours later, at 12:25 p.m, Julius Hobson died.

He had hoped his heart would last until he could begin to change his world, and it did.

SUBPAR PERFORMANCE BY THE EDUCATIONAL TESTING SERVICE

Mr. PERCY. Mr. President, there recently appeared in the New Republic a thought-provoking article, written by Kim Masters, on the Educational Testing Service of Princeton, N.J. ETS is responsible for a number of the exams most school-age children and young adults have encountered sometime on their educational journey. Such exams as the SAT, LSAT, and MCAT are familiar terms for anyone interested in higher education in America.

Today, of necessity, our centers of higher education rely on exams administered by ETS and the American College Testing Service—ACTS—in order to make distinctions among their overflowing files of applicants. Colleges, universities and graduate schools have found it necessary to use some common standard to begin their selection process. These institutions require applicants to take a national exam, which is usually an ETS- or ACTS-administered exam. That score is then considered a reasonably fair assessment of ability or intelligence as compared to one's peers. It has become a major determinant in deciding who will be tomorrow's architects, clinical psychologists, lawyers, doctors, and professors.

Understandably, there is a built-in cycle of dependence between ETS, the larger of the two testing services, and American universities. Simply because of the legion of applicants to these schools each year, admissions committees cannot hope to review every person's application with the time it deserves. Last year, Georgetown Medical School had over 9,100 applications for 205 available positions—a ratio of 44 candidates to each opening. As a result, most graduate schools depend on the ETS and, in turn, obligate all their applicants to take the exams ETS offers.

Thus, placement in the institutions of higher learning, and the concomitant social mobility that education makes possible, become a golden fleece attainable only by first experiencing an ETS or ACTS exam. ETS, because of its dominance over graduate and professional school exams, has become, in many ways, a major arbiter of American values. Anyone aspiring to a career in certain highly competitive fields must first make a pilgrimage, sharpened No. 2 pencil in hand, to an ETS-administered exam.

Yet ETS is a private monopoly; there are no real watchdogs or public controls over it. A student takes the exam and receives a score; he has no means of checking the accuracy of its decisions. The potential for mistakes or the passing on of clandestine information—as Kim Masters' article shows—is too great to be ignored. Even though ETS provides an important service to overburdened admissions committees making onerous decisions day in and day out, it should not be above the public scrutiny of students and universities who have come to depend on it. Kim Masters' article exposes a perspective on the danger of insulating powerful organizations—public or private, profit or nonprofit—from public scrutiny.

Mr. President, I ask unanimous consent that the New Republic article of February 5, 1977, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ETS's STAR CHAMBER

The Educational Testing Service of Princeton, New Jersey, rapidly is becoming the cradle-to-grave arbiter of social and economic mobility in America. Its tests determine who will be admitted to the nation's prestigious private schools, to almost all colleges and graduate schools, and even to the practice of medicine and law in many states. The typical educated American breaks the seal of his or her exam book (using the eraser end of a number-two pencil) while still in elementary school, and still is filling in between the pale blue lines well into middle adulthood.

Anyone who must deal with it is completely at the mercy of this private monopoly. He or she must take the tests ETS offers, must supply the information ETS requests, and must pay the fees ETS charges.

Most important, individuals whose lives are crucially affected have no way of checking the accuracy of information ETS supplies

to schools, universities and state accreditation boards. ETS has been treated as exempt from the requirements of the Family Education Rights and Privacy Act of 1974, commonly known as the Buckley Amendment. This law requires schools to give students access to files containing information about them and limits the use schools can make of this information without a student's permission. The Privacy Act also created a Privacy Commission to study the effects of the act and make recommendations to the office of HEW that administers it. The Privacy Commission currently is considering whether to recommend that ETS lose its exemption. The following cautionary tale may aid the commission in its deliberations.

The story involves the Law School Admissions Test, one of ETS's most popular offerings. When a candidate applies to take the LSAT, the application form asks whether he or she has taken the test before. This question appears among a series of general clerical questions (name, address, and so on). Applicants have no way of knowing that failure to indicate that they have taken the test before (whether by answering the question incorrectly or merely leaving it blank) will have any significant effect on their final applications.

The reason for asking the question was not clerical. Until last year, the test score report form sent to law schools contained—unbeknownst to the student who was paying to have this information sent—a space labeled "unacknowledged repeater." When this space was marked by an asterisk, it indicated that a candidate applying to take the test for the second time had not indicated that this was the case. The asterisk appeared even if a candidate (possibly by accident) failed to answer the question at all. Ralph Smith, a professor and admissions committee member at the University of Pennsylvania Law School, explained that the "unacknowledged repeater" designation raised "a question of [the applicant's] integrity." A number of other law school admissions officers confirmed that this was the construction admissions committees put on the asterisk.

Smith and several others think the appearance of the asterisk kept some applicants out of law school. Of course there are such a variety of reasons an admissions committee can give for denying admission to any one applicant that it is all but impossible to prove that anyone was excluded because of being designated an "unacknowledged repeater."

In the 1975–76 applicant year, the dean of admissions at the University of Pennsylvania Law School noticed that more and more of these asterisks were appearing on LSAT score reports. He reported this to ETS and asked whether the designation was correct in all these cases. Shortly thereafter ETS responded with a memo sent to all law school admissions deans, which read in part:

"It has recently become apparent that a problem exists with regard to the flagging of candidates as 'unacknowledged repeaters' (an asterisk in the area under 'Unacknowledged repeater' in the summary section of reports). This problem has been caused by several factors, some of which raise policy questions which will be considered next spring. The result for the current year, however is that some candidates who are not 'unacknowledged repeaters' have been designated as such."

The memo warned that the designation should be disregarded and explained that "it will not be possible to identify all such candidates" (those wrongly identified as "unacknowledged repeaters"). For 1976-77, ETS has dropped the asterisk.

There are several disturbing things about this incident. First of all, since applicants have had no way of knowing that the "unacknowledged repeater" designation existed, discovery of this error depended on the fortuitous curiosity of one admissions dean. Second, since applicants are not permitted to see the reports ETS sends to law schools, individuals would have had no way of clearing themselves of false charges even if they had known that the problem existed. Third, even after the error was discovered, ETS kept it quiet and apparently made no attempt either to correct its past mistakes or to inform the applicants who were harmed by them. In short, candidates who were perfectly acceptable may have been denied access to their chosen profession without ever suspecting the reason.

ETS avoided any mention of the "unacknowledged repeater" incident in testimony at a Privacy Commission hearing in November. Robert Solomon, vice president of ETS, was asked specifically and repeatedly about errors that might be correctable if students had access to their ETS files, but he failed to mention the asterisk episode and insisted that ETS errors were "to the best of our experience" no problem. Solomon now says the failure to mention it was an oversight: "We had no intention not to mention that." Tom White, an ETS official who deals with law schools, says the episode "just wasn't important enough to mention. All of the discussions at the commission were based on what our system is now doing. No effort to describe the system as it has grown and changed was made."

ETS argues it should continue to be exempt from the Buckley Amendment because of the time and expense that would be required to bring its files into compliance, and because the organizations that contract for its services provide sufficient regulation. Of course far poorer organizations, and others (such as state universities) with many more people looking over their shoulders, have been forced to comply. Even apart from the Buckley Amendment, ETS is far too immune from public regulation and scrutiny, given the function it serves and the power it enjoys. There is no good reason to continue this exemption as well.—KIM MASTERS

CHARLES E. MATTINGLY RETIRES

Mr. THURMOND. Mr. President, I wish to commend to the Senate and to the Nation the services rendered to our veterans population by Charles E. "Chuck" Mattingly who recently retired from his position as deputy director of the National Legislative Commission of the American Legion.

Mr. Mattingly was born and reared in Kentucky where he attended Breckinridge High School in Hardinsberg. He later attended American University in Washington, D.C.

Chuck served in the European Theater during World War II with the 1st Armored Division. Injuries which he received in 1942 resulted in his discharge from service in August of 1943 after 3 years of service.

Mr. Mattingly's record of service to his fellow man and to the veterans of our Nation in particular is long and distinguished. Immediately upon being discharged from service, he joined Post No. 15 of the American Legion in Louisville, Ky., and became an active member. In 1944, Mr. Mattingly was appointed assistant department service officer of the American Legion for the Department of Kentucky and claims representative for the Kentucky Disabled Ex-Servicemen's Board.

Mr. Mattingly's association with the national headquarters of the American Legion began in 1945 when he assumed responsibilities as field representative for the Mid-Pacific Area headquartered in Honolulu, Hawaii, and Indianapolis, Ind., He transferred to the National Rehabilitation Commission in 1946, and served as rehabilitation representative in the Veterans' Administration branch and district offices in St. Louis, Mo. Chuck joined the Washington office staff of the American Legion in 1950, where he supervised government insurance activities, social security appeals, forfeitures, and related matters, and was named chief of insurance activities in 1960.

Mr. Mattingly's selfless devotion to his responsibilities during his years of service has not gone unrecognized. In 1971, he was presented the National Department Service Officers Association "Proud" Award in recognition of his over 25 years of service to the American Legion and the Nation's war veterans. In 1973, he was the recipient of the American Legion News Service Association's Presidents Award. Furthermore, he has been recognized for his work and leadership in Scouting activities by being awarded the coveted Silver Beaver and St. George Awards.

The American Legion, the Nation's veterans population, and all of us who had the pleasure of working with Chuck Mattingly, will miss his valuable contributions to our efforts in the future. Chuck, his wife Jacqueline, and his family currently reside in Silver Spring, Md. I am sure that all of my colleagues in this body join with me in wishing them every happiness for the future.

NUCLEAR POWER ISSUES AND CHOICES

Mr. PERCY. Mr. President, earlier this week the Nuclear Energy Policy Study Group released a report entitled "Nuclear Power Issues and Choices." It is a comprehensive analysis of our national energy needs and potential, and it focuses particularly on nuclear power. The report deserves careful analysis by all policymakers in the energy field. It was sponsored and financed by the Ford Foundation and administered by the MITRE Corp.

The study group proposes that we deemphasize the breeder reactor and postpone indefinitely the development of plutonium reprocessing. There seems to be mounting evidence that this is a wise policy. Widespread use of breeder reactors could place the potential for nuclear blackmail in the hands of terrorists all over the globe, and help increasing numbers of nations arm themselves with atomic weapons.

Last November 22, in a speech to the National Press Club, I said:

I have concluded that my early support for the breeder reactor was misplaced. In the immediate future, a large share of funds now earmarked for the breeder should be redirected to conservation, solar and coal. The prime reason for this is that the dangers of a plutonium economy—and the related spread of atomic weaponry around the globe—demand that we go slowly on this technology.

The Washington Post in a March 23 editorial takes much the same position.

The consensus against the breeder reaactor grows daily.

Mr. President, I commend "Nuclear Power Issues and Choices," as an outstanding research effort, and ask that its conclusions on "Nuclear Power and Proliferation of Nuclear Weapons," a New York Times summary of the report, and the Washington Post editorial be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 23, 1977]

JUDGMENT ON PLUTONIUM

The case for plutonium fuel and the breeder reactor has been growing steadily more dubious. With each re-examination, the risks become clearer and the benefits dimmer. The latest analysis, published this week by a research organization called the Mitre Corporation, is remarkable for its intelligence and balance. It deserves to be considered authoritative. It strongly urges the Carter administration to postpone plutonium fuel production "indefinitely" and to relegate the breeder technology to the laboratory as a standby for the middle of the next century. That judgment is unquestionably the right one.

The penalties for a mistake here would be monstrous. Plutonium is one of the most potent poisons ever devised and, in its fuel form, it can be fashioned into nuclear weapons relatively easily.

The technology is within the capacity of terrorist organizations as well as national governments of every kind. Putting the stuff into commercial use would be an irreversible decision.

Yet that is the direction in which U.S. policy has been heading, guided mainly by obsolete assumptions and blind momentum. A reprocessing plant for the manufacture of plutonium now stands, two-thirds completed, near the town of Barnwell, S.C., waiting for a federal policy on subsidies. A breeder reactor is under construction at Clinch River, Tenn., scheduled to go into operation in the early 1980s as a prototype for commercial plutonium-fueled reactors in the 1990s. The Mitre report is addressed primarily to President Carter and his energy advisers. If they follow its clear and forceful logic, they will abandon both of these projects.

The Mitre report is the work of a committee of 21 men who, collectively, know as much about these questions as anyone in the world. One member of the committee, Harold Brown, was president of the California Institute of Technology and is now Secretary of Defense. Another, Kenneth Arrow of Harvard, holds the Nobel Prize in economics. A third, Wolfgang Panofsky, is director of the Stanford Linear Accelerator Center. There's no need to run through the entire list. Their report has been published as a book, incidentally, by the Ballinger Co., under the title, "Nuclear Power Issues and Choices." But it covers a great deal more than nuclear issues alone—because, to get to the plutonium question, you first have to consider the future American economy, its requirements for energy and the various possible sources.

The nuclear reactors now being built by utilities around the country are fundamentally different from the plutonium breeder—and far less dangerous. The present commercial reactors are fueled with rods of uranium; when the fuel is spent, the fission process has left a residue of plutonium in the rod. But in that form, it's not explosive. It's the next step that takes the country over a new threshhold—the reprocessing procedure that refines the plutonium and mixes it into a new kind of fuel for the breeder, which, in turn, produces more plutonium than it consumes. It's this second fuel, the one that emerges from the reprocessing plant, that contains weapons-grade plutonium and presents truly extraordinary dangers.

The only conceivable reasons for resorting to the plutonium technology now would be either a looming shortage of uranium or the threat of energy prices so high that they could derail the nation's economic growth.

Plutonium recycling can be postponed indefinitely "at essentially no economic cost," the report finds. "The fears that energy scarcity will force fundamental changes in economic and social structures or the lifestyle of the industrial world are not well founded."

The Mitre group, in other words, considered both possibilities and concluded that there was nothing to justify risking, in this century, the dire hazards of reliance on plutonium fuels.

[From the New York Times, Mar. 22, 1977]

FORD PANEL URGES MAJOR POLICY SHIFT ON NUCLEAR POWER

(By David Burnham)

WASHINGTON, March 21.—A panel of 21 scientists and economists today recommended major changes in the nuclear policy of the United States, including an indefinite postponement of plutonium reprocessing and the end of the crash program to build a commercial breeder reactor.

The panel, in making its negative recommendations on plutonium and the nation's major nuclear energy research project, said it had concluded that the most serious risk associated with nuclear power was that it would help an increasing number of nations arm themselves with atomic weapons.

The panel's study, undertaken with an $860,000 grant from the Ford Foundation, was made public while three teams within the Carter Administration continue to work on separate studies that touch on other aspects of nuclear energy.

ADMINISTRATION MEMBERS ON PANEL

Partly because the Ford Foundation panel included two top members of the Administration and partly because of previous comments of President Carter, the report's recommendations were widely seen as previewing what will probably be the Administration's own final positions on nuclear power.

For example, in a recent letter to Representative Tom Harkin, Democrat of Iowa, President Carter said flatly that "this Administration generally considers nuclear power a low-priority energy source and views the liquid metal fast breeder reactor as a potential security risk."

After a news conference this morning, members of the panel, headed by Spurgeon M. Keeny Jr., the director of Washington operations of the MITRE Corporation, met with President Carter at the White House and then briefed Congressional staff members at the Capitol.

The 418-page report, entitled "Nuclear Power Issues and Choices," appeared to rest on two fundamental assumptions that somewhat contradict those held by the nuclear industry and by many energy experts in Congress and the Nixon and Ford Administrations.

The first key assumption is that conventional nuclear reactors, now generating about 10 percent of the electricity in the United States, will be about as expensive and dangerous to operate as electrical generating stations fired by coal.

For many years, nuclear proponents have argued that nuclear reactors would be substantially cheaper and have significantly fewer health consequences than coal-fueled stations.

The second key assumption of the study is that the current official estimates of uranium reserves and resources substantially underestimate the amount of uranium that will be available during the next two or three decades.

This assumption, disputed by some experts, is of major importance to the panel's recommendations to postpone plutonium recycling indefinitely and to slow the swift development of the breeder reactor because both new technologies have been held to be vital to the United States because of alleged potential shortages of uranium.

Plutonium recycling is a complex chemical process in which plutonium, a heavy grey metal rarely found in nature, and uranium are extracted from used reactor fuel so they can be re-used to fire reactors.

The breeder reactor is an experimental model that would be fueled with plutonium and which could, the engineers believe, be made to operate so that it would actually create more plutonium than it burns.

The study panel, whose members included Harold Brown, Secretary of Defense, and Joseph S. Nye Jr., deputy to the Undersecretary of Security Assistance in the State Department, argued that the importance of nuclear power to the United States had been considerably exaggerated.

"It is incorrect to argue that nuclear power is 'needed' now to allow society to continue its development as it is," the report said. "While nuclear power is one of the options that should be pursued, it is not as critical to future economic development as its advocates claim."

Concerning requirements of the next century, the panel said, "We believe that some mix of coal, solar, and fusion energy, assisted by conservation, would be capable of supplying society's long-term energy needs."

"But we also believe that the nuclear breeder will be competitive and is likely to prove eventually to be socially acceptable," the report continued. "Society does not have to act on these guesses today. Our children will be in a better position to worry about our grandchildren than we are."

The report was, however, far less easy-going about proliferation: "In our view, the most serious risk associated with nuclear power is the attendant increase in the number of countries that have access to technology, materials and facilities leading to a nuclear weapons capability," it said.

FEARS OF PROLIFERATION

"If widespread proliferation actually occurs, it will prove an extremely serious danger to United States security and to world peace and stability in general," the report added.

In an attempt to meet this hazard, the panel recommended a large number of different approaches, including intensive new diplomatic efforts to assure the rest of the world of adequate supplies of uranium for conventional reactors and of the United States policy decision to abandon the use of plutonium for at least the next few decades.

The United States has already invested more than $3.5 billion in general breeder research and in the planning and engineering of a demonstration commercial breeder reactor on the Clinch River in Tennessee.

If the Ford Foundation panel's recommendations are adopted by the Carter Administration, the big immediate losers would be the Clinch River Reactor—which so far has received $325 million from the government and $130 million from a consortium of private companies—and a reprocessing plant under construction in Barnwell, S.C., in which the Allied Chemical Corporation and General Atomic so far have invested about $200 million.

NUCLEAR POWER AND PROLIFERATION OF NUCLEAR WEAPONS

SUMMARY AND CONCLUSIONS

A strategy to constrain proliferation must be complex and comprehensive. U.S. nuclear power policies and programs can be shaped to support such a strategy, but they can be only partially effective unless they are meshed with political actions and with broader international arrangements.

Some of the fundamental elements of a nonproliferation strategy are broader than nuclear power. They include:

A foreign policy in support of international security, peace, and stability; patient efforts to contain and resolve conflicts which might lead to recourse to nuclear weapons.

Relations with the Soviet Union that will foster continuing cooperation on nonproliferation.

Adherence to security commitments serving the interests of the United States and allies and certain threatened states, so that isolation will not make nuclear weapons appear necessary.

Where necessary, use of U.S. influence to discourage states from preparatory moves toward a nuclear capability.

Vigorous efforts toward nuclear arms limitations which would implement Article VI of the NPT and build additional barriers (e.g., a comprehensive test ban) against proliferation.

An active program of international cooperation in energy development and exploitation, so that the full range of energy resources will be available in international commerce and national planning, without need for excessive reliance on nuclear power.

Deemphasis on nuclear weapons in military policy, particularly doctrines that present nuclear weapons as acceptable necessary armaments for a limited application or political pressure.

Other international measures are directly related to nuclear power.

Support of the NPT and encouragement of present nonparties to adhere.

Support of the IAEA, in particular, generous financial and technical help for IAEA safeguards, standards, and practices relating to safety and physical security.

Leadership in supplementing the NPT with arrangements controlling the spread and utilization of sensitive nuclear fuel cycle facilities.

Coordination with other suppliers to handle nuclear exports and associated safeguards uniformly and in support of both current NPT requirements and new fuel cycle arrangements. Classification of the technology of laser isotope separation would be one useful area of coordination.

Interchange of objective data and analysis on recycle and the breeder, in the interests of a realistic appreciation of costs, benefits, risks, and time scale.

Support of coordinated actions by suppliers of low-enriched uranium to assure supply of reactor fuel, with special attention to needs of countries cooperating with international arrangements for control of the nuclear fuel cycle and related facilities.

Leadership in exploring arrangements for storage of spent fuel and for disposal of nuclear waste.

A clearer stand on the doubtful practical value and ominous proliferation dangers of "peaceful nuclear explosives," and greater effort to persuade the Soviet Union to discontinue its PNE activities.

Actions and policies regarding the U.S. domestic nuclear power program, discussed in other sections of this study, would affect proliferation in important ways. The following measures would have major nonproliferation significance:

A clear decision to defer plutonium reprocessing and recycle.

Deemphasis of the breeder program with deferral of the early date of commercialization.

Reduced priority for nuclear power in energy research and planning, in a framework giving equal weight to coal in the short term and alternative replenishable energy sources over the longer term.

Avoidance of promotion of nuclear power both at home and abroad.

Orderly expansion of enrichment facilities to correspond to realistic projections of future demand at home and abroad.

Continued refusal to export plutonium separation and enrichment technology, coupled wtih efforts to achieve similar action by other suppliers.

Approval of nuclear exports only where consistent with U.S. security interests and obligations and nonproliferation policy.

CHARLES BENTON: "HOW THE DEBATES CAME TO BE"

Mr. PERCY. Mr. President, although the 1976 Presidential debates are old news, it is time we looked at them in retrospect to understand how they came about.

Charles Benton, president of Films, Inc., and a member of the board of Encyclopaedia Britannica Educational Corp., recently reviewed the history of the Kennedy-Nixon debates and the origin of the 1976 Presidential debates in an article published in the "Encyclopaedia Britannica 1977 Book of the Year." Charles Benton, who was instrumental in the preliminary planning of the 1976 debates, provides interesting insights into the debates. And he raises some important questions to consider in planning future debates.

I ask unanimous consent that the article "How the Debates Came To Be" by Charles Benton be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW THE DEBATES CAME TO BE

(By Charles Benson)

The first television debates between major-party candidates in U.S. political history occurred during the 1960 presidential campaign, when John F. Kennedy and Richard M. Nixon met in four highly publicized confrontations that, it was later felt, probably helped Kennedy to win the election. Those debates were made possible by a suspension by Congress of the so-called equal time provision, sec. 315 of the Federal Communications Act.

A new ruling by the Federal Communications Commission in the fall of 1975 once again opened the way to presidential debates on television. The ruling broadened the interpretation of "bona fide news events," which were not subject to the equal time provision, by excluding from coverage under sec. 315 all events that were sponsored by organizations independent of the broadcasting media.

Six months earlier three citizen activists, Marjorie and Charles Benton and Gene Pokorny, had developed a proposal for a series of "presidential forums" to be held during the presidential primaries in the winter and spring of 1976. The idea was to hold a number of televised "town meetings" during the U.S. Bicentennial to which the presidential candidates of both parties would be invited to speak concerning the major issues confronting the nation. In July 1975 the William Benton Foundation made a grant of $50,000 to develop the idea. Jim Karayn, former head of National Public Affairs Center for Television, was named staff director, and discussions began with several major organizations involved in public television.

Immediately following the FCC ruling contact was made with the League of Women Voters, a leading voter education organization that had just announced its theme for the 1976 election as "Issues Not Images." When the League agreed to adopt the project, the Benton Foundation increased its grant to $200,000, and a further $100,000 was obtained by the Public Broadcasting System from the Ford Foundation to help fund public television coverage of the forums.

Four forums took place, although five were planned. The first occurred in Boston on Feb. 23, 1976, just before the Massachusetts primary. Seven Democratic hopefuls participated: Jimmy Carter, Morris Udall, Henry Jackson, Fred Harris, Sargent Shriver, Birch Bayh, and Milton Shapp. Participation fell off in later forums—in Miami, Fla., on March 1, in New York on March 29, and in Chicago on May 3—as the list of Democratic candidates contracted. No Republican joined any of the forums, although all were repeatedly invited by the nonpartisan steering committee. The last forum, scheduled to be held before the California primary, was canceled owing to a lack of candidate participation but the earlier ones had attracted a solid audience on public television—between 1.5 million and 2 million viewers.

With the experience, staff, and credentials of the forums behind it, the League of Women Voters, at its annual spring convention, announced through its president, Ruth Clusen, that the League would invite the major party nominees to engage in television debates during the fall campaign. Along with this announcement the League launched a petition drive for four million signatures and an editorial and press campaign to mobilize public opinion in favour of such debates.

Early in August the League formed a steering committee for the debates comprised of distinguished Americans and headed by three co-chairpersons: Rita Hauser, Newton Minow, and Charles Walker. In late August in his acceptance speech at the Republican convention, Pres. Gerald Ford issued a challenge to his Democratic rival Jimmy Carter to engage in debates during the campaign. Ford had learned that Carter was going to issue a similar challenge the next day and, at the last minute, decided to seize the initiative. Carter immediately accepted.

Heated discussions ensued among representatives of the League, the U.S. television networks, and other interested parties as to who would sponsor the debates, and about their framework and format. The League was finally chosen and proposed four debates, three between the presidential candidates, with the first on domestic affairs and the second on foreign affairs, and one between the vice-presidential candidates. The Ford entourage wanted to begin with foreign affairs and to have longer debates; both Carter and Ford wanted less informality than the League did, preferring a more structured exchange with representatives of the print and electronic media acting as intermediaries.

The first presidential debate was held at the Walnut Street Theatre in Philadelphia, the second in San Francisco, and the third at William and Mary College in Virginia; the vice-presidential debate was held in Houston, Texas. Unlike 1960, when the viewing audience fell sharply as the debates followed one another, the television audience in 1976 stayed fairly constant, at least for the three Carter-Ford debates: the average audience was over 70 million people, or roughly one in every three Americans. While much ground was covered, certain specifics stand out, such as Ford's assertion that the Eastern European

countries were essentially in control of their own destiny and free of Soviet domination. The debate between the vice-presidential candidates also seemed to accentuate the differences in the style and character of Senators Walter Mondale and Robert Dole.

Though commentators were uncertain of the overall impact on voter attitudes, there seemed to be a consensus that the debates helped to shape the 1976 presidential campaign. In a country of continental size, with its vast regional differences, the images of national candidates become blurred as they tailor their speeches to the special interests of different audiences and surroundings. In nationally televised debates, the candidates have to speak to all Americans.

There is also general agreement that the debates have raised some important questions for the future. Among them are these:

1. The year 1976 was the first in which the public directly, through the Campaign Reform Act of 1976, funded the primary and general election campaigns. Assuming that will continue, do candidates have a special obligation to be accountable to the public on the major issues through televised debates?

2. Television has become the most pervasive news medium. Assuming that, too, will continue, what is the proper balance between commercial time (bought by the candidates), news reporting (provided by the networks), and debates or forums organized independently of both candidates and networks?

3. In 1977 Congress will begin hearings on the revision of the Communications Act of 1934. How should sec. 315 and other provisions of this old law be changed to accommodate the needs of U.S. society now and in the future?

4. Finally, how can the issue of minor party participation in media debates be resolved, in fairness to such candidates but also keeping in mind the size of the constituencies—often relatively tiny—that they represent?

In American society today, how can mass communications technology play a role that supports, rather than erodes, the basic foundations of political democracy—public education, public understanding, and enlightened public choice? Since the technology itself is neutral, what is done with and through it remains the central issue.

ECONOMIC GROWTH WITHOUT ENERGY GLUTTONY

Mr. PERCY. Mr. President, on February 7, Business Week carried an article entitled "Support for Carter's Energy Priorities." The article describes a "blue-ribbon panel of energy experts" which will soon deliver its recommendations concerning long-term energy policy to President Carter.

The panel has found that we can continue to increase our economic output without a substantial increase in energy consumption. This would be accomplished through energy conservation. The article reports:

> In fact it seems likely that GNP could triple over the next 40 years without significant energy growth.

The ramifications of this prediction are startling. It means that, through wise energy husbandry, we can have the best of both worlds: Increasing economic wealth and a cleaner environment. Through energy conservation we can minimize the threat of foreign embargoes and capricious weather. And we can save nonrenewable resources for future generations.

Energy conservation is not only our best bet, it may be our only bet. The blue-ribbon panel predicts that alternate energy sources, such as solar energy and synthetic fuels, will not be available for large-scale use until the 21st century.

Mr. President, the article points out the tremendous potential of energy conservation, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SUPPORT FOR CARTER'S ENERGY PRIORITIES

A blue-ribbon panel of energy experts will soon deliver to the government a major study of long-range policy that could have significant influence on the Carter Administration's own energy planning in topics ranging from fuel pricing to relations with OPEC.

A committee carefully balanced among academics, environmentalists, and representatives from banks, utilities, and corporations, including several oil companies, will soon submit to government energy agencies a report that contradicts many of the standard assumptions concerning the relationship between energy supply and industrial growth.

The consensus of the committee is that the growth of gross national product is not dependent on the parallel growth of energy supplies. In fact, it seems likely that GNP could triple over the next 40 years without significant energy growth.

The report provides powerful support for proponents of stringent conservation measures in reallocating energy resources. The panel substantially agrees that economic incentives and plant-design improvements can promote enough efficiency in the use of available energy to maintain GNP growth.

One of the most striking conclusions of the committee is that the so-called "alternative" energy technologies are a good deal further off than experts had hoped. Indeed, none of them will contribute much in this century. Synthetic fuels, solar electric generation, and advanced nuclear power plants are considered promising but extremely long-term. Moreover, government regulation is seen as a signaficant barrier to development.

The panel, which is filled with people who have good connections with the Carter Administration, may serve to reinforce Carter's own preferences for a policy heavily dependent on conservation measures.

(This concludes additional statements submitted by Senators today.)

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. BURDICK). The Chair, on behalf of the Vice President, pursuant to Public Law 91-452, appoints the Senator from Maryland (Mr. MATHIAS) to the National Commission on Individual Rights.

ORDER FOR RECESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF MR. BARTLETT TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders are recognized on tomorrow, Mr. BARTLETT be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF MR. PELL TOMORROW

Mr. ROBERT C. BYRD. Mr. President, upon the resumption of the consideration of the Code of Conduct measure tomorrow, I ask unanimous consent that Mr. PELL be recognized for not to exceed 15 minutes to engage in a colloquy with Mr. NELSON.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFICIAL CONDUCT AMENDMENTS OF 1977

Mr. ROBERT C. BYRD. Mr. President, am I correct that upon the expiration of the 15 minutes on tomorrow, the two amendments by Mr. DURKIN which were temporarily laid aside would automatically come before the Senate? One was temporarily laid aside and the other one was before the Senate when we went into morning business. They both would be before the Senate, would they not?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. And all time has expired on both.

The PRESIDING OFFICER. That also is correct.

Mr. ROBERT C. BYRD. Mr. President, which of the two amendments would be before the Senate first?

The PRESIDING OFFICER. Amendment No. 103 would be the amendment that would come before the Senate first.

Mr. ROBERT C. BYRD. And then the second amendment would be the one which was temporarily laid aside?

The PRESIDING OFFICER. That is correct, and that is amendment No. 104.

Mr. STEVENS. Mr. President, a parliamentary inquiry. Does that mean that the votes would necessarily occur at that time, after the expiration of the two 15-minute periods, or will the vote occur when the Senator requests a vote?

Mr. ROBERT C. BYRD. No. All time has expired on the two amendments, so the votes would occur then, unless Senators yielded time from the resolution for further debate.

Mr. STEVENS. But it is my understanding that the managers could yield time at that time, should they wish to do so, to discuss these matters, before the vote.

Mr. ROBERT C. BYRD. They could, if they yielded time from the resolution. Otherwise, the votes would occur at that time.

REREFERRAL—SENATE JOINT RESOLUTION 13

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senate Joint Resolution 13, relating to energy conservation, be referred jointly to the Committee on the Judiciary and the Committee on Energy and Natural Resources. This request has been cleared on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, on tomorrow the Senate will convene at 12 noon.

Committees may meet until 2 p.m. tomorrow, under the Stevenson resolution. They could meet during the morning, when the Senate is not in session; they could meet during the afternoon, when the Senate is in session, until 2 p.m., under the Stevenson resolution. Of course, the Appropriations and Budget Committees have standing authority to meet.

After the two leaders have been recognized, the Senator from Oklahoma (Mr. BARTLETT) will be recognized for not to exceed 15 minutes.

The Senate will then immediately resume consideration of Senate Resolution 110, at which time the distinguished senior Senator from Rhode Island (Mr. PELL) will be recognized for 15 minutes, to engage in a colloquy with Mr. NELSON.

The pending question at that time will be on the amendment by Mr. DURKIN, No. 103. The Senator at that time may ask for the yeas and nays, if he wishes to have the yeas and nays thereon; and upon the disposition of the amendment, Mr. DURKIN's amendment No. 104 will be the pending question.

Upon the disposition of amendment No. 104, the Senate will take up the amendment by Mr. ROTH, in accordance with the order of last evening.

Upon the disposition of the amendment by Mr. ROTH, Mr. WALLOP will be recognized to call up his three amendments.

There is an amendment by Mr. HATHAWAY which will follow. Then Mr. PERCY has at least four amendments that have been ordered, with the understanding——

Mr. STEVENS. Six amendments.

The PRESIDING OFFICER. Mr. PERCY seems to have four amendments, under the previous order.

Mr. ROBERT C. BYRD. That is correct. He has four amendments. There was a time limitation on six, but we have the order for only four at that point. It may very well be that tomorrow we can arrange for him to call up all six, and I hope we can.

Beyond that, Mr. HELMS has several amendments, but they will be carried over until Monday. My judgment is we will have rollcall votes tomorrow during the afternoon, and that the Senate will be in until 5 or 6 p.m.

RECESS

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 12 noon tomorrow.

The motion was agreed to; and, at 8:14 p.m., the Senate recessed until tomorrow, Friday, March 25, 1977, at 12 meridian.

NOMINATIONS

Executive nominations received by the Senate March 24, 1977:

DEPARTMENT OF AGRICULTURE

Dale Ernest Hathaway, of the District of Columbia, to be an Assistant Secretary of Agriculture, vice Richard E. Bell, resigned.

Dale Ernest Hathaway, of the District of Columbia, to be a member of the Board of Directors of the Commodity Credit Corporation, vice Richard E. Bell, resigned.

IN THE NAVY

Vice Adm. Jon L. Boyes, U.S. Navy, for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 24, 1977;

DEPARTMENT OF AGRICULTURE

Carol Tucker Foreman, of the District of Columbia, to be an Assistant Secretary of Agriculture.

Carol Tucker Foreman, of the District of Columbia, to be a Member of the Board of Directors of the Commodity Credit Corporation.

The above nominations were approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

BAN ON SACCHARIN

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. GEPHARDT. Mr. Speaker, undoubtedly all my colleagues have received as many calls and letters as I have expressing outrage at the Food and Drug Administration's announced intention to propose a ban on saccharin.

Certainly, such action would, at best, inconvenience large numbers of Americans who use artificial sweeteners regularly for dietary purposes. True hardships will be created for Americans with health problems which prohibit their consumption of sugar. The 10 million diabetics in the country and the many millions with other conditions aggravated by natural sweeteners will have greater difficulty obtaining saccharin and will certainly suffer increased costs if they have to depend on prescriptions to get the product.

Although the Canadian test which concluded saccharin is carcinogenic relied on methods universally accepted by the scientific community, the public outcry about the possible ban on the product, in my view, is justifiable. It is difficult to understand, and indeed does not make sense, for saccharin to be taken off the market when it is still possible to buy cigarettes, which far more conclusive evidence has shown are health hazards. Similarly, substances which have been found to cause other diseases are also available, often without even the type of warning carried on cigarette packages.

The inconsistency has turned the proposed saccharin ban into a classic big Government issue. For too many of us, such action would constitute another instance of the Federal Government interfering in our daily lives, when we should be considered intelligent enough to exercise our own judgment once given all the facts. Is it necessary for FDA to tell us we cannot have a product or is it not sufficient for the agency to merely warn us of a possible health hazard?

Further questions arise from the proposal to ban saccharin before testing it on humans, an experiment which should be possible. The product has been available for 80 years and has been used in large quantities by a readily identifiable group of people. The 10 million diabetics in the country have consumed saccharin under controlled conditions over a long period of time. With the large data banks which have been developed in medical research to test the effect of various chemicals on different types of tumors, it is hard to believe that information about the relationship between the consumption of saccharin and the instance of cancer cannot be put into computers and analyzed to establish the human reaction.

This issue warrants close attention, and I am pleased the Health Subcommittee has begun hearings. Hopefully, the subcommittee action will help provide answers to these questions and lead to a more reasonable approach before the drastic step of an out-and-out ban is taken.

In this connection, I hope some attention will be given to the measure which my colleague from Arizona, Mr. RUDD, has proposed. His bill would put potential carcinogens in the same category as all other substances which FDA must test. It would require, basically, that the same criteria for determining the safety of other products and appropriate protective action be applied to additives suspected of causing cancer. This measure would enable us to legislate flexibility. It would give FDA the opportunity to weigh alternatives and find the best way of protecting public health with minimal disruptions or hardship.

I have advised Mr. RUDD of my support for his bill and urge the other Members of the House to join in this effort to inject some reason and discretion into the regulation of food and drugs.

OF ALL THINGS RESPONSIBILITY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DERWINSKI. Mr. Speaker, H. Marlin Landwehr, editor of the Subur-

anite Economist, an outstanding newspaper chain of suburban Cook County, Ill., is also a keen observer of domestic and current events.

In his column of March 20, he discusses the issue of freedom of the press, in view of the recent questions raised by U.N. Ambassador, Andrew Young. His article follows:

OF ALL THINGS RESPONSIBILITY

(By H. Marlin Landwehr)

It's ironic that Andrew Young, U.S. ambassador to the United Nations who President Carter has called the greatest civil servant he (Carter) has known, should find himself in disagreement with the nation's press.

As a leading liberal Young has enjoyed the support and praise of the press. Now Young has taken a conservative stance and drawn the censure of the press, which is usually considered to be largely conservative but in this instance takes the liberal position.

We refer, of course, to Young's statement that the U.S. supreme court should re-evaluate freedom of the press and perhaps restrict the publication of information about violent crimes, such as the Moslem terror in Washington, D.C. Young apparently agrees with others who have been saying that extended television, radio and press coverage of such events encourage others to engage in similar or even more revolting incidents. Young's view is heard more and more these days, though he may be the highest public official to make such a declaration to date.

Naturally, the press is quick to beat down any such opinion and the natural answer is the Constitutional guarantee (First amendment) of freedom of the press. And it is an irrefutable argument.

The situation is, truly, a dilemma. You cannot limit freedom of the press without doing damage to the democracy. Without a free press you would have dictators at every level of government. You might as well move to Russia. Yet there is no denying Young's contention that terror feeds on terror and the more publicity attached to such events the more likely the terror will grow.

The answer lies in one word—responsibility. There was a time when publishers and editors realized the good and the harm that could flow from the printed word. They were careful of the effect their stories might have on a child, a community or a nation. Some subjects—race, religion, riot—were treated with special care. They weren't avoided, there was no suppression, but they were presented in a manner that would foster race relations, respect freedom of religion and refrain from inciting riot.

Today such advice would be laughed at in most newspaper offices. We blame it mostly on television and the ensuing competition with newspapers and all other forms of printed matter. Each has to outdo the other in shock value and exclusivity. As so often happens, in the rush principles get trampled upon.

But the pendulum is turning. Young may be the biggest name to speak out on the subject, but he is not alone and won't be the last. Some in the industry are also aware of the problem and are trying to do something about it. This combination of a change in the public opinion and responsibility within the profession is the only way to change things and it will. After all, aren't there even signs that the public is wearying of the gore on television? And if that era can end—however long it takes—anything can.

BERGLAND PEANUT PROPOSAL—REAL REFORM

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. FINDLEY. Mr. Speaker, Agriculture Secretary Robert Bergland today outlined to the Committee on Agriculture his recommendation for reform of the peanut program. In brief, it would shift from acreage to poundage allotments, and over 4 years reduce price supports about 15 percent and total poundage allotments substantially. In making this proposal, he is taking on the State of Georgia, a decision which takes special courage these days.

In my view, it is a constructive proposal which gets peanuts close to a sound economic base within 4 years. As it now stands, the Federal peanut program is the most outrageous of all commodity programs.

Here are the outline details of the peanut proposal as distributed by the Secretary last week informally to the Oilseeds and Rice Subcommittee:

PROGRAM DETAILS: SUGGESTED TWO-PRICE PROGRAM

The suggested program has been designed as a transitional program to be offered as amendments to present legislation effective for the 1978 through 1981 crops. The amendments will expire at the end of four years unless extended.

A. LEGISLATIVE PROVISIONS

Item and Amendment

National allotment: The minimum national allotment of 1,610,000 acres will be retained as the minimum allowed to allotment holders for total peanut production, quota and nonquota.

National marketing quotas—Minimum: Minimum national poundage quotas eligible for high support will be legislated, the proposed minimums ranging from 1,680,000 tons in 1978 to 1,440,000 tons in 1981. Acreage equivalents are 1,300,000 acres in 1978 to 1,114,000 acres in 1981.

National marketing quotas—Actual: Poundage quota will be raised if the minimum quota for a crop year will be insufficient to meet estimated requirements for domestic edible and related use plus a year-end inventory carryover equivalent to a two-month supply for quota uses.

The poundage quota also may be raised at the Secretary's discretion (a) as a result of pre-season short supply determinations originating with growers of a particular type of peanuts (e.g., Valencia type) and (b) as a means of channeling nonquota production of a particular type to quota uses during the marketing year.

Nonquota production: Will be restricted to allotment holders and limited to each grower's share of the national acreage allotment.

Preliminary farm yield: To be established for each allotment holder based on the average of his best 3 years out of the 1973–77 period, times his allotment.

Farm Marketing quota: The preliminary farm yield established for the 1978 crop will be used each crop year to determine each grower's share of the national marketing quota.

Sale or lease of acreage allotments: New language may be needed, e.g. (a) to adapt to poundage quotas, and (b) to permit crossing county lines.

High price support rates: For quota production, in lieu of rates based on percent of parity, establish explicit support rates for each year 1978–81, ranging downward from $390 per ton net in 1978 to $345 in 1981. These rates are roughly equivalent to 65–60–55–50 percent of assumed parity levels.

Low price support rates: For nonquota production, the Secretary has discretionary authority to set low support rates taking into consideration projected crushing and edible export prices and such other guidelines as may be written into the legislation. The latest practicable deadline should be set for announcing low support rates.

Nonquota production for edible use: Provide mechanism whereby Secretary may channel nonquota. production (including nonquota inventories under loan) into domestic edible channels in short supply situations.

Handling nonquota productions:

a. Define permitted uses.

b. Define method of handling. If practicable give Secretary discretion whether to channel all nonquota production through the loan or permit contracting.

c. Establish controls and penalties to assure compliance with permitted uses.

PEANUT LEGISLATION: SUGGESTED 2-PRICE PROGRAM—CCC MINIMUM SALES POLICY ON EXPORTS, WITH MINIMUM AT LOW-LOAN RATE ON 2-PRICE PROGRAM

Item	Unit	Marketing year beginning Aug. 1			
		1978	1979	1980	1981
Minimum national allotment	1,000 acres	1,610	1,610	1,610	1,610
Harvested acres	1,000 acres	1,450	1,360	1,350	1,350
Total production	1,000 tons	2,045	1,979	2,025	2,086
Marketing quota:					
Minimum	1,000 tons	1,680	1,596	1,516	1,440
Actual [1]	1,000 tons	1,710	1,641	1,576	1,515
Domestic edible and related use and exports at or above high loan rate.	1,000 tons	1,320	1,300	1,370	1,440
Export and crushing, nonquota production, with exports at or above low-loan rate.	1,000 tons	335	338	449	559
CCC diversion, quota production	1,000 tons	479	329	195	75
Assumed loan rate:					
Quota:	Dollars per ton	390	375	360	345
Nonquota	Dollars per ton	200	205	215	225
Farm value of production [2]	Million dollars	750	702	685	676
CCC net outlays	Million dollars	90	54	27	9
Percent of farm value	Percent	12	8	4	1

[1] Includes (a) nonquota production used for domestic edible and related and (b) increases in national marketing quota resulting from short supply determinations.

[2] Assumes no deduction, does not include value of production of alternative corps grown in lieu of nonquota peanuts.

PEANUT LEGISLATION: PRESENT LEGISLATION WITH ALL EXPORT SALES AT OR ABOVE HIGH-LOAN RATE

Item	Unit	Marketing year beginning Aug. 1			
		1978	1979	1980	1981
Minimum national allotment	1,000 acres	1,610	1,610	1,610	1,610
Harvested acres	1,000 acres	1,530	1,530	1,530	1,530
Total production	1,000 tons	2,135	2,205	2,270	2,340
Marketing quota—Minimum	1,000 tons	2,135	2,205	2,270	2,340
Domestic edible and related use and exports at or above high-loan rate.	1,000 tons	1,415	1,445	1,485	1,525
CCC diversion	1,000 tons	720	760	785	815
Assumed loan rate	Dollars per ton	450	478	514	556
Farm value of production [1]	Million dollars	918	1,010	1,121	1,254
CCC net outlays [2]	Million dollars	158	188	223	266
Percent of farm value	Percent	17	19	20	21

[1] Net after $20 deduction for storage and handling.

[2] Without minimum sales policy estimated CCC net outlays would be higher by $50,000,00 to $70,000,000.

SQUIRREL POWER

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. SYMMS. Mr. Speaker, for several years the great energy debate has raged across America. Most frequently, we hear the complaint from all segments of opinion that we lack a national energy policy. But, I submit, Mr. Speaker, that we do have a national energy policy—and that our policy amounts to making sure that nothing is done to encourage energy production while paying lipservice to conservation at the same time.

Government, as we all know, is very ingeneous and creative—always has been—and I have always believed that government would find the solution to our energy dilemma. Well, the expected breakthrough has finally come. The details are reported in the March 9, 1977, issue of Review of the News by Mr. John Brennan. The article describes a revolutionary new power source that may even attract the blessings of Ralph Nader and Environmental Action, Inc.:

"Wait till you see what government squirrels can do" cried Mr. Nader, who then called for the halting of construction of all nuclear power plants, all electrical energy production stations, all oil refineries, and an immediate return to the oar, the pedal, and the windmill. In this he was a bit late, for the federal government is already sponsoring construction of giant windmills in the Rockies.

In the billion-dollar squirrel scheme the Federal Energy Administration has relied on a report, prepared by Mr. Nader, showing how a healthy squirrel running on a wire wheel attached to a small generator might produce enough electricity to heat a six-room house while powering all the electrical appliances in the average household. Some skeptics complained that a tiny squirrel whirling in a cage could not possibly produce sufficient energy to do this, but experts from the Internal Revenue Service said that a properly motivated squirrel could do the job. They assured the nation they had the methods and the personnel to guarantee compliance.

The first squirrel-cage factory is due to open in Cambridge, Massachusetts, on April 1, 1977, and will be dedicated by House Speaker Thomas P. "Tip" O'Neill. Speaker O'Neill replied at a recent press conference that he saw no conflict of interest on the part of the Administration in the fact that the government squirrels will live on a diet of peanuts. Later in the week the White House announced that a squirrel farm will be constructed on the former site of the now defunct Harvard University, from which some 1,200 professors had fled in terror upon learning of the squirrel roundup.

Bert Lance, President Carter's director of the Office of Management and the Budget, is overseeing the massive squirrel project in its initial stages. Lance stated that he is certain the squirrels will see America through her time of need, adding that the "same uncanny equilibrium that helps the squirrel maintain his balance high in the treetops might well be harnessed to help me achieve a balanced Budget by 1980."

Mr. Lance estimates that approximately 276,989,436 squirrels will be needed to supply America's energy needs. Since the young people employed under the federally funded program known as Youth And Squirrels Save America's Heat (YASSAH) appear to be catching the furry little animals at the rate of 2.4 squirrels per youth per day, it appears that the goal of capturing 276,989,436 squirrels before next winter will not be met. The youth of YASSAH blame their relative lack of productivity on the slowness of the federally developed ox carts, originally designed by the L.E.A.A. as police patrol cars.

The government is meanwhile banking on the well-known ability of squirrels to reproduce in large numbers as a means of saving the program. A high Welfare official recalled just the other day that when his mother began handing out bread to two little squirrels in his backyard it was impossible to enter the yard after only two months without being besieged by a pack of the persistent and ravenous creatures. The problem was solved when his father purchased a large dog which he kept tied to a tree in the yard and fed sparingly. The Welfare official thus far has been disinclined to apply a similar solution to the problems of his agency, but he has presented abundant data to prove that subsidies for squirrels should produce abundant offspring.

The Congress Of Racial Equality and the American Indian Movement have meanwhile been watching the squirrel project with much interest. Indeed, both organizations threatened legal action when the squirrel search was originally confined to gray squirrels because of their alleged superior energies. Red and black squirrels are now as welcome on the government squirrel farms as the gray.

Ambassador Andrew Young, whose pronouncements have been getting him in difficulty, ran into more trouble this week when his limousine struck and killed a squirrel in Central Park. Ambassador Young was photographed tearfully holding the carcass of the dead squirrel by the tip of its tail. The picture was captioned "America's Friend Makes Ultimate Sacrifice," but was withheld from most newspapers as not being in the national interest. It was widely reproduced in foreign countries, however, and became the cause of unseemly merriment in the O.P.E.C. nations and South Africa. General Idi Amin Dada telephoned Ambassador Young to say that Acts of Heaven will happen. Idi offered to replace the defunct squirrel with an anxiously running missionary.

Paul Warnke, whose nomination to head the arms control agency had such a stormy time in the United States Senate, is among those who are very interested in the squirrel energy program. He feels it is somewhat similar to his well publicized but little understood plan to replace the B–1 Bomber with horse cavalry. Mr. Warnke also has an answer for those who say the squirrel might fail to run and turn his little wheel. He says the same motivational technique should be used when dealing with squirrels as he would use when dealing with the Russians. "Build a man-sized cage and I will get in it," says Mr. Warnke. "Once the squirrels see me running they will know I am sincere and I am sure they will then want to run in their own little cages."

A late development in the squirrel energy story has broken just as we go to press. According to Jimmy Carter's chief economic advisor, Lawrence Klein, a slight error has been found in Ralph Nader's initial calculations that had indicated the energy of one squirrel could provide enough electricity for the average household. The new government figures, says Klein, confirm that the original plan was correct in all respects . . . except that the squirrel would have to weigh 200 pounds. A crash federal program with cost overrides is now under way to develop a 200 pound squirrel, and President Carter believes that with the sacrifices and forbearance of the American people his dream of energy independence will soon be a reality.

Mr. Speaker, I am sure that the American people will be pleased to learn that the Government has found a satisfactory alternative to coal and nuclear energy for power generation.

HUMAN RIGHTS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DERWINSKI. Mr. Speaker, the well-known philosopher and columnist, William F. Buckley, Jr., in an article appearing in the Chicago Daily News, weekend edition of March 12–13, comments on the recent discussions on human rights. His views are especially pertinent and timely in view of President Carter's recent remarks. The article follows for the Members' attention:

HUMAN RIGHTS INTO THE OPEN

(By William F. Buckley, Jr.)

LONDON.—President Carter's references to human rights are causing quite a commotion in these parts. It is not really expected, by working statesmen, that anything more will be done about human rights than to mention them genially from time to time.

That is why Carter's behavior, which one would not really have thought so extraordinary, is causing such upheavals here. President Giscard d'Estaing is positively truculent on the subject. Human rights, he passed

the word to the noble Amalrik who sought vainly to interview him, are not to be discussed with mere Soviet martyrs.

Another interesting argument has been raised against Carter's behavior, this time from the right. Mr. Worsthorne of the Daily Telegraph, who specializes in saying interesting things, makes this point: America is way behind in the business of keeping up militarily with the Soviet Union. And the only reason we exert ourselves as we do is that we sense how awful Soviet life is. Now, if we continue to put pressure on the Soviet Union, what is likely to happen is that the Russians will give free speech to all of the 200 Rusians who desire it, then will smile toothily at us, and we will fall over ourselves with appreciation, disbanding the Army, the Navy, the Air Force and the Boy Scouts.

What actually has President Carter done? And how can the Soviet Union respond?

Carter has with utter dignity done just a little more than talk abstractly about human rights. He has recognized the existence of real heroes, genuine victims of systematic persecution. He has mentioned a few by name. He has, albeit as discreetly as if he had arranged to see a peep-show, actually visited with one. In terms of policy, he has used no sanctions against the Soviet Union—only against relatively impotent Latin American nations. In the course of doing so—of ruling, e.g., against Uruguay but not against the Philippines—Carter stressed quite candidly the necessity of superordinating the national interest. Translated, that means the Philippines can hit back at us; Uruguay can't.

The Soviet Union would not be motivated to strike or not to strike by our behavior toward the Bukovskys. But a crystallization of world opinion against the tormentors of the Bukovskys is something the Soviet Union clearly does not want—and may not be able to afford. Are we willing to see through to the implications of our challenge to the Soviet Union to civilize itself? It means, among other things, giving them no acceptable alternative. And that means rearmament, and all those grim and costly things.

THE GOP AND THE FORTUNE 500

HON. BOB WILSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the Wall Street Journal, Mar. 23, 1977]

THE GOP AND THE FORTUNE 500

(By James P. Gannon)

WASHINGTON.—Ronald Reagan thinks big business is gutless, when it comes to standing up for political principle.

Republican National Chairman Bill Brock believes that the public image of the GOP as the party of big business is "a significant liability" which ought to be wiped out to aid the GOP's rebuilding effort.

Sen. Paul Laxalt of Nevada is "shocked" at how business groups split their political contributions in 1976 between Democrats and Republicans. "Political eunuchs," he mutters.

House GOP leader John Rhodes of Arizona says "there are lots of Republicans who would just welcome the opportunity to do something against big business," to demonstrate their independence.

As these comments from leading Republicans indicate, something strange is going on within the range of the GOP. In this period of introspection following their bitter election disappointments of 1976, Republicans are rethinking their party's relationship to big business. Particularly among conservatives, this self-analysis is generating a nearly heretical thought: Republicans ought to stop fighting big business battles, because corporate titans are fickle friends who give GOP politicians little more than political body odor.

It's not that the disenchanted Republicans are about to launch an anti-business crusade: their free-enterprise philosophy isn't changing, just their attitudes about corporate America. At this stage, they are merely pondering some questions they hadn't seriously faced before, and groping for answers, which don't come easily.

NEW QUESTIONS BEING ASKED

Isn't big business in bed with big labor and big government? Aren't corporations basically apolitical, willing to curry favor with whichever politicians happen to hold power, regardless of party or philosophy? Haven't Republicans paid a high price, politically, for being defenders of rich, unpopular companies? Isn't the party's pro-business image a major obstacle to building a middle-class majority of wage-earners?

To these and similar questions, many GOP thinkers and leaders are answering "yes." Attitudes which previously seemed confined to conservative neo-populist theorists such as former Nixon speechwriter Patrick Buchanan now appears to be spreading much more widely within the party, notably in its conservative-to-middle ground. But the rethinking is in a formative stage, with many Republicans only groping for answers.

"There are straws in the wind," remarks Max Friedersdorf, former White House lobbyist and now staff chief of the Senate Republican Policy Committee. He observes: "There is, beneath the surface, a grumbling among Republicans that their close connection with business hasn't paid off politically. You hear it wherever you are with a group of Congressmen or party people. It isn't that they want to desert their principles: it's just that, politically, it's been a bummer."

The rethinking is occurring now for several reasons. The party's loss of the White House and its failure to dent the big Democratic majorities in Congress have prompted GOP soul-searching on all sorts of questions, including the Republican-business link. Philosophically, many conservatives are coming to see a growing disparity of interest between giant corporations with multinational empires and the back-home small businessmen who actually vote. Politically, Republicans had their eyes opened by recent disclosures showing how widely business hedges its bets by contributing to both Democrats and Republicans, both liberals and conservatives.

The Republican who's making the most noise about "getting the Fortune 500 off our backs is Sen. Laxalt of Nevada. An outgoing Westerner who wears cowboy boots and speaks with shotgun bluntness, the conservative chairman of the 1976 Reagan-for-President campaign is hitting the dinner circuit with a speech designed to make corporate bosses wince.

With big government and big labor threatening the free-enterprise system, Sen. Laxalt complained to a recent Ogden, Utah, businessmen's banquet, "big business sits on its hands for fear involvement may dip into profits." He blistered corporate political action committees for giving "a shockingly high percentage" of their contributions to Democrats. "Business tries to play both sides," he complained. "They look to the Republicans for protection and to the Democratic Party for gravy."

In an interview, the Senator cites figures compiled by conservative fund-raiser Richard Viguerie to support his comment that "businessmen have become so sophisticated they are political eunuchs." The "Right Report," a newsletter put out by Mr. Viguerie, recently published a list of 20 corporate and trade-association political committees which reportedly gave between 26% and 87% of their contributions to Democrats in 1976.

Big business, big labor and big government "are politically sleeping with one another and they depend on each other for their political and economic survival," Mr. Laxalt figures. He wants Republicans to forget the Fortune 500 and concentrate on aiding small businessmen and the middle-income taxpayer.

Ronald Reagan, still the biggest name on the Republican right, is thinking along the same lines. He's dismayed that big business is "feeding the crocodile" of big government "hoping it will eat them last."

The former California governor notes that it wasn't a big corporation but a small Idaho company which went to court to stop federal safety inspectors from conducting plant searches without a warrant. "Why didn't General Motors do that," Mr. Reagan asks. The answer, he thinks, is that big corporations are "too timid about rocking the boat" and too willing to go along with more government regulation—which is easier for them than for small firms.

This sort of complaining about business might be dismissed as meaningless if it weren't being heard from party pros who are groping for ways to improve the GOP's future prospects. "We're improperly perceived as the business party," says Sen. Robert Dole of Kansas, the 1976 GOP nominee for Vice President. "We've got to change that if we are going to win elections," he adds.

The new national chairman of the party, former Sen. Brock of Tennessee, agrees. The big-business tag is "a significant liability," he says, even though "big business by its own action has belied the validity of the charge." He contends that business' heavy contributions to incumbent Democrats reflect a desire "to buy access to Congress," regardless of party or philosophical considerations.

The GOP, Mr. Brock declares, is facing "a political evolution that could be significant." Historically, political parties renew themselves by reaching out to large blocs of unaffiliated voters, in Mr. Brock's view. The big bloc which the GOP must reach, he thinks, is that vast middle: working adults in their middle years, with middle incomes, and with middle-road political attitudes which don't attach them strongly to either party.

Reaching out to these taxpaying, wage-earning, child-rearing middle Americans may require the GOP to become "a little less concerned about the corporate sector," Mr. Brock says. It doesn't mean a sharp left turn. "I don't foresee the majority of Republicans adopting an anti-business stand for short-term political gain," he emphasizes. But if the hoped-for "political evolution" actually occurs, the GOP would take on a more populist cast that might clash with acting as defenders of the corporate interest.

"Then the business community would have a heck of a time finding political representation," Mr. Brock points out.

So far, all this is so much thinking-out-loud, and even those doing the thinking are hard pressed to say whether it will translate into action. House GOP leader Rhodes finds many of his colleagues groping for ways to demonstrate that they're not captives of business, but "it's hard to figure out what to do."

TILT TOWARD SMALL BUSINESS

Robert Griffin of Michigan, a Republican Senator who may face a tough reelection

fight in 1978, thinks the GOP "could make an effort to concentrate more on small-business and middle-income groups." In fact, that's just what the Senate Republicans did last month in constructing a GOP alternative to President Carter's economic stimulus package. The Republican Senators unanimously agreed on a tax proposal that would sharply reduce taxes on the first $100,000 of profits—a benefit of great value to small companies but peanuts to IBM. Furthermore, the GOP alternative doesn't include any Carter-like increase in the investment tax credit, which benefits big companies the most.

That sort of tilt toward small business is exactly what many conservative thinkers insist the GOP must adopt. "What has IBM or Xerox done for the Republican Party lately?" asks former Nixon aide Pat Buchanan, who's preaching an anti-big business gospel at conservative gatherings.

Mr. Buchanan argues that the GOP must be seen to be fighting for the little guy against the corporate giant. "When it is a contest between Henry Ford and the United Auto Workers, or the coal companies and the coal miners, we shouldn't automatically side with management," he says. "We've got to side with the working guy and his job."

When Pat Buchanan starts sounding like a union organizer, it's clear something remarkable is fermenting within the GOP. At a minimum, it raises a warning that big business can't take conservatives for granted, as they have for so long. Warns Nevada's Mr. Laxalt: "If we ever were, we are no longer automatic Fortune 500 votes."

THE CONSERVATION OF HARP SEALS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. WHITEHURST. Mr. Speaker, in the March 19, 1975, Extensions of Remarks in the CONGRESSIONAL RECORD, I inserted the text of a factsheet which I had received from the State Department regarding the need to protect harp seals. Because the killing of those seals is still going on, I believe that this information is still germane, and I am sharing it with my colleagues again at this time.

On February 8 of this year, I reintroduced my resolution to conserve these hapless creatures. It is now House Concurrent Resolution 109, and it states:

That the United States should, as expeditiously as possible, take all necessary actions to effect a regional conservation treaty for the protection of northern hemisphere pinnipeds.

I would again welcome the cosponsorship of any of my colleagues who share my concern for these animals.

The material follows:

THE CONSERVATION OF HARP SEALS

The harp seal is taken by Canadian and Norwegian hunters in March of each year off the coasts of Newfoundland and Labrador (known as the "Front") and in the Gulf of St. Lawrence. In 1972, the Canadian Government limited the hunt in the Gulf by banning there the use of aircraft and large vessels. Harp seals are also taken, but in considerably fewer numbers, by natives in the eastern Canadian Arctic (Baffin Islands and the Labrador coast) and in Greenland, and by Norwegians around Jan Mayen in the Arctic Ocean and in the White Sea area. The Russians participated in the hunts in the last two areas during the early sixties, but we do not know if they are still doing so.

The Canadian Government in January, 1972 released a report, drawn up by a special advisory committee, which stated that "if the (harp) seal hunt is maintained at the 1972 level, there will be a total elimination of the one year old animals in 2014. The harp seal would then move toward extinction as the older animals die off." The Committee recommended a phase-out of the Canadian and Norwegian Atlantic hunt (i.e., in the Gulf and the "Front") by the end of 1974 to be followed by a minimum six years moratorium, except for a yearly quota of 10,000 for aboriginal hunting in Canada and Greenland. It further recommended that the decrease in hunting activity in the Atlantic should not produce an increase in the exploitation of seals in other areas of the world. Presumably these other areas would include the White Sea and the waters surrounding Jan Mayen. The recommended phase-out schedule was 160,000 (85,000 less than the previous year) to be taken in 1972, 120,000 in 1973 and 80,000 in 1974. The Canadians, Norwegians and Danish followed the Committee's recommendations for 1972, but in 1973 and 1974 they set the quota at 150,000.

Since 1964, the harp seal has been subject to the conservation and management measures adopted by the International Commission for the North Atlantic Fisheries (ICNAF), whose sixteen member nations include the United States, Canada, Norway and Denmark. In practice, the Commission has accepted the recommendations of Canada, Norway and Denmark. At the 1973 ICNAF annual meeting, the Commission's scientific experts stated that the quota of 150,000 equals the sustainable yield, meaning that this is the number that can be taken without further reducing the harp seal population in the Atlantic, but not allowing for any rebuilding of the stock. Also at the meeting, the United States presented a paper that urged Canada, Norway and Denmark to consider the harp seal in relation to the health and stability of the ecosystem rather than on the basis of their economic utility.

In the longer run, the United States would like to remove the harp seals from ICNAF and, in accordance with the principles and purpose of the Marine Mammal Protection Act of 1972, place them under the protection of a regional conservation treaty for northern hemisphere pinnipeds (the order of marine mammals which includes seals). Scientists have informed us, however, that there is insufficient scientific information available at the present for the conclusion of such a treaty. They have suggested that the conference for the treaty be preceded by a preparatory scientific meeting. Currently we have been cooperating with the UN Food and Agricultural Organization (FAO) in gathering scientific information for the preparatory meeting, which we hope will be held as soon as possible. This would be followed by the conference to negotiate the treaty for the protection and conservation of northern hemisphere pinnipeds.

GREEK INDEPENDENCE DAY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. RODINO. Mr. Speaker, over 2,000 years ago the philosophers of ancient Greece gave civilization the priceless concept of democracy, which became the very foundation of our American government.

Had this been the sole contribution of the Greek people to mankind, their memory would have been enshrined eternally. However, as we all know, the contributions of the Greek people and those of Greek heritage have enriched Western civilization. Greek influence in America extends from the design of our magnificent Capitol to the very letters in which these remarks are printed.

It is appropriate, therefore, that we join Americans of Greek heritage in celebrating tomorrow the anniversary of the independence of Greece from the Ottoman Empire.

Following the capture of Constantinople by the Ottoman Turks in 1453, the Greeks suffered from the many injustices of foreign domination. However, in early March of 1821 Prince Alexandros Ypsilantis led a rebellion which quickly sparked a series of popular uprisings throughout Greece. The action was inspired in part by the success of the American Revolution. Independence was declared on March 25, 1821, a date which has become an occasion for great celebration by Greeks and their descendants throughout the world.

Mr. Speaker, the spirit of Greek freedom has never faltered. Even in the dark days of the Second World War Greek resistance to the German occupation was unceasing. Following the war the Greeks, with American assistance, successfully thwarted attempted domination by the Soviet Union, and today independent Greece is a partner in our North Atlantic Treaty Organization.

Mr. Speaker, I am proud and happy to join the many Americans of Greek heritage in celebrating this anniversary of Greek independence.

JOURNAL'S GUIDE FOR WOMEN CRIMEFIGHTERS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. CONYERS. Mr. Speaker, in the March 1977 edition of the Ladies Home Journal, the editors have compiled the answers of 22 prominent Americans as to what should be done to lower the Nation's crime rate. At the conclusion of the Journal's presentation of these diverse views, the editors offer readers the opportunity to write their own responses to President Carter. Several of the contributors agreed that job creation would be the most effective way to mitigate the crime problem. This view struck a responsive chord in my mind as a Member of Congress heavily involved both in issues of crime prevention and full employment.

Across the Nation, crime is becoming a dominant factor in people's lives, no matter where they live or their status in

society. Daily life now has to be organized to one degree or another around fear of crime. People are fed up with living in fear, but do not know what they can do about crime. There are few if any useful models to guide group or community action. The verities of liberal criminology provide little guidance and less comfort.

A recent Gallup poll found that nearly half of all Americans living in big cities—and over three-fourths of the women—are afraid to walk their neighborhoods at night. After seeing the film "Jaws," the media reported that people even hesitated to use their own swimming pools. After reading about and, worse, experiencing a rash of burglaries, muggings, and robberies in their neighborhoods, often in broad daylight, people no longer feel safe either in their swimming pools or living rooms.

Fear of crime is escalating. Handgun sales are up dramatically as are dogbites from protective canines. Some people are even resorting to wolves as pets and it is well known that mace is replacing cologne in many handbags. In small towns, suburbs, and big cities, citizens are organizing anticrime patrols. However, communal control of crime in China may offer some inspiration, but the model is too remote to reassure most of those Americans worried about getting mugged tonight under advance capitalism.

The two things we know for certain about crime are: it is rooted in the social and economic realities of life in contemporary America; and it is inflicted with special severity on lower income people and minorities.

Today, even the most conservative crime theorists acknowledge the close relation between crime and unemployment. Data from Congressional Research Service, Congressional Budget Office, and Joint Economic Committee studies shows a clear relationship between unemployment and imprisonment rates for both State and Federal prison systems. A recent CBO study, for example, documented a 94-percent positive correlation between unemployment and Federal prison admissions.

These same studies suggest that without fuller employment, there is every reason to expect that crime rates will continue to rise accompanied by accelerated prison construction. Part of the importance of the Humphrey-Hawkins Full Employment and Balanced Growth Act is that it offers the only comprehensive alternative to the inevitable failure of harsh criminal justice solutions in dealing with economic, social and racial ills.

Those victimized by crime, especially street crime, are among the same groups whose victimization by enforced unemployment leads to crime. A sample survey of crime victims undertaken in 1974 by the Law Enforcement Assistance Administration shows that: persons with an annual income above $25,000 are only half as likely to get robbed as a person making less than $3,000; a woman whose annual family income is below $3,000 is roughly seven times as likely to be raped as a middle-income woman; and so forth.

No amount of tinkering with the institutions of justice, however well intended, will have much impact on crime. At the same time, efforts that hold the promise of reducing the danger of crime, addressing the special needs of groups, such as women, need to be developed in the short range. The 22 contributors to the Journal article suggest some constructive short and longer range approaches to dealing with violent crime. I commend the article to the attention of my colleagues in Congress:

HOW AMERICA LIVES: HOW WOMEN CAN FIGHT BACK AGAINST VIOLENT CRIME

There is no place to hide, in city, suburb or town. Violent crime is everywhere, and we are all potential victims. With a murder, robbery, assault or rape in the U.S. every 31 seconds, the shocking thing is that we have almost lost our capacity to be shocked by this. Our TV and movie screens make violence fashionable; public disrespect for law enforcement agencies is growing. What can we do to save our society, our children, ourselves? Violent crime is a complex problem, and there are no easy solutions. But because the Journal feels this issue is perhaps the most important one in American life today, we ask our readers to join with us in a search for answers. Citizen involvement can accomplish two things: it can focus the attention of the government on the problem, and it can furnish the womanpower and manpower needed to people a crusade.

Please read this section—a small first step—and, if you care, fill out the coupon at the end of it; it will be forwarded by the Journal to President Carter and/or his designate. America can no longer countenance the kind of spiritual death that violent crime is forcing on us all. Something must be done. You can help.—THE EDITORS.

THE MANY ANSWERS: 22 PROMINENT AMERICANS TELL THE JOURNAL: WHAT SHOULD BE DONE TO LOWER THE CRIME RATE

Gerald R. Ford, former President of the United States:

"It is imperative that the Federal government continue to provide leadership in the battle against crime. As John Locke once wrote, "Where there is no law, there is no freedom." Since a hard core of lawbreakers commit a large portion of our crime, as president I called for the following: Mandatory minimum sentences for those convicted of committing Federal offenses with dangerous weapons; a career-criminal program to deal swiftly with persons repeatedly convicted of serious crimes; a new Federal criminal code to serve as a model for the states and localities; and additional Federal judgeships and prisons. But law enforcement alone cannot reduce crime. The American people must . . . instill within their own families and communities respect for the law and the rights of others."

Benjamin Spock, M.D., pediatrician, activist, author:

"Crime is not the fault of criminals, but of society. People who become criminals have been neglected or unloved and treated brutally in early childhood. We should have welfare programs ten times as good as we do now, and concentrate on rehabilitating families. The answer is not a return to the death penalty, or to put people in jail for longer and longer periods of time. Prison brutalizes, it does not reform. To follow the general hue and cry for increased penalties will only increase the general murderousness of society, which is now at a frightening level."

Edward M. Kennedy, U.S. Senator, Massachusetts:

"We must continue efforts to reform the Law Enforcement Assistance Administration, which has dispensed over $5 billion to localities since 1968 to help them curtail crime. This program will only work if it is accompanied by less bureaucracy and more efficiency at the national and local level. The second step is sentencing reform, including mandatory sentences of at least two years for the violent offender. Judges should be given guidelines so that similar offenders get similar sentences. Finally, we need a complete overhaul of the Federal Criminal Code, which is hopelessly outdated and ambiguous. Any changes, however, must include safeguards to our civil liberties."

James M. Rochford, Superintendent of Police, Chicago:

"Criminals must be served notice that anti-social behavior will not be tolerated. Those who do not heed the warning must be removed from the community until they prove they can live among decent human beings. Police and citizens must work together to reduce the spread of crime and create awareness that crime is unacceptable. We must begin by fighting the little things like window-breaking, writing on school walls, vandalism of all sorts. When we get into the habit of overlooking minor offenses it is easy for this apathy to carry over into the larger things such as robberies, burglaries and even murders."

John Wayne, actor:

"Curtailment of crime should begin at home. Parents shouldn't be afraid to show a little love for their children; they'll get some respect in return. And adults should show some love for their neighbors' children, who will show a little responsibility in return. By love I don't mean gifts. I mean time and thought and communication and caring."

Arnold A. Hutschnecker, M.D., psychiatrist, former member of President's Special Action Office of Drug Abuse Prevention:

"We must institute mental health and social education in kindergardten with small classes and teachers trained in psychology. While children are taught conventional educational disciplines, they must also learn to express basic feelings and vent their discontent. By channeling feelings of violence, hostility and aggression into the open at a formative age, a peaceful society will evolve. Our system of law and order relies on fear as a deterrent against crime. It has failed because it is not a cure."

Edward H. Levi, former Attorney General of the United States:

"For punishment to be a deterrent to crime it must be swift, certain and even-handed. The sentence imposed must be the sentence served, with time off for good behavior. There should be mandatory minimum sentences for certain heinous crimes. . . . I favor the death penalty in some situations because I think it is a necessary deterrent. However, I am certainly not in favor of a death penalty in the United States if we're going to have a flamboyant, macabre [spectacle] every time an execution is scheduled."

Norman Carlson, Director of Federal Bureau of Prisons:

"Rehabilitation is not the prime purpose of penal institutions. Criminals are sent for punishment, or as deterrent. Many have no desire or motivation to try to be rehabilitated. We can only help those who want to help themselves. The penal institutions have not failed; society—homes, schools and churches—failed first. You can't expect the correctional institutions to correct a lifetime of neglect, poverty, racism."

Judianne Densen-Gerber, J.D., M.D., founder of Odyssey House and pioneer in the treatment and care of child addicts and addicted mothers:

"Criminals are made; they just don't happen. America must make its children its first priority. We must establish a Cabinet post for the concerns of children—a Secretary of Children as well as a Secretary of War. Only when we free our last slaves—our children—from being property and make them a sacred trust can we expect them to become responsible adults."

Richard J. Daley, former mayor of Chicago. Mayor Daley gave this statement three days before his death:

"Because the police are relatively few in number, their work must be aided by the public. Citizen information, which can be used to prevent crime or lead to arrests and convictions, must be passed on to the police. Witnesses must be encouraged to testify. Citizen representatives in Chicago, working closely with the police, helped bring about a substantial reduction in crime in 1975 and 1976. Also, there must be an end to the almost constant portrayal on national television of violence and inducements to commit crimes. Current programming is obstructing efforts of the family, church and school to teach obedience for the law and respect for human dignity."

Susan Brownmiller, author of "Against Our Will: Men, Women and Rape":

"If people are really serious about crime, the most critical thing is to change the social attitude that continues to equate aggression with masculinity. I am convinced that violent crime springs out of the offender's belief that she or he is being heroic in the best male model."

Telly Savalas, star of "Kojak":

"Kojak's a different kind of hero. When was the last time you saw him pull a gun? He knows about violence, he's exposed to it but rarely uses it. I think TV has an effect on violence in the streets. And the responsibility rests with the news media. Give the kids different kinds of heroes, not guns. Don't give them the tools of violence. Give them the tools of love and sanity."

Sol Wachtler, Justice, New York State Court of Appeals:

"We can no longer afford to use our criminal courts for the hoped-for, but never realized, purpose of safeguarding all our personal moral values. Some 75 percent of our criminal justice system's time and manpower is devoted to so-called victimless crimes: drunkenness, possession or use of marijuana, consensual sexual 'crimes' and gambling. That leaves much too little capability to deal effectively with violent crimes."

Monsignor John Ahern, Director, Department of Social Justice of Catholic Charities, Archdiocese of New York:

"The correlation between family breakdown, high unemployment and crime cannot be ignored. As a society, we must reassess the swiftness, fairness and purpose of the criminal justice system. But we must also re-examine the seriousness of our commitment to full employment and family stability. Without the latter, even the best criminal-justice system can have little impact on the high incidence of crime."

Carol Kimmel, National P.T.A. President:

"We are looking at a generation that grew up with television. The constant exposure to violence desensitizes people to the actual hurt and consequence of violent crime. If we really believe that TV is a great teacher, then our children are getting great instruction in violent behavior. We also believe that when you move children away from their local schools for any reason, parents become less involved in the school; it ceases to be part of community life, and violence and vandalism increase. The high absentee rate also seems to be a contributing factor in the increase of crime by young people. But the schools can't accept the entire burden of discipline; parents have to be willing to help. The way to get parents involved is to allow them to be part of decision-making in schools."

Betty Friedan, author:

"We must erase the pathology, hate and hostility that nurture the potential for violence and crime. We must open opportunities for full employment, especially to women and the young, who are hardest hit by the recession. And we must establish new values so people can participate more meaningfully in society."

Edmund G. Brown, Jr., Governor of California:

"We need fuller employment, including a public service corps open to all young people so that they may give at least a year of service to their community and their country I also believe there must be swift, fair and certain criminal punishment, good community-police relations; and neighborhood organization and leadership so that people take responsibility for their own living and working areas."

F. Lee Bailey, attorney:

"When one is seeking to mortally wound an enemy, one goes for the jugular. The jugular of large crime (but not passionate crime) is cash. Without it, drugs couldn't be sold, illicit gambling couldn't exist, hookers would have to quit or take credit cards and corrupt public officials would have to do the same. Honest people have no need to carry large amounts of cash. They have checkbooks, credit cards, charge accounts. The few who must carry cash could be licensed to do so. All others could be limited to possesion of no more than $200. As to those who offend because of emotion, frustration or deprivation, frankly, I have no easy answer."

Brian Garfield, author of the novel "Death Wish":

"A particular work of fiction may inspire a crime or two. But . . . will censorship reduce crime? Can we presume to tell the purveyors of news and entertainment what they can and cannot show? It can't be done with justice—and, in any case, you can't deal with crime by chastising entertainers; you can deal with crime only by dealing with criminals. At the moment, crime is profitable, the risks minimal. This is largely because our criminal justice system has rotted. There must be a balance between the rights of the accused and the rights of victims or potential victims. A system of justice must protect all of us—not just the criminals. Perhaps we're still more apathetic than alarmed. Possibly, before we take action, we all need to be mugged."

Clarence M. Kelley, Director of the FBI:

"There is convincing evidence that as much as two-thirds of all crimes are committed by repeat offenders. Their neutralization, whether through lengthy imprisonment or rehabilitation, should be the prime objective of professionals and laymen alike."

Connie Francis, singer-actress (Miss Francis was raped by an intruder in her Long Island motel room in 1974. She says the resulting trauma has ended her career):

"More quality police officers, prosecutors and judges with better salaries to attract the finest people to law enforcement's ranks; higher priorities to all our courts' needs; an end to plea bargaining; stringent punishment for all offenders; heavy bail for second offenders and those in violent crime; reinstatement of capital punishment; and bigger—not prettier—prisons. Also, deemphasize such 'crimes' as gambling and prostitution and direct greater attention to violent crimes against people. The cost will be high, but the problem is serious. The money can come from our defense budget because our first priority must be a sense of safety on our streets. Peace of mind to the elderly, to mothers, daughters and sisters is far more important than the abstraction of losing out in the world struggle for ideological supremacy. Ask me—I know."

Michael J. Codd, Police Commissioner, New York City:

"We must start taking a harder position with both adult and juvenile criminals. Punishment must be swift and certain for all. I recommend mandatory prison sentences for repeaters and perpetrators of intentional crimes of violence. I recommend additional penalties for the use of firearms in the commission of crimes. Young criminals who commit serious crimes should be made to answer for their crimes. And correctional programs must concentrate on practical vocational training so that released prisoners can become self-supporting upon their return to the community."

NO BEEF ON BEEF

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. ABDNOR. Mr. Speaker, the American consumer has become accustomed to plentiful supplies of reasonably priced, highly nutritious food, and as long as our farmers and ranchers are able to stay in business, the great record will continue.

That consumers have no beef on beef and other meat items, particularly, is apparent from this article which appeared March 1, 1977, in the Livestock Market Digest:

PUT IT ANY WAY: BUYERS WELL OFF

There seems a conflict in two reports on beef consumption during 1976. USDA figures showed there was an 8 per cent increase in beef production, to 25.7 billion pounds. This was translated into per capita beef consumption of 128.9 pounds, up from 120.1 in 1975.

The gain in pork consumption was in proportion, too, with the per capita average going from 54.8 in 1975 to 58.1 in 1976. Combining all meats, Americans returned to a record-setting pace which had not been the case from 1972 to 1975. The total average for 1976 was 193.1 pounds per capita, a rate that beat the 1971 record of 191.8 by little more than 1 pound.

Those are figures to be kept in mind when reading another statistic. The Agriculture Department says that Americans spent an all-time low percentage of disposable income on beef in the last quarter of 1976. The percentage was 2.27. That compares to an average of 2.52 per cent for the past three decades and an average of 2.41 for all of 1976.

One quarter does not make a trend, but the figure is justification for concern. William C. Helming, a Kansas City livestock industry analyst, sees that figure as raising "a bright red flag for the industry . . . the most significant single event of the year for the beef industry."

How could beef consumption grow at a good pace yet disposable income spent for this product decline? The answer, of course, should be price. Yet the price statistics show

that February averages for representative beef cuts were much the same as a year ago.

So the real culprit is inflation. The money used to purchase beef—or anything else—today is approximately 5 per cent less in value than a year ago, but average wages have more than made up the differences while beef and meat prices remain the same. The level of beef purchases can be maintained with less "real money" now as opposed to a year ago.

Without getting lost in a sea of statistics, one can put it more simply: The American consumer is much better off when it comes to beef and other meat purchasers today than a year ago, and more. Which is to say well off, indeed. It is a point that deserves all the stressing that a $30 million to $40 million information program could give it. And that can become possible with the beef market development plan.

ENERGY CONSERVATION IN BUILDINGS ACT OF 1977

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. MOAKLEY. Mr. Speaker, energy is the lifeblood of our economy. It is the catalyst that enables us to convert raw resources into the products and services that make up our high standard of living. But we are using up our energy at an alarming rate and once it is used, it is gone forever. Who could have imagined that the fossil fuels that took 500 billion years to make, could be all burned up in just a mere 300 years?

Cheap energy is gone forever and it is time for us to reevaluate our priorities. There is an obvious need to conserve as much energy as possible but we must also develop alternative energy sources. It is for these reasons that I have introduced The Energy Conservation in Buildings Act of 1977.

This legislation seeks to incorporate energy conservation principles in the design and operation of Federal buildings by considering, prior to construction or renovation, the total cost of energy to be consumed during the buildings' useful life. These life-cycle cost analyses shall be made in an effort to determine the least expensive reliable source—or combination of sources—for the energy system.

Buildings larger than 25,000 cubic feet shall be subject to the analyses, which will include examining the building's orientation, the insulating factors, the climatic conditions and the amount and placement of doors and windows. Some Federal buildings and property, including ones in foreign countries and covered under historic American sites, are to be excluded from this act.

Also the advantages and disadvantages of at least 5 available sources—or combination of sources—shall be taken under consideration while determining in the projected cost and amount of energy consumed by each such system during each year of the buildings' expected life cycle.

It is the aim of this legislation to promote the alternative technologies of the sun and wind, for despite higher initial costs, these renewable resources may prove to be vastly more economical over the sytem's life-cycle when compared to the continually increasing fuel and utility charges of conventional systems.

States from all regions of the country, including Texas, Washington, North Carolina, and my homestate of Massachusetts, have already enacted similar laws and it is now the Federal Government's turn to move the country a step closer to a sensible energy policy.

TAX REBATE PROPOSALS ASSESSED

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DEL CLAWSON. Mr. Speaker, an editorial from the Topeka, Kans., Daily Capital has been brought to my attention and because it contributes an objective assessment of the so-called benefits of the tax rebate proposals, I would like to bring it to the attention of my colleagues. The article follows at this point in the Extension of Remarks of the CONGRESSIONAL RECORD:

The Carter administration's income tax rebate plan suddenly is no rebate at all. It is another government give-away program.

The dictionary definition of rebate is "to give back part of an amount paid." But the proposal as it stands now, after some juggling by the House Ways and Means Committee, would:

Rebate no taxes because there aren't any to rebate. All those taxes have been spent. What the government will rebate will be new money that it must borrow.

Pay the full rebate to 11½ million Americans who paid no taxes at all. How can you give them back part of something they didn't pay in the first place? The Congressional solution: Give it to them anyway. These 11½ million people already are on the government welfare rolls and are not paying any income taxes at all.

Pay less of a rebate to those Americans who pay more taxes than most and pay no rebate at all to those who pay the most. Americans who earn $25,000 to $30,000 a year would receive less than $50 each. Those earning more than $30,000 would receive none of their taxes back. This category includes many working couples, persons who moonlight and persons who have built a small business that they work on the side. So this provision penalizes the industrious and productive, the people who are willing to work more hours or risk private capital.

This includes people who pay taxes that are too high, along with paying their own doctor and dental bills and the tab for their children's education because they are "too affluent" to qualify for all those other give-away goodies.

To put the congressional reasoning into focus, consider this. Taxpayers earning $25,000 a year and up are so "rich" that Congress reduces or denies altogether any tax relief for them; on the other hand, members of Congress who are paid $44,600 a year are so "needy" that they granted themselves a $12,900 a year pay increase. This goes along with the almost $1 million allowances, expenses and fringe benefits they have allotted to each member of Congress.

The proposal will benefit millions of working, taxpaying middle income Americans who need and deserve tax relief. But it is reducing or denying the relief to millions of other taxpayers who are paying taxes that are too high and giving it to millions who escape taxation.

BUDGET RECOMMENDATIONS FOR RURAL LOAN

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. HARKIN. Mr. Speaker, the Congressional Rural Caucus has proposed a series of budget recommendations for rural loan, grant, and other special programs for fiscal year 1978. These proposals deserve the very serious consideration of each and every Member of this body.

The fresh air and open beauty of rural America often masks the fact that there are some very serious problems in rural America.

Over 30,000 rural communities do not have adequate water systems. Another 30,000 do not have adequate sewer systems. One-third of America's people live in rural America, yet a full 60 percent of all substandard housing can be found in rural America, as are 45 percent of the Nation's poor.

In terms of rural development and revitalization, the real needs of rural America have, in the past, been ignored.

The Congressional Rural Caucus proposes to change that. Their budget recommendations can change this situation, and at the same time make a tremendous contribution to the fight against unemployment.

There are others far more qualified than I who can discuss the impact of these proposed funding levels on our unemployment problem.

What I wish to discuss today is the real cost to the taxpayer for these proposed increases.

The Congressional Rural Caucus has proposed the various loan programs be funded in fiscal year 1978 at a level of about $15.8 billion. That is an increase of $10 billion from 1976. But I hope no one makes the mistake of reading that increase and assuming the increased loan levels will cost the American taxpayers an additional $10 billion.

These are loans. They must be, and are repaid with interest. They have proven to be some of the best loans the Government has ever made. The default rate for these loans is one of the lowest in the entire Government, about 3 percent. That means these proposed increases would not cost $10 billion, but rather about $300 million.

That is about one-third what we will spend to build one Trident submarine.

That is about one-sixth what we will spend to build one Nimitz-type nuclear aircraft carrier.

It is only one-third more than what we loaned Lockheed to bail them out, two-thirds more than what we loaned Penn Central to bail it out, and only one-fourth what we loaned New York City to bail it out.

Surely we can do this much to help revitalize our decaying rural America.

But even this $300 million price tag is not the real cost of these increased loan programs. The truth is, they do not cost anything at all. They pay. They create jobs in the private sector. They make it

possible for people to become self-sufficient once again, to pay taxes, instead of drawing welfare.

Instead of draining the Federal Treasury, these expended Federal loan programs can help stock it with interest and with reduced welfare expenses and higher tax revenues.

BYELORUSSIAN INDEPENDENCE DAY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Ms. MIKULSKI. Mr. Speaker, 59 years ago, an event of great significance occurred for those who embrace freedom. March 25, 1918 marks the anniversary of Byelorussian Independence Day.

During the First World War, the Byelorussians, like the Ukrainians, Lithuanians, and others within the collapsing Russian empire, seized the opportunity to establish their own national independence. The Great National All Byelorussian Congress on March 25, 1918 established a Republic embodied in the ideals of democracy and freedom.

Despite great difficulties created by the war and its consequences, the Byelorussian Government made advances in the fields of education, culture, and social welfare. The Government was also able to achieve de jure and de facto recognition from a number of European countries.

However, the year 1918 sealed this small country's fate. In November and December of that year the Bolshevik army advanced into the young Republic and within a few months the Republic was ended.

These few months of freedom which the Byelorussian Republic enjoyed will remain important to those of the Byelorussian heritage and to all who cherish independence.

ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DERWINSKI. Mr. Speaker, tomorrow, Americans of Byelorussian descent will celebrate the 59th anniversary of the Proclamation of Independence of the Byelorussian Democratic Republic which took place in Minsk on March 25, 1918. Although this anniversary is of great significance for the citizens of Byelorussian origin in the United States and in other countries of the free world; in Byelorussia itself, this national observance of independence is replaced by the forcibly imposed observance of the Bolshevik revolution.

Despite the continuous oppression imposed upon them by the Russian Communist regime, the Byelorussians have, at every opportunity, sought freedom from Soviet Russian domination. At the end of World War II, the All-Byelorussian Congress again convened to approve a second proclamation of independence, but was immediately dispersed by the Soviet armies.

It is indeed an unfortunate development that the Byelorussian people, whose heritage is so rich in traditions of democracy, must now live under the oppressive rule of the Soviet Government. As we commemorate their independnce of 1918, we must also recognize and support the courage of the Byelorussian people who are still struggling to preserve their ethnic and cultural identity.

Now more than ever, when human, national, and religious rights are actively defended throughout the world, but are subject to flagrant violations that occur in Communist countries in Eastern Europe, including Byelorussia, this commemoration gains additional significance. Through this annual observance on behalf of the Byelorussian people, I trust that we can help reassure those people whose human rights and cultural heritage are held captive behind the Iron Curtain, that they will continue to receive our encouragement and support for their goal of self-determination.

QUESTIONNAIRE RESULTS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. OTTINGER. Mr. Speaker, in January of this year, as is my custom at the start of every session of the Congress, I sent out a questionnaire to every mailing address in my 24th Congressional District in Westchester County, N.Y.

I have received over 10,000 responses from my constituents, many with two respondents answering on one questionnaire. The following are the results of that questionnaire broken down into percentages:

QUESTIONNAIRE

[In percent]

	Favor	Oppose	Undecided
A. ECONOMY—DO YOU FAVOR OR OPPOSE?			
1. A general tax cut to help spur the economy?	75	16	9
2. Decreasing business taxes to stimulate the economy and generate jobs?	69	20	11
3. A Federal program to pay partial salaries to provide jobs in the private sector?	33	53	14
4. Creation of a permanent CCC-WPA type job program to act as employer of last resort?	55	31	14
5. Eliminating Federal programs for health, education, and welfare, and turning program and tax responsibility over to State and local governments?	28	59	13
6. Wage and price controls?	35	50	15
7. Price controls on key commodities like oil and steel?	55	33	12
8. Extending and improving antitrust laws to require competition in concentrated industries?	66	22	12
9. Legislation preventing any competition with AT & T for terminal telephone equipment (telephone instruments, answering service equipment, business switchboards, and other communications equipment)?	18	71	11
ENERGY—DO YOU FAVOR OR OPPOSE?			
1. National insulation standards for homes, offices and factories?	64	25	11
2. National conservation standards for autos, appliances and industry?	71	19	10
3. Tax incentives instead of standards to accomplish 1 and 2 above?	50	34	16
4. National program to promote solar heating for homes, offices, and factories?	78	11	11
5. National program for recycling newspapers, bottles, and other materials?	77	15	8
6. Requirement that utilities adopt lower base rates that increase with use and lower rates for off-peak hour use?	76	14	10
7. Moratorium on construction of new nuclear plants until plants and waste disposal are proven safe?	56	30	14
8. Giving higher priority to energy conservation and solar, wind, tidal, and geothermal energy research than to nuclear power research?	68	19	13
9. Legislation to require major oil companies to sell 1 or more of their production, refinery, distribution, or retail components?	37	39	24
10. Legislation to require major oil companies to sell 1 or more of their holdings in other energy fields like uranium, coal, and natural gas?	42	34	24
11. Increased Federal aid to mass transit?	54	38	8
C. WELFARE REFORM—DO YOU FAVOR OR OPPOSE?			
1. Federal take-over of costs?	63	29	9
2. Requirement that potential recipients who are able to work (except mothers of young children) be disqualified for welfare if jobs are available?	83	9	8
3. Negative income tax to replace welfare?	44	29	27
4. Family assistance allowance to replace welfare?	45	26	29
D. GOVERNMENT REFORM—DO YOU FAVOR OR OPPOSE?			
1. Public financing of congressional elections?	48	38	14
2. 4-yr term for House Members?	64	31	5
3. Abolishing the electoral college and instituting a system of direct popular election of the President and Vice President?	71	18	11
4. Providing for regional primaries to select delegates to Presidential nominating conventions?	57	20	23
E. MISCELLANEOUS—DO YOU FAVOR OR OPPOSE?			
1. National health insurance?	63	27	10
(a) Operated by Federal Government?	41	41	18
(b) Operated by private insurance companies?	42	39	19
2. Increased Federal aid to education?	48	32	20
3. Increased defense spending?	36	48	16
4. The reestablishment of trade with Vietnam in return for an accounting of our missing in action?	44	41	15
5. Constitutional amendment abolishing legal abortions except to save the life of the mother?	29	62	9
6. Federal registration of handguns and licensing of owners?	69	24	7
7. Disability benefits for pregnant women?	35	53	12

CIVIL ENERGY FROM LASER FUSION: A GROWING REALITY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. PURSELL. Mr. Speaker, this is my third installment regarding laser fusion. I am quite hopeful that laser fusion can help solve our burgeoning energy shortage. But the benefits of laser fusion do not inure solely for the purposes of energy production. The following document articulates in "laymenese" the principles and probable utilization of laser fusion. Having read this document, I believe you will begin to share my enthusiasm for laser fusion:

BASIC LASER FUSION PRINCIPLES

Laser driven fusion is conceptually a simple process. Unlike nuclear fission, where the nuclei of the heavy elements like uranium and plutonium are split apart to release energy, in fusion the light nuclei elements such as isotopes of hydrogen—most commonly deuterium and tritium—are fused together to release energy.

The essential step in the fusion process is to squeeze the molecules together very quickly raising the temperature and pressure high enough to cause the nuclei to combine. This has been likened to creating a small sun in the laboratory as it is under conditions similar to the interior of the sun that fusion occurs.

To achieve man-made fusion, a tiny pellet about 1/32 of an inch in diameter, and filled with the gaseous isotopes of hydrogen is illuminated by a high power laser beam for a fraction of a billionth of a second. The energy impinging on its surface so compresses the pellet that it is heated to millions of degrees while the inward force or implosion raises the pressures at the core to thousands of atmospheres; the combined action creates conditions which theory indicates will cause fusion to occur.

The process is difficult to achieve, control and measure. Extensive laboratory tests to date have shown excellent progress leading to the required conditions. While neither government nor industry labs have achieved man-made fusion, there is general agreement that it will be achieved, probably within 5 years and possibly within 2 years; all experiments confirm this to date. A major pacing factor is increased laser power; and advances in both laser availabilities and target-interaction knowledge are being made almost monthly.

When fusion occurs in the fuel pellet, the binding energies of the nuclei are released in the form of high energy neutrons, plus heat and some minor radiation energies. The reaction takes place in a suitable atmosphere contained in a reactor designed to transfer these radiating energies and convert them to useable power, or employ them to split the molecule of other elements (such as water) into useful products.

In a practical laser fusion operating system, the pellets would be injected into a shielded reactor at rates up to 50 per second, with the laser pulses synchronized to produce a steady outflow of radiation energies to be removed in a manner to give a continuous power output. Systems designs may vary widely in size from as small as 10 megawatts (MW) to 5000 MW. (For example: the largest nuclear fission utility plants in operation or under construction today range are about 1000 MW in size. The Delaware Delmarva Summit site plant will be in the 900–1200 MW range. There are no fission plants as small as 10 MW because it is not practical. Such a plant is equivalent to a 10,000 horsepower system. Our nuclear submarines use plants ranging in the 60–100 MW size).

Laser fusion is basically a benign process. It produces no radioactive wastes as do the nuclear fission plants. Thus there is no long term storage problem to be passed on to future generations or civilizations. The absence of the materials used in nuclear bombs removes the threat of terrorists actions.

Tritium, one of the hydrogen isotopes used as fuel in the process, is fusion's only potential pollutant. Studies show its potential hazards are about a million times less than fission's radioactive wastes. Gaseous tritium is easily trapped and handled by normal procedures within a plant. And since it is used in the cycle, there is every incentive to do so. In essence, it poses neither threat nor difficulty to safety or the cleanliness of any outputs from the process.

Laser fusion is safe and controllable, it cannot "explode" or run away as there is no critical mass. It is essentially environmentally clean as it does not contaminate either the air or water used in the supporting systems.*

The laser fusion process is an inexhaustible source of energy as the hydrogen fuel isotopes used for the fuel pellets are derived from seawater or generated internally during the process. Thus it depletes no natural resources and it truly qualifies as a prime candidate for providing the U.S. with "Energy Independence".

Applications will be described in subsequent sections in order of their likelihood of coming into practical usage on a chronological basis.

APPLICATION NO. 1—CANCER RADIATION THERAPY

The earliest near term application to which laser fusion might be used is in the medical arena. There is some medical evidence and theory both here and abroad that fast neutrons produced by the laser fusion process may destroy certain types of cancer cells.

Preliminary tests at the Hammersmith Hospital in London, which started in 1969 and by the Harvard Medical School, Department of Radiation Therapy, indicate that a controllable source of fast neutrons provide benefits in certain cancer treatments superior to that obtainable at the present time by the 3 treatment methods of surgery, radiotherapy (X-ray or cobalt) or chemotherapy.

Neutron irradiation techniques require dosages that are precisely controllable, economically producible, and rapidly repetitive. The main reason why little use has been made of fast neutron beams has been the expense and difficulty of generating the neutrons. Laser fusion promises such an output. An important feature of current laser fusion research work is that the achievement of thermonuclear fusion is not required to initiate immediate specimen testing for cancer treatments; it can be started at the low level of neutron production available today and could be put in experimental practice sometime thereafter even if complete laser fusion for energy production is not reached.

KMSF and Harvard Medical School have initiated informal discussions aiming at early specimen testing in conjunction with the current scientific test experiments on a non-interference basis. There is a need for a better laser and improved optics, both of which are available but which ERDA has not yet seen fit to support.

This potentially promising non-energy application grew out of the commercial orientation that KMSF gave its program from its early start. It demonstrates graphically the unpredictable benefits that an unencumbered industry effort can generate.

*From an independent Environmental Impact Study done on 2/22/76 by G. Hoyt Whipple and John R. Trabalka.

APPLICATION NO. 2—THE FIRST ENERGY USE

The major thrust of the KMSF commercial effort is to produce hydrogen for conversion to methane as a substitute for the rapidly depleting supply of natural gas. The KMS program, under contract from Texas Gas Transmission Co. has evolved a process, both laboratory proven and patented, which uses the laser fusion process to split (dissociate) the water molecule H_2O into hydrogen and oxygen. Thus it provides an inexhaustible supply of the most abundant and basic element, in nature, i.e., hydrogen, from ordinary water.

All liquid and gaseous fuels are primarily a combination of hydrogen and carbon. Any synthetic fuel program requires abundant and low cost hydrogen. Carbon is available in virtually unlimited quantities from limestone and coal. The production of methane—a combination of hydrogen and carbon—was selected in response to the foreseen shortage of natural gas by TGT. This severe winter has well substantiated the projected shortage that lie ahead for the U.S. in the current energy environment. Methane (synthetic natural gas) can be the first available energy supply quantity-produced from laser fusion if an aggressive program is undertaken.

While KMSF in 1975 projected a schedule of events and financial support that had a hydrogen-methane pilot plant goal in 1981, this with joint industrial and U.S. Government financing; no such program has been aggressively pursued for a variety of reasons. Today, almost 3 years later, the U.S. still lacks a coherent energy plan, there is still uncertainty, bureaucratic jealousies, indecisiveness, and a complete lack of dynamic leadership to direct the type of accelerated program that all scientific, technical, financial, and political evidence demands.

Today, with U.S. annual petroleum import costs of over 30 billion dollars and rising 10–15% annually, we still dicker and quibble about a 100 million dollar program that might, just might, save the U.S. and provide real energy independence.

APPLICATION NO. 3—USES FOR HYDROGEN

Beyond the production of methane, abundant and low cost hydrogen from the inexhaustible sources of water could benefit many other energy and energy-intensive processes. For example, transportation fuels for ground vehicles, air and sea vehicles are all hydrogen carbon combinations which current day technology can produce synthetically. Transportation fuels today use about 50% of each barrel of crude petroleum produced and imported by the United States—it is the single biggest liquid fuel requirement.

The U.S. has long considered various transportation fuel alternatives: methanol, synthetic gasoline or jet fuel, combinations of synthetics and gasoline, alcohols, etc. All require an abundant low cost source of hydrogen. Technology now promises that capability could soon be at hand.

A beneficial spin-off for the nation's anti-pollution struggle would derive from wide scale production and common usage of synthetic transportation fuels. Such fuels would not contain contaminants like sulfur, tetraethyl lead, bromines and dyes routinely used in gasoline. Thus, atmosphere would be freed of the sulphuric oxides and lead poisons commonly found in vehicular exhausts today.

In many of the current "under-development" energy projects such as: coal gasification, coal liquefaction, the several variations for hydrogenation of coal, reduction of shale both above ground or in situ, the Consol Synthetic Fuel Process, and others; an essential and often limiting element is hydrogen. With that same abundant and low cost availability of hydrogen mentioned earlier many of the other buried energy sources may be brought to productive fruition. The significance of available hydrogen

cannot be over-emphasized as it can make available trillions of BTU's that would otherwise be buried forever.

For the very critical and highly specialized field of petrochemicals, i.e., that which manufactures an almost infinite variety of plastics, synthetics, drugs and other man-made hydrocarbons upon which our society depends so heavily, hydrogen is the basic feedstock element and its continued availability assures the healthy growth of the petrochemical industry independent of depleting petroleum feedstocks.

APPLICATION NO. 4—FERTILIZERS AND FOOD

The world's food problem is very well appreciated by government personnel of all nations. The shortages are certainly felt by at least two billion of this earth's four billion population—these multitudes face it every day. We recognize there is no single answer to solve this ever present threat of mass starvation and famine. However, one important element of increasing the world's food production is recognized to be related to the ability to provide better, cheaper and abundant quantities of fertilizers. In the United States liquid fertilizers are frequently used because our distribution and handling methods are rather advanced. In most areas of the world dry fertilizers must be used because of ineffective distribution, storage and handling systems.

Nitrogen is a major constituent element of life essential for the construction of proteins. It is also a major component of air (79% being N). The natural supply of N is limited and it limits the world's agricultural capacity. Supplemental N is provided by chemical fertilizers in which nitrogen (N) is fixed by combination with hydrogen to form ammonia. In 1972 14 million tons of ammonia were made in the U.S.; and production is doubling every 5 years.[1]

The Haber Process is the main method used to produce ammonia; it is efficient and effective. Any reductions in the cost of fixed N depend almost exclusively in the supply of raw materials needed for fixation. Hydrogen not only provides the energy for the Haber process; it also determines its cost.[1]

A substantial reduction in fixed nitrogen prices would have extraordinary worldwide agricultural consequences. Current limitations are not imposed by technologies, but are dependent upon investigations that could lead to potential sources of less expensive hydrogen.[1]

It is thus apparent and obvious that an abundance of low cost hydrogen which laser fusion can provide may assure the world of an inexhaustive supply of fertilizer.

APPLICATION NO. 5—NATIONAL DEFENSE APPLICATION

While the Department of Defense is relatively a small user of the total national energy pie—varying somewhat between 2.5 to 8%—it is obviously a vital element for national security as without fuel any military machine comes to a quick grinding halt. The availability of hydrogen as mentioned previously may assure a stable and totally independent synthetic fuel industry upon which the military may depend for its navy petroleum fuels, its air vehicle aviation gasoline and jet fuels, its ground vehicle diesel or common gasoline and its installations heating and power fuels.

Another facet of great concern to the military is the logistics or "life line" problem of providing fuels to remote bases and fleets at sea. The laser fusion process which could provide hydrogen from water would assure any remote base of the capability of producing on site synthetic fuels. This would depend on carbon being available, but carbon is distributed in vast quantities throughout the world both in coal and limestone.

[1] Data from Scientific American.

An additional feature that seems to be of particular interest to the Navy is the concept that floating hydrogen processing plants within tanker sized vessels or aircraft carriers can be envisioned, which systems would make hydrogen from seawater and provide this gaseous fuel to accompanying naval combatant ships, many of which use gas turbines for propulsion and which are capable of using gaseous hydrogen as a fuel. It is an intriguing concept because it promises the Navy a capability to make a fuel from the water upon which they float.

The KMSF program has also evolved a concept for a closed loop nuclear fusion power system to produce shaft horsepower which might provide in essence unlimited range for naval ships, possibly very large aircraft, and be useful as transportable power stations for the military forces.

APPLICATION NO. 6—OVERALL COMPATIBILITY

While the KMSF project has as its major goal the production of hydrogen for methane conversion, it should be realized that a successful laser fusion process could subsequently be adapted to provide electricity by any of several downstream cycles. It is anticipated, however, that the heavy emphasis being placed by the Government on research in the utilization of Solar energy will come to fruition in the near term future.

All energy technologists are aware of the limitless solar energy that shines on the earth endlessly and hopes that technology will soon find answers to the critical questions of efficient conversion, cost of conversion energy and storage, and transmission which have prevented widespread acceptance of solar energy in most areas of the U.S. and the world.

Solar energy and its cost effective conversion to electricity will assure independence from fossil fuels as prime energy sources for electric generating plants. It does not provide any capability, however, for use as liquid or gaseous fuels upon which most civilized societies depend for transportation vehicles.

Thus we see in solar and laser fusion programs a complementary and gratifying energy mix that can satisfy virtually all requirements: the former as an inexhaustible and environmentally clean source of electricity; and the latter as another inexhaustible and equally clean source of the liquid and gaseous fuels for transportation, heating and combustion systems.

The above conclusions do not imply that the U.S. can today shrug off conservation, or deplete too hastily and unwisely our remaining natural fossil resources. No system or systems, be they solar or laser fusion, can be introduced into the public marketplace at an unreasonably accelerated pace, despite any emergency or need. Therefore, we would be well advised to recognize the realities of life in our expectations, while simultaneously accepting the technological and administrative challenges of program implementation decisively, boldly and promptly.

CONGRESSIONAL SALARY INCREASES

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. ASHLEY. Mr. Speaker, I am pleased to be offering legislation along with a number of my colleagues that will unravel the tangled web of procedure that has grown up around the question of congressional salary increases. I speak of H.R. 4504, which will reduce the role of the Quadrennial Presidential Commission to an advisory one only, and will eliminate the automatic aspect of congressional cost-of-living increases. The net effect of this bill will be to place the onus for congressional salary increases precisely where it belongs—with the Members.

Many of you will recall that this mirrors my express views at the time Congress was considering the propriety of the recent pay increases. With the submission of this bill, I underscore the disapproval I then expressed over method in my testimony before the Subcommittee on Presidential Pay Recommendations. Moreover, it begins to make good on my pledge at the time of consideration of the resolution on financial ethics that I would assume a leadership role in attempting to restore accountability to the matter of Federal salaries. The American people demand accountability and responsibility on this issue. The flood of mail we have all received in the past several weeks gives eloquent testimony to that fact. Some of this correspondence, it is true, has protested the raise per se. Much of it, however, has articulated the public's outrage over the indirect, devious method in which the raise became law. Congress has been perceived, and correctly so I believe, as ducking its responsibility on this issue.

To retain such an indirect method, however, offends more than public conscience. In my view it is also violative of at least the spirit of article 1, section 6 of the U.S. Constitution, which mandates that—

> Senators and Representatives shall receive a compensation for their services to be ascertained by law . . .

I submit that the phrase "by law" was not an invitation to congressional inventiveness nor imagination in devising a method for increase. Rather it contemplated forthright congressional action. Congress and Congressmen are not honored nor are their reputations enhanced when they succeed with such a subterfuge; clearly the American people have not been deluded.

Moreover, we now have proof that the indirectness and deviousness of the current method precludes a meaningful dialog as to the justifiability of the raises themselves. In the recent controversy, for example, the talent drain being experienced by the Federal judiciary was a problem that begged for reasoned attention and cure, yet it was obscured by the transcendent furor over methodology. As a matter of fact, that Congress had not had a pay raise in eight years—a period of escalating prices—was a matter worthy of measured debate and thoughtful, recorded votes. It is at least possible that a majority of Americans would have favored a modest salary increase, had the issues been discussed against a background of accountability.

This bill will insure such accountability and it will insure a reasoned presentation of the issues in any future salary debate. Due consideration will be given the opinions of the Quadrennial Commission, but their findings will not have the force of law through congressional inaction. Direct congressional action will be required for a pay raise, or

for periodic cost-of-living increases. The public's right to know will be honored.

The passage of the resolution on financial ethics was a significant first step in the arduous process of restoring public confidence in Congress. I urge passage of this bill as a meaningful second step.

REPRESENTATIVE GEPHARDT DISCUSSES SCHOOL LUNCH PROGRAM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. SIMON. Mr. Speaker, many of us in the House have been most impressed by our new colleague from Missouri, Congessman RICHARD GEPHARDT.

The other dav I was attending a meeting of our Subcommittee on Elementary and Secondary Education chaired by Congressman CARL PERKINS when Mr. GEPHARDT came and presented his testimony.

It was the kind of solid, constructive discussion of issues that we have learned to expect from him in the few weeks that he has been a Member of this body.

I think many of my colleagues who were not present to hear his contribution would be interested in his testimony.

TESTIMONY BY RICHARD A. GEPHARDT

Mr. Chairman. I appreciate this opportunity to come before the Committee to discuss commodity distribution under the School Lunch Program.

In the two months since I entered the Congress, school officials in my district, which includes parts of St. Louis and St. Louis County, have told me some alarming stories about their experience with commodity distribution. I am concerned that if the present situation is allowed to continue, it will cripple a program which has been so valuable in making sure the children of our country get the nutrition they need for their health and education.

I would like to relate for you some of these stories because they reveal problems that ought to be addressed by the Congress as we debate legislation to extend the National School Lunch Act.

Most widespread are reports of massive inventories of some products which it seems could never be exhausted without spoilage or waste. For example, the Rockwood School District in St. Louis County, which serves about 4,500 lunches a day, has a 2½ year supply of peanut butter and a 2 year supply of orange juice. Another district in the County has on hand 153 cases of cranberries, a notoriously unpopular item which can be served in very few ways. A third district reports an inventory of over 6,200 pounds of margarine, which may not seem unreasonable considering the wide variety of uses for the item. But the same district also has on hand almost 1,300 pounds of butter and another 1,700 pounds of peanut shortening. The result has been that since peanut shortening has an undesirable flavor for use in cooking and baking, it is often melted and poured down the drain.

In addition, some school districts have reported massive quantities of ground beef, forcing them to serve it three, four and even five times a week. The Special School District in the St. Louis area, for example, reported one weekly menu as follows:

Monday—Barbecued beef on bun.
Tuesday—Cheeseburgers.
Wednesday—Spaghetti with meat sauce.
Thursday—Meatloaf.
Friday—Chili.

One of the smaller districts in St. Louis County has on hand 12,155 pounds of ground beef. According to the State's allocation rates, that is twice the amount appropriate for the district, and more shipments are due this month.

Other reports demonstrate that commodities are often unsuitable for many schools. There is little use for some commodities, like peanut granules which have been distributed in large quantities this year. Schools can use them for little more than topping on some baked goods; and one school superintendent said that they usually end up as ammunition in pea-shooters.

Other schools have received oil but have no facilities for deep-frying. Rather than waste the product, they rig up some system for cooking in the sink.

Furthermore, the packaging of commodities is often inappropriate. Packages are either too large, like a 70-pound block of butter, half of which becomes spoiled before the whole block has softened enough to be used; or some are too small, like the 12-pound turkeys that were distributed last year requiring much time and expense on processing before they could be served in the large quantities required in a school cafeteria.

Committee members are familiar with the General Accounting Office report issued in January which found the stories I have heard in St. Louis to be typical of the experience with school lunch programs throughout the country. The large inventories, the lack of variety and the unsuitability of commodities raise costs for the district and encourage waste by school kitchen staffs and children alike. Storage of large inventories alone can raise costs for a single school district by as much as $150 a month, particularly if commercial freezers have to be used. One school system in my district is finding it necessary to build additional freezers and warehouses because commercial storage facilities are too far away to provide convenient storage and timely deliveries.

In contrast to the operation of the School Lunch Program in my home state of Missouri and elsewhere is the experience in Kansas, where cash in lieu of commodity assistance for school lunches has proved to be advantageous. You are familiar with the findings of the GAO study there, where most school officials reported they could buy more food with cash than they received under the commodity program. They have been able to serve a wider variety of food, making the menus more desirable and cutting down on plate waste. Furthermore, the purchases have been better suited to their needs and facilities, thereby lowering storage and processing costs.

Officials of the Kansas City, Kansas school district reported a total annual savings of over $26,000 since cash assistance replaced commodity donations for school lunches. A suburban district, Shawnee Mission, has saved $42,000 per year in freight, storage and delivery costs since the cash program was implemented.

The Subcommittee may be familiar with a study underway at Kansas State University comparing the cash system in Kansas with the commodity system in Oklahoma. Preliminary findings show administrative costs for the Kansas school lunch program are one-quarter those for Oklahoma.

In my view, the findings of the Kansas State and the GAO studies, as well as the many problems which have come to light about commodity assistance, warrant more careful and constructive action than a simple five-year extension of the School Lunch Program as it presently operates. Cash in lieu of commodity assistance deserves more complete analysis to determine whether it would impair the quality of nutrition provided children under the program, whether it fosters economy and efficiency in the program in all school districts or only those in urban areas, and whether it would damage our agricultural programs which are designed to assure just and adequate incomes for farmers through price supports and surplus removal.

It would also be beneficial to test the feasibility of some combination of cash and commodities, perhaps giving school districts the option of accepting the type of assistance they prefer, or providing cash in lieu of commodities to schools in urban areas while continuing food assistance in rural areas where food purchasing costs tend to be higher.

Finally, some of the administrative recommendations of the Comptroller General should be implemented and evaluated to determine if any statutory changes are needed at all or if the problems I have described this morning can be solved without Congressional action.

I therefore urge the Committee to extend the School Lunch Program for only a short period—say one or two years—during which time a number of pilot projects can be carried out to answer these questions.

The National School Lunch Program has made an outstanding contribution in promoting adequate nutrition for the children of this country. To continue the benefits of the program, it is important that we in the Congress make sure it is operated in a manner that will maximize those benefits while minimizing the costs. The evidence shows that the present administration of commodity assistance for school lunches, in many respects, incurs unnecessary costs for both the government and school districts while lowering nutritional benefits by fostering plate waste. The types of controlled experiments I have suggested can help us find the changes most appropriate for realizing the full potential of the School Lunch Program.

TERRORISM: CHRISTIAN SCIENCE MONITOR OVERVIEW

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. McDONALD. Mr. Speaker, Christian Science Monitor staff correspondent David Anable has writen two carefully documented and much needed articles outlining the problem of international terrorism.

Mr. Anable makes the point that the international terrorist organizations are able to operate because they are supported by the resources of foreign governments. These resources include training in sabotage, political indoctrination, organization, supplies of modern automatic weapons, money, and false identity papers and passports. In every case, the international terrorist groups and many local ones have been aided either by the Soviet Union directly, or through its satellites and allies which serve as "cut-outs" or surrogates such as East Germany, Cuba, Czechoslovakia, Bulgaria, Algeria, Libya, Yemen, Iraq, and North Korea.

I take exception to his definitions of terrorism, however, as being confused. Communist literature, as well as pronouncements by certain Western "experts" on terrorism, argues that terrorism cannot be condemned because "one man's

terrorist is another's freedom fighter for national liberation." To replace this morally bankrupt "pop wisdom" I have offered the following definition of terrorism:

Terrorism: A violent attack on a non-combatant segment of the community, for the purpose of intimidation to achieve a political or military objective.

Terrorism is not guerrilla warfare. When ZANU forces attack a Rhodesian army unit that is not terrorism. But when ZANU slaughters innocent villagers and missionaries to demoralize the population that is terrorism. When the PLO attacks an Israeli Army unit that is not terrorism. But when they place land mines in the roads and destroy civilian buses or throw little children out the windows of captured buildings or machinegun tourists in an airport, that is terrorism. In World War II both the Nazi and Communist armies took civilian hostages and in some cases murdered them to intimidate the rest of the population. This was terrorism. Anti-Nazi partisan irregulars who targeted only Nazi army targets were not commiting terrorism.

Civilized nations have the duty to protect noncombatants from the horrors of war. And even when legitimate military attacks result in civilian deaths inadvertently, the attacker has the responsibility to minimize the effects on civilians.

International terrorism, properly, refers to terrorist actions carried out across the national boundaries of the terrorists' home country. International terrorism includes PLO members crossing from East Germany into West Berlin armed with hand grenades—they were arrested by the West Germans—hijackings of airplanes from one country to another, and so forth. Transnational terrorism involves attacks by a group in one country on behalf of an allied terrorist group in another country. Transnational terrorism has included attacks on Jews in Great Britain by the IRA on behalf of the Palestine Liberation Organization; bombings by the Weather Underground in support of the Puerto Rican revolutionary movement; and similar "solidarity" terrorism.

I commend the articles to the attention of my colleagues:

TERRORISM

(By David Anable)

Dec. 20, 1973. In the chilly predawn, agents of the DST, France's security service, burst into a villa in a suburb of Paris and arrested 10 members of the Turkish Peoples Liberation Army (TPLA). Among weapons found: American M-26 grenades.

Sept. 13, 1974. Three Japanese terrorists stormed into the French Embassy in The Hague, seized 11 hostages, and demanded that France release a Japanese Red Army (JRA) courier arrested at Paris's Orly Airport two months earlier. Four tense days later all four JRA members are flown to Damascus, Syria. They leave behind: M-26 grenades.

Sept. 15, 1974. An explosion tears through a crowd in "Le Drugstore," a Jewish-owned complex of shops on the Left Bank in Paris. Two people are killed, more than 30 injured. The weapon: an M-26 grenade.

June 17, 1975. Three DST officers with a Lebanese informer enter a Paris apartment on the Rue Toullier to arrest Venezuelan-born Ilich Ramfrez Sánchez, better known today by his pseudonym, Carlos Martínez. But Carlos shoots his way out, killing the informer, two DST agents, and gravely wounding the third. Left behind by Carlos in Paris and London: M-26 grenades.

The trail of the M-26 grenades is only one of many indicators of a growing international web of terrorist cooperation. Western intelligence experts see it not so much as an all-embracing conspiracy with a single sinister figure or nation lurking at its center. Rather, they view it as a series of interconnecting supply lines of funds, documents, and weapons that feed a great variety of terrorist or "liberation" causes. Perhaps most significant of all is a noticeable trend toward joint operations.

Such linkages provide an infusion of vital supplies, a boost for terrorist morale, and a greater ability to evade or penetrate purely national defenses. They are an ominously spreading part of what is becoming known as "transnational terrorism." In the words of a research study on terrorism drawn up last year by the United States Central Intelligence Agency (CIA):

"The trend toward greater international contact and cooperation among terrorist groups that has already markedly enhanced the operational capabilities of some of the organizations involved seems likely to gain further momentum."

LOD AIRPORT RAID

An early example of such cooperation was the 1972 attack by three members of the Japanese Red Army on Israel's Lod Airport in which 26 people were killed. The Japanese fanatics had been trained at a camp in Lebanon run by one of the extreme groups that reject compromise with Israel—the Popular Front for the Liberation of Palestine (PFLP). They got Czechoslovak weapons in Rome, picked up false papers in Frankfurt, West Germany, and descended on Israel in a French plane in the guise of innocent Japanese tourists.

Since then, the inter-group links have become more pervasive. And, under the guidance of Carlos and his immediate boss, Waddieh Haddad, the PFLP has been the most skillful in forging and using these ties.

It was Carlos, for instance, who got hold of a batch of those M-26 grenades stolen by members of the Baader-Meinhof gang from a U.S. Army base in West Germany. He appears to have doled them out as occasion demanded to Turkish, Palestinian, and Japanese terrorists. At the same time, he was carefully assembling his own international network which continues to operate long after his narrow and violent escape from the Rue Toullier.

It was this Carlos-Haddad network that under Carlos's personal command kidnapped astounded oil ministers from the Vienna meeting of OPEC (Organization of Petroleum Exporting Countries) in December, 1975. The same network carried out the hijack of the Air France jetliner to Entebble, Uganda, last year. Then, last August in retaliation for the Israeli rescue of the Entebbe hostages, members of the same group blew up a transit lounge in the Istambul airport, killing four people who were waiting for an El Al plane (including an aide to Sen. Jacob Javits (R) of New York).

Waddieh Haddad now is thought to be based in Baghdad, Iraq—reportedly seeking safety from a "contract" put out for his life by a more moderate guerrilla group. Carlos, together with his faithful retainer. Hans Joachim Klein, visited Haddad last fall. Carlos and Klein, a West German anarchist who was almost fatally wounded in the OPEC raid, traveled from Libya via Algiers and Belgrade to Baghdad. Both were back "at home" in Libya by a year's end.

Such travels make Western security men edgy. The have to be constantly braced for new spectaculars. Nor do they lightly dismiss Carlos's boast that he controls some 40 seasoned professionals. "Violence," Carlos has said, "is the only language the Western democracies understand."

But the PFLP is far from being the only example of the terrorists' international skein. The linkages vary from innumerable shadowy gatherings of terrorist, leftist, rightist, and nationalist clans to a system of essential supplies that the CIA study describes as a "European-based terrorist 'service industry.'"

One Europe-wide meeting in 1974, for instance, brought together in Trieste a score of separatist and terrorist emissaries, a motley crew of militant Basques and Irish, Croats and Bretons, Welsh and Catalans, and many others.

On the other side of the Atlantic a gathering in Buenos Aires the same year saw four Latin-American underground groups from Chile, Bolivia, Uruguay, and Argentina set up a "junta for revolutionary coordination." A follow-up meeting in Lisbon a year later cemented the pact and brought in Paraguayans, Dominicans, Colombians, and Venezuelans.

Meanwhile, money has flowed between revolutionaries and terrorists in extaordinary volume. Argentina's groups, for instance, have collected well over $200 million over the past three years, mainly from ransoms for kidnapped local and foreign businessmen. Some of the cash has spilled from the overflowing coffers into other revolutionary groups. More than $2 million has been traced to Europe, spent by leftists who fled Chile after the fall of Salvador Allende Grossens in 1973.

LIBYA, IRAQ BACKING

The extreme Palestinian groups, including Carlos and the PFLP, have liberal backing from Libya and Iraq.

The factions of the Irish Republican Army have different arrangements. The Marxist "official" IRA reaches out to Eastern Europe. The supernationalist "provisionals" supplement their local sources of funds (bank robberies, rackets, and extortion) with dollar-raising in, and arms smuggling from, the U.S. And, on the other extreme, Northern Ireland's Protestant "loyalists" seek support and weaponry from Canada.

Training, too, has become international in scope. During the 1970s the Palestinians camps in the Mideast have seen as disparate a bunch of trainees as can be imagined. Black Panthers and Weathermen from the U.S. once struggled over the assault courses. So have West Germans, Irishmen, Latin Americans, Scandinavians, Italians, Turks, Iranians, Eritreans, and many others.

When Lebanese Christians finally smashed their way into the Palestinians' Tel Zatar camp last July, among those surrendering was a member of the Japanese Red Army.

It is a moot point as to how many of these trainees have ended up as guerrilla fighters or terrorists. Certainly many have—from the three Japanese who seized the French Embassy in The Hague in 1974, to the two members of the Dutch "Red Help" group arrested last year while reconnoitering Tel Aviv and Bombay for a planned hijack of an Air France flight from Bombay to Israel to Paris.

TRAINING IN SOUTH YEMEN

These Japanese and Dutchmen were trained in the PFLP's camp in South Yemen. And it is the PFLP that the Iranian Government accuses of providing Iranian revolutionaries with training and arms.

The IRA provisionals, although one of the most active groups in the world (more than 5,000 bombings and 25,000 shooting incidents since 1969), have not set up a network like the PFLP's. But the "provos" have forged loose links with other groups, notably the Basque separatist "ETA." They are said to exchange tips with ETA members on obtaining and using weapons and explosives. In 1975 Belgian police cracked an arms-smuggling ring that had supplied guns and

bomb materials to both the IRA and ETA as well as to the Palestinians.

One of the dangers of a spreading supply network is that dissident nationalists or terrorists could more easily be able to obtain sophisticated equipment. Rocket-launchers, for example, have been used on a number of occasions by the PFLP in attacks on airliners at Orly Airport (using American rockets stolen from U.S. bases in West Germany) and by the IRA against British military outposts (using Soviet equipment, probably a gift from Libya's Col. Muammar al-Qaddafi).

Still more ominous has been the appearance of the Soviet-built heat-seeking missile, the SA-7 or "Strela." This portable weapon is capable of hitting aircraft at ranges of up to several miles. In its first attempted use PFLP members were arrested in possession of Strelas near the Rome airport in 1973.

In January last year another Strela attempt was planned, this time on an El Al airliner coming in to land at Nairobi, Kenya. Three PFLP terrorists (two of them had been involved in one of the Orly Airport rocket attacks a year earlier) were arrested at the Nairobi airport perimeter fence just as they prepared to fire the missiles.

Although the potential clearly exists for such weapons (and even more devastating ones) to circulate on a terrorist supply network, in both these cases they are thought to have come from Arab governments—probably via Libya and, in the Nairobi incident and thereafter, via Uganda's President Idi Amin.

But when it comes to phony documents there is amply evidence of a central supply system. Often during the '70s examination of captured terrorists' papers, such as passports, visas, and driving licenses, has indicated a single source. The Israelis refer to what they call a "sophisticated workshop" which they charge is run by the PFLP.

Palestinians, West Germans, Japanese, and even Carlos all have traveled on these papers. The Japanese-Palestinian quartet that attacked a Shell Oil refinery in Singapore in 1974 carried a selection. So did the Japanese pair who were caught photographing embassy buildings in Stockholm shortly before six West German terrorists attacked their country's embassy there in 1975 and unsuccessfully demanded the release of Andreas Baader, Ulrike Meinhof, and 21 other West German anarchists.

Most recently, when the Baader-Meinhof gang's weapons specialist, Rolf Pohle, was arrested in Athens last July, he was using papers from the same nest of forgers. To complete the circle, it was probably Pohle who first organized the Baader-Meinhof raids on U.S. Army bases in West Germany that netted the much-spread-around consignment of M-26 grenades.

And it was the Greeks who were among the most edgy when Carlos suddenly turned up in neighboring Yugoslavia en route to Baghdad last September. They were anxious lest Carlos try to spring Pohle from his Greek cell. However, Carlos moved on; and Pohle was extradited back to jail in West Germany . . . 20 months after he and four companions had been released to South Yeman in exchange for kidnapped West Berlin politician Peter Lorenz.

TERRORISM PLAYED DOWN

Western officials tend to play down the extent of the terrorist network. "There is no central conspiracy, no central body of terrorists operating worldwide," says one American official. "Rather there is a loose-fitting collection of groups, coalescing, splintering, reforming in certain areas and at certain times."

Clearly, too, the terrorists themselves are keen to emphasize their links with each other so as to add propaganda impact to their violence. Hence it is necessary to avoid any exaggeration of their capabilities. Says one leading antiterrorist expert, Hans Josef Horchem, chief of the Office for the Protection of the Constitution in Hamburg:

"Terrorism is overestimated in its threat to society, to democracy. . . . More people are killed by dog bite in the world than by terrorism."

Such experts go on to point out that the number of terrorist incidents has declined over the past couple of years, perhaps partly because of the Palestinians' preoccupation with the Lebanese civil war. Also, they add, while most of these groups in the long run have little in common and frequently are split by raging internal feuds, the cooperation among Western security services has increased.

But it is equally clear that contacts, cooperation, and joint operations among terrorist groups are becoming more common, providing them with new opportunities to exploit the weaknesses of free societies. Meanwhile, say Western officials, reports are continuously coming in of new terrorist operations being planned. In the words of the CIA study:

"All told, transnational terrorism promises to pose a continuing and potentially gravely unsettling problem for the world community until such time—possibly years hence—that the international system gets into new and generally accepted contours."

IS CUBA REALLY OPEN?

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DERWINSKI. Mr. Speaker, Alex Seith, the noted observer of the international scene, comments on the recent developments involving our relations with Cuba. It is my understanding that the United States is now entering formal negotiations with the Government of Cuba, and Mr. Seith's editorial of March 20, appearing in Star Tribune Publications of Cook County, Ill., sheds some light on the politics involved in the negotiations:

IS CUBA REALLY OPEN?

(By Alex R. Seith)

So now you can go to Cuba? So what? When President Carter announced that he would abolish the 16-year prohibition on travel to our Communist neighbor in the Caribbean, there was no loud rejoicing. There wasn't much complaining either. In fact, hardly anyone, whether politician, press or public, seems much concerned.

Yet there is more to the President's proclamation than has immediately caught the public's attention. The next day I decided to try booking reservations to Cuba. A quick analysis made me realize that no U.S.-based airline would be of any help. Pan Am, TWA, Eastern and other airlines which once had daily service to Havana, have not flown that route for 16 years.

But what about the Canadians? Air Canada must have regular flights to Havana because our anti-Communist neighbor to the north never chose to follow our lead in breaking diplomatic relations with Fidel Castro's regime. So I called the Air Canada office in Chicago.

"Do you have space on your flight on April 9 from Toronto to Havana," I asked routinely. Recognizing my obvious American accent, the booking agent immediately asked,

"Are you an American?"

"Yes."

"Then you can't go to Cuba," she declared.

"But," I answered, "the President just abolished the ban."

Coolly, the agent responded, "I'll check with my supervisor." Within moments she returned to the line in an excited tone. Her cool was gone. After years of telling callers that Americans could not go to Cuba, the thought of flying to Havana was exhilarating. She, too, was American.

When the excitement subsided, we reviewed the practicalities of booking room space and finding a way to travel around the island. It seems that Cuba's Communists have learned well from their Communist mentors in Moscow. All travel in Cuba is tightly controlled by Cubatur, a government agency modeled after the Soviet Intourist. Without clearance from Intourist, a Westerner cannot even get a plane reservation to the Soviet Union. Since Cubatur does not control Air Canada, you can get the reservation, but you can't go anywhere in Cuba without Cubatur's approval.

Confronted with the Cubatur obstacle, the still-excited booking agent offered to be especially helpful. She would call Toronto and Montreal to seek a way to arrange rooms and travel within Cuba. An hour later she called back with bad news. Individual travel to Cuba is not welcomed by Cubatur. You might land at Havana airport and be told there is no room space. Or be given the shabbiest room at the highest prices with the phony excuse that nothing else is available.

A group trip is possible, the agent explained, but there are conditions imposed by Cubatur. You must stay at a hotel of its choice. You must pay in advance for all three meals each day at its chosen hotel. But, I protested to the agent, my purpose is to see all of Cuba, not to be stuck in a single hotel. It is impossible to go far in the few hours between one meal and the next.

With this set of obstacles already diminishing the prospects of an early visit to Cuba, a quick call to Washington revealed still more obstacles. Since Cuba has no embassy in the U.S., its affairs in Washington are handled by the embassy of Czechoslovakia. Visas to Cuba are no simple matter, the embassy explained. A prospective visitor should send a request by mail and expect a wait of three to four months.

A three-four month delay seemed unnecessary. Communist Czechoslovakia issues its own visas within one or two weeks. The vague answer: Cuban visas require "additional processing." Translated, this probably means that visa requests are either sent to, or cleared with, some agency in Havana.

Since a three-month delay would wreck my chances for a trip to Havana in early April, I asked if there were not some expedited procedure. The reply: Send us a letter.

This futile go-around brought me back to the question first asked by the Air Canada agent, "Are you American?" I'm always proud to say "yes." But for 16 years a "yes" answer meant a closed door to Cuba; a door that was closed by our own government. Jimmy Carter, having criticized Communists in Russia and Czechoslovakia for denying their citizens the right to travel, saw the inconsistency of prohibiting Americans from traveling to Cuba.

By lifting the ban, the President also lifted a veil. Behind the mystery of Cuba's 16-year inaccessability is a Communist country made in Moscow's mold.

THE CARRYOVER BASIS PROVISIONS OF THE TAX REFORM ACT OF 1976

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. CONABLE. Mr. Speaker, during the past 10 days I have placed various materials in the RECORD intended to bring to the attention of the Members some of the problems associated with the carryover basis provisions of the Tax Reform Act of 1976. In this connection, on March 17 an item appeared in the Tax Coordinator Weekly Alert, published by the Research Institute of America, Inc., which is worthy of careful consideration. The item follows:

ESTATE CARRYOVER BASIS RAISES MORE PROBLEMS

The '76 Tax Reform Act with its requirements for carryover of a decedent's basis raises new will and estate tax problems. The reason is that a new factor, income taxes, has been added to what was formerly solely an estate tax problem. Prior to '77, since all property left by a decedent had a basis equal to its value at death, there was rarely an income tax problem since there would generally be no gain or loss realized by disposing of any property. But now because of the basis carryover, the income tax can be an important factor. While the "fresh start" (Dec. 31, '76) value will cushion the effect somewhat, it will be less and less a factor as time goes on because the formula method for determining the Dec. 31, '76 value of property other than marketable securities will generally reduce the Dec. 31, '76 value as time goes on (unless the date of death value keeps increasing). And property acquired after '76 will be unaffected by the "fresh start" rule.

The basis carryover raises these problems:

An executor who disposes of property in order to pay estate taxes, expenses, bequests, etc., must take into consideration the possible income tax on the property sold. If he sells high basis property and the estate has no gain, he may then be giving low basis property to some beneficiary. This means the estate saved taxes at the expense of a beneficiary. If the will doesn't give him the right to use his judgment, regardless of the effect on any beneficiary, etc., he may have to go to court for approval of his proposed action or face possible trouble from the heir. If the decedent doesn't want to give the executor a "blank check," he may have to specify what property is to be sold (high basis, low basis, etc.).

A similar problem can arise in making distributions to beneficiaries. While property given to each beneficiary is equal in value it may not be equal in basis. The will again may have to anticipte this problem.

As a general rule under the new law it is advisable to give a spouse high basis property if the marital deduction will be allowed. The reason is that the carryover basis of *appreciated* property can be increased by the estate taxes paid on the appreciation in value. But since marital deduction property pays no estate tax, there is no estate tax to add to the basis. Giving low basis property wastes the estate tax.

Illustration

Take an obviously extreme case. A decedent owns two pieces of property each worth $500,000. One has a basis of zero, the other $500,000. If the low basis property is given to his wife, the basis in her hands is zero since there was no estate tax paid on the property because of the marital deduction. The high basis property keeps the $500,000 basis because no estate tax was paid on any appreciation.

If the property transfers had been reversed, the wife would have a $500,000 basis and the estate would have a zero basis plus the estate tax paid on the appreciation in value (assume $150,000) of $150,000. Thus the "family" would then have a total basis of $650,000 instead of $500,000.

No more "outs" for tax shelters?

One difficulty with many tax shelters has been that after a period of time they become tax liabilities. Deductions far in excess of the capital invested have been claimed and there are no further tax benefits. But the excess deductions are represented by partnership debts which if wiped out, forgiven, etc., actually or by a transfer of the partnership interest, can result in capital gain or ordinary income.

Up to now, the death of the investor wiped out the overhanging tax liabilities and, in effect, kept the excess deductions from ever being put back in income. But the new carryover basis rules seem to prevent such avoidance. The investor may thus be passing on a substantial tax headache to his heirs.

FEDERAL POLICIES INCREASE HEALTH PROBLEMS

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DANIELSON. Mr. Speaker, I recently received a letter from a doctor in my district which is one of those that "hits you right between the eyes." I would like to share that letter with my colleagues.

Dr. Weldon J. Walker complains of Federal Government policies that are in direct contradiction to proven health problems created by the use of tobacco and the consumption of saturated fat and cholesterol in the American diet. Dr. Walker's letter follows:

Hon. GEORGE E. DANIELSON,
House of Representatives,
Washington, D.C.

Hon. GEORGE E. DANIELSON: You probably share my concern with both the spiraling costs of health care in our nation and for the moral tone, integrity and efficient operation of our government. These are complex issues. While I do not claim a comprehensive understanding or solution to either, I would like to point out one major area that contributes significantly to both problems.

Illness and death resulting from tobacco use are major contributors to medical costs in the United States. In January 1964, the Surgeon General of the Public Health Service warned Americans of the health hazards of tobacco consumption, particularly of cigarette smoking. Yet each year, despite this health warning, Congress has voted and the President has approved increased levels of price support for tobacco. Also, early in 1964, the American Heart Association advised limiting the consumption of saturated fat and cholesterol in the American diet, with the specific goal of reducing the number of heart attacks and strokes. However, both the Food and Drug Administration and the Department of Agriculture have tended to impede implementation of this recommended change in diet.

The public has been far ahead of the government in its perception of the issue and its response to these recommendations. United States Government Statistics show that in the twelve years from 1963 to 1975, there was more than a twenty percent decline in per capita consumption of tobacco, animal fat and cholesterol,[1] and an equal age-specific decline in coronary and cerebrovascular mortality[2] (the first and third leading causes of death in the United States.) For the first time, a decline in coronary mortality has been recorded!

By using a fraction of the money now spent for tobacco-related medical care we could better inform the public of its dangers with further saving of lives and dollars. No more taxes should be spent to support tobacco. In a world threatened with recurrent food shortages, much of the land made available could be devoted to food production. Imaginative national leadership should allow barter of this food for resources we lack, with mutual benefit to all.

How can one speak of responsible moral leadership in Washington, when each year our government spends our tax dollars to support a special interest that is a major contributor to death, disease and spiraling health care costs in the United States? Such action is undercutting the most productive preventive medical effort of this generation. Since about 60 percent of all coronary deaths occur before individuals reach any medical facility, prevention is of paramount importance. It is counterproductive for Congress to support tobacco production while voting increasing sums for medical care.

Sincerely yours,

WELDON J. WALKER, M.D.,
Clinical Professor of Medicine, University of Southern California and Loma Linda University Schools of Medicine.

MERIT SELECTION OF U.S. ATTORNEYS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DRINAN. Mr. Speaker, today I am introducing a bill which would provide for the selection of U.S. attorneys on the basis of merit. At the present time, such officials are "political" appointments: candidates are chosen by the President with the advice and consent of the Senate. This proposal would remove the Presdent and the Senate entirely from the selection process and assign the appointment authority to the Attorney General. In short the bill would place the selection of U.S. attorneys on the same footing as selection of all other attorneys in the Department of Justice.

The reason for changing the selection process is the same reason the Congress and the President have, since the first civil service act, transferred other po-

litical appointments into the merit system. It has been found that hiring on the basis of objective qualifications, in the long run, produces a more sound, fair, and efficient civil service. The "spoils system," once considered an essential prerogative of elected officials, is now considered deleterious to good government.

The existing appointment system is attended by many of the difficulties associated with other offices of a political nature.

For many U.S. Attorneys, the position has been a short-term, often honorary appointment he holds prior to being appointed a federal judge, seeking other political office or pursuing a prosperous legal practice. Cohen, 5 National Journal Reports 1785 (1973).

In addition, because the U.S. attorney is a Presidential appointment, the office carries with it a certain independence which produces a very uneasy and uncertain relationship with other Department of Justice officials, including the Attorney General. As a consequence the development and enforcement of uniform policies are frequently inhibited. One writer has referred to the process as a "haphazard system of determining Federal litigation strategies and priorities." The same at 1794.

The result, of course, is a very uneven system of law enforcement. The emphasis placed on the enforcement of certain statutes—both civil and criminal—by one U.S. attorney may be at the bottom of the list of the U.S. attorney in the adjoining district, which may be in the same State.

Furthermore some U.S. attorneys, because of their political base, may be very reluctant to initiate or litigate law suits of a "sensitive" nature. For example, until relatively recently, nearly all civil rights actions were instituted and tried by the Civil Rights Division in Washington. Apart from the psychic stress it placed on employees and their families, this system required a large travel budget for that division. In some districts, a similar reluctance obtained in other areas of Justice Department responsibility.

Since the creation of the office of U.S. attorney in the Judiciary Act of 1789—the officeholders were then called U.S. district attorneys—Congress has, through the years, brought that position closer and closer into the fold of the Justice Department. It is now time to complete that process by fully integrating it into the Department. This bill would accomplish that goal.

Before concluding, I should note one other feature of this proposal. Under 28 U.S.C. 546, vacancies in the office of U.S. attorney may be filled by the Federal judges in that judicial district. In my judgment that appointment process, even though of a temporary nature, raises serious constitutional issues and conflict of interest. The duty of the U.S. attorney, like that of the President, is to "take care that the laws be faithfully executed." If the judges are to decide impartially whether the U.S. attorney has proved a case, they cannot perform that function untainted if they have selected the attorney. Of course, the converse is true also.

It may be that when communications between Washington and the various districts around the country were difficult, the need for continuity in the office of U.S. attorney was so paramount that the court-appointment system was the only alternative of filling the vacancy. It may be too that the delay which sometimes occasions the appointment of a political officer by the President, with the advice and consent of the Senate, provided a second rationale for that mechanism.

Neither of those justifications is applicable today. Telecommunications have so advanced that the resignation, incapacitation, or death of a U.S. attorney is instantly known in Washington. Second, every district has at least one assistant U.S. attorney who is available to serve as the acting U.S. attorney. Third, this bill would remove the President and the Senate from the appointment process, thus allowing the Attorney General to speed the filling of vacancies. Consequently, it repeals the provision in current law giving the district judges the authority to fill a vacancy in the office of U.S. attorney.

I should note that President Carter and Attorney General Bell have expressed their interest in making U.S. attorney appointments on a merit basis. They too appear to agree that the present system is not adequate. I would hope therefore that they would place their strong support behind this bill and urge the Congress to enact it swiftly.

The text of the bill follows:

H.R. —

A bill to amend section 541 of title 28 of the United States Code to change the term of office and the manner of appointment and removal of United States attorneys and to repeal section 546 (relating to temporary appointments to vacancies by courts) of such title

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 541 of title 28 of the United States Code is amended to read as follows:

"§ 541. United States attorneys

"(a) The Attorney General shall appoint a United States attorney for each judicial district.

"(b) Each United States attorney is subject to removal by the Attorney General.".

SEC. 2. (a) Section 546 (relating to temporary appointments to vacancies in offices of United States attorney by courts) of title 28 of the United States Code is repealed.

(b) The table of sections for chapter 35 (relating to United States attorneys) of such title 28 is amended by striking out the item relating to section 546.

MANDATORY RETIREMENT MUST END

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. MOAKLEY. Mr. Speaker, I urgently recommend swift passage of H.R. 65, terminating mandatory retirement laws based on age. Sixty-five, the year most often stipulated for mandatory retirement, is an arbitrary age selected for bureaucratic reasons, and not a biological signal of approaching physical exhaustion or mental feebleness in our working citizens. It certainly should not be upheld as some sacred indicator of a worker's future uselessness. Winston Churchill, for example, was reelected British Prime Minister at the ripe age of 77, while our own Speaker, the Honorable TIP O'NEILL, turns 65 this year with no sign of slack in his physical and mental vigor. No one would dare ask such men as these to halt their vital work.

As science continually upgrades our health and prolongs our lifespan, our elderly increasingly remain alert and active. We can no longer demand the retirement of 65-year-old workers and expect to be relieving only employees eager to rest. While H.R. 65 recognizes and continues to protect the right to retire that many—perhaps still the majority—of elderly workers require, it now also recognizes the senior citizen's right to work for as long as he feels capable. Often only experience affords the individual worker the competency and proficiency he seeks throughout his career, and to retire individuals of this caliber solely because of their age is to deprive both individual and economy as a whole of his efficiency and productivity.

One final point needs to be made. Statistics tell us that workers between the ages of 60 to 64 make up only 8.4 percent of the poor, while senior citizens—65 and over—suddenly constitute almost 14 percent of this disadvantaged group. Surely, mandatory retirement laws account at least partially for this increase in poverty levels. Given the chance, perhaps many elderly citizens would and could be self-supporting, gladly adding to, rather than subtracting from, our beleaguered welfare and social security coffers. If these fine people can and want to work, no Federal authority should stay their efforts. To demand retirement of competent, experienced, willing workers is to take action that is not only cruel but foolish. I strongly urge support of H.R. 65.

I include the following:

A bill to terminate age discrimination in employment

Be it enacted by the Senate and House of Repeserntatives of the United States of America in Congress assembled, That section 12 of the Age Discrimination in Eemployment Act of 1967 is amended by striking everything after the word "age" and inserting a period.

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., January 25, 1977.

DEAR COLLEAGUE: One of the ugliest forms of age discrimination badly needs legislative action. We urge you to join in cosponsoring H.R. 65, a bill to end mandatory retirement.

Each year thousands are forced to retire not because they can no longer work but merely because they reach an arbitrary age usually 65. Our bill would protect their right to retire but it would establish their right to keep working if they are able and wish to do so.

H.R. 65 would help the economy, as well, by adding an estimated $10 billion to the gross national product from the skilled and experienced older workers who remain in our factories and offices. And those workers would extend their years of peak earning and purchasing power, increasing consumer demand and creating jobs.

Our burdened social security retirement system would also be strengthened as those

who do not retire continue paying in beyond age 65 instead of drawing benefits.

Many prove well able to work past age 65 and often excel in later years. Dr. Albert Schweitzer won the Nobel Prize at 68, Frank Lloyd Wright designed New York's Guggenheim Museum at 76, and Winston Churchill was reelected British Prime Minister at 77.

Carl Sandburg wrote some of his most beautiful poetry in his eighties, Leopold Stokowski still conducts at 94, and Grandma Moses kept painting beyond 100.

Both justice and common sense cry for us to end retirement required by age alone. To cosponsor call 55271.

Sincerely,

AUGUSTUS F. HAWKINS,
Chairman,
Subcommittee on Equal Opportunities.
CLAUDE PEPPER,
Chairman,
Select Committee on Aging.
PAUL FINDLEY,
Representative in Congress.
BENJAMIN S. ROSENTHAL,
Representative in Congress.

CHIEF DEPUTY SHERIFF G. STANLEY KREILER HONORED FOR 45 YEARS OF PUBLIC SERVICE

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. CARNEY. Mr. Speaker, I would like to take this opportunity to pay tribute to G. Stanley Kreiler, chief deputy sheriff of Mahoning County, who recently retired after 45 years of distinguished and dedicated public service for the State of Ohio.

Upon graduating from Rayen High School in Youngstown, Ohio, Stan was appointed deputy sheriff under Sheriff William J. Engelhardt. The youngest deputy sheriff in the State of Ohio. He worked initially as a jailer and eventually became head of the detective bureau. In 1942, he went into the Armed Forces and graduated as a classification specialist. Later he graduated from Counter-Intelligence School and the FBI school, and was attached to the 85th CIC Unit as a special agent. During his career in the service, he spent 13 months in Korea and received a ribbon of recommendation for outstanding service for his efforts in reorganizing police departments in Inchon and other areas. He was honorably discharged from the service in 1946.

After World War II, Stan was appointed secretary to Chief of Police Edward J. Allen, assigned to internal affairs and special investigative work. In 1961, he became deputy sheriff of Mahoning County and served in that position for 16 years. Stan's tenure as chief deputy sheriff of Mahoning County was marked with dedication as he assumed various law enforcement responsibilities and positions. He assisted in coordinating the Ohio Peace Officers Training Council and participated in the administration of the summer cadet program and the youth enlightenment program; both programs received commendation by the Law Enforcement Assistance Administration for their success.

In addition, Stan held office as president of the Tri-County Law Enforcement Group for Ashtabula, Trumbull, and Mahoning Counties. Further, he was director of the Reserve Officers Corporation and director of the Berlin Dam Marine Patrol.

Mr. Speaker, G. Stanley Kreiler is an outstanding, personable gentleman, and those of us who have known and worked with him will miss him greatly in public service. Certainly, I wish Stan the very best of good luck, health, and happiness in his richly deserved retirement.

At this time, I would like to include excerpts from a newspaper article in the Austintown Leader designating November 10, 1976, as "G. Stanley Kreiler Day" in Austintown, Ohio:

G. STANLEY KREILER DAY

G. Stanley Kreiler, chief deputy sheriff under Ray T. Davis the past 16 years, was lauded for his 45 years of service to the state, county and city as 300 of his friends honored him at a luncheon at the Saxon Club November 10, 1976.

Letters were read from William O'Neill, Chief Justice of the State Supreme Court, Judge Paul Brown, a member of that body, Governor James Rhodes, Charles Vimmerstedt, William Cafaro, Judge Charles Bannon and Phil Rogers.

During the Admininstration of Judge Henderson, then mayor of Youngstown, Kreiler was secretary to Chief of Police Edward J. Allen, now retired and living in California.

Henderson paid personal tribute to Kreiler and read a letter from Allen lauding Kreiler's efficiency as a secretary and "partner", as well as his loyalty and friendship.

Youngstown City Council President Emmanuel Catsoules said he would never forget Kreiler's kindnesses to him. He represented the City of Youngstown in the absence of Mayor Jack Hunter.

The invocation was given by Rabbi Jordon Taxon of the Oved Tzedek Temple and the pledge to the flag was led by Col. Joseph Alessi of the Mahoning County Bicentennial Brigade, and his two children, Joseph Jr. and Lisa.

Sheriff Davis praised his chief deputy, saying he was an inspiration through his devotion to duty. "I feel toward him as though he were my brother," he remarked.

Mrs. J. Alessi presented Kreiler with a letter from Governor Rhodes; and commendation resolutions were presented by George Meshel representing his brother, Senator Harry Meshel; Thomas Gilmartin from the Ohio House of Representatives; William Houser, from the Boardman Township trustees, Councilman Pete Starks, E. Ray Davis from Austintown Township trustees; John Palermo from the county commissioners; and Clingan Jackson from the Bicentennial Commission.

Kreiler said he couldn't begin to thank everyone who attended. He said he found out through life that "The way to have a friend is to be one".

MIDWIVES: A GROWING PROFESSION

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Ms. MIKULSKI. Mr. Speaker, I am pleased to see the growing interest in midwivery, not only in Maryland, but all across the country. In the early days of our Nation, when the science of medicine was young, and doctors scarce, it was the midwife who helped women through the emotional and physical difficulties of childbearing.

Midwivery nearly disappeared in this country with the increasing availability of hospitals and advances in medical training. Today, however, with the increasing high costs of medical care, many women are welcoming the reemergence of the midwife as part of the medical team.

I support the development of this humane experiment and thank Lynelle King, associate executive director of the Maryland Nurses Association for passing on to me the following article printed in the Baltimore Evening Sun. I commend the article to the attention of my colleagues:

MORE WOMEN TURNING TO MIDWIVES

(By Sue Miller)

At City Hospitals more and more affluent and middle-class women are requesting midwife delivery of their babies.

"They are seeking a kind of sensitivity a woman brings to birth, a peak experience," says Cindy Monshower, who has a clinical midwifery practice at the southeast Baltimore hospital.

The staff nurse-midwife is part of a four-member midwifery team that is on call 24 hours a day and is bringing into the world about 10 babies a month at a time when the overall number of deliveries is down.

And a quick check of the team's schedule for the next few months shows that this figure will be increasing.

"Women's consciousness has changed," says Ms. Monshower. "Women are seeking out women health-care givers. They don't want to be drugged and they don't want stirrups.

"We (midwives) are committed to dignity in birth and to women being treated like adults."

She continues, "I can unreservedly say that we get many, many calls from women who ask, 'Where can I find a midwife?' They are calling and coming to us here at City from many sections of the city."

A midwife, according to Ms. Monshower, manages the maternity cycle for mothers and infants and, if any abnormalities are discovered, she consults a doctor. If complications develop, she co-manages the delivery with the doctor.

Under this interpretation, she says a midwife can deliver babies singlehandedly, without a doctor looking over her shoulder—with "only God, and I hope he's always there."

In addition, a midwife can give prenatal care. She can administer anesthesia to numb the birth canal and, under certain conditions, administer drugs prescribed by doctors.

City Hospitals is one of a few hospitals in the state that allow midwives to have hospital delivery privileges.

Generally, Ms. Monshower says, midwives (there are about 85 in Maryland) are not allowed by hospitals to do what they are trained to do. But, at City, where midwives are not held back, she has been encouraged "to go to my potential and that's why I'm here."

Midwives are denied hospital privileges, she believes, partly because of economic pressure and partly because some doctors "don't feel comfortable yet with the expanded role of the nurse."

Ms. Monshower decided to become a midwife when, after having a pregnancy and a delivery and then breast feeding the baby, she realized "how women have kind of lost control of birth."

The 28-year-old midwife, who trained at the New Jersey College of Medicine, believes in women taking care of women, and she is committed to women's health care.

"I think birth is a normal process," she says, " and women do it well. If you help them and teach them and support them, they have a great time."

In her newly created position at City, Ms. Monshower during the past four months has observed what she and other midwives in the state and country are calling another trend among affluent, middle-class women—an increasing interest in home deliveries.

"The demand is coming from all parts of the city," she says. "I get several calls a week. The demand is there and no one is meeting it."

For the time being, Ms. Monshower is limiting her deliveries to the hospital setting, but a trio of midwives has hung out a shingle in Bethesda, Md., for the sole purpose of handling home deliveries. Those three have formed a corporation and hired a doctor as its medical director.

Those three Montgomery county midwives are handling 20 births a month, and "women want home deliveries badly enough that they're willing to pay out of pocket for them," says Ms. Monshower.

In Maryland, the services of nurse-midwives in any setting are not covered by third-party insurers—Medicaid, Blue Cross and Blue Shield—although there is a bill before the legislature that would change that.

This means, for example, that those mothers-to-be who opt for midwifery services through the Bethesda corporation have to pay $500 of their own money to cover costs.

If these same women had their babies delivered by doctors in a hospital, the bulk of the medical bills—about $1,800 for each birth—would be covered by the insurer.

Ms. Monshower, who also teaches City's nurses maternal child care and Johns Hopkins Medical School students normal labor delivery, sees herself not only as a teacher but also as a monitor "to see that everything goes well before and after birth."

She tells her patients everything that is happening to minimize fear. And, she teaches them what she terms "the realities of newborns—that babies are not fun, but hard work and a big responsibility."

Women are not prepared for the role of mothering, she feels. She addresses herself to that concern by including mothers and fathers from the very beginning in the teaching and delivery.

"I feel a father should be in for prenatal visits to hear the heart beat," she says. "I think it is crucial that mother and father and baby be together after birth and that the parents touch the baby to get used to its being there forever."

PERSONAL EXPENDITURES BY MEMBERS FOR OFFICIAL TRAVEL

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. JACOBS. Mr. Speaker, there is no truth to the rumor that cost-of-living adjustments will be made to reimbursements of personal expenditures by Members of Congress for official round trips to their districts if and when such reimbursements are ever made.

FOOD AND POPULATION: IV

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. RICHMOND. Mr. Speaker, the future security of the world's food supply will be determined to a large extent by the twin forces of population growth and changes in the world's climate. We know that populations continue to grow rapidly, doubling every 41 years in the United States and every 32 years worldwide—at current rates. It has been noted that rapid population growth is placing serious and often irreversible strains on the food producing systems of much of the world through overgrazing, deforestation, deserification, and erosion.

On March 5, 1977, columnist Tom Braden warned us—both foods producers and food consumers—that this summer's weather may well be worse than this winter's. According to Dr. Reid Bryson, director of the Institute for Environmental Studies at the University of Wisconsin, the summer ahead could be one of the worst in our history. There could be widespread crop failures with far-reaching domestic and foreign consequences.

For the urban consumer, this would mean higher food prices. For the many rural American farmers, this would mean financial loss if not ruin. For America's economy, it would mean a serious balance-of-payments deficit—depending upon what percentage of our $26 billion agricultural exports are forgone.

I have discussed this with Dr. Bryson many times. I hope he is wrong, and so does he. However, he has been consistently right in the past. His track record is such as to make his remarks extremely important for all of us. Secretary of Agriculture Robert Bergland has, with his usual foresight, already conferred with Dr. Bryson.

For a moment, let us explore the possible consequences of the climatic changes predicted by Dr. Bryson. According to Dr. Kenneth E. F. Watt, professor of zoology, Institute for Ecology, the University of California at Davis, and author of the book "The Titanic Effect," should the United States now experience climate changes similar to those which have occurred in the past, our annual grain production would fall precipitously.

In our efforts to feed a globally unprecedented number of human beings—to say nothing of the critical task of providing an adequate and nutritious diet for millions of Americans, especally our urban and rural poor—the effects of climate on agriculture must be high on our agenda of concerns.

Professor Watt, in a paper submitted to Science for publication, has outlined the dimensions of the problem now being examined by Dr. Bryson. His argument is, essentially:

First. The world's population is larger now than at any other time in history and rising rapidly;

Second. The continued support of such a population will require major improvements in agricultural technology, placing increased amounts of land under cultivation and a continuously benign climate for crop growth—past benign weather, it should be remembered, has made possible the rise of the world population to its present 4.2 billion level;

Third. Substantial evidence has now been accumulated that the world's climate is undergoing a fundamental change and in a direction less suitable for agricultural production—we had strong evidence of this this winter;

Fourth. A high proportion of worldwide food supplies are now produced in a very few countries vulnerable to a sudden deterioration in weather. Forty-seven percent of the world's wheat is grown in the United States, U.S.S.R., and Canada and 93 percent of the available world wheat exports come from Canada and the United States; and finally

Fifth. With present acreage and technologies, weather as poor as 1936, for example, would result in a drop—from levels during optimum weather conditions—in Canadian wheat production of 44 percent, in the United States wheat production of 21 percent; and United States corn production of 42 percent.

It would seem, Mr. Speaker, that prudence would compel us to adopt a number of strategies to lessen the impact of future climatic changes in U.S. and world food production. It would seem that prudence would compel us—we do not have much time and changes do not occur overnight.

We should, therefore, establish a domestic and, if possible, an international grain reserve—equal to 1 full year of grain consumption. Such a strategy is imperative, as has been noted by Stephen Schneider in his book "The Genesis Strategy."

As grain reserves are still precariously low, sole reliance upon this action would not be wise. While good harvests can build up our reserves—as has been done this past year—we cannot count on bountiful harvests forever.

As we are now vulnerable—worldwide—to a drop in food production, the only allowable conclusion is that national governments should become more aggressive about controlling population growth—here in America as well as elsewhere.

I would like to share Mr. Braden's article on Dr. Reid Bryson with you at this point, as well as two additional articles concerning drought in the United States and China:

AFTER THIS WINTER, WILL SUMMER BE WORSE?

(By Tom Braden)

After what has been officially described as the hardest winter in more than 200 years, the country may be facing something worse. Secretary of Agriculture Bob Bergland has conferred recently with a prominent climatologist who advised him that immediate steps should be taken to store food against the probability of major drought this summer.

Dr. Reid Bryson, director of environmental studies at the University of Wisconsin, says the summer just ahead will be one of the worst in our history.

There will be, says Bryson, widespread crop failures, particularly of wheat, with

both domestic and foreign consequences that will make the weather-induced troubles of this past winter seem trivial by comparison.

Bryson says that, except for a very brief period of rainfall in April, drought is likely to occur throughout the country through the month of July. "We are now working," he told me, speaking of his colleagues at Wisconsin, "on a study of what the effects of major drought will be, and we expect to have some statistics ready soon. At the moment all we are fairly confident about is that next summer looks very bad."

Bryson has recently developed a system for long-range weather predictions. Unlike standard weather forecasting, which is based upon linear projections beginning with atmospheric pressures on a given day, his system is based primarily on two factors.

The first is a measurement of particles in the air, the density of which affects the amount of sunlight reaching the earth's surface.

The second is a measurement of the "Chandler wobble" of the North Pole. For many years, climatologists have speculated as to whether slight variations in the position of the North Pole affect the weather. Bryson believes he can prove that the "wobble" does have an effect, and he now believes he has found a means of measuring it.

He is, at any rate, "elated," if that word may be used, at what happened to weather across the country during the month of January. In December he made his predictions based upon the new theory. The bitter cold in the East and Midwest and the drought in the West met his calculations precisely, he says, and he is convinced that his forecast for the spring and summer will prove equally accurate.

If Bryson is right, the summer of 1977 will be of about the same harshness as that of 1934, which was the year of the great dust bowl. Food prices will soar, there will be no wheat for export, and therefore no balance of trade to counter increasing imports of oil. The result could very well be near catastrophic.

The U.S. Weather Service considers Dr. Bryson something of a gadfly, but it does not dismiss him. "Almost every known change in the earth from quakes to sunspots has been postulated as a means of predicting weather, and Bryson may be in to something with the 'Chandler wobble'," said one official. "But he has not yet published his theories, and so we can't study them."

Another official of the Weather Service said, "Bryson is a brilliant mathematician, but he's far out." A third remarked, "Butz (former Secretary of Agriculture)) wasn't interested in weather. Bob Bergland is interested in weather, and I'm glad he's been talking to Bryson."

The Weather Service's own long-range prediction calls for heavier than normal rainfall this spring in areas afflicted by drought this winter. Beyond that, nothing is ventured.

[From the Washington Post, Mar. 22, 1977]

SOUTHERN CHINA WARNED OF DROUGHT

(By Jay Mathews)

HONG KONG, March 21.—The General alarm over China's worsening drought has spread into the huge southern Kwangtung Province, increasing the threat to party Chairman Hua Kuo-feng's plan for economic recovery.

An official Kwangtung radio broadcast monitored here yesterday said, "The current situation of drought in our province is developing daily, seriously threatening the smooth progress of spring farming. Since November of last year, there has been no heavy rain. Some of the water levels are close to the lowest levels ever recorded.

The drought in usually well-watered Kwangtung, the province of 53 million people that surrounds this British colony, aggravates a severe national water shortage parching at least six northern Chinese provinces.

According to a series of official reports, many on the front pages of Peking newspapers, the drought now affects the provinces of Shansi, Shensi, Honan, Hupei, Hopei, Shangtung and now Kangtung.

The reports indicate that water has been rationed to allow bucket brigades to bring as much as possible out to the fields.

The situation has become so serious that Peking's State Council issued a circular calling for immediate action yesterday.

"At present the drought is extremely severe in areas along the Yellow and Huai Rivers and a number of places in northern China," the New China News Agency quoted the circular as saying. "Many places had no rain or snow for half a year. In some other places, the drought continues to develop. It is greatly threatening the growth of the summer-harvested crops and spring plowing and sowing."

The drought, which Peking has called the worst in at least 28 years, puts unusual pressure on Hua and his government.

He has, in effect, pledged to restore an economy that he said was ravaged by Peking dogmatists, like Mao Tse-tung's widow, Chiang Ching, whom Hua purged in October. To make the "proper arrangements for the masses' daily lives," which has become a watchword of his administration, Hua may have to dip into grain reserves or spend precious foreign-exchange funds on overseas grain. A 2-million-metric-ton Australian wheat contract was announced this month.

The official reports on the drought say that 14 million people have been mobilized in Honan and 17.5 million in Shangtung to bring water from rivers and reservoirs to the wheat fields. Army troops are being assigned to drought work in great numbers, the reports said.

The most severely affected northern crops are the wheat and barley sown during the winter and due to be harvested in June and July. The small shoots now coming out of the ground represent about 50 million of China's total annual grain output of about 285 million metric tons, according to economists here.

In Kwangtung, peasants are working to save the rice seedlings that must be kept in well-watered paddies.

"We must . . . mobilize the masses to carry, store and transport water, resist drought, crash-plant, crash-transplant, and protect the rice seedlings," said yesterday's broadcast report of a telephone conference Friday of provincial leaders.

The broadcast said a general headquarters for fighting the drought had been established in the province under the command of a veteran agricultural expert on the provincial party committee, Chang Ken-sheng.

[From the Christian Science Monitor, Feb. 23, 1977]

PEOPLE, NOT DROUGHT, THE REAL CULPRIT

(By Robert C. Cowen)

DENVER.—Robert D. Miewald of the University of Nebraska looks at the mountains that frame this mile-high city and thinks of Africa's Sahel (semi-desert lands south of the Sahara). The gray of bare ground that softens the brilliance of what should be snowy peaks here symbolizes a drought that has caught officials napping, as did the Sahelian drought a few years ago.

The problem, says the Nabraska political scientist, is a blindness on the part of governments and their people to the climatic implications of living in semi-arid lands.

Development pursued in good years demands more water than such regions can supply when the weather turns dry. Dr. Miewald says his greatest concern is that there will be a return to the old complacency when the present drought is passed.

The real threat of drought, Dr. Miewald feels, is not empty reservoirs or crop failures this year or the next. It is the long-term disruption it will eventually cause if arid lands continue to be developed beyond the carrying capacity of their climate. This, indeed, was the underlying thread of concern here in a symposium on drought held as part of the annual meeting of the American Association for the Advancement of Science at which Dr. Miewald spoke.

Part of the problem lies in the heavy pressure that expanding population and development are putting on all natural resources, including water.

James E. Newman, agronomist from Purdue University, pointed out, for example, that U.S. grain production has both increased substantially in volume over the past few decades and reduced its variability due to weather changes. But even though a bad year may see a smaller percentage loss, the number of bushels involved is far greater than ever before. Also, since more people than ever before depend on that harvest, the impact of the loss is heavier.

Part of the arid land problem also lies in the inability of meterologists to forecast drought with certainty.

Lacking that certainty, officials have been reluctant to do much contingency planning. Noting this, Stephen H. Schneider of the National Center for Atmospheric Research emphasized a point he has been making for several years: that the likelihood of recurrent great plains droughts is certain enough to play a prominent role in long-range planning.

Even now, he explained, no meteorologist could say definitely that this area is entering a several-year drought cycle.

But such cycles do recur with varying severity at roughly 20-year intervals in the climatic record. "Prudence," scientists here say, "demands advance planning for these cycles, particularly in an era when many parts of the world depend on U.S. farm production."

For his part, Dr. Schneider advocates a system of substantial grain reserves. He calls this a "Genesis strategy"—after the example of the biblical Joseph.

When scientists such as Drs. Schneider and Miewald urge planning for recurrent drought, they warn against looking for some magical technological solution. Dr. Miewald said he welcomes the promise of present action implied by the meeting here Feb. 20 of 11 Western Governors to plan drought strategy. But he noted that crisis response is no answer to the underlying challenge.

There's a tendency, he said, to talk about cloud-seeding when no one knows that this will work—or to promote big dams and dream about piping water from Alaska at great cost. "Instead of talking of too little water," he advised, "we should talk about too many people, too much development."

OREGON ISLANDS

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. WEAVER. Mr. Speaker, the bill I am introducing today would designate as wilderness 54 small islands off the Oregon coast and add them to the single island Oregon Islands Wilderness, established by Public Law 91-504 in 1970. The wilderness will be administered by the U.S. Fish and Wildlife Service within the Oregon Islands National Wildlife Refuge.

Establishment of this wilderness is, by law, supplementary to the primary purposes for which the wildlife refuge was established. As wilderness, these islands would continue to serve their primary objectives, namely to preserve and maintain natural habitat for nesting colonies of native marine birds. Hundreds of thousands of nesting birds utilize the islands each spring. For example, over 500,000 Leach's petrel, a nocturnal burrow-nesting bird, have been recorded nesting on a mere eight acre site on Goat Island, which is already in the National Wilderness Preservation System. Other Islands have similar abundant use from a wide variety of sea birds. The islands also serve as resting areas for sea lions and seals. Wilderness designation would aid management by its added legislative assurance that the natural qualities of the islands will be preserved for wildlife benefit.

Mr. Speaker, I am sure that when the term "wilderness" is mentioned, most of my colleagues picture a large area consisting of high mountain peaks with tree covered flanks, jewel like lakes and, perhaps a pack train winding in the distance. While this image fits many of the larger wilderness areas in national forests in the western part of the country, official wilderness designation is much broader in scope and purpose. For, the Wilderness Act required the Secretary of the Interior to review all roadless islands in the National Wildlife Refuge System and make wilderness suitability recommendations to the President who, in turn, transmits his recommendations to the Congress for legislative enactment. Small wildlife refuge islands off our east coast, Florida, Washington, Alaska and even in Lake Erie have already been included in the Wilderness System by act of previous Congresses.

Mr. Speaker, last year hearings were held on this wilderness proposal by the Subcommittee on Pacific Lands of the Interior and Insular Affairs Committee and subsequently reported by the committee in an omnibus wilderness bill. Unfortunately, due to erroneous last minute information furnished the committee, the Oregon Islands proposal was struck from the bill by committee amendment on the floor.

Last year the proposed wilderness, as reported by the committee, contained only those islands presently within the national wildlife refuge. Apparently, some were advised that other nearby federally owned islands, proposed for addition to the wildlife refuge and wilderness by the Interior Department but not yet transferred from the Bureau of Land Management were included. Inclusion of these additional islands in the wildlife refuge and wilderness received overwhelming public support—and the concurrence of BLM—at the field hearing in Newport, Oreg., in June 1972. An application for withdrawal was filed in January 1974, with the assumption it would be approved quickly.

Unfortunately, bureaucracy moves slowly and no final action has been taken to date, over 3 years later. This year my bill includes all of the islands proposed by the Interior Department for wilderness classification. Those not yet transferred to the U.S. Fish and Wildlife Service are included under the assumption that the public land order will be issued shortly. If not, it is my intention to request the committee to transfer them and designate them as wilderness simultaneously.

Mr. Speaker, the rugged rocks, islands, and reefs of this 55-island wilderness vary greatly. Many are over 100 feet high; many frequently are awash by the surf. Some are bare rock; others support a modest cover of low-growing vegetation. They have remained undeveloped because of their small size—up to 20 acres—Federal ownership, and generally inhospitable character. They extend from near Tillamook Head to Twin Rocks, are within a half mile of the Oregon coast in most places, and are eminently qualified for immediate inclusion in the National Wilderness Preservation System.

ADMIRAL RICKOVER TESTIFIES ON AEGIS SHIPS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. BOB WILSON. Mr. Speaker, Admiral Rickover recently testified before the Subcommittee on Seapower of the House Armed Services Committee on the need for Aegis ships in the Navy.

He presented a chronology of the decisionmaking process that has taken place to date respecting the Aegis program.

Aegis is the latest and best fire control system the Navy has devised to launch missiles to protect surface ships against enemy air attack.

Since procurement of the Aegis program is so important to the Navy, I believe it would be helpful for all the Members to carefully read the admiral's excellent summation of the Aegis requirements.

AEGIS SHIPS

This year again marks a real test of the effectiveness of Title VIII. The issue is whether or not ships to be equipped with the Aegis fleet air defense system will be nuclear powered. Aegis is the latest and best fire control system the Navy has devised to launch missiles to protect surface ships against enemy air attack. The decision this year on the issue of whether the Aegis ships to be built for naval strike forces will be nuclear powered will have a profound effect on the future of the Navy, and will determine the rate of application of nuclear propulsion for surface ships.

The Aegis fleet air defense system has been under development for several years. The development has now reached the stage where the Navy is asking for authorization to construct Aegis ships. The Congress will make the decision this year whether Aegis strike force ships are to be provided nuclear propulsion, or whether some or all Aegis ships will be non-nuclear.

Up to April 1971, Navy programs were based on all Aegis ships being nuclear powered. It was planned to modify future *Virginia* Class nuclear cruisers to accommodate Aegis. In April 1971, the Secretary of Defense cancelled the third *Nimitz* Class carrier, the CVN 70, and the two nuclear cruisers, CGN 41 and 42; he also cancelled the Navy's future plans for building Aegis equipped nuclear cruisers. During the next two years, the Defense Department restored the CVN 70 and the CGN 41 and 42. Congress subsequently cancelled the CGN 42.

In 1973, Admiral Zumwalt, who was then the Chief of Naval Operations, recommended starting a class of gas turbine powered Aegis destroyers in FY 1977 and a class of nuclear cruisers with Aegis in FY 1978. Secretary of the Navy Warner requested that the CNO investigate "the feasibility of building a single new class of aircraft carrier escort, nuclear powered, vice the two now planned . . ." In a meeting I attended on 12 October 1973, Admiral Zumwalt chose a program of 16 gas turbine powered Aegis ships and 8 nuclear Aegis ships to provide two Aegis ships per carrier for a projected force level of 12 carriers of which four are already authorized to be nuclear. This decision became the basis for a planned mix of conventional and nuclear Aegis ships.

At this meeting, he said that the talk of an energy crisis was just so much talk, that we are sitting on a 400-year supply of coal and that we will soon have the capability of putting this in a form we can use in our ships. He said that if he had his way, he would never build another nuclear powered surface ship. He said that his decision on the number of conventional Aegis ships was based on the assumption that all new carriers will be non-nuclear. Therefore, he approved eight nuclear Aegis ships to provide two each for the four nuclear carriers and 16 non-nuclear ships to provide two each for 8 conventional carriers he assumed would later be replaced by new conventional carriers.

Admiral Holloway became Chief of Naval Operations in July 1974, a month before Title VIII became law. Based on his review of future shipbuilding plans, he recommended that future carriers be nuclear powered. He also recommended, and the Navy adopted his position, that the Navy build 18 nuclear powered strike cruisers, CSGNs, in lieu of the prior proposed mix of 16 non-nuclear and 8 nuclear ships with Aegis.

In a letter of December 6, 1974, to the Chairman of the Seapower Subcommittee of the House Services Committee, Admiral Holloway proposed a four-year program for building Aegis ships. This program called for six nuclear powered strike cruisers, CSGNs, to be authorized in the four-year period from fiscal 1977 though fiscal 1980, and no conventional Aegis ships.

The Navy subsequently recommended to the Secretary of Defense that, in addition to all new construction Aegis ships being CSGNs, Aegis should be introduced into the fleet by concerting the nuclear cruiser *Long Beach* to Aegis as soon as possible. The Defense Department disapproved the 18 CSGN program proposed by the Navy. The Navy continued to recommend that the first new Aegis ship be a CSGN in FY 1977 with advance procurement funds in FY 1976. The Defense Department cut the Navy's FY 1977 budget and persuaded the Navy to recommend in the FY 1977 program a DD–963 type ship with Aegis; this was named the DDG–47 Class.

In June 1975, President Ford disapproved this DOD/Navy recommendation and requested Congress to provide advance procurement funds in the FY 1976 budget for the first CSGN to be authorized in the FY 1977 program. The Congress did not authorize the long lead funds. The Navy program was then changed to four nuclear strike cruisers to be built over the five year period FY 1977–81, along with seven conventional ships.

In the program subsequently proposed by President Ford in early 1976 there were only two nuclear strike cruisers and eight conventional Aegis ships to be built in this same five-year period. The five-year plan also included two nuclear carriers, one of which was later dropped by the Ford Administration. Congress approved advance procurement funds for one nuclear carrier as requested by President Ford, but did not approve starting either the CSGN or DDG-47 programs in FY 1977. Instead, Congress directed that the existing nuclear cruiser *Long Beach* be the first Aegis ship and appropriated $371 million in FY 1977 to start the conversion.

Last month President Ford recommended that the advance procurement funds for the *Long Beach* conversion and for the nuclear carrier be rescissioned. He submitted a five year program from FY 1978 through FY 1982 which included two conventional carriers, two CSGN's, and ten DDG-47 Class AEGIS ships. It has subsequently been proposed that the nuclear strike cruiser program be eliminated entirely.

I testified last year that I was firmly convinced that by this year the analysts in the Office of Management and Budget and in the Defense Department would attempt to eliminate completely the nuclear strike cruiser program. I said that:

"It would not surprise me if they then again recommended building conventional aircraft carriers in lieu of nuclear carriers. That has been the pattern for over 25 years, starting with nuclear submarines. And I see no indication that the analysts have changed one iota in their position that, since nuclear surface ships cost more, we should build conventional ships."

Unfortunately, my prediction turned out to be correct.

Aegis is planned as our most capable AAW weapons system. Because Aegis ships will be expensive, regardless of their means of propulsion, there will never be a large number. In a naval war against an enemy employing sophisticated weapons systems, all strike force Aegis ships will be needed in the areas of highest threat. It is under just such circumstances that the advantages of nuclear propulsion are most urgently needed to maximize mobility and minimize logistic support. It is into such high threat areas where the nuclear carrier task forces will be sent in time of war, and they will need nuclear powered Aegis ships to accompany them. The Aegis ships should be nuclear for the same reasons that carriers should be nuclear.

In areas where the threat is great enough to require nuclear carriers and Aegis ships—our first line naval stike forces—it is highly unlikely that oilers can survive. When a non-nuclear Aegis ship runs low on fuel, it will be necessary to remove the Aegis ship to an area of lower threat to meet the oiler, losing Aegis protection just when it is most needed.

The CSGN also has unique capability for independent operation in areas where carriers are not available and its cruise missiles and 8 inch gun can provide sufficient offensive power.

Another consideration is that to have a credible nuclear powered guided-missile ship capability in both the Atlantic and Pacific Fleets, it is necessary to build a reasonable number of nuclear ships so that some ships are available for immediate deployment at all times. There are only nine nuclear cruisers authorized to date, and none of these have Aegis.

Unless nuclear Aegis ships are built, our nuclear carriers will have to be accompanied by DDG-47 Class ships when they enter the highest threat areas, thus giving up the significant military advantages of the *all*-nuclear carrier task force in the very areas where nuclear propulsion is most needed.

COMPULSORY PUBLIC SERVICE SHOULD BE AVOIDED

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. DRINAN. Mr. Speaker, our long tradition of voluntary public service is a fundamental characteristic of American society. Tens of thousands of volunteer firemen protect rural communities against fire. In my own area, volunteers care for patients in nursing homes, raise funds for vital medical research, clean up refuse in parks and along riverbanks, and carry out innumerable other beneficial projects. Participation in the town meeting is, perhaps, the most basic form of voluntary public service engaged in by the citizens of my congressional district.

In recent months, an increasing amount of attention has been given to various proposals to institute a system of compulsory public service. Proponents suggest that such a plan could provide adequate personnel for the Armed Forces along with the manpower necessary to carry out numerous projects in the fields of environmental protection, transportation, health care, and education.

These proposals strike at the very basis of our free society. Compulsory service, such as a military draft, should be employed only as a last resort in times of national emergency. Prof. Charles Fried of Harvard Law School authored a critical analysis of these universal service proposals in the Washington Post of March 15, 1977. I commend this incisive and provocative essay to the attention of my colleagues:

COMPULSORY PUBLIC SERVICE: A BAD PRECEDENT

(By Charles Fried)

Proposals for a program of compulsory public service for all young people have been making the rounds in congressional and editorial circles. One major network news commentator hailed such a program as an idea "whose time has come."

I disagree. In this, the beginning of our third century of liberty, it is shocking that so many should be ready to impose in so drastic and total a way on the liberties of a whole generational slice of the American population. And it is particularly disheartening that the liberties of our young people should be casually disposed of on such ill-conceived and essentially self-serving grounds.

The proposal, which has attracted so much favorable comment, is this: All youths—say at high school-leaving age—would be required to spend a year in some form of public service activity, but this obligation could be discharged by enlistment in one of the military services. The proposal is thought to be good in principle and good in practice. In principle, it is thought to affirm the notion of an obligation of public service. And practically it would help alleviate a problem which is showing up in the volunteer army. It appears that the volunteer army is turning out to be very expensive while still failing to attract recruits of a desirable quality. It is thought that by instituting a general obligation of service, many more will find it worth their while to discharge that obligation in the military, thereby improving the quality of the army and lessening the burden on the taxpayers.

The idea is wrong in principle and would surely be a nightmare in practice.

The idea is wrong in principle because the liberty of young people is worth no less than the liberty of middle-aged politicians and editorializers who would take from them the right to determine how to live their lives during a substantial period of time. I would not wish to denigrate the principle that we all have an obligation to serve our community, but the notion that we may be compelled to do so absent manifest necessity and some clear national emergency, is foreign to our traditions. The shoddiness of the proposal, indeed, reveals itself when we see that it really boils down to a desire on the part of the middle-aged to get something—a high quality defense manpower pool—without paying for it. If the nation needs a military establishment of a particular qualtiy, then the nation as a whole should pay for it, and not force a small segment of the popualtion to contribute its services unwillingly for nothing.

But if the argument of principle doesn't convince, the practicalities should. All one has to do is consider the difficulties of tens of thousands of local school boards in enforcing useful activities on high school students during some five or six weekday hours, to see how unlikely we would be able to provide and supervise a meaningful, compulsory year-long, 24-hour-a-day-experience for every 18 year-old in the nation. (And make no mistake about it, anything less total would not have the desired effect of driving large numbers of youths into the military as a preventive alternative.)

I ask those who would casually deprive their fellow citizens of their liberty for a year of their lives, who would administer these programs? Who would determine what constituted appropriate public service alternatives? Who would enforce atendance, and discipline participants who snuck away for an hour, or a day, or a week? Who would keep order in the dormitories? Or would there be dormitories? What about drinking and drugs? Would there be exemptions for students? For persons engaged in essential activities? And so on.

I would have thought the loathing the American people have displayed for multiplication of bureaucracies and regulations would indicate that the last thing in the world the public would want at this point would be a program that turned over every 18-year-old in the nation (man and woman) to wholly undefined, non-existent set of institutions.

RESOURCES FOR THE FUTURE

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. JEFFORDS. Mr. Speaker, I would like to draw my colleagues attention to an important statement by a group of eminent American agricultural experts from across the country on the subject of food reserves. The group of 22 experts, which was organized by senior fellows from the Brookings Institution and under the auspices of the Federation of American Scientists, has rightly pointed out that a combination of increased demand for food and the vagaries of current world weather conditions require that a major contingency be developed to forestall the possibility of massive

starvation, perhaps on a global scale in the decades ahead.

It seems to me that the 95th Congress cannot escape a full investigation of the issue of building some kind of world reserve system.

I here reproduce for my colleagues a statement released today by the Federation of American Scientists on the subject, which includes excerpts of a letter to President Carter from George Rathjens, chairman of the Federation of American Scientists calling for the rebuilding of a grain reserve system:

EXPERTS CALL FOR U.S. TO INITIATE WORLD FOOD POLICY

The Federation of American Scientists released today the names of 22 distinguished America agricultural experts who have united to call for the formation of a multilateral system of grain reserves by endorsing the following statement:*

"We the undersigned, call on the next Administration to reaffirm United States support for, and to take action to achieve, a multilateral system of national grain reserves, managed according to common principles and guidelines."

These individuals included:

Martin E. Abel, Professor, Department of Agricultural and Applied Economics, University of Minnesota.

Harold F. Breimyer, Professor, Department of Agricultural Economics, University of Missouri.

Lester R. Brown, President, Worldwatch Institute.

Williard W. Cochrane, Professor, Department of Agricultural and Applied Economics, University of Minnesota.

James H. Cothern, Professor, Department of Agricultural Economics, University of California at Davis.

Howard Cottam, Professor, American University School of International Service.

Brady J. Deaton, Associate Professor, Institute of Agriculture, University of Tennessee.

Raymond O. P. Farrish, Professor, Head of Department of Agricultural Economics and Rural Sociology, University of Connecticut.

Lincoln Gordon, Resources for the Future.

Roger W. Gray, Professor, Food Research Institute, Stanford University.

Jimmye S. Hilliman, Professor, College of Agriculture, Department of Agricultural Economics, University of Arizona.

James P. Houck, Professor, Department of Agricultural Economics, University of Minnesota.

Theodore W. Lead, Professor of Food Marketing, Department of Food and Resource Economics, University of Massachusetts.

Robert G. Lewis, National Secretary and Chief Economist of the Farmers Union.

J. Paxton Marshall, Professor of Agricultural Economics and Extension Specialist, Virginia Polytechnic Institute and State University.

John R. Moore, Professor, College of Agriculture, Department of Agricultural and Resource Economics, University of Maryland.

V. James Rhodes, Professor, College of Agriculture, Department of Agriculture.

Fred H. Sanderson, Brookings Institution.

Philip H. Trezise, Brookings Institution.

Warren L. Trock, Extension Economist, Cooperative Extension Service, Colorado State University.

Melvin Walker, Assistant Professor, Department of Agricultural Economics, Fort Valley State College, Fort Valley, Georgia.

T.K. Warley, Professor, School of Agricultural Economics, University of Guelph (Guelph, Ontario, Canada).

*The petition was promulgated by Lincoln Gordon, Fred H. Sanderson, and Philip H. Trezise.

In a letter to President Carter, Chairman of the Federation of American Scientists George Rathjens said:

"Underlying the concern of the signers over the absence of food reserves are the burdens that the consumer and the world economy would be forced to bear because of increased demand for grain after poor harvests, and the possibility that during poor growing years millions of people might starve.

"In particular, all will recall the explosion of grain prices after the ill-advised bargain basement sale of wheat and feed grains to the USSR in 1972. With reserves depleted by exports to the USSR, prices skyrocketed. As always, the principle victims were the poorest people. But the damage to consumers and to economic well-being worldwide was extensive and lasting.

"The need to rebuild grain reserves is now widely recognized. There is no other way to contain the impact of inevitable fluctuations in supplies. We believe that the responsibility is an international one, and that a system of reserves should be a priority subject for multilateral negotiation. The leadership of your Administration is crucial to the prospects for success."

In releasing the statement Rathjens commented that the concern of these 22 signers reflected the feelings of a major segment of the world economic and agricultural communities, and expressed the hope that this F.A.S. initiative would catalyze a new dialogue both within the U.S. and abroad.

UPDATE ON THE OZONE LAYER

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. MURTHA. Mr. Speaker, for the weekly column which I prepare for the news media in the 12th Congressional District, I recently asked the Library of Congress for an update on our knowledge of the ozone layer and man's effects on its density.

I would like to submit the following report for the RECORD which was prepared by Mr. George N. Chatham, specialist in Aeronautics and Space, Science Policy Division, and a copy of the column I wrote based on this material:

REMEMBER THE OZONE LAYER?

The ozone layer used to be something we all learned about in ninth grade science, and then quickly forgot.

Then, eight years ago, the debate of the Supersonic Transport Plane (SST) raised the fear that man was destroying the ozone layer of air which protects our skin from ultraviolet light. The results of its destruction would be a dramatic rise in skin cancer, eye damage, and skin burns from normal sunlight.

In succeeding years followed reports that spray cans, fertilizer, and refrigerants were also destroying this air layer in a rapid rush to destroy the environment that protects us all. At the same time the British-French Concorde SST began a few flights into Washington.

With the debate now somewhat quieter (and further SST flights into the U.S. being considered), I asked the Library of Congress what the exact status of our information is concerning the ozone layer.

For openers, the Library reported that "no disturbance in the cycle of ozone density has been detected which can be related to man's use or mis-use of the atmosphere."

Although reassuring, the report goes on to note that "determining the presence of a man-related disturbance, unless it is a dramatic one, is extremely difficult and would require continuous measurement of ozone densities . . . for a period of not less than 22 and perhaps as much as 50 years."

In other words, several hundred articles in scientific journals have been published on ozone destruction, some predicting harmful consequences. To date, none have been tested, though, and only the actual monitoring of the ozone layer will provide final proof.

The exclusive Library of Congress report prepared for me came to these conclusions:

1. "Although increasing knowledge of the upper atmosphere is rapidly becoming available, data are not yet available to demonstrate the effects of photochemical pollutants, natural or man-made on the ozone density."

2. "The air of crisis, which was present when the first theories of photochemical-ozone control first appeared, has diminished as increasing information has been gathered. But the concern remains strong and the debate is not likely to be settled" for many years.

3. "In view of the distinguished scientific memberships of several of the review panels which have raised warnings about possible destruction of the ozone layer based upon review of laboratory tests, one must take the issue as a serious concern for public policy . . . We suggest keeping an open mind, neither accepting the more alarming views nor discussing the matter as one of no consequence."

I believe there is an important lesson in this report. That is never to legislate without all the facts, in the air of emotion that surrounded the initial SST debate. The final decision that allowed a few test flights seems fair as far as the ozone layer and the public are concerned.

NATURAL VERSUS MAN-CAUSED VARIATIONS IN OZONE DENSITY

WHAT IS OZONE (O_3)?

Ozone (O_3) is an unstable molecule of oxygen formed (as well as destroyed) by the ultraviolet portion of the solar spectrum. It is thinly dispersed through the atmosphere from the surface up to about 70 kilometers reaching a maximum density between 20 and 25 kilometers. If all of the ozone was collected and reduced to standard temperature and pressure at the Earth's surface, it would form a layer 2½ mm (1/10 inch) thick.

The ultraviolet (UV) light that forms and destroys ozone is absorbed by it in the process, thus prevented from reaching the surface. Of course, not all of the UV is stopped. The amount reaching the surface varies with the ozone density. Ozone density over a single spot on the surface varies by about 25 percent with the seasons and by as much as 300 percent over the Earth's surface. There are also long term variations in which ozone density rises steadily (by as much as 7½ percent per decade in the Northern Hemisphere) and then declines again. The long term fluctuations are not understood but thought to be related to the solar flare cycle. The density rose during the 1960's and early 1970's.

Variations in UV intensity are much greater, peaking at any point on the surface when the Sun is most directly overhead and increasing in intensity toward the Equator. The UV intensity drops rapidly over a given point as the Sun declines toward the horizon.

UV intensity increases as O_3 becomes less dense. Peak UV intensity over the Tropics indicates that O_3 is least dense in these regions. The regions of highest O_3 density are the polar regions, with the Temperate Zones being of intermediate density. Since O_3 density is at no place and time homogenous, increases and decreases in overall concentration are determined by the averaging of

many measurements. Determining the presence of a man-related perturbation, unless it is a dramatic one, is therefore extremely difficult and would require continuous measurement of ozone densities and the simultaneous concentration of the suspected contaminating substance through not less than 2 and preferably 5 or more solar flare cycles, or a monitoring period of not less than 22 and perhaps as much as 50 years.

No perturbation in the cycle of ozone density has been detected which can be related to man's use or mis-use of the atmosphere.

IS MAN ENDANGERING THE OZONE?

Several hundred articles in science journals and magazines have dealt with the ozone destruction issue since 1969, the peak of the debate on the American SST. The preponderance of these papers have proposed (and many forecast) ozone destruction to various degrees of severity resulting from some man-caused pollutant. These pollutants have ranged from the now rejected idea that water vapor created by the hydrogen in burning fuel in the stratosphere would destroy ozone; now nitrogen oxides (NO_x) created in part, by the heat of aircraft engine combustion but predominantly from artificial fertilization of soil, agricultural fungicides containing bromine, to refrigerants, solvents and other chemicals containing chlorine compounds are viewed by many as dangerous.

For the most part, publications on this topic are scholarly papers, often supported by laboratory tests and related to various mathematical models of the atmosphere. Most of these authors have concluded that the density of the ozone is dominated by photochemical reaction, not by other variables, such as ozone creation and destruction cycles by UV radiation. Models of the atmosphere in which ozone density is a function of photochemical reaction show that additional photoreactive substances such as NO_x or ClO, is inserted into the air by man, will increase the rate at which ozone is decomposed, hence, thin the protective ozone shield.

Many of these papers offer their conclusions as facts, without informing the reader that at this time, they are unsupported by empirical proof.

One difficulty with the photochemical theories of ozone control was stated by Dr. Alan J. Grobecker who managed the three year Climatic Impact Assessment Program (CIAP). He notes:

"Any purely photochemical model of this type predicts the wrong sense of the variation in the total vertical ozone column with latitude and season: as ozone is produced by solar irradiance, photochemical models predict ozone maxima in the equatorial regions as a result of the greatest total solar irradiance there. In fact, the data indicate precisely the opposite: there is a minimum in the equatorial regions and relatively little total ozone over the summer pole, with a maximum over the winter pole."

In other words, the distribution of ozone from the Tropics to the poles, as called for by all photochemical models is exactly the reverse of that actually found in nature. The transportation of ozone through large scale air circulation patterns is suggested as a means by which the Earth's ozone distribution could somehow be held reversed. If this condition is found to prevail, then the natural distribution of ozone would not refute the photochemical theories.

Although in the minority, there are other sicentists who object to conclusions, of far reaching economic and social impact, being accepted prior to the time the theoretical work could be supported by empirical testing. Notably caustic among these is Professor R. S. Scorer of the Empirical College of Science and Technology, London. He took the CIAP participants to task in numerous papers and speeches for deriving conclusions from atmospheric models described by CIAP as "primitive" and by Scorer as less than that because they contained gross errors of an obvious nature.[1]

Dr. James P. Lodge, a consultant to the Chemical Specialties Manufacturing Association, a group having a vested interest in aerosol sprays, wrote a number of assessment papers for his client and cautioned them on the CIAP as well as the National Academy of Science findings that ozone destruction could indeed be linked to the effluents of supersonic aircraft, aerosol sprays and possibly other man-inserted substances. "It should be noted," he said, "that these conclusions were based entirely on theory. At the time these reports were completed, no demonstration of any ozone destruction in nature was available to either party" (CIAP or NAS).

Finally, an overview from a principal CIAP participant and director of a follow-on work shop adds another perspective. Dr. Donald M. Hunter[2] lists the basic steps required by the scientific method:

1. Study existing data.
2. Formulate an hypothesis.
3. Predict the consequences.
4. Test those consequences (gather empirical data).
5. Modify the hypothesis as required.

Dr. Hunter says of CIAP and other work to date:

"At present we are in a sense stalled at the end of step 3; in some cases we do not even have enough data to get going on step 1. There has been a lively debate about whose, or what kind of, model is best for predicting SST effects. The reason we were reduced to that kind of thing is simple: we did not have enough data about the actual atmosphere to decide, *and there was nothing left to do but hold a scholastic debate.*" (emphasis added).

In summary, the major positions are the following:

1. Although increasing knowledge of the upper atmosphere is rapidly becoming available, data are not yet available to demonstrate empirically the effects of photochemical pollutants, natural or man-made, on ozone density.

2. In the present state of knowledge, the known increasing average density of ozone, which has persisted over the past decade, does not disprove the concept that photochemical reactions dominate in the control of ozone density. The quantities of substances shown to destroy ozone in theory and in laboratory tests have been released to the atmosphere in steadily increasing amounts over the past four decades. However, two possibilities are: 1) the ozone density, increasing from some natural cause, would have reached much higher densities were the photo-reactant substances not present, and/or; the bulk of the suspect materials has yet to reach the stratosphere in sufficient quantity to have an effect.

3. Almost all of the stratospheric flight, artificial fertilizing, releases of halocarbons from refrigerants, aerosol sprays and agricultural fungicides occurs in the Northern Hemisphere, where the ozone shield persists in a slightly denser layer than in the Southern Hemisphere. This observation would seem to challenge the concept of photochemical control of ozone density but is not adequate to disprove it. There is a possibility that patterns of upper atmospheric circulation tend to cause a hemispheric imbalance in ozone distribution great enough to compensate for Northern Hemisphere losses to photochemical reactants.

4. The air of crisis, which was present when the theories of photochemical-ozone control first appeared, has diminished as increasing information has been gathered. But, the concern remains strong and the debate is not likely to be settled prior to the completion of not less than two full solar flare cycles (22–25 years) or perhaps more.

5. In view of the distinguished scientific memberships of several of the review panels which have raised warnings about possible destruction of the ozone layer based upon review of laboratory tests, one must take the issue as a serious concern for public policy. The purpose of this review is simply to distinguish between these hypotheses, however well thought out and tested in laboratories, and our present factual data on the real atmosphere which to date does not match the hypotheses by seeming to show tendencies the reverse of those postulated. We suggest keeping an open mind, neither accepting the more alarmist views nor discussing the matter as one of no consequence.

YOUTH CAMP SAFETY ACT

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. MOAKLEY. Mr. Speaker, I would like to take this opportunity to express my support for legislation that insures the safety and well being of American children attending summer camps. These youngsters represent our hope and our future. The official attitude of neglect and indifference on the part of camp administrators can no longer be sanctioned. These children must be protected as heirs to the cherished legacy which resides in our American heritage of respect for individual rights, defense of the weak, and compassion for those in need. It is the dynamic spirit of this rich tradition which demands that we take action in this area. As has been the case in the past, our Government must once again protect those not capable of protecting themselves. We must, as public servants, safeguard the rights, the lives, and the happiness of those people whom we represent.

The particular measure of which I am speaking is the Youth Camp Safety Act, H.R. 2518, which I am cosponsoring. This bill directs the Department of Health, Education, and Welfare to draw up minimum standards of health and safety for summer camps for our youth. It is unfortunate to note how miserably most of our States have failed in this area. The Federal Government must now insure that this situation is remedied. Forty-five States have no regulations pertaining to camp personnel or out-of-camp excursions; 17 have no regulations dealing with program safety; 24 do not have any regulations on personal health; 34 States do not regulate day camping. Surely, we in Congress can do something to protect our 2 million youngsters who go to camp every year. Nothing stands between our youth and potential disaster at summer camps.

This year, over 250,000 children will be hurt at camps; most of these injuries can be avoided simply by better supervision or higher standards of camp maintenance and administration. Certainly the $7.5 million authorized in this

bill is a small amount to pay for the prevention of tragedy. The goal of H.R. 2518 is just that. Under this measure, States are encouraged to develop their own plans and adopt their own enforcement procedures. In the meanwhile, nationwide standards will be set by the Federal Government. It is the least that we in the Congress can do.

This piece of legislation passed with amendments in the House last year, but died in the Senate. Hopefully, in dealing with the newer, slightly modified version, we will be able to avoid such shortsightedness this year. This is a measure which deserves passage. While establishing some degree of safety for youth, it does not pose a threat to individuals operating camps. The camp administrators will be faced with no harsh first instance penalties and they will be offered opportunities to consult with officials before inspections are made of their facilities. Indeed, the American Camping Association, representing over 8,000 camps, is one of the many organizations that have endorsed this bill. It is also backed by the Campfire Girls, the YMCA, the Boy Scouts, the Girl Scouts, the Methodist Church Camps, and the National Safety Council. With such highly reputable and widely esteemed groups supporting passage, it is easy to understand that this is vital and necessary legislation.

Soon hearings will be held on the Youth Camp Safety Act before the Committee on Education and Labor's Subcommittee on Compensation, Health and Safety. I strongly hope that affirmative action will be taken in committee on H.R. 2518, and that it will shortly be enacted into law. American families deserve nothing less than summer camps which are safe, healthy, and responsible as well as being enjoyable and worthwhile.

SOUTH DAKOTA LEGISLATURE URGES BETTER RELATIONS WITH REPUBLIC OF CHINA

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. ABDNOR. Mr. Speaker, it is my pleasure today to bring to the attention of the House the text of a resolution adopted by the South Dakota State Legislature. We have heard much in recent months about citizen participation in Government. Yet for years State legislatures have done this very thing and this is a continuation of this tradition of citizen imput through the duly elected officials of the State of South Dakota.

It is particularly important that the message of this resolution be heard in Washington. In recent years, the pressures and strains of international relations have often resulted in policies pursued at the expense of our allies and friends. By this resolution the elected representatives of the legislature of the State of South Dakota are urging this Congress and this administration to keep uppermost in mind the interests of our allies and friends. It is a message that truly needs to be heard in Washington:

SENATE CONCURRENT RESOLUTION No. 3

A concurrent resolution urging the President and the Congress of the United States to maintain close relations with the Republic of China

Be it resolved by the Senate of the State of South Dakota, the House of Representatives concurring therein:

Whereas, the great free nation of the Republic of China has been a continuous and faithful ally of the United States, supplying both moral and economic support to the benefit of both nations; and

Whereas, the Republic of China has made every effort to develop a free enterprise-based democratic form of government on the island of Taiwan; and

Whereas, the cultural interchange between the Republic of China and the United States has benefited both nations; and

Whereas, the Republic of China, during the many years since its founding, has pledged its human and economic resources to the defense of free people everywhere; and

Whereas, the Republic of China remains steadfast in its friendship toward the United States:

Now, therefore, be it resolved, by the Senate of the Fifty-second Legislature of the State of South Dakota, the House of Representatives concurring therein, that the President and Congress of the United States make every effort to develop better social and economic relations with the Republic of China and not in any way detract from our relations with the Republic of China, and that the government of the United States do nothing which would compromise the freedom or security of the Republic of China or its people; and

Be it further resolved, that copies of this resolution be sent to the President, the President of the United States Senate, the Speaker of the United States House of Representatives and each member of the South Dakota Congressional delegation.

TRIBUTE TO LAWRENCE M. STOLLE, YOUNGSTOWN VINDICATOR SPORTS EDITOR, AND DON GARDNER, WKBN RADIO-TV SPORTS ANNOUNCER

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. CARNEY. Mr. Speaker, on Sunday, March 20, 1977, I had the pleasure and the privilege of attending the appreciation dinner in honor of two distinguished gentlemen in the world of sporting news: Mr. Lawrence M. Stolle, sports editor of the Youngstown Vindicator, and Mr. Don Gardner, retired WKBN sportscaster.

More than 400 people, including the Youngstown area's most prominent athletes, coaches, political, civic, business and community leaders attended the testimonial banquet to pay tribute to these outstanding sports reporters. During his long and illustrious career, Lawrence Stolle has covered, with keen insight and an abundance of enthusiasm, virtually every kind of sporting event. At the same time, Don Gardner has been "The Voice" of Youngstown sports for nearly all of WKBN Radio-TV's entire 50-year existence. Together, their vivid descriptions and analyses of sporting events have given countless sports fans a better understanding and appreciation of those events.

More than being a great sports editor and a great sports announcer, Larry Stolle and Don Gardner are great human beings They are known, respected and loved by nearly every citizen of the greater Youngstown metropolitan area. Likewise, their love of sports has been contagious, and has been translated into a love of their fellow man.

Mr. Speaker, Don Gardner and Larry Stolle have received almost every award, honor and commendation available to members of their profession. I would like to extend my hearty congratulations, in this public forum, to Mr. Lawrence M. Stolle and Mr. Don Gardner for the outstanding contributions they have made both to Youngstown sports, and also to the Youngstown community as a whole. I would also like to take this opportunity to insert a portion of the appreciation dinner program and two Vindicator articles in the RECORD at this time for the information and consideration of my colleagues:

THE PROGRAM

God Bless America, Mrs. John DeMain, Sr.

Pledge of Allegiance.

Invocation, Rev. Henry Fabrizio, retired pastor, Our Lady of Mt. Carmel Church.

Dinner, catered by Lou Fusillo.

General chairman, Dr. Frank Bellino.

Welcome address, Jack C. Hunter, mayor of Youngstown.

Resolutions:

1. Ohio State Senate.
2. Ohio House of Representatives.
3. Mahoning County Commissioners.
4. City Council, City of Youngstown.

Remarks—roastees:

1. Dom Rosselli.
2. Norm Berger.
3. Val Carano.
4. Dr. Phil Davidson.
5. Paul Amadio.
6. George Bellino.
7. Joseph (Blackie) Gennaro.
8. James Keifer.
9. Vic Frolund.

Introduction of honorees, Dr. Frank Bellino.

Response, Don Gardner, retired Sports Director, Channel 27—W.K.B.N., Lawrence Stolle, Sports Editor, Youngstown Vindicator.

Benediction, Rev. Joseph Iati, pastor, Our Lady of Mt. Carmel Church.

Music by Frank Sainato.

Banners by John Witek.

COMMITTEE

Dr. Frank Bellino, General Chairman.

Felix Malone, Co-Chairman.

Carmen Ross, Treasurer.

Michael Lariccia, Co-Treasurer.

Dom Conti, Byrd Giampetro, Program and Ticket Chairmen.

400 TO ATTEND FETE HONORING STOLLE, GARDNER THIS EVENING

Upwards of 400 persons are expected to gather in the C.C.D. Center at Mt. Carmel Church this evening to attend a testimonial dinner honoring Vindicator sports editor Lawrence M. Stolle and retired WKBN sports announcer Don Gardner.

Dr. Frank Bellino is general chairman, Dom Conti and Byrd Giampetro program cochairmen on the committee which made arrangements for the event citing two individuals who have played significant roles in the coverage and growth of Youngstown sports for half a century.

All realms of area sport will be represented, and those attending will include business, civic and political leaders of the community as well.

Through the years Stolle has covered almost every conceivable type of major sporting event—baseball, boxing, horse racing, golf, basketball, etc.—and has been cited numerous times for his literary contributions. Most recently he was recipient of an award for his coverage of the 1976 Mahoning-Shenango Kennel Club show, gaining national honors in its category as "the best story of the year."

A golf addict in his younger years, Stolle also was instrumental in helping to organize the Youngstown District Amateur Invitational Golf Association, and has written extensively about this sport in particular along with his regular weekly column. He also has made lasting contributions to the promotion of area horse racing at Thistledown and Waterford thoroughbred tracks, and Northfield's harness racing plant.

Gardner was a prominent "voice" of Youngstown sporting activities for most of WKBN's 50 years in radio and nearly three decades in television. He has always had an ardent interest in Youngstown area athletics and athletes, has rendered valuable behind-the-scenes assistance to many individuals in the sports world as well.

A former teacher in the local school system and at Youngstown State, Gardner has provided play-by-play accounts of hundreds of local and area scholastic football and basketball games, as well as those of the Penguins. In addition, he provided on-the-scene coverage several years of state scholastic track, tennis, baseball and golf events.

His gifted eloquence frequently resulted in Don's being called upon either as a guest speaker or toastmaster for varied functions, and he always seemed to find the time to oblige.

FOUR HUNDRED HONOR STOLLE, GARDNER AT BANQUENT

A crowd of 400 turned out for an "Appreciation Dinner" last night to pay tribute to Lawrence M. Stolle, Vindicator sports editor, and Don Gardner, retired WKBN sportscaster.

The event took place at Our Lady of Mt. Carmel Church Hall.

A number of the area's top sportsmen took part in the program, which followed a "roast" type format, in which speakers' remarks were both complimentary and whimsical and directed to the honored duo.

Taking part in the "roast" were Dom Rosselli, YSU cage coach; Norm Berger of WKBN, Val Carano of the Curbstone Coaches, Paul Amodio, YSU athletic director: George Bellino, golf pro at Tippecanoe, Atty. Henry DiBlasio, Judge Frank Kryzan, Vic Frolund, noted sports historian and Stephen R. Olenick, president of the Baseball Oldtimers.

Mayor Jack C. Hunter gave the welcoming address. Dr. Frank Bellino, general chairman, introduced the honorees.

Both Gardner and Stolle gave sincere talks, describing their appreciation to the group in attendance and those on the various committees.

A number of resolutions were read. The Ohio State Senate, House of Representatives, Mahoning County Commissioners and Youngstown City Council prepared the resolutions honoring Stolle and Gardner for their contributions to the Ycungstown area sports scene.

Assisting Bellino on the committee were Felix Malone, Carmen Ross, Michael Laricia, Dom Conti and Byrd Giampetro.

The Rev. Henry Fabrizio gave the invocation and Rev. Joseph Iati the benediction. Mrs. John DeMain Sr. sang God Bless America.

WHY WE NEED TO "INFLATION-PROOF" THE TAX SYSTEM TO PROTECT PEOPLE'S PURCHASING POWER

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. KEMP. Mr. Speaker, inflation has become a fact of life in America. Unfortunately, many of the Government's policies and institutions were developed in an era when a dollar was worth a dollar, and the value of a dollar could be assumed to be constant, like an inch, a foot, or a yard. Throughout most of American history this was a valid assumption, but since the early 1930's we have come to live with ever-increasing rates of inflation. The corollary to this is an ever-declining value of the dollar.

The institutions which rely on dollar figures in order to measure value, however, have not kept pace with this new reality. In many cases it is impossible to ever accurately compensate for inflation because its effects are not uniform. All prices and wages do not rise at the same rate for many reasons, including imperfect knowledge, contractual arrangements, wage and price controls of various kinds, and so forth. Thus, there will always be gross inefficiencies built into the economic system by inflation, with those distortions becoming magnified with every increase in the rate of inflation.

At this point it should be kept in mind that inflation has only one major cause, namely, an increase in the quantity of money. It is true, of course, that real factors, such as the tremendous increase in the price of oil recently, do affect prices. But it is impossible, I repeat impossible, to have a general increase in the price level without an increase in the quantity of money.

Insofar as the Congress is responsible for this state of affairs, it is due to the tremendous increase in deficit spending over the past several years. This deficit can only be financed to a limited degree by borrowing—which in any case depletes the resources available for capital investment, thus leading to a lack of growth in productivity, which exacerbates the effects of the inflation. Whatever money cannot be borrowed must be created by the Federal Reserve System through monetization of the debt.

Thus a recent study by the Subcommittee on Domestic Monetary Policy concluded that as much as 70 percent of the rise in the Consumer Price Index between 1966 and 1975 can be attributed to excessive monetary growth. Furthermore, this inflation is largely responsible for the current recession. According to the study, for each 1 percent rise in the Consumer Price Index, on average, real gross national product decreased by 1 percent the next year. Likewise, every decrease of 1 percent in the rate of inflation achieved this year can be expected to increase the rate of real GNP growth by 1 percent next year.

The first step toward reestablishment of real economic growth, therefore, must be an end to deficit spending and a reduction in monetary growth. Given the current political situation and the vast number of mandated spending programs already committed, however, this is not likely to occur in the near future.

In the meantime, the Congress can take steps to reduce some of the distortions caused by its inflationary policies. The most important step would be a revision of the tax system to reflect inflationary increases in corporate profits and individual incomes.

Because our tax rates are steeply graduated, the higher one's income the greater the proportion of that income which must be paid in taxes. I do not intend to justify this system, I merely note its existence. Suffice it to say that progressive tax rates do not exist for economic reasons. It is a well-known fact that, all other things being equal, a flat rate of about 21 percent would raise exactly the same amount of tax revenues as all the income tax rates from 14 to 70 percent.

Consequently, when incomes begin to rise in response to the inflation they become subject to higher rates of taxation. If prices have also risen by the same amount, therefore, real income may actually be unchanged, though it is subject to higher tax rates nevertheless. The following tables demonstrate

EFFECT OF 10-PERCENT INCREASE IN TAXABLE INCOME ON NET AFTER-TAX INCOME (1974 RATES)

Before 10-percent increase			After 10-percent increase			Increase in net income	
Taxable income	Tax	Net income	Taxable income	Tax	Net income	Amount	Percent
$1,000	$140	$860	$1,100	$155	$945	$85	9.9
$3,000	450	2,550	$3,300	501	2,799	249	9.7
$5,000	810	4,190	$5,500	905	4,595	405	9.7
$10,000	1,820	8,180	$11,000	2,040	8,960	780	9.5
$20,000	4,380	15,620	$22,000	5,020	16,980	1,360	8.7
$30,000	7,880	22,120	$33,000	9,080	23,920	1,800	8.1
$50,000	17,060	32,940	$55,000	19,650	35,350	2,410	7.3
$75,000	30,470	44,530	$82,500	34,790	47,710	3,180	7.1
$100,000	45,180	54,820	$110,000	51,380	58,620	3,800	6.9
$200,000	110,980	89,020	$220,000	124,980	95,020	6,000	6.7

EFFECT OF 10-PERCENT INCREASE IN TAXABLE INCOME ON TAX LIABILITIES (1974 RATES)

Taxable income	Tax	Income after 10-percent increase	Tax on increased income	Increase in tax	
				Amount	Percent
$1,000	$140	$1,100	$155	$15	10.7
$3,000	450	3,300	501	51	11.3
$5,000	810	5,500	905	95	11.7
$10,000	1,820	11,000	2,040	220	12.1
$20,000	4,380	22,000	5,020	640	14.6
$30,000	7,880	33,000	9,080	1,200	15.2
$50,000	17,060	55,000	19,650	2,590	15.2
$75,000	30,470	82,500	34,790	4,320	14.2
$100,000	45,180	110,000	51,380	6,200	13.7
$200,000	110,980	220,000	124,980	14,000	12.6

Source: The Tax Foundation.

how a 10-percent inflation rate would affect the proportion of taxation paid:

As one can see, the progressive income tax increases the rate of taxation on additional income at higher than the average rate on existing income. This tends to discriminate against those with larger incomes especially.

The result is that the burden of taxation in the United States is continually rising even though real income has not risen significantly. Thus, according to the Congressional Budget Office, every 1-percent increase in the Consumer Price Index automatically increases Federal tax revenues by 1.2 percent. Furthermore, most of this increase falls on individual incomes such that there is a 1.5-percent increase in the individual income tax for each 1-percent rise in GNP.

Since these hidden tax increases are unresponsive to the rate of real growth in GNP and income, they have seriously hampered recovery from the current recession. For example, real GNP in the United States was more than 2 percent lower in 1974 than in 1973. Yet total Federal tax revenues, expressed in real terms, rose by more than 2 percent. This fact has led Prof. Thomas Dernburg to conclude in a recent Joint Economic Committee study that an indexed personal income tax would have relped to avert the collapse of 1974.

Indexing would have meant that the real tax burden would not have risen in response to inflation and that everyone would still be paying the same proportion of their income in tax both before and after the inflation. It is my opinion that implementation of such a system is one of the most important ways in which the Congress can help alleviate some of the most harmful effects of its own inflationary policies. That is why I have introduced H.R. 426 in the current Congress.

I should point out that it is not sufficient to merely eliminate the inflationary distortion on personal income taxes. Allowance must also be made for the overstatement of corporate profits caused by inflationary increases in the value of inventories and the increase in replacement costs for plant and equipment which are not compensated for by depreciation allowances. Therefore, I have included a provision for indexing depreciation, as well as indexing personal income tax rates.

To be sure, this is only a first step. Ideally, an indexing feature should compensate for all distortions in capital gains and remove the bias against saving as well.

Take, for example, the person who buys a house. He may be able to sell that house for three or four times what he paid for it after only a relatively few years. But this does not reflect true profit because this increase is largely due to inflation. Even someone with a very moderate income may suddenly find himself paying a rate of tax on this illusory profit usually reserved for the truly rich. Nominal capital gains, in fact, may actually be a loss after inflation is factored in. Yet the Tax Code does not recognize this fact.

As I said earlier, the first priority must be a reduction in inflation through the adoption of enlightened fiscal and monetary policies. In the meantime, it is grossly unfair and detrimental to economic growth for the Government to continue deriving increased tax revenues which do not reflect an increase in real income. Indexing would be a first step in this direction.

CARTER ELECTION PROPOSALS DRAWS WARNING

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. FRENZEL. Mr. Speaker, today's lead editorial in the Washington Post demonstrates a thoughful analysis that I would like to see more frequently. It describes most of the Carter administration's election proposals as "chancy" and reminds that "at some point the system, . . . starts to choke the politics."

The editorial follows:

THOSE CARTER ELECTION REFORMS

"Political reform" is a nice, all-purpose term whose definition—and possible drawbacks—must be found in the details. A good example is the package of election changes proposed by President Carter and Vice President Mondale this week. Some of their recommendations strike us as being sound. These include a constitutional amendent to abolish the archaic electoral college in favor of direct popular election of the President and revision of the Hatch Act.

The Hatch Act is a good example of a well-intentioned law that has become stifling. Mr. Carter proposes enabling most federal employes, except those in acutely sensitive posts, to engage in political activity if they choose. He would also—essentially—maintain protections against political coercion and partisan abuse of federal offices. We're not sure whether or how Congress can draft a statute meeting all these goals. But generally we favor the effort to promote both governmental integrity and individual rights—including the freedom not to take part in politics.

The rest of the Carter-Mondale proposals strike us as being a good deal chancier and more open to objection. We will reserve for the moment comment on his proposal to extend public financing to congressional elections, an idea that is fraught with dangers and complications and one we intend to address separately soon. For now we prefer to take Mr. Carter's recommended improvements in the method of registering voters as an illustration of the way in which the pursuit of unexceptionable democratic values can lead the best-intended reformer into self-defeating results.

The Carter-Mondale plan for election-day registration raises questions of the limits of the law as a stimulus to political reform. The plan's purpose is to encourage more citizens to vote. That is a worthy aim—but registration does not seem to be a major barrier any more. Since 1960 the opportunity to vote has been vastly expanded through the Voting Rights Act, the lowering of the voting age to 18, shorter residence requirements and simpler registration systems in many states. And voter participation has been dropping nonetheless. Non-voting is most rife among the young, the less affluent, the less educated and those who lack strong community ties. This is more an indictment of recent politics than a reflection of the registration laws.

That is not to say that polling-place registration isn't worth a broader try. Messrs. Carter and Mondale, however, are not content to recommend this plan to other states. They want to make it a full-fledged federal program, mandatory in federal elections, strengthened by federal approval of states' voter identification rules, and sweetened by federal grants to the states—with supplemental funds for "voter outreach" and other activities. All in all, it's one of those nice-sounding but awful ideas. Anybody can guess what would come next: affirmative action programs for precinct workers, "outreach" demonstration projects, charges that federal funds are being used as walking around money, and more rules and restrictions and "reforms." And each such step erodes the traditional role of the states and stifles free, competitive political activity.

The problems of the current campaign financing law should have taught us all that government can only do so much to promote better politics. President Carter has had a few glimpses of this himself. Indeed, he now wants to modify the system of public financing of presidential contests in order to revitalize state and local campaigning that involves a national ticket. He also thinks the reporting rules could be simplified. Yet, at the same time, he has proposed this new national-registration program and endorsed public financing for congressional elections. All this suggests to us that Mr. Carter and his allies, in their zeal to improve the political system, are not fully mindful of the fact that at some point the system—sure as death and taxes—starts to choke the politics.

BUTTERING UP INFLATION—CARTER DAIRY SUPPORT MILKS EVERYBODY

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. FINDLEY. Mr. Speaker, the new price support level for milk, just announced by the Carter administration, is a billion dollar budget buster that will raise prices to consumers by $800 million a year, increase tax-supported annual Government costs by at least $400 million, and trigger a whole new round of inflation. It will also complicate our trade relations with Europe. The decision can be accurately characterized as buttering-up inflation. The higher Carter support clearly milks everybody.

It is difficult to believe that a President who is truly committed to balancing the budget and easing inflation would even consider raising price supports for milk to 83 percent of parity when price supports are already too high. Apparently, the increase reflects partial compliance with a campaign promise he made as candidate in the Wisconsin primary in order to get dairy lobby support—a promise for which the rest of the country must now pay, and pay dearly.

I am especially saddened by the fact that the milk support increase comes at a time of enormous dairy surplus—about a half-billion pounds in Government hands; and a time when administration rhetoric is at a high pitch regarding a commitment to consumers. The commitment is hard to find in the milk decision.

I submit for the RECORD a recent Washington Post editorial and news article which appropriately describe the Carter assault on food shoppers and taxpayers. These news stories certainly reflect my sentiment on the milk support increase; and I believe, more importantly, they

sum up the American public's view as well:

[From the Washington Post, Mar. 22, 1977]

BUTTERING THE DAIRY FARMERS

The new Secretary of Agriculture, Bob Bergland, is about to raise dairy support prices—and, by all hints and portents, he's going to raise them far too high. It is taking awhile, evidently, for Mr. Bergland to get used to the idea that he's no longer a congressman from Minnesota. He's reportedly on the verge of moving the price up to $9 for 100 pounds of milk. The present support price is $8.26, and most of the increase would get passed right along to the consumer.

Why make a fuss over a minuscule seven-tenths of a cent per pound? Because this country's exceedingly productive dairy herds give us 115 billion pounds of milk a year. That tiny seven-tenths of a cent means something over $800 million a year to consumers. But that's not the full cost to the public. The Agriculture Department maintains the price by buying surplus milk products to take them off the market. That would cost more than $400 million this year, at the present support level. Raising it to $9 would add another $350 million or so over the coming year—and that's on top of the aforementioned $800 million from consumers.

That kind of an increase in support threatens to bust President Carter's budget. It promises to fan up inflation at the grocery store—adding available damage to the unavoidable food price increases already resulting from this year's strange weather. If the $9 support price goes through, it will raise real doubts about the Carter administration's grip on economic policy.

The principle of price supports is a good and useful one, in dairy products as in other basic foodstuffs. Milk production fluctuates, and farmers are entitled to insurance against severe and unexpected drops in prices. Supports benefit consumers as well, for they guarantee a steady and adequate flow of milk to market. The issue is where to set the price. The Council on Wage and Price Stability, which is the White House's early warning system for inflationary threats argues that even the present support price is a shade too high. Other specialists argue that it's a bit too low, in view of rising costs of production. But there's hardly anyone, except perhaps some of the dairymen, who think that it ought to be as high as $9 a hundredweight.

[From the Washington Post, Mar. 23, 1977]

MILK SUPPORT PRICE GOING UP 6 TO 8 CENTS A GALLON AT RETAIL

Agriculture Secretary Bob Bergland announced yesterday he will raise government milk supports 6 cents a gallon April 1 in hopes that higher prices this year will prevent shortages and even higher retail prices in the future.

The increase is expected to cause retail prices to jump 6 to 8 cents a gallon. Rep. Paul Findley (R-Ill.) said it likely will cost consumers $800 million a year.

Bergland estimated it will add $3,000 to the annual cash receipts of a typical small dairy farmer with a 40-cow herd.

Questioned at a news conference, Bergland said President Carter approved the 9 percent increase—instead of a 5 percent hike recommended by the National Milk Producers Federation—"partly" to keep a campaign promise to Wisconsin dairy farmers.

Bergland said drought in major Western and Midwestern dairy regions boosted cattle feed costs "significantly."

"Our concern is that in the absence of any increase in this modest price support, we would see heavy attrition in the dairy industry, the result of which would be extremely high prices sometime during the next year or two," he said.

The government price support currently is $8.26 per hundred pounds of milk. It will go to $9 on April 1, and Bergland said it will be reviewed again for possible adjustment in six months.

The government has been spending $330 million a year to buy up dairy surpluses. The increase may boost that to $700 million.

Sen. William Proxmire (D-Wis.) said Bergland's decision to raise supports to about 83 percent of parity wasn't enough. He said it's below the 85 percent commitment made by Carter during the election campaign.

Proxmire said the cost of producing milk in Wisconsin is more than $10 per hundred pounds.

Government experts said the increase likely will cause retail milk prices to climb 6 cents a gallon, but Patrick Healy, secretary of the National Milk Producers Federation estimated the retail increase at 8 cents.

THE 59TH ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. ANNUNZIO. Mr. Speaker, March 25 is the 59th anniversary of the Declaration of Independence of Byelorussia. We in the U.S. Congress have been elected by a free people and therefore we have an obligation to take this opportunity to focus the world's attention on the conditions under which the Byelorussian people are forced to live and speak out most energetically in behalf of their freedoms.

Excerpts from a statement on the occupation and oppression of Byelorussia by Soviet Russia issued by the Byelorussian Congress Committee of America follows:

OCCUPATION AND OPPRESSION OF BYELORUSSIA BY SOVIET RUSSIA

At the end of the First World War in March 1917, the Czarist Russian Empire collapsed. At this favorable situation, simultaneously with other Captive Nations. Byellrussia restored its national sovereignty.

After an extensive preparatory activities by many various organizations, the First All-Byelorussian Congress assembled in Mensk on December 14, 1917. It consisted of 1,872 delegates, elected democratically and covering all the ethnographic Byelorussian lands. This Congress was a national Constituent whose aim was to decide the future statehood of Byelorussia. Bolshevik-Russian delegates were in a small minority and were not able to influence the Congressional decisions. After the Congress had chosen independence for the Byelorussian state, the Soviet Russian troops dispersed it on December 18, 1917.

The next day, the Congress reconvened and delegated its rights and power to the Council of Congress. On March 25, 1918 this enlarged Council proclaimed independence of Byelorussian Democratic Republic. This Republic was recognized de jure by Austria, Estonia, Czechoslovakia, Finland, Georgia, Latvia. Lithuania, Poland, and Ukraine. It was acknowledged de facto by Bulgaria, Denmark, France, and Yugoslavia.

Having established its power in the U.S.S.R., the Bolshevik government of Moscow in 1929 drastically changed its relative liberal N.E.P. into a Communist policy of severe national persecution and economic exploitation. The first Five Year Plan inaugurated in 1928 signalized this basic change. It started with annihilation of Byelorussian leaders. Thousands of scholars, writers, teachers, state officials, and even students, were arrested, deported or murdered in jails Subsequently, Byelorussians were constantly removed from all leading posts and replaced by non-Byelorussians.

At this time forced collectivization of agriculture was introduced into B.S.S.R. The Byelorussian peasants were distinguished by their traditional attachment to private property. They offered firm resistance to collectivization. The Moscow government applied a mass and ruthless terror. The more prosperous peasants, over 1.5 million, were arrested and deported to the concentration camps in the forests of Siberia and deserts of Kazakhstan. In this way the collectivization of the individual farms was conducted in B.S.S.R. over several years and completed only in 1937, four years later than projected in the 1930 plan.

The waves of mass arrests, shootings and deportations were systematically passing over Byelorussia.

After occupation of Western Byelorussia in 1939 the Soviet government of Moscow immediately deported more than half of million of its population to the concentration camps of Siberia and Kazakhstan.

During the Second World War the Soviet Russian diversionist partisans were murdering, as a rule, Byelorussian teachers, officials, writers, priests, and all relatives of those, who were occupying any position in national Byelorussian life.

Despite mass terror and huge devastation of Byelorussian population by Soviet Russia, the Second All-Byelorussian Congress, held on June 27, 1944 in Mensk, the activities of the Byelorussian Central Council, and the armed fight of Byelorussian National Guard against Soviet Russia for independence of native country, gave the best proof for real desire of Byelorussian people. Therefore, after occupation of Byelorussia in 1944, the Russian government used its mass bloody reprisals on Byelorussian people. Again there took place mass deportations, public hangings, and shootings of Byelorussian national and cultural leaders, workers and peasants.

During years of occupation the Moscow government has annihilated over 6 million of the Byelorussian population.

On March 13, 1938, by a governmental decree, the study of the Russian language was made obligatory in schools of Byelorussia, and other national republics of the U.S.S.R. Immediately a final Russianization of schools was pursued. The language of instruction in all higher schools and in about all secondary and grammar schools was made Russian. The Russian language was introduced in cultural life, administrative offices, commerce, communications, armed forces, etc.

The Moscow government commenced to liquidate the cultural achievements of the Byelorussian people, created in the historical past. Many architectural and religious monuments: cathedrals, churches and monasteries, were ruined completely. Even after the 2nd World War at the Freedom Place in Mensk, the Roman Catholic Cathedral and a mediaeval firehouse tower of the specific Byleorussian architecture were destroyed. The buildings in Byelorussia were erected in the uniform present Russian fashion.

The names of towns, streets, institutions, schools, etc. are dedicated to the Russians or international Communists. The university in Mensk is dedicated to Russian Communist Lenin; the military school in Mensk is dedicated to Russian czarist general Suvoroff; the prospect in Mensk is dedicated to Russian poet Pushkin. In Byelorussian towns and cities many monuments were erected and dedicated to the Russian personalities.

It is hard to assume that the genocidal policies of present Soviet Russian government will be able to eradicate the Byelorussian people with their desire for national independence. The historical past is convincing that at the suitable opportunity

Byelorussians will again open the military fight for their liberation.

Mr. Speaker, the members of the Bielarusian Coordinating Committee of Chicago, Ill., have also informed me of their concern that the proper designation of Bielarus has not been generally known, and I quote from the committee's letter:

Though our native country is known as Byelorussia in English, we reject this terminology as incorrect and confusing our people with the Russians. In the first place, we do not like the "erzatz"—one-half of the word being the original Bielarusian while another half a Russianized English translation of the ending "rus," which properly means Ruthenia and not Russia. Secondly, the English name for Bielarus was not the choice of the Bielarusian people but was introduced by the Russians, and presumably Stalin, when the United Nations was established and Bielarus was allowed to become a signatory member. We, therefore, feel that the words Bielarus in its original form for the country and Bielarusian and/or Bielarusians for the people are best suited and most proper and should be used to describe our native country and the people as opposed to the terms of Byelorussia and Byelorussians, which in our opinion, should be used only when speaking of the present Russian imposed Soviet regime in Bielarus.

Mr. Speaker, I am privileged to join those Americans of Bielarusian descent in the 11th Congressional District, which I proudly represent, in the city of Chicago, and all over the Nation as they speak out in common concern for the plight of the people of Bielarus and rededicate themselves to hasten the day when human dignity and justice may again flower in Bielarus.

ELIOT JANEWAY DISCUSSES THE NEED FOR CAPITAL INVESTMENT AND THE DISTURBING BEHAVIOR OF LOAN MARKETS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. KEMP. Mr. Speaker, one of the most widely recognized aspects of the current economic recovery is the sluggish level of capital investment by industry. Under normal circumstances one would expect that there should be heavy demand for business loans as companies expand to take advantage of the more favorable economic climate. This, in turn, would normally express itself in higher interest rates. Manifestly, this has not occurred.

The Carter administration's position on this is that the economy is still not moving sufficiently fast enough and needs another quick-fix to get it moving again. They argue that this can be accomplished by stimulating more demand, which will then lead to an expansion of plant capacity—which allegedly is underused.

I do not believe this is the proper diagnosis for the current situation and I think that this can be demonstrated by an examination of loan market activity. As I have noted, there is little demand for commercial credit at this time. Yet banks are known to be overflowing with funds, as a result of extraordinarily high levels of saving by individuals. I believe that these two facts are closely interrelated and result from the same thing: a lack of confidence.

I think that there are two reasons for this lack of confidence: A fear of renewed inflation and the lack of incentive caused by a crushing burden of taxation—especially on capital. As a result, large amounts of money are being loaned out for very questionable and risky ventures, such as loans to third world nations. Or else they are simply going into the Treasury to cover the vast Federal deficit. Not enough money is going into business investment, and the country as a whole is the loser because this will eventually reflect itself in higher inflation, as production bottlenecks appear, and, ultimately, a lower standard of living. This is why I have spoken out so forcefully on the need for tax rate reductions, the need to control Federal expenditures and the need to remove excessive regulations and disincentives to production.

Eliot Janeway, the noted stockmarket analyst, has examined some of these issues and come to similar conclusions. I offer the following article of his to my colleagues:

MONEY MARKETS PROVE THIS SLUMP'S DIFFERENT

(By Eliot Janeway)

"Money, money everywhere, but not a dollar to use" is this year's American variant of the Ancient Mariner's lament which every schoolchild memorizes.

This winter saw the greatest inflow of idled cash into family savings accounts ever. Those who have been oversaving all along are doing so even more anxiously now. Country savings institutions don't know what to do with the spare cash cascading across their tellers' windows. But they're certainly not putting it out into loans to finance new construction.

In a normal slump, the country's mortgage-lending institutions come under pressure to put any buildup of new savings deposits to work. The workings of the supposedly inexorable law of supply and demand explain the source of the pressure.

As the supply of idle money builds up in savings deposits, interest rates are expected to fall. As a matter of fact, this is exactly what was happening last year—until the President's ill-conceived and ill-timed $30 billion recovery program scared the money markets to death.

Generally, once the mortgage-lending institutions find themselves earning less from risk-free Treasury securities, they become more willing to take chances on new construction loans. But now the backlash from the new inflationary scare the President has provoked is having the reverse effect.

The country's mortgage-lending institutions have been dumfounded to discover that they can earn more from riding risk-free in Treasury paper than taking chances on doing business with the builders.

The country's trend-making businesses are making a good thing out of sitting tight, too. The same expectation of lower interest rates is supposed to prod corporations into switching back into a "spend and invest" stance after months of slump.

But still further proof that this slump is different is coming from the money markets; and corporate treasurers are sharing the surprise of mortgage bankers. The jump in interest rates on risk-free Treasury paper is rewarding them for using their idled cash to lend money to the government instead of putting it to work by making commitments that will put people to work—not just 40 hours a week, but overtime, as the economy requires if it is to do the job of sharing the wealth only it can multiply.

The grim lament of the Ancient Mariner applies to the original version of the standard Washington Operation Tanglefoot which the new administration has dreamed up. It is proposing to borrow $30 billion to pass out as a stimulant: Some of it to those who already have too much; and the rest to those who are in urgent need of much more than the government is likely to offer, much less to give.

The irony of it is that the government will borrow this extra cash from the very businesses to which it is offering handouts.

The winter statistics being carried into the March opinion stream go far to explain this apparent perversity in the marketplace.

Albert Sindlinger, the well-known surveyor of consumer attitudes and preferences with whom I have been collaborating for years, is the source of the first revealing statistic. Sindlinger's February findings indicate that 22 percent of all American families with telephones listed in their own names—there are millions more unable to afford this basic necessity—do not own savings accounts.

The second telltale statistic came from the Federal Reserve Board, which is the official scorekeeper of consumer credit. It seems that January broke a variety of records for consumer borrowings.

After months of a normal slump, a surge in consumer borrowing is generally great good news; auto installment sales are the biggest ingredient of this important total, and an increase in car buying on time heralds recovery.

This January's consumer borrowing surge, however, was racked up despite a startling drop in new auto installment paper written—and when people weren't going shopping. The subsequent dampening of auto sales has confirmed this advance indication that no new auto boom is on. It also leaves no doubt that this slump is different.

The kind of borrowing that more than offsets the drop in auto paper explains why. Personal cash loans to families needing the money to pay bills made the difference; and it was the largest increase in borrowing for necessities ever. In fact, it's a wonder that savings accounts were up despite the squeeze on families in trouble.

Sindlinger finds that $10 billion have been withdrawn from savings accounts to pay bills so far this year; and that 3 million stockholders have dumped their holdings for the same reason.

As matters stand, the people who have more than enough money to trigger recovery are afraid to use it; and the people who are in trouble because of this strike of capital can't borrow to keep afloat.

The government won't straighten out this tangle by borrowing more from the people who are already lending money to it. Selling them confidence in putting their money to work would be easier and cheaper—and, incidentally the only way to recovery.

HON. FRANCES PAYNE BOLTON

HON. DELBERT L. LATTA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 22, 1977

Mr. LATTA. Mr. Speaker, I rise to pay tribute to the late Frances Payne Bolton, former Republican Representative from Ohio and one of the most distinguished,

innovative and visionary women ever to serve in the U.S. Congress.

Born into a wealthy industrial family, Frances Bolton dedicated her life to improving the lot of those less fortunate than herself. During nearly three decades in the U.S. Congress, she became a champion of social, hygenic, educational, and industrial programs, pushing through reforms to guarantee equal opportunities for all Americans, and encouraging similar initiatives around the world.

Through the Bolton Act, this distinguished Ohioan prodded Congress to establish a $5 million U.S. Cadet Nurse Corps which trained 124,000 nurses. Those nurses, in return for their training served in the Armed Forces or in essential civilian positions, and proved to be an invaluable resource to American forces during World War II. Though Mrs. Bolton, a widow and mother of four children, was ahead of her time in urging fair treatment for women, she was also concerned that traditionally female domains be opened to men, who gained access to the military nurse corps through her efforts.

As ranking Republican on the House Foreign Affairs Committee, Frances Bolton was extremely active in international affairs, and among many of her firsts was the first woman appointed as a congressional delegate to the United Nations General Assembly. In 1955, she was the first Congresswoman ever to head a mission abroad, and soon afterward was a U.S. delegate to the British-American Parliamentary Conference. At different times she also served as an alternate delegate to the 1966 NATO Parliamentary Conference in Paris, a U.S. delegate to the Ghana independence ceremonies, and a U.S. delegate to the 1966 Council of Europe in Strasbourg, France. Chairman of the House Subcommittees on the Mideast and Africa, Mrs. Bolton played a crucial role in promoting black educational and social projects in both America and Africa, and in 1965 was honored by an award from Operation Crossroads Africa.

The wife of the late U.S. Congressman Chester Castle Bolton, Frances Bolton originally joined the ranks of Congress to fill the unexpired term of her late husband, but because of her own outstanding initiative, talent, and leadership was elected to 14 full congressional terms. Serving from 1940 through 1969, she was half of the first mother-son team in Congress, with her son Oliver Payne Bolton elected as a Representative from Cleveland from 1953 through 1957, and from 1963 through 1965.

It was my privilege to serve with Frances Payne Bolton as a member of the Ohio delegation to the U.S. Congress, and it is a great pleasure today to pay tribute to her as a fine legislator who spanned social, geographical, and ethnic barriers to become an inspiration far beyond her very grateful and proud State of Ohio.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Friday, March 25, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

MARCH 28

9:00 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriation
HUD—Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration.
1224 Dirksen Building

Commerce, Science, and Transportation
Communication Subcommittee
To resume hearings to inquire into domestic communications common carrier policies (i.e., telephone, computer, etc.)
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To continue hearings on proposed authorizations for fiscal year 1978 for ERDA's budget as it pertains to nuclear power.
3110 Dirksen Building

Governmental Affairs
Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To resume hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

11:00 a.m.
Foreign Relations
Foreign Economic Policy Subcommittee
To resume oversight hearings on major international economic issues facing the United States.
S-116, Capitol

1:30 p.m.
Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

2:30 p.m.
Foreign Relations
African Affairs Subcommittee
To receive a briefing in closed session from CIA Officials on internationalization of local conflicts in Africa.
S-116, Capitol

MARCH 29

9:00 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

9:30 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Rural Development
To hold hearings on medicare reimbursements for rural health care clinics.
322 Russell Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Office of Human Development.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Energy and Natural Resources
Energy Production and Supply Subcommittee
To continue hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Foreign Relations
To hold hearings on the nominations of Joseph D. Duffey, of the District of Columbia, to be Assistant Secretary; Herbert J. Hansell, of Ohio, to be Legal Adviser; Matthew Nimetz, of New York, to be Counselor; all of the Department of State; to be followed by consideration of the above nominations and the nomination of W. Michael Blumenthal, of Michigan, to be U.S. Governor of the International Monetary Fund and U.S. Governor of the International Bank for Reconstruction and Development; a Governor of the Inter-American Development Bank and U.S. Governor of the Asian Development Bank and African Development Fund.
4221 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To continue hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

11:00 a.m.
Foreign Relations
Foreign Economic Policy Subcommittee
To continue oversight hearings on major international economic issues facing the United States.
S-116, Capitol

1:30 p.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the National Technical Institute for the Deaf; the American Printing House for the Blind; Gallaudet College, and Howard University.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on the nomination of Joan Bucker Claybrook, of Maryland, to be Administrator of the National Highway Traffic Safety Administration.
5110 Dirksen Building

MARCH 30

9:00 a.m.
Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear Secretary Bergland.
1224 Dirksen Building

Energy and Natural Resources
To hold hearings on the nomination of Guy Richard Martin, of Alaska, to be an Assistant Secretary of the Interior.
3110 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the National Park Service.
1114 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
235 Russell Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Agricultural Production, Marketing and Stabilization of Prices
To hold oversight hearings on problems of flue-cured tobacco farmers.
322 Russell Building

Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of the Export-Import Bank, and Overseas Private Investment Corporation.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Social and Rehabilitation Service.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
To mark up S. 305, to require issuers of securities to maintain records, and to prohibit the payment of overseas bribes by any U.S. business concern.
5302 Dirksen Building

Energy and Natural Resources
Subcommittee on Public Lands and Resources
To consider S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Governmental Affairs
To continue hearings on S. 591, and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To continue hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

10:30 a.m.
Commerce, Science and Transportation
To consider the nomination of Michael Pertschuk, of the District of Columbia, to be a Federal Trade Commissioner.
5110 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Foreign Relations
Subcommittee on Foreign Economic Policy
To meet in closed session to receive a staff report on U.S. Foreign Economic Policy Issues: The United Kingdom, France, and West Germany.
S-116, Capitol

Rules and Administration
To resume consideration of S. Res.'s 5 through 12, proposing several changes in the Senate rules, principally with regard to Rule XXII (cloture); and to consider other committee business.
301 Russell Building

MARCH 31

9:00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.

Foreign Relations
Foreign Assistance Subcommittee
To mark up legislation on international financial institutions and bilateral development assistance.
4221 Dirksen Building

Select Nutrition and Human Needs
To continue hearings to examine the relationship between diet and health, to receive testimony on the need for fiber in diet.
Until: 1 p.m. 3302 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Bureau of Outdoor Recreation and the Land and Water Conservation Fund.
1114 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Select Committee on Small Business
To hold hearings on the nomination of Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration.
424 Russell Building

10:00 a.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the defense establishment, to hear public witnesses.
1223 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Social Security Administration.
S-18, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for pub-

lic works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for National Highway Traffic Safety Administration.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
To hold hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.
5302 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Energy and Natural Resources
Subcommittee on Public Lands and Resources
To consider S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on national water policy in light of current drought situations.
4200 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

11:00 a.m.
*Foreign Relations
Subcommittee on Arms Control, Oceans and International Environment
To hold hearings on S. Res. 49, favoring international agreement to a treaty requiring the propagation of an international environmental impact statement for any major project expected to have significant adverse effect on the physical environment.
4221 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Office of Civil Rights, Inspector General, Policy Research, and General Management.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

3:30 p.m.
Foreign Relations
To receive a briefing (in closed session) from officials of the Central Intelligence Agency on the general world situation.
S-116, Capitol

APRIL 1

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.
5302 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Commerce, Science, and Transportation
To hold hearings on the nominations of Charles Linn Haslam, of North Carolina, to be General Counsel, and Frank Alan Weil, of New York, to be an Assistant Secretary, both of the Department of Commerce.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To hold hearings on S. 419, to test the commercial, environmental, and social viability of various oil-shale technologies.
3110 Dirksen Building

11:00 a.m.
Foreign Relations
International Operations Subcommittee
To hold hearings on proposed 1978 authorizations for the International Broadcasting Board.
4221 Dirksen Building

APRIL 4

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To resume hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Treasury on funds for New York City financing.
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Commerce, Science, and Transportation
To hold hearings on S. 263, to provide for interim regulatory reform of the Interstate Commerce Commission, Federal Trade Commission, Federal Power Commission, Federal Communications Commission, Civil Aeronautics Board, Federal Maritime Commission, and Consumer Product Safety Commission.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Conservation and Regulation
To hold oversight hearings to determine status of national efforts in energy conservation.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To resume hearings on proposed authorizations for fiscal year 1978 for Energy Research and Development Administration.

SENATE—*Friday, March 25, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 12 meridian, on the expiration of the recess, and was called to order by Hon. JOHN MELCHER, a Senator from the State of Montana.

PRAYER

L. R. Elson, D.D., offered the following prayer:

The Chaplain, the Reverend Edward

Eternal Father, may Thy spirit brood over the Earth to allay fears and raise the hopes of mankind that there may yet come a just and righteous order after the

pattern of Thy kingdom. Be with the emissaries of this Nation and the representatives of other nations in their consultations, to the end that conciliation and concord with justice and freedom may prevail. Arm us with the sinews of a righteous people that we may wage peace in accord with Thy kingdom purposes. Spare us from mistaking angels of death for doves of peace. Cultivate in each of us the desire and the will to do justly, to love mercy and to walk humbly with our God that Thy kingdom may begin in us.

Grant Thy grace to the President and all whom we have set in authority over us that they and we may be obedient to Him who is King of Kings and Lord of Lords, in whose name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 25, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JOHN MELCHER, a Senator from the State of Montana, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. MELCHER thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Thursday, March 24, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SECURITIES AND EXCHANGE COMMISSION AUTHORIZATIONS

Mr. ROBERT C. BYRD. Mr. President, there is one measure which has been on the unanimous-consent calendar for 2 days now, I believe. It is Calendar Order No. 48, S. 1025.

I ask unanimous consent that the Senate proceed to its consideration.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1025) to amend the Securities Exchange Act of 1934 to increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year 1977.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill (S. 1025) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 35 of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) is amended by striking the amount "$55,000,000" before the words "for the fiscal year ending September 30, 1977" and inserting in lieu thereof the amount "$56,500,000".

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-56), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

In the Securities Acts Amendments of 1975 (Public Law 94-29), Congress authorized to be appropriated $55 million for the Securities and Exchange Commission in fiscal year 1977. Of this amount, only $53 million has actually been appropriated.

The Commission served notice to the appropriate Committees of the Congress in January 1977, of its needs for additional appropriations for the current fiscal year. The request for additional appropriations necessitates legislation raising the current level of funds authorized to be appropriated.

Originally, the Commission requested an increased budget authorization to a maximum $58 million to accommodate two supplemental appropriations which have been submitted to the Congress. The first is an additional $2.4 million needed to pay for the cost-of-living wage increase granted Federal employees last October. The second supplemental request involved $2.6 million, which the Commission claimed was the minimum additional amount needed to assure the continued efficient operation of the Commission.

After further analysis and consultation with the appropriate authorizing committees of the Congress, the Commission reduced its second supplemental budget request and recommended to the Committee that its authorization ceiling be increased from the present $55 million to $56,500,000.

The nature and purpose of the legislation

The Commission has initiated an ambitious, and costly, effort to modernize its automated data processing and record system. Through increased reliance on micrographics, the Commission expects the anticipated benefits will far outweigh the actual cost. With the completion of the modernization program, the Commission will be better able to meet effectively its responsibilities under the securities laws, as well as improve public access to information contained in public files.

The Committee believes this supplemental request is essential to the successful completion of the Commission's modernization program and also necessary to enable it to meet its obligations under mandatory and unanticipated budget items.

The following information furnished by the Commission, details the nature and purpose of the request to raise the authorization ceiling from the present $55 million to $56,500,000:

Current appropriation	$53,000,000
Supplemental request relating to October pay increase	2,390,000
Supplemental request relating to executive pay increase	230,000
Supplemental request relating to modernization program and miscellaneous operating expenses	880,000
Total authorization	56,500,000

The Committee unanimously recommends the enactment of legislation to accomplish this purpose in order that the necessary funds can be appropriated.

ESTIMATED COST OF THE LEGISLATION

This legislation will increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year 1977 from $55 million to $56,500,000. Assuming the full amount of the increased authorization is subsequently appropriated, the costs incurred in carrying out the bill will be $1,500,000.

HUMAN RIGHTS

Mr. ROBERT C. BYRD. Mr. President, in recent weeks President Carter has spoken several times in support of basic human rights. The President's statements on this vital issue have met with considerable criticism from several quarters, notably among some of the nations that have the least admirable record on the subject of human rights.

There has been some conjecture that President Carter's stance on the question of human rights might even jeopardize our continuing arms limitation talks with the Soviet Union.

I fully support President Carter's expressions of concern for human rights. The hope and the dream of generations of Americans, a hope and dream for which millions of Americans have fought and many thousands have died just in this century, has been the extension and strengthening of basic human rights, wherever such rights have been denied or suppressed.

President Carter has magnified a position that has been distinctly American from the earliest days of this Nation. We live in an era in which tyranny and dictatorship are apparently reasserting themselves in country after country.

I believe that future Americans will take pride in the fact that our President spoke words of hope and light in a time of increasing darkness and oppression.

With regard to the Soviet reaction and the arms talks, I do not believe that any arms talks would be very promising at best if they were to be jeopardized or if they were to collapse on the pretext that the United States took a stance in favor of human rights.

We have heard a good bit about the theory of "linkage" in connection with the arms talks. I believe in the theory of linkage, but only in a sort of reverse concept. I personally believe that there is a linkage between human rights and the keeping of an arms limitation agreement. A nation whose people are free to speak out on matters that affect their own lives is a nation that will be more prone to fulfill its commitments under an arms control treaty.

To speak out on matters as precious as human rights is not to be equated with intervention in a nation's internal affairs. The Soviet Union has never hesitated to speak out on matters that we have, from time to time, considered to be internal to our own country. Speaking out on matters as precious as human rights is a reflection of a principle so basic to American life that it has made this Nation the refuge for the oppressed for more than two centuries.

The more open a society the greater the likelihood that it will live up to its commitments.

It is my strong belief that an arms agreement which is the product of negotiations between the United States and the Soviet Union is far more likely to be a good and lasting one in a society where there can be open dialog and dissent than would be the case if that society is closed, if dissent is suppressed, and if repression is practiced against those individuals who feel compelled to freely speak their minds and their beliefs.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

Mr. BAKER. Mr. President, I have two matters that I wish to bring to the attention of our colleagues.

ENERGY POLICY

Mr. BAKER. Mr. President, I invite the attention of Senators to a column by Evans and Novak in this morning's Washington Post. Many of the points which are covered in this article deserve repeating.

I endorse the authors' opinion that the United States cannot be quickly turned into an energy efficient society such as Sweden, however, conservation must become a very important part of our energy policy, as we are too well aware, the voluntary and mandatory energy conservation measures invoked in the 3 years since the oil embargo have not resulted in a dramatic change in our habits of energy consumption, and the road to energy efficiency will be a slow and difficult one.

A second point brought out in this column that deserves repeating is that power utilities and electric manufacturers are unwilling to embark on a major nuclear development program because they are fearful that our natural uranium reserves will be depleted around the year 2000 A.D. The recent Ford-MITRE report entitled "Nuclear Power Issues and Choices" reached the conclusion that there will be sufficient uranium reserves to fuel light water reactors well into the next century. Mr. President, I hope the authors of the Ford study are correct, but I must point out that many other experts disagree with their conclusion.

Considering the doubts about the extent of our reserves of natural uranium which are raised in this editorial, I urge Senators to carefully consider the potential consequences before the breeder reactor option is foreclosed. I particularly concur with the opinion expressed in this column that we should at least continue building the fast breeder reactor at Clinch River, Tenn. This demonstration project serves as a safeguard for the future and a reassurance to the U.S. nuclear industry that we will not let our reactors run out of fuel. I ask unanimous consent that this editorial be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

ENERGY POLITICS

(By Rowland Evans and Robert Novak)

The nagging question for President Carter one month before his energy message to the nation is whether political success in avoiding confrontation with passionate environmentals over nuclear and coal production will yield political failure in providing the nation's energy needs.

Contrary to Carter's warnings of painful sacrifices ahead, there is no intent of radical energy conservation that would change the American way of life. Consequently, to become invulnerable to a future oil embargo requires the production of much more energy from coal and nuclear sources. But coal and nuclear power are taboos for environmentalists who backed Jimmy Carter for President and are now strategically placed in his administration.

The Carter answer is to appease the environmentalists with prestigious government jobs and conservation measures while at the same time going slow on the nuclear and coal programs. But is the President going too slow? Those who say yes, mainly in industry, are privately telling energy czar James Schlesinger that the plan now forming may not even put a dent in the frightening energy deficit.

Final decisions on Carter's first major program are not yet in concrete. Nor do those who have read sketchy first drafts of the President's message feel it approaches the clarion call to action that they want. What's more, decision-makers and speech-drafters must confine themselves to two unspoken political realities that circumscribe Carter on energy.

The first is that not even a President so popular as Carter can convert his energy-spoiled nation into an energy-saving China or Sweden. While Cadillacs and Corvettes may soon disappear and home insulation become mandatory, Americans will not let anyone drive them from auto and home into bus and apartment. One Schlesinger aide feels that "inconvenience" is a better description than "sacrifice" for what Carter is cooking up.

To maintain a faintly reduced American way of life without vulnerability to the international oil cartel, the need for new energy—from coal and nuclear sources—is obvious. But that runs into the second political reality: President Carter will not reenact President Ford's head-on charge against the environmentalists.

The conscious plan of Dr. Schlesinger is to trade off energy conservation for environmentalist acquiescence in coal-nuclear development. Just to make sure, the President is naming prominent environmentalists to key positions in the Justice Department and the Council on Environmental Quality.

Nevertheless, the administration's energy operatives are getting cold feet about relaxing environmental standards for coal production. The clear downgrading of coal leaves only one other option: nuclear power. But that brings Carter in conflict with his own campaign description of nuclear power as "a last resort" and with his intense fear of nuclear arms proliferation caused by supposedly peaceful production of plutonium.

The Carter-Schlesinger answer is to press ahead with nuclear energy production through so-called "conventional" means but not through reprocessing spent uranium into plutonium (which then could be used for weapons). More specifically, the decision has been all but pinned down at the White House to stop developing fast breeder reactors that burn reprocessed plutonium and yield additional plutonium. This compromise satisfies all but radical anti-growth environmentalists.

But it certainly does not satisfy power utilities or electric manufacturers, fearful that natural uranium will be depleted around the year 2000 and unwilling to embark on a major nuclear development program for only 25 years. One important utility executive told us that, as news of tentative decisions has spread from Washington, he and his colleagues over the past two weeks have devolved from cautious optimism to deepening gloom.

Their pleas, however, have not moved the decision-makers. When Schlesinger was told that General Electric Co. was on the verge of quitting the nuclear power business, he replied with a brief but salty expletive. In truth, dispassionate experts disagree among themselves over the immediate need for fast breeder development.

Considering that doubt, one objective energy consultant believes that Carter should at least continue building the $2 billion fast breeder reactor at Clinch River, Tenn., both as a safeguard for the future and to reassure industry. Yet, it seems dead beyond all hope. The reason: Clinch River has become a hated symbol for environmental activists.

Clearly, then, the real politics of energy goes beyond the President exhorting fellow citizens to drive smaller cars, pay more for gasoline and insulate homes. Although they may not end up in the final draft April 20, two lessons have emerged from its preparation: first, production rather than conservation is the toughest obstacle for an energy program; and second, the biggest sacrifice of all may be sacrificing an environmentalist scruple or two.

TVA CONSERVATION PROGRAM

Mr. BAKER. Mr. President, for the past several years the energy shortage has occupied much of the time of the policy institutions of Federal Government. There has been considerable debate over the national security, economic, environmental, and consumer impacts of our energy situation, and the evolution of clear policy guidelines has been slow.

In the past few months there has been a growing consensus that energy conservation—reduction of unnecessary energy usage—must play a substantial part in our national energy policy. The per capita consumption of energy in the United States is higher than can be justified by economic or social needs. While it is true that a sufficient supply of energy is essential to economic stability and growth, it is also clear that Americans waste incredible amounts of energy.

I am certain that the implementation of a Federal conservation effort will raise fundamental philosophical and political issues which will be debated at length in coming months. But I want to take this opportunity to applaud the efforts of one Federal agency which has begun practical action to bring about conservation already.

The Tennessee Valley Authority yesterday approved a no-interest loan program to assist low-income families weatherize their residences. Loans will be made to homeowners who heat with electricity to purchase insulation for attics and walls.

The loans may be repaid as a part of regular energy bills over a period so that the monthly charge will reflect a savings to the consumer as the result of reduced usage. The loans will be furnished out of the proceeds from the sale of power by TVA in the same manner that capacity improvements are financed.

The concept of this loan program should serve as an example to other energy producers. An investment in eliminating waste energy use is as sound as an investment in expanding capacity. To the consumer the result is decreased energy costs and enhanced property value. To the Nation the result is sounder management of energy resources.

The Tennessee Valley Authority deserves applause for undertaking this farsighted program of energy conservation.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no other requirements nor requests for time, and I yield back the remainder of my time under the standing order.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there is one nomination that I should like to call up at this time. Both of the distinguished Senators from Tennessee (Mr. BAKER and Mr. SASSER) have expressed interest in this nomination. I ask unanimous consent that the Senate go into executive session to consider the nomination under "Department of Justice."

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The clerk will state the nomination.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of W. J. Michael Cody, of Tennessee, to be assistant U.S. attorney for the western district of Tennessee.

Mr. SASSER. Mr. President, I commend the President of the United States on the appointment of Mr. Michael Cody as U.S. attorney for the western district of Tennessee. Mr. Cody is a native of Memphis, Tenn., and was educated in the Memphis public schools. He graduated with distinction from Southwestern University in Memphis in 1958. While in undergraduate school at Southwestern, he served as president of the student body at Southwestern University.

His legal training is excellent. He is a graduate of the University of Virginia Law School, and holds the degree of doctor of jurisprudence, awarded to him in 1961 by that distinguished law school.

He practiced law in the city of Memphis for 16 years, with the prestigious law firm of Burch, Potter & Johnson. He has served his city well as councilman at large on the Memphis City Council.

Mr. President, I think that the appointment of this young man as U.S. attorney for the western district of Tennessee can give us all hope in the future of our Government in this country. He is seeking this post at considerable personal financial sacrifice to himself; and I must say that it is to his credit and to the credit of the State of Tennessee that he did, at this point in his career, enter the Government service, at a time when he must make financial sacrifice to do so.

I might add that Mr. Cody is married and he has four lovely children, and not the least of his assets is his lovely wife, Nancy Cody.

So, Mr. President, I again commend the President on this excellent appointment. I am confident that Mr. Cody will serve in his capacity as U.S. attorney for the western district with the same distinction that he has served the people of the city of Memphis and the city council and with the same distinction that he has served at the Memphis bar.

Mr. BAKER. Mr. President, I was pleased to learn today that President Carter has forwarded to the Senate for consideration the nomination of W. J. Michael Cody for the position of U.S. attorney for the western district of Tennessee. Mr. Cody is a fellow Tennessean and is a respected member of the bar of Shelby County.

The position for which Mr. Cody has been nominated is a demanding one, and therefore it is of utmost importance that it be filled by a person who is strong, self-confident, public spirited and who has the integrity to perceive that the ultimate constituency of this office is the public interest.

The capabilities of the person holding the office of U.S. attorney becomes even more critical in the context of the tremendous problems presently being encountered by the country's legal institutions. Only through strong leadership by those in policy making positions such as that of U.S. attorney can our legal system continue to provide the prompt and equal justice which the citizenry of our country demands.

I have visited with Mr. Cody and am convinced that he is aware of these problems and is willing to confront them. I therefore feel he is an excellent choice by the President and will make an outstanding U.S. attorney.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objeciton, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TRANSFER OF SENATE RESOLUTION 105 TO THE UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there is a measure on the calendar that can be passed by unanimous consent. I ask the clerk to place it on the unanimous-consent calendar for consideration at a later date. The measure is Calendar No. 54, Senate Resolution 105.

The ACTING PRESIDENT pro tempore. The measure will be so transferred.

Mr. ROBERT C. BYRD. Mr. President, I do not believe that unanimous consent is required to place it on the consent calendar.

The ACTING PRESIDENT pro tempore. The Senator is correct; as majority leader, he has the power to transfer measures.

Mr. ROBERT C. BYRD. I thank the Chair. Mr. President, I have nothing further at this time.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Oklahoma (Mr. BARTLETT) is recognized for not to exceed 15 minutes.

AIR DEFENSE IN EUROPE

Mr. BARTLETT. Mr. President, the Carter administration, after only 1 month's deliberation, has proposed drastic cuts in procurement of Chaparral and Stinger surface-to-air missiles—SAM's—and in Hawk launchers at a time when shoring up the air defenses of our ground forces in Europe is one of the most important tasks confronting the U.S. Army. Given the history of rising costs and delays which have plagued our follow-on Roland and Patriot air defense missiles planned for the 1980's, this cut in all our production SAM's except the obsolescent Redeye is another example of muscle-cutting in the defense budget. The 60-percent reduction in funds requested for the Stinger missile will result in a 71-percent decrease in the number of Stinger missiles received—258 instead of 890. The proposed 40-percent cut in Chaparral funds will have a similar effect. The entire buy of six Hawk battery sets—nine launchers each plus radars and fire control computers—designed to plug holes in NATO defense when operational launchers are being repaired, has been canceled. Funds for other equipment related to tactical air defense have also been reduced in the Defense Department request. Either the Carter administration does not understand the importance of air defense on the modern battlefield or it does not recognize the present weaknesses in our air defenses in NATO.

If war should come to Europe, it is most likely that NATO forces would face a blitzkrieg style attack from Soviet air and ground forces launched with little or no warning, perhaps disguised in the beginning as a training exercise. As massive Soviet ground formations would advance under the protective cover of their own mobile air defense systems, Soviet ground attack aircraft would pound our defending forces. The need for effective antiaircraft weapons which stay with the ground forces was learned at great cost by the Soviet Union in World War II.

The Middle East war of 1973 revealed to Western observers that the Soviets had developed a superb air defense network consisting of mobile surface-to-air missiles and radar-controlled automatic cannon. The United States, with its tradition of maintaining absolute air superiority, has been slow to develop mobile air defense artillery. However, the development of advanced Soviet ground attack aircraft such as the SU-19 Fencer with the Warsaw Pact has forced the NATO nations to upgrade their air defenses in light of the probability that NATO will not be able to

maintain complete air superiority during the critical early days of war.

American forces in Europe rely upon the mobile, all-weather improved Hawk missile for its low- to medium-altitude SAM protection against Soviet aircraft. The Hawk missile has incorporated many improvements during its long history, and is once again undergoing a program to update its capabilities against advanced electronic countermeasures. However, the major fault with the Hawk missiles deployed in Europe has been that maintenance problems result in gaps in our air defenses. Sixty percent of the improved Hawk missile electronics consists of outdated items such as vacuum tubes that break down frequently. Further, the Hawk, which was deployed in 1972, was designed to be overhauled every 5 years. The Army has explored numerous methods for increasing Hawk readiness, including hiring more civilian technicians and rebuilding equipment onsite, but has come to the conclusion that the most cost-effective means of keeping gaps out of our European air defenses is to replace launchers undergoing repair with spare launchers not normally deployed. The Carter administration decision not to purchase the additional Hawk launchers and radars for this role only insures that our thin SAM defenses in Europe become thinner and thinner until replacement systems are hopefully deployed in the 1980's.

The Chaparral missile system is the U.S. Army's fair weather, low altitude air defense system deployed in Europe. Basically, it is the Air Force Sidewinder heat seeking missile mounted on a tracked vehicle and launched from the ground. In this makeshift role, the Chaparral has suffered from operational problems which have necessitated continual modifications. Nevertheless, the Chaparral is our standard quick reaction surface-to-air missile, and it is vital to ground forces on the move. The decision by the Carter administration to reduce the number of Chaparral missiles manufactured this year will not only increase the unit cost, but far more importantly, it will reduce the basic combat load for missile launchers deployed in Europe and for reinforcements.

During the wars in Vietman and the Middle East, military planners discovered the importance of providing infantry with a shoulder-fired weapon capable of shooting down attacking aircraft. The Soviet SAM-7 was fairly successful in this role, and the American Redeye, deployed in Europe, remains a threat to Russian aircraft. Still, the Redeye missile is vulnerable to countermeasures and can engage enemy aircraft only after they have completed their attack since the Redeye tracks the heat from their tailpipes. The new Stinger missile, however, can attack enemy aircraft from any angle and has overcome all of the problems associated with the Redeye. Because of its low cost, excellent capability, and immediate availability, the decision by President Carter to delay procurement of 632 of the 890 Stinger missiles which would have been purchased this year is particularly harmful, especially since production had already been deferred from last year.

While the Carter administraiton proposes major cuts in our programs to improve the readiness of our present tactical air defense network, NATO commanders are watching the Soviet Union deploy a new generation of surface-to-air missiles designed to accompany their armoured formations into battle. The Soviet combat-proven SA-6 is now being supplemented by the all-weather SA-8 which is extremely effective against high performance aircraft at low altitude. Also, the new SA-9 is being introduced to improve Soviet air defenses during good weather. The U.S. Army, however, still awaits the Roland, which is being modified from a European design, and the Patriot, which is the final result of the long delayed SAM-D program.

Mr. President, I reserve the remainder of my time for the distinguished Senator from Kansas (Mr. DOLE).

The ACTING PRESIDENT pro tempore. The Senator from Kansas has 5 minutes.

MIA ISSUE NOT YET RESOLVED

Mr. DOLE. Mr. President, I have followed with interest the Woodcock Commission's visit to Hanoi, as well as the actions and statements that followed that visit.

I certainly commend the Commission for the effort made, particularly Representative G. V. MONTGOMERY, who has probably more knowledge and more experience in dealing with the problem of POW's and MIA's than any other Member of Congress.

Frankly, I am disappointed with the apparent lack of progress in gaining an accounting for missing American servicemen. The Woodcock Commission returned essentially emptyhanded, yet the administration appears determined to proceed with plans for normalizing relations with Vietnam.

I am pleased that President Carter acted early in sending an executive commission to Vietnam to raise the subject of an accounting. But the Commission's visit, in fact, produced no tangible accounting for 2,500 missing Americans in Southeast Asia. It did acquire the remains of 11 U.S. casualties who had already been identified by the Vietnamese Government last September. But those bodies could and should have been returned long before now.

The Commission also garnered a pledge that the Vietnamese will set up a study mechanism to seek further information about missing American servicemen. It seems to me that this is hardly indicative of substantive progress. The study mechanism should have been set up long ago in accord with a pledge the Vietnamese made to us under the Paris peace agreement in 1973.

My chief concern at this point is that momentum appears to be building toward early normalization of U.S. relations with Vietnam, without tangible progress toward the accounting we have been seeking. The Vietnamese seem almost eager to gain membership in the United Nations and to implement trade channels with the United States. But we have reduced the matter of the MIA accounting from a precondition, to an unobtrusive footnote of normalization talks. In my opinion, it is vital that the United States sustain an active effort to achieve progress toward an accounting before agreeing to trade, aid, or formal diplomatic ties with Vietnam.

It is disturbing to me that the Vietnamese did not provide our Presidential Commission with new information on some missing Americans. The Department of Defense is said to have documented evidence of many other Americans who were known to have been alive or died in North Vietnam. The Commission report itself states that:

> Although they (the Vietnamese Government) almost certainly have at least some additional MIA information available, they did not provide it to the commission during its visit.

This, in my opinion, is not progress and cooperation.

HUMAN RIGHTS

We have been hearing a lot lately about the subject of human rights, and the impact this factor will have on U.S. foreign policy. I suggest that the Carter administration apply the same standards to improvement of relations with Vietnam that are being applied to our ties with Eastern Europe and Latin America. What we have witnessed, and are continuing to witness in the Vietnamese Government's attitude is a callous disregard for the basic human rights of American MIA's and their families. The withholding of this information is a violation of the rights to an accounting of the fates of American servicemen—a humane and compassionate obligation to family and friends, and to the memory of the servicemen themselves.

At a time when this administration addresses itself so eloquently to the matter of universal compassion for human rights, it seems only fitting that the same criteria of judgment needs to be applied to Vietnam's treatment of the MIA issue.

SUPPORT FOR ACCOUNTING UNDIMINISHED

Only 4 weeks ago, the Senate went solidly on record as supporting a full accounting for missing American servicemen in Southeast Asia. I can say with confidence that the Congress and the American public are not going to forget the MIA accounting. Nor are they going to quietly accept a reinstatement of diplomatic relations and bilateral trade in advance of substantive progress toward an accounting.

We have waited too long, and labored too hard for an honorable accounting, and we are not going to be satisfied with less than full Vietnamese compliance on this issue.

I would add that my disappointment extends to the apparent lack of progress in obtaining cooperation from Laotian and Cambodian officials on missing American servicemen in those countries. The Cambodians have thus far refused to even meet with American representatives on the matter, and Laotian officials indicated to the Woodcock Commission that they considered American aid a precondition to accounting efforts. A sizable number of missing servicemen are lost within this territory, and I urge the administration to continue to press for contacts and cooperation with Laotian and Cambodian officials on the accounting matter.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, the Senate will resume consideration of Senate Resolution 110, which is the ethics resolution.

The clerk will state the resolution.

The legislative clerk read as follows:

A resolution (S. Res. 110) to establish a code for official conduct for the Members, officers and employees of the U.S. Senate, and for other purposes.

The ACTING PRESIDENT pro tempore. Under the previous order the Senator from Rhode Island (Mr. PELL) is recognized for not to exceed 15 minutes, to engage in colloquy with the Senator from Wisconsin (Mr. NELSON).

The ACTING PRESIDENT pro tempore. Does the Senator suggest the absence of a quorum?

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be charged equally to both sides on the resolution until Senator NELSON arrives.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 1 minute without the time being charged against Mr. PELL.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TIME-LIMITATION AGREEMENT—S. 1051

Mr. ROBERT C. BYRD. Mr. President, there is a measure on the calendar, Calendar Order No. 51, S. 1051, on which I believe we have been able to work out a time agreement. This is a bill to amend the U.S. Grain Standards Act with respect to recordkeeping requirements and supervision fees. I ask unanimous consent that, at such time as the measure is called up and made the pending business before the Senate, there be a time limitation on debate of 2 hours, to be equally divided between Mr. HUDDLESTON and Mr. DOLE; that there be a time limitation on any amendment of 1 hour; a time limitation on any amendment in the second degree, debatable motion, or appeal of 30 minutes, and likewise with respect to a point of order if such is submitted to the Senate for discussion; and that the agreement be in the usual form.

Mr. BAKER. Mr. President, reserving the right to object, I shall not object. My calendar notes that Senator TOWER has amendments to this bill. I know of no others. That agreement has been cleared on our side. We have no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The text of the unanimous consent agreement is as follows:

Ordered, That during the consideration of S. 1051 (Order No. 51), a bill to amend the United States Grain Standards Act with respect to recordkeeping requirements and supervision fees, and to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service, and for other purposes, debate on any amendment in the first degree shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill, and that debate on any amendment in the second degree, debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manpower of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment, debatable motion, appeal, or point of order, the time in opposition thereto shall be controlled by the Minority Leader or his designee: *Provided further*, That no amendment that is not germane to the provisions of said bill shall be received.

Ordered further, That on the question of the final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Kentucky (Mr. Huddleston) and the Senator from Kansas (Mr. Dole): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

The ACTING PRESIDENT pro tempore. The Senator from Rhode Island is recognized.

Mr. PELL. Mr. President, the committee resolution, subparagraph 4(g), on page 13, requires that the Comptroller General should "provide assistance in completing any reports required under this rule when requested by a Member, officer, or employee of the Senate." I ask the manager of the bill, what is the extent of the assistance which the Comptroller General is required to provide, and does that assistance extend to the maintenance of records necessary to provide information for filing the report?

Mr. RIBICOFF. No, not at all. I think he can just tell you how to fill out the report and be of help. Frankly, so far as I am personally concerned, I would ask my certified public accountant to fill out mine. I want to be frank with the Senator.

Mr. PELL. Then, it is not foreseen that the Comptroller General will provide any actual tangible assistance to Members or staff in keeping records or in filling out the forms.

Mr. RIBICOFF. I think he would give advice. I cannot see him doing all the detailed work or having his staff do it. He would give advice to those that might ask him, but I do not anticipate that keeping records is within the purview of his duties and obligations.

Mr. PELL. It is evident, I believe, that the reporting and disclosure requirements will impose additional costs on Senators, officers of the Senate, and many Senate employees who are required to file reports. Is it the intention of the committee that these costs be paid out of the pockets of those who are required to file?

Mr. RIBICOFF. Well, I would anticipate that that would be a personal expense of the Senators or the staff who are required to do so. They could do it themselves, of course, which would not be an expense, or they would have to get assistance and pay for that assistance.

Mr. PELL. In that regard, section 301 of the resolution would require that the Committee on Appropriations report, within 120 days, legislation to adjust the amounts and permissible uses of senatorial allowances so the allowances will be adequate to defray "necessary and appropriate expenses incurred in connection with the operation of a Member's office."

For the guidance of all of us, would the manager of the resolution consider the expenses required to comply with this resolution to be necessary and appropriate expenses which should be included in any adjustment of Senate allowances?

Mr. RIBICOFF. If the Senator is just asking me personally, I would not. I cannot speak for the committee. With respect to the preparation of a personal financial disclosure statement it seems to me that that would be more or less in the nature of the expenses one would have if one had a CPA fill out an income tax return. However, the Committee on Rules could consider that and make provision for that. I would leave that entirely within the purview of the Committee on Rules when they start their consideration.

Mr. PELL. Under Senate Resolution 110, Senators and staff members and officers of the Senate will be required to file disclosure statements listing assets, liabilities, securities transactions, and other items. For many, there could be considerable expense involved because of the complexity of the statement. I ask the managers of the bill whether expenses incurred in the preparation of these reports will be deductible for income tax purposes.

Mr. RIBICOFF. First, I should say that, obviously, a definitive answer on this question can only be given by the Internal Revenue Service after review of the individual situation. However, the forms submitted by Senators under this resolution will be necessary to comply with requirements placed on all Senators in their capacity as Members of the Senate. I therefore believe that any expenses involved would be ordinary and necessary business expenses and deductible for tax purposes. They would not be personal expenses or political expenses, but an expense related to the requirement of being a Senator.

I do believe these expenses would also be analogous to expenses incurred in the preparation of a tax return, which expenses are deductible under the current law. Therefore, I believe that Senators would certainly be justified in taking a tax deduction for any expenses incurred in preparing information required to be submitted under Senate Resolution 110.

Mr. PELL. I thank the manager of the bill for that scant consolation on the problems involved in filling out all these forms, and I appreciate his views very much.

Now, another question: The committee resolution requires the disclosure of the amount and identity of each source of unearned income. It also requires the disclosure of the identity and category of value of each item of personal property and requires the disclosure of identity and category of value of real property. So, essentially, it requires disclosure with regard to property and income. What we are trying to see here is whether there may be any strains on loyalty, any tugs and pulls or potential conflicts of interest. Is it not sufficient to know the property and, if a person has 100 shares of General Electric, is it not enough to know that he has 100 shares or whatever it is of General Electric, not to have to file also the information with regard to income from the General Electric? I submit that one could omit the provision required in the filing of the income as long as you have the value of the assets and save the time and money and expense of the accountant's fees.

Mr. RIBICOFF. If the Senator is talking about conflict of interest, income certainly is a factor. It is one thing, of course, where you have a listed security on the New York Stock Exchange and you know what the dividends are on that stock and you also know its value. But there are many items of property with respect to which there is nothing listed and no one would know what the income on that property is or what the value is unless the Member actually states it. So I do believe that, in making disclosure with respect to property, it is also necessary to have the income. We try to do that by way of category, too.

Mr. PELL. But as long as the property is a matter of public record, what difference does the income make? In other words, if you have the property listed there, 1,000 shares of General Electric, why does one have to add that the income, in another item, is x? Or if it is real estate that is not producing any income, as long as he lists the real estate, then it is a matter of record. If it is producing a large income or a small income, it still does not make any difference.

Mr. RIBICOFF. All I can say is that this is a decision that the Nelson committee made, and I do believe it was unanimous. I think we get into many problems because there are so many items of property where the income is not obvious, and it would become important to indicate the relative magnitude of a potential conflict.

(At this point, Mr. NELSON assumed the chair.)

Mr. RIBICOFF. That is the reason we have listed two items, the items of income and the items of property.

I cannot be of much help to the Senator. I cannot give the interpretation he wants. It can only be changed by way of amendment before the Senate. But I can only give the Senator the philosophy that the committee adopted when we felt we had to list both the value of the property and a descripiton of the property, as well as the income from the property.

Mr. MELCHER. Will the Senator yield?

Mr. PELL. I yield.

Mr. MELCHER. When this Senator was in the chair, the Senator from Rhode Island addressed the question to the manager of the bill regarding the responsibility of the Comptroller General in assisting either a Senator or a staff member who is covered under the terms of the bill in reporting on their financial disclosure forms.

It was the intent, as I understood, of the Nelson committee during the mark-up of the bill that that type of service would be provided by the Comptroller General to those who requested it, much in similar vein as the Internal Revenue Service would provide for a taxpayer who asked questions in filling out forms.

I want it clearly understood if that is the response of the manager of the bill.

Mr. RIBICOFF. The Senator is correct. Like the Internal Revenue Service, the General Accounting Office would assist in filling out the form, but the GAO would have no responsibility to keep the records or to attest to the accuracy of the records.

If the Senator or Member came to them with his records, with his information, and asked for assistance, they would give the assistance, as would the Internal Revenue Service. They would not be required to authenticate the actual records or the information given by the Member to the GAO. GAO would assist in giving advice as to filling out the form.

In that, the Senator is correct.

Mr. MELCHER. Will the Senator continue to yield to me?

Mr. PELL. I yield again to the Senator from Montana.

Mr. MELCHER. I thank the Senator from Connecticut for his response, but I am a little bit troubled about discussion of expense involved in the use of a CPA.

While it may be advisable and necessary and acceptable to Members of the Senate to use a CPA's services in ascertaining whether the reports are accurate and true and valid, to infer that the staff members might also need the services of a certified public accountant goes a little bit too far, and it is specifically why I was anxious. In the final version of the bill, we did direct the General Accounting Office to provide services so that staff members may have expert advice on how to keep these records.

Mr. RIBICOFF. If the Senator misunderstood it—or if I did not make it clear—I should like to correct the record.

Certainly, there is no requirement for either a Senator or the members of his staff to hire a CPA or an accountant. That was entirely up to the person.

I was trying to make the point that, personally, I would get a CPA. I use one to make out my income tax return, and as long as he is making out my income tax return, I would also make sure that all the information he had was correct and I would ask him to make out my disclosure statement as required by this measure.

This is only something that I would do personally, but in no way should it be inferred that that would be a requirement.

A member of the staff, his spouse, or any assistant are certainly competent to complete the financial disclosure statement and there is no requirement at all—inferred, implied, or required—that one get a CPA to do it.

Mr. MELCHER. I quite agree with the Senator from Connecticut, and I will follow the same procedure. But the first step I will tell my certified public accountant will be to consult with the General Accounting Office so that he will understand what the forms mean.

Mr. RIBICOFF. I hope that the Ethics Committee will try to make the forms as clear and as uncomplicated as possible for the benefit of everybody involved.

Mr. MELCHER. I hope the Ethics Committee and everyone else will follow this colloquy as established in the record.

Mr. PELL. I was delighted to hear the Senator from Connecticut say that some forms would be provided, so there would be some simple way of organizing the information that is required, and then we could turn that over to whoever prepares our income tax return and they would fill it in.

Would the form be similar to the forms presently used by the Committee on Ethics?

Mr. RIBICOFF. I cannot say. My secretary told me that the Ethics Committee has set an organization meeting for some time next week. It is a completely new Ethics Committee, under the chairman, Senator STEVENSON and the ranking minority member Senator SCHMITT. At that time, I imagine this will be discussed.

We have a considerable amount of time to develop forms. I would hope we will exercise our responsibility to get help and advice and try to have as clear and precise and as simple forms as we can possibly develop.

Mr. PELL. I think the present forms are pretty good and, frankly, I believe if they were made public it would provide the public disclosure needed. But we would not have to fill out two sets of forms, I would hope, the previous ones we have, plus these?

Mr. RIBICOFF. Just in May of 1978 for the period covering this calendar year. The first filing under the new code, May 15, 1978, only requires disclosure under the new rule for the period from October 1 to December 31, 1977.

We will be required, consequently, to fill out forms covering the period from January 1, 1977, to October 1, 1977, under the financial disclosure rule which presently exists.

Mr. PELL. The forms we fill out now are on a calendar year basis.

Mr. RIBICOFF. Yes.

Mr. PELL. I hope these required in this bill are on a calendar year basis.

Mr. RIBICOFF. They will be, except for the first filing, which only is required to cover income and holdings for the period from October 1, 1977, to December 31, 1977. Only the last 3 months of the year.

Mr. PELL. I see.

Mr. RIBICOFF. One would have the option of filing the whole year, if he wanted.

Mr. PELL. Right.

Mr. RIBICOFF. In the filing due May 15, 1977, that is in less than 2 months, he would be filing a statement covering last year, that is 1976. The proposed new code does not affect the filing due on May 15, 1977 at all.

Mr. PELL. So it will be on a calendar year basis?

Mr. RIBICOFF. That is right.

Mr. PELL. So we at least can save a few nickels in preparing reports.

Mr. RIBICOFF. Absolutely correct.

As a member of the new Ethics Committee, I am listening to this colloquy as well as talking. I will convey it to the other five members of the Ethics Committee, and I hope we can work out as simplified and clear a form as possible.

Mr. PELL. I was talking to an accountant about it because I am not sure there was any great accountant input into this legislation. It is a complicated matter, but will be rendered much easier, we hope, if it is done on the calendar year basis and the same information compiled for tax returns can be used.

Mr. RIBICOFF. I thank the Senator from Rhode Island. I look at this problem exactly the same way.

Mr. PELL. I thank the Senator from Connecticut very much for this colloquy.

UP AMENDMENT NO. 99

Mr. RIBICOFF. Mr. President, I ask unanimous consent to offer a brief amendment necessary to correct a printer's error, and I send the amendment to the desk.

The ACTING PRESIDENT pro tempore. Without objection, the amendment will be considered at this time.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. RIBICOFF) proposes an amendment.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 46, line 23, insert the following: "(3) by amending subsection (c) (1) to read as follows:

(c) With the prior consent of the department or agency concerned, the Select Committee may (1) utilize the services, information, and facilities of any such department or agency of the Government, and"."

Mr. RIBICOFF. Mr. President, The paragraph I would like to add was in Senate Resolution 110 as reported by the Nelson committee, but was left out of substitute amendment No. 65 to Senate Resolution 110 because of a printer's error.

The amendment would place in the resolution the language in Senate Resolution 110 found at page 46, lines 12 through 17. The amendment would permit the Select Committee on Ethics, with the prior consent of the department or agency concerned, to utilize the services, information, and facilities of any such department or agency of the Government. This amendment permits the select committee to utilize the services of the Congressional Research Service or other Government agencies not now mentioned in Senate Resolution 338.

In the substitute amendment, that paragraph was left out, and we want to put it in to make sure that the Congressional Research Service can be of assistance.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Connecticut.

The amendment was agreed to.

AMENDMENT NO. 103 (AS MODIFIED)

The ACTING PRESIDENT pro tempore. Under the previous order, the pending question is on amendment No. 103 by the Senator from New Hampshire (Mr. DURKIN).

The amendment is as follows:

On page 26, line 8 through line 11, strike all of the language in (c)(2) and insert the following "income from a family-owned farm employing no more than ten employees if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;".

The ACTING PRESIDENT pro tempore. There is no time remaining on the amendment.

Mr. RIBICOFF. Mr. President, I suggest the absence of a quorum. I do not see Senator DURKIN on the floor.

The ACTING PRESIDENT pro tempore. Does the Senator ask unanimous consent that the time be charged equally?

Mr. RIBICOFF. Charged equally on the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I have a series of technical and clerical amendments to amendment 65 to Senate Resolution 110. I ask unanimous consent to have printed in the RECORD at this point these technical and clerical amendments so that Members will be able, in looking at the Friday RECORD next Monday, to see what the technical and clerical amendments would do.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

On page 3, line 23, after "(1)" strike out "the" and insert "The".

On page 4, line 2, strike out the colon and insert a semicolon.

On page 5, line 14, after "value" insert "of".

On page 9, line 19, after "list" insert "the date of purchase and".

On page 9, lines 20 and 21, strike out "at the time of purchase and the date of purchase".

On page 15, lines 2 and 3, strike out "the date of the enactment of this Act" and insert "December 31, 1977".

On page 19, line 9, after "Act" insert a comma.

On page 19, lines 19 and 20, strike out "has the same meaning given to such term" and insert "includes any employee or individual described".

On page 19, line 21, after "4" insert "(c)".

On page 20, line 3, strike out "shall" and insert "does".

On page 20, line 7, after "inheritance" insert a comma.

On page 23, line 1, strike out "this subparagraph" and insert "subparagraph (a)".

On page 23, line 13, strike out "shall" and insert "does".

On page 25, line 6, strike out "(1)" and insert "1".

On page 25, lines 20 and 21, strike out "shall, subject to the provisions of subparagraphs (b) and (c), mean any income" and insert "means, subject to the provisions of subparagraphs (b) and (c), any income (other than compensation disbursed, or treated as disbursed, by the Secretary of the Senate)".

On page 26, line 1, strike out "shall include" and insert "includes".

On page 26, line 5, strike out "or" and insert "and".

On page 27, line 6, after "receipt" insert "or accrual".

On page 30, lines 9 and 10, strike out "has the same meaning given to such term" and insert "includes an employee or individual described".

On page 30, line 10, after "4" insert "(c)".

On page 30, line 20, strike out "(A)" and insert "(1)".

On page 30, line 25, strike out "(B)" and insert "(2)".

On page 38, line 7, delete "State" and insert in lieu thereof "Senate".

On page 40, line 16, strike out "(k)" and insert "(i)".

On page 41, line 12, before "Committee" insert "Select".

On page 42, line 3, before "Committee" insert "Select".

On page 42, line 14, after "'technical" insert a comma.

On page 42, lines 21 and 22, strike out "section 2(a)(2)" and insert "subsection (a)(2)".

On page 43, line 9, strike out "section 2 (a)(2)" and insert "subsection (a)(2)".

On page 43, lines 17 and 18, strike out "(as defined in subsection (b)(4))".

On page 44, line 14, after "relationship" insert a comma.

On page 47, line 19, delete the first "of" and insert in lieu thereof "or".

On page 54, line 23, before "relating" insert a comma.

The ACTING PRESIDENT pro tempore. The pending question on agreeing to amendment No. 103, by the Senator from New Hampshire (Mr. DURKIN), with no time remaining.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally on both sides of the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. NELSON. What is the pending amendment?

The ACTING PRESIDENT pro tempore. The pending amendment is No. 103, by the Senator from New Hampshire (Mr. DURKIN). There is no time remaining.

Mr. NELSON. No time remaining?

The ACTING PRESIDENT pro tempore. No time remaining.

Mr. NELSON. Mr. President, I move to lay on the table the amendment of the

Senator from New Hampshire, and I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged against both sides on the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from New Hampshire. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from North Dakota (Mr. ABOUREZK), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), the Senator from Louisiana (Mr. LONG), the Senator from Michigan (Mr. RIEGLE), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from Florida (Mr. STONE) and the Senator from Alaska (Mr. GRAVEL) are absent on official business.

Mr. BAKER. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from Alaska (Mr. STEVENS) would eash vote "yea."

The result was announced—yeas 71, nays 4, as follows:

[Rollcall Vote No. 73 Leg.]

So the motion to lay on the table Mr. DURKIN's amendment (No. 103) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 104

The PRESIDING OFFICER (Mr. BAYH). The pending question is on agreeing to the amendment (No. 104) of the Senator from New Hampshire (Mr. DURKIN).

Mr. NELSON. Mr. President, has all the time expired on that amendment?

The PRESIDING OFFICER. It is the understanding of the Chair that all time on the amendment has expired.

Mr. NELSON. Mr. President, I yield, from the bill, 5 minutes to the Senator from New Hampshire.

Mr. DURKIN. I thank the Senator from Wisconsin. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DURKIN. Mr. President, under the resolution a Senator is prohibited from aiding the passage of legislation only when his principal purpose in doing so is the furtherance of his pecuniary interest, the pecuniary interest of his immediate family, or the pecuniary interest of a limited class of persons or enterprises associated with him.

That is no restriction at all. The resolution says it is unethical for a Senator to push legislation only when his principal purpose is to profit himself, his family, or his limited class of associates.

My amendment would strike the word "principal," so that it would be unethical for a Senator to introduce or aid in the passage of legislation when one of his purposes in doing so, whether it be the principal purpose or a secondary purpose, is the furtherance and only the furtherance of his or his family's pecuniary interest.

As we have said throughout the debate, there are several perceptions afoot in the land. We have covered the outside income and the honoraria, and the campaign financing will come up later in the year; but I think the American public is justifiably upset when it appears that Members are introducing or supporting legislation, if that is the case, in committee and on the floor, when their purpose is to profit themselves or a group of their associates.

The resolution as drafted is really no restriction at all. A person would have to have a smoking pen in each hand to be found in an unethical situation, as long as we retain the word "principal" in the resolution.

Again, the amendment is very short, direct, and to the point. It deletes the word "principal," so that if a purpose of a Senator's conduct in committee or on the floor is to profit himself, his family, or his business associates or friends, that would be unethical.

As I say, I think it addresses a very real concern of the people who sent us here, who are concerned with the appearance that we may be voting our portfolios and our own interests rather than the interests of the people.

That, in a paragraph or two, is the amendment.

I was encouraged last night by a statement of the senior Senator from Connecticut in which he indicated that he personally had no problems, but he was waiting until the distinguished chairman of the Ethics Committee returned today. I hope the chairman of the Ethics Committee will accept this amendment, thereby eliminating the need for a rollcall vote

Mr. NELSON. Mr. President, I would like to be sure that we are clear on this paragraph. I yield myself 5 minutes from the resolution.

What we are talking about here is page 27, line 23, which reads:

> 4. No Member, officer, or employee shall knowingly use his official position to introduce or aid the progress or passage of legislation, a principal purpose of which is to further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises, when he, or his immediate family, or enterprises controlled by them, are members of the affected class.

The committee put the paragraph in there, of course. I do not think the paragraph should be in there at all. Although the paragraph has a narrow meaning, the general principle is troubling. The argument is made by some people that if a Member has a substantial interest, he should not be allowed to vote. The fallacy of this reasoning is clear from an example. If Senator Bob Kerr were here today, worth $100 or $200 million, representing the State of Oklahoma, and the issue was reducing the 27.5 percent depletion allowance, Senator Kerr would have a very substantial personal interest and every oil interest in his State would have a interest.

He had to be in the Chamber to cast his vote as he saw fit on that issue. If he was against it, he should have cast his vote, against it. He would not be prohibited by this paragraph, because the interest he was representing was that of a large class, not a limited one. There are people around the country who are trying to set standards concerning when a Member should be forced to disqualify himself. I asked the representative of the

Common Cause organization a year ago what a substantial interest was. I said:

Let me ask you a question. If a dairy farmer is on the Agriculture Committee and the issue is whether or not we should increase the support price from 80 to 85 percent of parity, which is about the break even point, and if he has 100 cows and it affects him because he is losing money and 85 percent of parity would give a price that would give him the cost of production, can he vote?

The answer was, "No."

If that is the case, no dairy farmer can come to the Senate. They will send GAYLORD NELSON, who does not own a cow and who votes 100 percent for the dairy farmers every time, because I believe in their cause.

So should we start setting the standard and if a Member has a substantial interest he cannot vote?

Mr. DURKIN. Will the Senator yield?

Mr. NELSON. I will yield in a moment. I am explaining the concept which is being advocated.

This paragraph, which I believe is unnecessary, and with which I do not agree, simply says if there is an interest which affects just one Member or just his family, or a narrow group of people in which he or his family are a part, he should not vote.

For example, the committee report indicates that if the Federal Government were to buy a piece of property, condemning it for an airbase or something, and a Member was one of the owners who would be a beneficiary in a small class, of course they could not vote. I do not think we need it in the rule, but there it is.

We have another kind of case that would be clear, the failing newspaper doctrine of a few years ago. That would only affect two newspapers in the same town, both of whom may qualify under the failing newspaper doctrine.

Senator HARRY F. BYRD, JR., of Virginia, who owns several newspapers did not vote. That was not because it affected him. It did not affect him at all. I do not think there was a potential that it ever would affect him, so he could have voted. But he decided he would not vote.

If a Member were a newspaper owner in Tucson, Ariz., where the case started, and he was one of the two newspapers involved and it benefited those two newspapers, and maybe 20 or 30 others around the country, obviously he should not vote and he would not need this provision to tell him that.

I want to make it clear for the record that we are talking about that kind of narrow, narrow case. I hope that when the statute comes along to follow this up, we will knock it out and leave it, to public disclosure. The public will decide whether or not a Member has an interest which ought to bar him from voting.

I am moving to table the amendment which knocks out the word "principal" and broadens this provision beyond what it says at this time.

Mr. DURKIN. Mr. President, will the Senator yield?

Mr. NELSON. I yield 2 minutes.

Mr. DURKIN. I thank the Senator.

I have to quarrel with the Senator from Wisconsin. If he will turn to page 27, beginning at line 23, it says:

4. No Member, officer, or employee shall knowingly use his official position to introduce or aid the progress or passage of legislation, a principal purpose of which is to further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises, when he, or his immediate family, or enterprises controlled by them, are members of the affected class.

On line 2 at the top of page 28 are two words that are extremely important. I do not think the Senator has read them in the context that they exist in the resolution. It says:

Further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises.

This does not prohibit the Senator from Wisconsin from voting for increased price supports. It does not prohibit the Senator from Oklahoma, who succeeded Senator Kerr, from voting on oil legislation. I think the record will show that the Senator who succeeded Senator Kerr has put his assets in a blind trust.

Amendment 101, which the Governmental Appropriations Committee is going to study, and which was proposed last night, would go a long way in solving this problem, if agreed to. We would apply the same standard in this Chamber that we have applied to the Federal judges, that a Member cannot vote his portfolio. He puts it in a blind trust, if it is significant enough, and he does not vote the portfolio.

This amendment eliminates the word "principal." It does not prohibit a farm State representative from voting for exporting white, milk price supports, or what have you.

The PRESIDING OFFICER. Does the Senator yield further?

Mr. NELSON. I yield 2 more minutes to the Senator from New Hampshire, from the resolution.

Mr. DURKIN. I thank the Senator.

It seems we have been discussing this matter for what seems to be months. I am intrigued now that disclosure is enough. We have weaved in and out of it. On one day disclosure is a perfect disinfectant and the next day it is not an adequate disinfectant. Disclosure has to be buttressed by limitations, buttressed by all means. I am intrigued by the fact that now disclosure is enough, when disclosure has not been enough in this Chamber all week.

If the resolution stands with the word "principal," literally, a Member will have to be caught with a smoking pen when legislation clearly benefits only himself or only a small group. It will have to be his principal and practically his sole purpose. To me, that is a gaping hole. I thank the Senator.

Mr. NELSON. Mr. President, I yield myself 3 additional minutes.

I say to the Senator from New Hampshire that a legislative body is not a judicial body and that representatives in a legislative body should come from all walks of life, because they represent people from all walks of life. The suggestion that the late Senator Bob Kerr could put $200 million of oil stock in a blind trust and have it meaningful would be like putting the Empire State Building in a blind trust and claiming you do not know what is there. It is impossible.

If somebody wants to use a blind trust and it really is a blind trust, I have no objection to that, as long as there is disclosed what went into the trust.

What I am saying is that the concept of a rule which says that if one has a substantial interest, he may not vote is wrong. I defy anybody to define what that is. If you drew a Bell curve and put on that Bell curve $1,000 worth of stock in some company, or $2, $3, $4, $5, up to $10 million worth, and asked 1,000 people to mark on the Bell curve where the substantial interest occurred, you would have 1,000 different marks on the Bell curve.

So it does not make any sense whatsoever to get into the position of making those judgments. The public will decide whether or not they think he is voting his interest. If a dairy farmer is down here with 100 or 500 cows, he is representing 55,000 dairy farmers and he ought to vote. He cannot put his cows in a blind trust, either.

Mr. THURMOND. Mr. President, I associate myself with the remarks of the distinguished Senator from Wisconsin. He has answered completely the amendment by the Senator from New Hampshire. This amendment is unnecessary, it is unwise, and it should be defeated. I shall not take the time of the Senate, but I ask unanimous consent that the section in the report on the code of ethics on this point be printed in the RECORD. It begins on page 41, the 11th line from the bottom, beginning with "paragraph 4" and ending with "should be total" on page 42.

There being no objection, the material ordered to be printed in the RECORD, as follows:

Paragraph 4 provides that no member, officer, or employee of the Senate shall knowingly use his official position to introduce or aid the progress and passage of legislation, a principal purpose of which is to further his pecuniary interest, the pecuniary interest of his immediate family, or the pecuniary interest of a limited class of people or enterprise, when he, his family or enterprises controlled by them are part of the affected class.

The Committee recognizes that in many cases, legislation advancing through the Senate will have some impact on the financial situation of a member, officer, and employee. All tax legislation has such an impact. Ordinarily, however, the impact on an individual's holdings is likely to be quite minimal in comparison to the impact of the legislation on the public and the public interest served. This paragraph addresses itself to the rare case when the relationship between the legislator's private interest and the public interest is dramatically different from the ordinary situation. It applies when a principal purpose of the legislation is to further the financial interests of the member, officer, or employee or his family. Legislation may have a significant financial effect on a Senator because his holdings are involved, but if the legislation also has a broad, general impact on his state or the nation, the prohibitions of the paragraph would not apply.

Thus, for example, if a dairy farmer represented a dairy farming state in the Senate, and introduced, worked for, and voted for legislation to raise or maintain price supports for dairy producers, he would not fall under the strictures of this Rule. The strong

presumption would be that the Member was working for legislation because of the public interest and the needs of his constituents and that his own financial interest was only incidentally related. In the terminology of the paragraph, the dairy farmer would be part of a class affected by the legislation, but not a member of a "limited class," as envisioned in this paragraph. The Committee tried to apply a number to the concept of "limited class" but found the task futile. However, the Committee intends that a class of people or enterprises sharing a particular economic interest (i.e. dairy farmers; shoemakers; disabled veterans) would not be a "limited class." By "limited class," the Committee means a class which resembles much more closely the class of people affected by a private bill. Therefore, to return again to the example of the Senator who was a dairy farmer, he would not be prohibited from working for legislation to help boost or maintain the price supports of dairy products. If, however, legislation was introduced to purchase a piece of land made up in part of a piece of his property and in part of pieces of his neighbors' property, in order to build a federal project there, the Senator would be foreclosed from working on the legislation.

If the legislation does meet the "principal purpose" (and "limited class") standards as necessary, the Committee intends that the disqualification from involvement with the legislation should be total.

The PRESIDING OFFICER. All time has expired.

Mr. DURKIN. Mr. President, will the Senator yield me 1 minute?

Mr. NELSON. I yield 1 minute to the Senator from New Hampshire.

Mr. DURKIN. I thank the Senator.

Mr. President, I would like to read the heresy that my amendment will perpetuate on this body:

No Member, officer, or employee shall knowingly use his official position to introduce or aid the progress or passage of legislation, a purpose of which is to further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises, when he, or his immediate family, or enterprises controlled by them, are members of the affected class.

If that is heresy, table it.

I ask for the yeas and nays on any motion to table.

The PRESIDING OFFICER. Is there a motion to table

Mr. NELSON. I move to lay the amendment on the table and ask for the yeas and nays.

The PRESIDING OFFICER. A motion to lay on the table has been made and the yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from New Hampshire. The yeas and nays have been ordered. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), The Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), the Senator from Louisiana (Mr. LONG), the Senator from Michigan (Mr. RIEGLE), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from Florida (Mr. STONE) and the Senator from Alaska (Mr. GRAVEL) are absent on official business.

Mr. BAKER. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr McCLURE), the Senator from Virginia (Mr. SCOTT), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from Alaska (Mr. STEVENS) would each vote "yea."

The result was announced—yeas 63, nays 12, as follows:

[Rollcall Vote No. 74 Leg.]

So the motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 100, AS MODIFIED

The PRESIDING OFFICER. Under the previous order, the Senator from Delaware is recognized to call up an amendment on which there shall be 1 hour of debate, to be equally divided and controlled.

Mr. ROTH. Mr. President, I send my amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. ROTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment proposed by Mr. ROTH (for himself, Mr. HASKELL, and Mr. WALLOP) is as follows:

On page 41, line 14, strike out the comma "; ADVISORY COMMISSION ON ETHICS".

On page 41 line 13, insert before the period the following: "or a proceeding undertaken by the Advisory Commission on Ethics pursuant to section 207(b)(2) (B)(i) or (C) of the Official Conduct Amendments of 1977".

On page 41, line 14, strike out the comma after "Member".

On page 41, line 15, after "officer" insert "by the Select Committee, no referral to the Advisory Commission on Ethics for an investigation of the conduct of a Member or officer".

On page 41, line 16, strike out "thereto" and insert in lieu thereof "to either such investigation".

On page 43, line 6, strike out "conduct an investigation" and insert in lieu thereof "refer the matter to the Advisory Commission on Ethics for an expeditious investigation and determination of the facts with respect thereto".

On page 43, line 11, beginning with "Upon", strike out all through page 43, line 15, and insert in lieu thereof the following: "Upon the receipt of the findings of the investigation conducted by the Advisory Commission on Ethics, the Select Committee may conduct its own investigation if it deems such investigation advisable. However, the Select Committee shall report to the Senate, as soon as practicable, the results of the investigation conducted by the Advisory Commission on Ethics and its own investigation (if any) together with its recommendations (if any) pursuant to subsection (a)(2).".

On page 43, line 16, after "(6)" insert "(A)".

On page 43, between lines 21 and 22, insert the following:

"(B) Upon the receipt of the findings of any other investigation respecting the conduct of a Member or officer undertaken by the Advisory Commission on Ethics, the Select Committee shall—

"(i) make a determination under paragraph (2), (3), or (4) of this subsection and take such action as provided in such paragraph, or

"(ii) report to the Senate the results of the investigation of the Advisory Commission on Ethics together with its recommendations (if any) pursuant to subsection (a)(2).

The Select Committee may conduct its own investigation if it takes any action as provided under clause (ii) and if it does, shall include the results of the investigation in its report to the Senate.".

On page 44, line 25, after "complaints" insert "by the Select Committee".

On page 46, line 20, after "conducted" insert "by the Select Committee".

On page 49, between lines 13 and 14, insert the following:

"SEC. 207. (a)(1) There is hereby established a permanent Advisory Commission on Ethics (hereafter in this section referred to as the 'Commission') which shall be composed of three members recommended by the Select Committee of Ethics (hereafter in this section referred to as the 'Select Committee')

to become effective upon approval, by resolution, of the Senate.

"(2) The Select Committee shall make recommendations under this section from among individuals who are retired Members of Congress unless the members of the Select Committee find it appropriate to appoint an individual other than a retired Member of Congress, and shall be based on the integrity, impartiality, and good judgment of the individuals.

"(3) Members of the Commission shall serve for a term of three years, except that of the members first appointed one shall be designated by the Select Committee to serve for a term of two years, one to serve for a term of three years, and one to serve for a term of four years. Any vacancy occurring in the membership of the Commission shall not affect the authority of the Commission to carry out its duties and shall be promptly filled in the same manner as in the case of the original appointment. Any individual appointed to fill a vacancy occurring other than by the expiration of a term of office shall be appointed only for the unexpired term of the member he succeeds.

"(4) The Commission shall elect a chairman from among its own members. A majority of the Commission shall constitute a quorum for the transaction of business.

"(5) The Senate may, by resolution, remove any member for any substantial impropriety or for unwillingness or inability to carry out any duty under this section.

"(b)(1) It shall be the duty of the Commission to assist the Select Committee and the Senate in carrying out their responsibilities in maintaining the highest standards of ethical conduct.

"(2)(A) Any person who believes that any individual in the performance of his duties as a Member of the Senate or an an officer or employee of the Senate has violated any law, the Senate Code of Official Conduct, or any other rule or regulation of the Senate, or has engaged in any improper conduct which may reflect adversely upon the integrity of the Senate, may file a complaint with the Commission.

"(B)(i) If the Commission, after initial review of a complaint initiated with the Commission, finds that there is substantial credible evidence which provides substantial cause for the Commission to conclude that a violation within the jurisdiction of the Commission has occurred, it shall notify the Select Committee and the individual involved of such finding, and shall expeditiously conduct an investigation of such apparent violation.

"(ii) If the Commission, after initial review of a complaint that initiates with the Commission, finds no substantial creditable evidence which provides substantial cause for the Commission to conclude that a violation has occurred, it shall notify the Select Committee and the individual involved of its findings.

"(C) The Commission shall expeditiously conduct an investigation whenever directed to do so by the Select Committee pursuant to section 2(d) of Senate Resolution 338, Eighty-eigth Congress, agreed to July 24, 1964.

"(D) The Commission shall, after an investigation under subparagraph (B)(i) or (C), submit, in writing, the results of its investigation and the facts on which such results were based to—

"(i) the individual who was the subject of the investigation, and

"(ii) the Select Committee,

"(E) A member of the Commission may, at his discretion, disqualify himself from participating in any investigation pending before the Commission and any determination with respect thereto. Notice of such disqualification shall be given in writing to the Select Committee which shall appoint another individual to serve as a member of the Commission solely for purposes of such investigation and the determination with respect thereto.

"(c) Notwithstanding any other provision of this section, no initial review or investigation shall be made of any alleged violation of any law, the Senate Code of Official Conduct, rule, or regulation which was not in effect at the time the alleged violation occurred. No provision of the Senate Code of Official Conduct shall apply to or require disclosure of any act, relationship or transaction which occurred prior to the effective date of the applicable provision of the Code. The Commission may conduct an initial review or investigation of any alleged violation of a rule or law which was in effect prior to the enactment of the Senate Code of Official Conduct if the alleged violation occured while such rule or law was in effect and the violation was not a matter resolved on the merits prior to the date of the adoption of this resolution.

"(d)(1) Members of the Commission shall receive, for each day in which they are engaged in the performance of their duties as members of the Commission, compensation at a daily rate equal to the per diem equivalent of the highest rate of gross compensation which may be paid to an employee of a standing committee of the Senate; and shall be entitled to reimbursement for transportation expenses and to receive a per diem, in lieu of subsistence, at the same rate as is payable to employees of the Senate, for each day on which they are away from their home or regular place of business or employment and are engaged in the performance of their duties as members of the Commission or in traveling to or from the place where such duties are to be performed.

"(2) The Commission shall appoint, prescribe the duties and responsibilities of, and fix the compensation of a staff director and such other employees as may be necessary to enable it to carry out its functions and duties. The staff director may be paid at a maximum annual rate of compensation not exceeding the maximum annual rate which may be paid to the two committee employees of a standing committee of the Senate referred to in section 105(e)(3)(A) of the Legislative Branch Appropriation Act, 1968, as amended and modified, and other employees of the Commission may be paid at a maximum annual rate of compensation not exceeding the maximum annual rate which may be paid to the four committee employees of a standing committee of the Senate referred to in such section.

"(3) The Commission is authorized to procure the temporary or intermittent services of individual consultants, or organizations thereof, in the same manner and under the same conditions as a standing committee of the Senate may procure such services under section 202(i) of the Legislative Reorganization Act of 1946.

"(4) The Commission is authorized to utilize the services, information, facilities, and personnel of the Office of the Secretary of the Senate, the Office of the Sergeant at Arms of the Senate, the Office of the Secretary for the Majority, the Office of the Secretary for the Minority, the Library of Congress, and the General Accounting Office; and the Secretary of the Senate, the Sergeant at Arms of the Senate, the Secretary for the Majority, the Secretary for the Minority, the Librarian of Congress, and the Comptroller General of the United States are authorized to furnish such services, information, facilities, and personnel as may be requested by the Commission.

"(5) Office space and office furniture, furnishings, and equipment shall be provided to the Commission in the same manner as other offices of the Senate.

"(e) The Commission may, at any time, recommended to the select committee any additional rules, regulations, rules of conduct, or other legislative measures which the Commission believes would help maintain high standards of ethical conduct in the Senate.

"(f) The Commission is authorized to make such expenditures from the contingent fund of the Senate as may be necessary to carry out its functions and duties. Such expenditures shall be paid upon vouchers signed by the Chairman of the Commission and approved by the majority leader and the minority leader of the Senate, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.".

Mr. ROTH. Mr. President, without losing my right to the floor, I ask unanimous consent to yield to the Senator from Maryland.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I ask unanimous consent to speak out of order, although it is not going to be entirely out of order.

The PRESIDING OFFICER. Without objection, it is so ordered.

MARYLAND DAY 1977

Mr. MATHIAS. Mr. President, March 25, is the 343d anniversary of the founding of Maryland. For citizens of the Free State, Maryland Day is an occasion for celebration and for reflection.

It has been my custom since first being elected to the Congress of the United States, to mark Maryland Day by calling to the attention of my colleagues some particular facet of my State's many-faceted character.

Today, as the Senate debates questions of ethics and of the need for a code of ethics, an appropriate way to mark Maryland Day is by calling attention to a remarkable letter about Maryland and America written in 1765 by Charles Carroll of Carrollton, a prime mover in the American Revolution and the last surviving signer of the Declaration of Independence.

In that letter, Charles Carroll of Carrollton, writes to Mr. Bradshaw of London, on the 21st of November 1765, and he says:

> The climate here is delightful—particularly ye Autumn: the weather is now as mild and serene as it generally is in England in August and September; many who have traveled through the colonies give ye preference to Maryland both in point of climate, ye fertility of its soil, and ye sociability of its inhabitants.
>
> As the English Constitution seems hastening to its final period of dissolution, and the symptoms of a general decay are but too visible, I advise you to sell your estate in England, and to purchase lands in the province where liberty will maintain her empire, till a dissoluteness of morals, luxury and venality shall have prepared the degenerate sons of some future age, to prefer their own mean lucre, ye bribes, and the smiles of corruption and arbitrary ministers, to patriotism, to glory, and to ye publick weal—no doubt the same causes will produce the same effects and a period is already set to ye reign of American freedom; but that fatal time seems to be at a great distance . . .

I call particular attention to its final lines, and express the confidence that the passage of 212 years has not yet diminished the "great distance" that lies between us and a dishonorable future.

I thank the Senator from Delaware for yielding at this time to observe Maryland Day.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

Mr. ROTH. Mr. President, this amendment is cosponsored by the distinguished Senator from Colorado (Mr. HASKELL) and the distinguished senator from Wyoming (Mr. WALLOP).

Our amendment is designed to establish an outside, three-member group, which I have called the Advisory Commission on Ethics, to assist the Select Committee on Ethics by investigating serious allegations of wrongdoing. This group would conduct the investigations and make findings of fact, either when directed to do so by the Ethics Committee or on its own initiative when it believed that there was substantial credible evidence of wrongdoing by Members of the Senate, officers, or employees. Its findings would be referred to the Ethics Committee which would retain the right to make any additional investigation needed and to recommend to the Senate any appropriate sanction.

There are two main reasons why an independent fact-finding commission is needed.

First, history has shown that it is very difficult for any small group to really investigate the conduct of its own Members. The ethics problem in Congress has not been a lack of laws or rules, but a lack of enforcement. The public has found that Congress, which is usually so eager to investigate allegations of misconduct involving the executive branch or private sector, has been reluctant to seriously examine allegations involving its own Members.

For 10 years we have entrusted enforcement to the Ethics Committees in both the House of Representatives and the Senate. I was a Member of the House when that body's Ethics Committee was established, and I was an original sponsor of the resolution creating that committee. Like my colleagues at the time, I hoped that our action has solved the problem.

Despite the very fine and honorable people who have served on these committees, the procedure has not really worked. It has a fatal flaw, and the flaw is that in any body as small as the Senate and even as small as the House, there are conflicts of affection and conflicts of interest that inhibit careful and full investigation. It is extremely difficult for Members to conduct investigations of their colleagues, the people with whom they have to deal on other issues every day. It is distasteful. Women and men come to the Congress to help shape national legislation, not to investigate friends and colleagues.

In the present resolution, an attempt was made to address the enforcement problem by establishing a sworn complaint procedure requiring the select committee to make at least an initial review. This may be an improvement, and, in fact, it reminds me very much of a procedure I had proposed last year for dealing with congressional leaks of classified information. However, an initial review can be as complete or as limited as the Members themselves make it. I believe, and history confirms, that the institutional pressures, the fact that we are all friends and colleagues, and the time constraints tend to tip the scales in the direction of a limited review.

Moreover, I believe the public will not have confidence in an in-house procedure, no matter how much we try to tinker with it.

My second main reason for proposing this amendment is to alleviate the members of the select committee from the burdens of making investigations. A full and careful investigation of an alleged ethical violation can be a very, very time consuming business. Yet the Ethics Committee is a "fourth committee," an assignment additional to a Senator's three main committees.

The Nelson substitute does attempt to address this problem by allowing the committee to use hearing examiners. In my judgment, a hearing examiner would not be independent enough from the committee. While a hearing examiner might be appropriate in a case involving a staff member, I do not believe that the public would have any more confidence in using a hearing examiner in a case involving a Senator than they would if the committee's own professional staff were used.

What is needed—and what my amendment establishes—is a group with the authority, the status, and the national prestige to give the public and the Senate confidence that the rules of ethics will be enforced fairly and effectively. Under my amendment, the Advisory Commission on Ethics would consist of three members, recommended by the Ethics Committee and approved by the entire Senate. These members might be retired Members of Congress with national reputations for integrity—men and women such as former Senators John Williams and Mike Mansfield or former Congresswoman Edith Green. They could also be drawn from other groups, such as retired judges.

Without this kind of independent, prestigious group, Mr. President, I am afraid we are heading toward a repeat of the past decade.

I do not wish to see the Senate, a few years down the road, suffering from another crisis of ethics. If we want to regain our effectiveness as an institution and restore our standing in the public esteem, we must establish a strong, effective enforcement procedure.

Mr. President, I ask unanimous consent to have printed in the RECORD a statement bv the distinguished Senator from Colorado (Mr. HASKELL).

The PRESIDING OFFICER (Mr. McGOVERN). Without objection, it is so ordered.

STATEMENT BY SENATOR HASKELL

I support the amendment of the distinguished Senator from Delaware, Mr. Roth, of which I am a cosponsor, along with the distinguished Senator from Wyoming, Mr. Wallop.

We have spent several long days debating the proposed Code of Ethics. I support the code and believe it is a good one. It is regrettable that such a code has ever become necessary, but we all know the series of events which have made it so. For the same reasons that a formal code of ethics is necessary, I believe that an enforcement mechanism beyond that proposed by the committee is also necessary.

The committee resolution before us vests responsibility for enforcement of the code in a revised and reconstituted Select Committee on Ethics. I have every confidence that the members of this new ethics committee will take their responsibilities very seriously, and will do a very conscientious and fair job. To suggest that the mechanism itself is inadequate is in no way a reflection on the members of the committee which created it, or the members of the Ethics Committee who will be expected to administer it.

In offering this amendment, rather, we simply contend that any enforcement mechanism must not rely wholly on the self-regulation of the Senate. We must provide some measure of outside enforcement.

I have argued in the past for legislation I have introduced creating an office of ethics enforcement with Government-wide responsibilities for enforcement of uniform standards of financial behavior. I continue to believe that is the proper direction to head.

But obviously that is a problem to be addressed by statute, and there are many practical difficulties and constitutional questions to be resolved in such an approach.

The problem before us now is to address the question of enforcement of Senate ethics alone.

The Roth amendment offers a workable and reasonable means of securing a necessary degree of outside enforcement, while continuing to rely upon and utilize the basic procedures prescribed in the bill.

This amendment creates a three-person Advisory Commission on Ethics—to assist the Select Committee on Ethics by making actual investigations and determinations of fact. The Advisory Commission could also initiate investigations, but the Select Committee on Ethics would retain the sole right to come to a final judgment of innocence or guilt, and could alone recommend appropriate sanctions to the full Senate.

This procedure has the advantage of relieving the members of the select committee of the time-consuming burden of conducting investigations, and also separates the two functions of investigation, and coming to a judgement about a specific case. It seems to me that is entirely proper, as well as an altogether practical division of duties.

But most importantly, it provides a needed measure of outside participation in the enforcement of this code. Obviously, this code will only be as worthwhile as the political will to support it and live up to it, and the credibility of the mechanism established to enforce it.

It has unfortunately been rather clear for some time, that self-enforcement lacks credibility. Past performance of the Congress in policing itself simply provides no evidence that such a mechanism is adequate.

I am afraid it is in the very nature of the institution. We are a body of only 100 Members. We all know each other to varying degree. We are colleagues in more than just a formal sense. The public is entirely right in expressing a healthy dose of skepticism about any enforcement mechanism which relies 100% on Senators. We need some outside participation, with a proper degree of independence.

This amendment offers that proper degree of outside participation, and deserves the support of the Senate.

Mr. ROTH. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. Mr. President, I was aware of, and had discussed with staff, the proposal made by Senator ROTH. I

am going to move to table it. But I say to the Senator that I do so not making a judgment on the merits one way or another. We briefly touched upon that concept in the committee. The House of Representatives, also, had some discussion of it and did not act on it.

It may very well be that it is the proper and a good device to add to the procedures which we have in title II of the resolution, which this Senator thinks are good procedures. Title II establishes a procedure for sworn complaints. We require an initial review of the complaint. The resolution has procedures for settling de minimis violations of the code, procedures for resolving those that are more important, with public reporting of the remedy and procedures requiring a full investigation, with a report to the Senate, in a serious case where the committee finds that substantial credible evidence exists.

I think the procedure is very good. I think Senator ROTH also believes it to be a good procedure but believes that we should add to that procedure this independent commission of three citizens to investigate and make findings.

I want to report that I may come down on that side when we get to the question of writing the resolution into statute. But I would first wish to see some hearings on it. I am almost neutral on the question as of now, to be frank with the Senator. So the way we resolved it in committee was to adopt this procedure and not involve a group of outside citizens, which certainly should be considered, in my judgment, at the time the House of Representatives sends a statute over to us.

Therefore I am not arguing for or against the proposal on the merits and may very well support it later in the year, or I may oppose it later in the year.

So, I will move to table. But I do not know whether anyone wishes to speak first.

Mr. THURMOND. I wish to say a few words.

Mr. NELSON. Yes.

Mr. THURMOND. Mr. President, I have tremendous respect for the able and distinguished Senator from Delaware. I think he is one of the finest men in this body.

I cannot go along with him on this amendment, however, as I feel that a constitutional provision on this subject is important. Article I, section 5, clause 2 of the Constitution provides:

> Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

So we can see from this that the responsibility to punish Senators for disorderly behavior or to expel a Senator lies with Members of the Senate.

It is possible that the court might hold to bring in outside individuals would be constitutional, but I do not think that is necessary.

Mr. President, the Constitution specifically delegates to the Senate the right to discipline its Members and to the House the right to discipline its Members. To further delegate the investigatory function to an outside commission, unaccountable to the Senate as a body, is a delegation of authority which I view in derogation of article I, section 5, clause 2 of the Constitution.

I fully understand the desirability of retaining outside counsel to conduct an investigation. I support such a procedure, as it removes the investigatory function from the hands of one who may have personally dealt or may in the future personally deal with the accused party on other committee matters. Section 204 of the resolution authorizes this procedure, but I stress the point that outside counsel retained by the committee is responsible and accountable to the Senate during the investigation.

If we adopt the amendment of my friend from Delaware, we are failing to meet our responsibility of keeping our own house in order.

Official conduct and ethics procedures are internal matters for the Senate to determine, and adoption of the pending amendment will be a step in the wrong direction.

For this reason, Mr. President, I oppose the amendment.

Mr. NELSON. Mr. President, I was going to say I am prepared to yield back my time. Does the Senator wish to speak?

Mr. ROTH. Mr. President, I shall be very brief. But I wish to make a few additional comments.

First, of all, I have great respect and admiration for both the Senator from Wisconsin and the Senator from South Carolina and am pleased to hear the Senator from Wisconsin say that he still has an open mind on this matter.

In answer to Senator THURMOND, I point out that under my proposal, the right to recommend appropriate sanctions is retained by the select committee, so we are in no way downgrading or minimizing the authority of the Senate as it is provided in the Constitution.

One observation I make to Senator NELSON is that it does concern me that in writing a statute which involves the President, once we have a statute, we may be delegating a certain authority to the executive branch that would prevent us from making modifications in the future. So I have some reservations as to writing this into the statute. I prefer to see it done by rulemaking of the Senate.

But I reemphasize once more that 10 years ago, when I was a freshman Congressman, I was very enthusiastic about the creation of the Ethics Committee; and I was one of a small group of freshmen who came up with the idea of modeling it, frankly, very much on what was done over here.

However, as I pointed out, I feel very strongly that the disenchantment with the problems that the Senate is facing with public reaction is not because of a lack of rules but because the public feels very strongly that neither the House of Representatives nor the Senate has had the courage to investigate itself when there are serious complaints.

As I indicated in my opening statement, it is very difficult for Members of the Senate to work with colleagues one day and then attempt to act as a judge the next day.

What concerns me with this set of rules is that we are in the process of adopting some very complicted rules, and I really doubt seriously that it adequately addresses the basic question in the American mind, which is the question of enforcement.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. NELSON. Mr. President, first, the point made by the Senator from Delaware respecting the problems which may arise from putting this in statutory language is a good point. Second, I think there is a lot of merit to independent citizens involved, because it is clear to me, at least, that such a provision could have the benefit of adding to the credibility of the fact finders.

So I repeat that I may very well support the Senator's concept when we get around to this the second time; but at this time I feel constrained to move to lay the amendment on the table.

Mr. President, I yield back the remainder of my time. Is all remaining time yielded back?

The PRESIDING OFFICER. Does the Senator from Delaware yield back the remainder of his time?

Mr. ROTH. I yield back the remainder of my time.

Mr. NELSON. Mr. President, I move that the amendment be laid on the table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Delaware. On this question, the yeas and nays are ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. (ABOUREZK), the Senator from Arkansas (Mr. BUMPERS), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from Maine (Mr. MUSKIE), the Senator from Michigan (Mr. RIEGLE), the Senator from Illinois (Mr. STEVENSON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from Florida (Mr. STONE) and the Senator from Alaska (Mr. GRAVEL) are absent on official business.

Mr. BAKER. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania

(Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), and the Senator from Alaska (Mr. STEVENS) would each vote "nay."

The result was announced—yeas 47, nays 26, as follows:

[Rollcall Vote No. 75 Leg.]

YEAS—47

Allen	Huddleston	Pell
Anderson	Humphrey	Percy
Bartlett	Inouye	Proxmire
Bentsen	Jackson	Randolph
Brooke	Javits	Ribicoff
Burdick	Magnuson	Schmitt
Byrd, Robert C.	Mathias	Scott
Cannon	Matsunaga	Sparkman
Chafee	McClellan	Stafford
Cranston	McGovern	Stennis
Danforth	McIntyre	Thurmond
DeConcini	Metzenbaum	Weicker
Domenici	Moynihan	Williams
Eagleton	Nelson	Young
Glenn	Nunn	Zorinsky
Hart	Pearson	

NAYS—26

Baker	Culver	Lugar
Bayh	Dole	Metcalf
Bellmon	Durkin	Morgan
Biden	Ford	Packwood
Byrd, Harry F., Jr.	Garn	Roth
	Griffin	Sarbanes
Case	Hansen	Sasser
Chiles	Hatch	Schweiker
Clark	Helms	Wallop

NOT VOTING—27

Abourezk	Hathaway	McClure
Bumpers	Hayakawa	Melcher
Church	Heinz	Muskie
Curtis	Hollings	Riegle
Eastland	Johnston	Stevens
Goldwater	Kennedy	Stevenson
Gravel	Laxalt	Stone
Haskell	Leahy	Talmadge
Hatfield	Long	Tower

So the motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was laid on the table.

Mr. RIBICOFF. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, there will be no more rollcall votes today.

UP AMENDMENT NO. 100

The PRESIDING OFFICER. In accordance with the previous order, the Senator from Wyoming (Mr. WALLOP) is recognized to call up an amendment.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. ALLEN be recognized without prejudice to Mr. WALLOP.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I call up an amendment at the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes unprinted amendment numbered 100:

On page 35 at the end of line 15 add a comma and the following: "including his official Senate allowances,"

On page 50, line 3, strike "raised and expended" and insert in lieu thereof the following: "expended by a political committee".

On page 55, lines 7 and 8 strike "August 1, 1977" and insert "January 1, 1978."

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Mr. President, I yield myself 2 minutes.

Mr. President, this is largely a technical amendment. Where it is not technical, I shall explain it. It is in three parts. If there is no objection, when I get through my remarks, I am going to ask that the amendments be considered en bloc.

On page 35, where it says that the expense of the newsletter must come out of funds of the Senator, I add the words "including his official Senate allowances." I am told that the committee had this in mind in drafting the resolution, but it is not clear enough. That is one point.

On page 50, line 3, I ask the Committee on Appropriations and the Committee on Finance to work with the IRS with regard to a fund which raises and expends money on official expenses of Senate offices. The resolution abolishes such a fund. What the committee really was talking about was the tax aspects of payments out of a political fund to defray official nonreimbursable expenses. That is all that this wording has to do with. This also was approved by the committee.

The third amendment, which is nontechnical—it is substantive—makes the effective date of the newsletter regulation January 1, 1978, instead of August 1, 1977. The reason for that is that annual reports are required and, therefore, it should date from the 1st of next year. Furthermore, the so-called nonofficial funds are allowed to continue until January 1, also. Some Senators—not this Senator—use such funds to help defray the cost of newsletters. This would have the same uniform rule as to the effective date of the regulation, which is January 1, 1978. It also coincides with the ruling on the disclosure requirement.

Mr. RIBICOFF. Mr. President, the amendment of the Senator from Alabama is acceptable to the Senator from Connecticut.

Mr. THURMOND. Mr. President, the distinguished Senator from Alabama, I think, has offered some helpful amendments here. As far as I am concerned, they are acceptable.

Mr. RIBICOFF. I yield back the remainder of my time.

Mr. ALLEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RIBICOFF. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HART). Without objection, it is so ordered.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. HART). The Chair, on behalf of the Vice President, pursuant to Public Law 86-420, appoints the Senator from Arizona (Mr. GOLDWATER) and the Senator from Oklahoma (Mr. BELLMON) to the Mexico-United States Interparliamentary Conference, to be held in Guaymas, Mexico, May 27-31, 1977.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess awaiting the call of the Chair, with the time to be charged equally to the time of both sides on the resolution.

There being no objection, at 3:15 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 3:29 p.m., when called to order by the Presiding Officer (Mr. HART).

ORDER FOR RECESS UNTIL 11 A.M., MONDAY, MARCH 28, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 11 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 12:04 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 3965. An act to authorize research, development, and demonstration projects relating to aviation, and for other purposes;

H.R. 4991 An act to authorize appropriations for activities of the National Science Foundation, and for other purposes;

H.R. 5040. An act to authorize additional appropriations for the Department of State for fiscal year 1977.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 3965. An act to authorize research, development, and demonstration projects relating to aviation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 4991. An act to authorize appropriations for activities of the National Science Foundation, and for other purposes; to the Committee on Human Resources.

H.R. 5040. An act to authorize additional appropriations for the Department of State for fiscal year 1977; to the Committee on Foreign Relations.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-982. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, a listing of contract award dates for the period March 15, 1977, to June 15, 1977 (with an accompanying report); to the Committee on Armed Services.

EC-983. A letter from the chairman of the Senate Committee on Commerce, Science, and Transportation transmitting, pursuant to law, a report on allocation of entitlement funds under the third concurrent resolution of the budget (with an accompanying report); to the Committee on the Budget.

EC-984. A letter from the Acting Secretary of the Federal Trade Commission transmitting, pursuant to law, the second report of the Federal Trade Commission concerning the impact on competition and on small business of the development and implementation of voluntary agreements and plans of action to carry out provisions of the international energy program (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-985. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Financial Disclosure Systems in Banking Regulatory Agencies" (with an accompanying report); to the Committee on Governmental Affairs.

EC-986. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Energy Policy Decisionmaking, Organization, and National Energy Goals" (with an acompanying report); to the Committee on Governmental Affairs.

EC-987. A letter from the Secretary of the Interior transmitting, pursuant to law, a report on the administration of the Freedom of Information Act during the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM-104. House Joint Resolution 62 adopted by the Legislative Assembly of the State of Oregon ratifying the proposed amendment to the Constitution of the United States relating to equal rights for men and women; to the Committee on the Judiciary;

"HOUSE JOINT RESOLUTION 62

"Be It Resolved by the Legislative Assembly of the State of Oregon:

"Paragraph 1. The ratification of the proposed amendment to the Constitution of the United States relating to equal rights for men and women, as set forth in and ratified by Senate Joint Resolution 4, 1973, is reaffirmed.

"Paragraph 2. The Secretary of State shall send certified copies of this resolution to the Administrator of General Services of the United States, to the Vice President of the United States and to the Speaker of the House of Representatives of the United States Congress."

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. STENNIS, from the Committee on Armed Services;

Gerald Paul Dinneen, of Massachusetts, to be an Assistant Secretary of Defense.

David E. McGiffert, of the District of Columbia, to be an Assistant Secretary of Defense.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. STENNIS. Mr. President, from the Committee on Armed Services, I report favorably the nominations of Rear Adm. Kenneth M. Carr, U.S. Navy, for appointment to the grade of vice admiral; and Lt. Gen. William B. Fulton, U.S. Army, to be placed on the retired list in the grade of lieutenant general; and John B. Hirt and Kenneth W. Weir for appointment to the grade of brigadier general, U.S. Marine Corps Reserve. Also, Lt. Gen. William G. Moore, Jr., U.S. Air Force, to be general; and Lt. Gen. John N. McLaughlin, U.S. Marine Corps, to be placed on the retired list in the grade of lieutenant general; and Col. John B. Conaway, Air National Guard, to be brigadier general as Deputy Director, Air National, National Guard Bureau; and Lt. Gen. John A. Kjellstrom, Army of the United States, to be placed on the retired list in the grade of lieutenant general. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. In addition, Mr. President, there are 540 in the Navy for temporary and permanent promotion to the grade of lieutenant—list beginning with David H. Acton; and 1,368 in the Navy for temporary and permanent pormotion to the grade of lieutenant commander and below—list begins with Ronald J. Abler; and 655 in the Army for appointment and reappointment to the grade of colonel and below—list beginning with James J. Hill. Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed at the end of the Senate proceedings in the RECORD of March 1 and March 14, 1977.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. ALLEN:

S. 1129. A bill to amend chapter 67 of title 10, United States Code, to grant eligibility for retired pay to certain reservists who did not perform active duty before August 16, 1945, and for other purposes; to the Committee on Armed Services.

By Mr. GARN (for himself, Mr. SCHMITT, and Mr. TOWER):

S. 1130. A bill to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HART (for himself and Mr. RANDOLPH) (by request):

S. 1131. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; to the Committee on Environment and Public Works.

By Mr. BIDEN:

S. 1132. A bill to amend the Equal Educational Opportunity Act of 1974 to provide for an improved standard for enforced transportation of students, and for other purposes; to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 1133. A bill to repeal section 3306 of title 5, United States Code, to eliminate the requirement of apportionment of appointments in the departmental service in the District of Columbia; to the Committee on Governmental Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ALLEN:

S. 1129. A bill to amend chapter 67 of title 10, United States Code, to grant eligibility for retired pay to certain reservists who did not perform active duty before August 16, 1945, and for other purposes; to the Committee on Armed Services.

RETIREMENT BENEFITS FOR CERTAIN RESERVISTS

Mr. ALLEN. Mr. President, over the years it has on several occasions been brought to my attention that reservists who did not perform active duty before the end of World War II have been denied retirement benefits notwithstand-

ing the fact that their total service inclusive of years prior to the termination of World War II amounts to 20 years or more.

Many of these reservists served later in the Berlin crisis or Vietnam yet they have still been denied retirement because they have not been permitted to count for retirement purposes service in the Reserve performed during the World War.

The Senate acted once to resolve this inequity when it passed during the 93d Congress S. 3283, a bill identical to the measure I am introducing today.

Unfortunately, S. 3283 was not acted upon by the House of Representatives; however, I believe the House might now favorably consider this legislation should it again pass the Senate.

Toward the end of the 94th Congress, I introduced the same bill under the designation S. 3846, but the Committee on Armed Services did not have sufficient opportunity to act on it.

Inasmuch as the measure has once passed the Senate and has been amply studied in committee, Mr. President, I urge that the Committee on Armed Services now act promptly to report the measure and that thereafter it be given priority for consideration by the full Senate.

By Mr. GARN (for himself, Mr. SCHMITT, and Mr. TOWER):

S. 1130. A bill to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors; to the Committee on Banking, Housing, and Urban Affairs.

FAIR DEBT COLLECTION PRACTICES ACT

Mr. GARN. Mr. President, on behalf of Senator SCHMITT, Senator TOWER, and myself, I am pleased to introduce the Fair Debt Collection Practices Act to eliminate in interstate commerce abusive debt collection practices by independent debt collectors and to encourage the States to adopt Model Fair Debt Collection Practices Acts and to provide consumers with convenient access to informal debt controversy resolution mechanisms which are effective, fair, inexpensive and expeditious.

The Fair Debt Collection Practices Acts attacks abusive debt collection practices on two levels. First, it amends the Federal Consumer Credit Protection Act to prohibit the harassment or intimidation of the consumer in the collection of debts in interstate commerce. Next, it provides a program of grants to States for study and demonstration projects to stimulate and improve State regulation of the operation of debt collectors and to provide on the local inexpensive procedures for the resolution of debtor-creditor controversies.

NEED FOR THE LEGISLATION

Recent television and newspaper accounts and hearings before the House Consumer Affairs Subcommittee publicized sensational allegations of maddening harassment of consumers by independent debt collectors. Although there is considerable question as to the probability of the antidotal evidence thus far presented to support comprehensive Federal regulation of debt collectors, there is considerable evidence in the form of testimony by State officials that some debt collectors have utilized watts lines and other means of communication to harass debtors in interstate commerce. In addition, reports from the New York Regional Office of the Federal Trade Commission, the Better Business Bureau and law enforcement officials tend to establish that the existing debt collection redress mechanisms are often inadequate to protect the interest of the consumer. Our bill would address both of these problems by prohibiting the harassment of the consumer by using the mails or telephones in interstate commerce and by establishing a grant program to encourage the States to pass model acts and provide local consumer redress mechanisms. This would permit the States to continue experimentation to determine the best way in which the consumer's interest can be protected.

HISTORY OF FEDERAL DEBT COLLECTION PRACTICES LEGISLATION

Bills are pending in the House and Senate (H.R. 29 introduced by Congressman ANNUNZIO and S. 918 introduced by Senator RIEGLE), which would amend the Federal Consumer Credit Protection Act to regulate the practice of independent professional debt collectors by prohibiting harassment and restricting the methods and procedures used in debt collection. In 1976, after 5 days of hearings, the House passed a debt collection bill (H.R. 11969) but no action was taken in the Senate. Hearings were held during the week of March 8 by the House Consumer Affairs Subcommittee at which former employees of debt collection agencies and State officials testified concerning the use of harassing tactics. The industry witnesses claimed these were isolated instances.

Basically, the bills pending in the Senate and House would mandate a mechanism which would restrict the methods that a debt collection agency may use in locating and contacting a debtor. They also require the debt collector to cease communications upon request of the debtor or when the debtor employs an attorney. A complex validation procedure is imposed upon the debt collector when the debt is disputed. Debt collectors are restricted in the manner in which they may bring legal actions. Several provisions prohibit harassment, intimidation, and false representation. Enforcement is given to the Federal Trade Commission and there are both criminal and civil sanctions.

MAJOR PROBLEMS WITH PENDING DEBT COLLECTION LEGISLATION—IT IS REGULATORY OVERKILL

Although both of the bills introduced in the House and Senate purport to prohibit harassment and abusive tactics, in reality they provide a Federal mechanism for the minute regulation of the internal business operations of the debt collection industry. For example, the bills in regulating the acquisition of location information, prohibit the debt collector from making a personal contact in an attempt to find a debtor who has skipped without leaving a forwarding address. The debt collector is severely limited in contacts that can be made with the debtor at his place of employment or home. In addition, the debtor may require the debt collector to cease communications. A complicated procedure is set up for the validation of debts.

Although there may be merit in establishing such a procedure in large metropolitan areas such as New York City or the District of Columbia, it does not follow that these procedures would be to the advantage of the consumer in small urban areas such as Logan, Utah, or Rawlings, Wyo. By and large, the debt collection industry is composed of small businesses operating in local communities. The regulation of the operation of these small business people should be left to the States rather than preempted by the Federal Government.

In addition to the problems which may be created by Federal legislation in an area that can best be regulated by State and local government, the House hearings to date have produced no empirical studies or evidence regarding the cost of compliance with these complicated procedures. It is difficult for one to perceive how the typical debt collection agency with 8 to 10 employees can comply with these intricate proposals. I fear that Congress is on the verge of creating another RESPA.

THE BILLS INTERFERE WITH STATE PREROGATIVE TO LEGISLATE IN THE LOCAL AREA

The Senate and House bills deal with abuses covered by legislation already enacted in approximately 33 States. The National Conference of Lawyers and Collection Agencies is actively promulgating a model act to be enacted in the remaining States. In addition, it is an area which is partially covered by the Uniform Consumer Credit Code adopted by the National Conference of Commissioners on Uniform State Laws. With the States actively pursuing remedies in this area, it is not in the public interest for Congress to discourage further efforts of State experimentation.

THE SENATE AND HOUSE BILLS INTERFERE UNDULY WITH THE PREROGATIVE OF STATE COURTS TO REGULATE THE PRACTICE OF LAW

By not exempting attorneys from the definition of debt collectors, the legislation would place the action of attorneys in collecting debts under the supervision of the Federal Trade Commission and Congress. Traditionally, the conduct of the attorneys has been regulated by State courts and legislatures. In addition, the limitation on where a debt collector may file suit and serve process could conflict with Federal and State laws or jurisdiction and venue. The provision prohibiting communication by a debt collector with a debtor once the debtor is represented by counsel could interfere with the attorney/client relationship. This provision could be interpreted as abrogating the historical and essentially confidential relationship between attorney and client.

THE SENATE AND HOUSE BILLS WOULD PLACE A SERIOUS BURDEN ON THE JUDICIAL SYSTEM

The bills as presently drafted would impose the risk of serious civil and criminal liability for trivial infractions. The civil and criminal sanctions are overbroad. This would encourage and invite

the filing of frivolous lawsuits in both the State and Federal courts. This is compounded by the stifling effect the bills would have on informal collections forcing many more cases into court. In spite of the foregoing, the House hearings made no attempt to determine the judicial impact of the legislation.

I am hopeful that when the Senate Consumer Affairs Subcommittee holds hearings on debt collection legislation attention will be given to the costs of the proposals in terms of the impact they might have on the overcrowded judicial system, the overregulated small businessman, and the overburdened consumer's pocketbook.

Mr. President, I request unanimous consent that the section-by-section analysis and the bill be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 1130

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VIII—DEBT COLLECTION PRACTICES

"Sec.
"801. Short title.
"802. Definitions.
"803. Harassment or intimidation.
"804. False or misleading representation.
"805. Civil liability.
"806. Administrative enforcement.
"807. Relation to State laws.
"808. Exemption for State regulation.
"809. Resolution of consumer controversies.
"810. Effective date.

"§ 801. Short title

"This title may be cited as the 'Fair Debt Collection Practices Act'.

"§ 802. Definitions

"As used in this title—

"(1) the term 'Board' means the Board of Governors of the Federal Reserve System.

"(2) the term 'Commission' means the Federal Trade Commission.

"(3) the term 'communicate' means to complete the transmission of a written or verbal message.

"(4) the term 'consumer' means an individual who owes or allegedly owes a debt created primarily for personal, family, or household purposes.

"(5) the term 'credit bureau' means any person, firm, partnership, corporation, organization, association, or any other legal entity engaged in furnishing credit reports, as the term is defined by section 603(f) of the Fair Credit Reporting Act.

"(6) the term 'creditor' means a party to a consumer transaction other than a consumer.

"(7) the term 'debt' means any obligation arising out of a transaction in which credit is offered or extended to an individual, and the money, property, or services which are the subject of the transaction are primarily for personal, family, or household purposes. Such term does not include transaction involving extension of credit for business, commercial or agricultural purposes.

"(8) the term 'debt collector' means any person who engages in any business the principal purpose of which is the collection of any debt for another person, or any person who directly or indirectly collects or attempts to collect a debt owed or due or asserted to be owed or due another, unless, on or after the effective date of this title, substantially all of the activities in the course of such business or in such collection of debts occur within one State, but such term does not include—

"(A) any creditor or assignee of such creditor who engages in the business of extending credit and primarily collects or attempts to collect debts owed to such creditor or any person, both of whom are related by ownership or affiliated through corporate control;

"(B) any officer or employee of the United States or any state to the extent that collecting or attempting to collect any debt is in the performance of his official duties;

"(C) any attorney acting in a professional capacity on behalf of a client;

"(D) any person serving or attempting to serve legal process on the consumer or on any other person in connection with the judicial enforcement of a debt;

"(E) any person who enforces or attempts to enforce a security interest in real or personal property which is valid under state law;

"(F) any person acting in the capacity of a debt collector on behalf of another person, both of whom are related by common ownership or affiliated through corporate control;

"(G) any officer or employee of a creditor who is acting in the capacity of collecting a debt owed to that creditor or any person acting in the capacity of a debt collector on behalf of another person pursuant to a reciprocal service agreement, both of whom are financial institutions who regularly extend or arrange for the extension of credit; or

"(H) any person who is a member of a trade association, whose primary business is not the collection of debts of others and whose members' primary business is not the collection of debts of others, who acts in the capacity of a debt collector on behalf of another member pursuant to a reciprocal services plan provided by the association to its members to facilitate the collection of debts owed to its members.

"(9) the term 'State' means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing.

"(10) the term 'Bureau' means the Bureau of Consumer Redress.

"(11) the term 'Director' means the Director of the Bureau.

"(12) the term 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Canal Zone, and the Trust Territory of the Pacific Islands.

"(13) the term 'Administrator' means the individual or agency which is designated under State law to direct, coordinate, or conduct a State system.

"(14) the term 'State system' means all the mechanisms and procedures of a State for the resolution of controversies involving consumers, including small claims courts, arbitration, and other mechanisms and procedures referred to in section 809.

"§ 803. Harassment and intimidation

"A debt collector may not collect or attempt to collect any debt alleged to be due and owing by—

"(1) using or threatening to use violence or other criminal means to cause harm to the person or property of any person;

"(2) accusing falsely or threatening to accuse falsely any person of fraud or any other crimes;

"(3) representing or threatening to represent to a third party or any other person, that a consumer is willfully refusing to pay a non-disputed debt when the debt is in dispute for any reason and the consumer has notified such debt collector in writing of the dispute;

"(4) threatening to sell or assign to another the obligation of the consumer with an attending false representation that the result of such sale or assignment would be that the consumer would lose any defense to the alleged debt or would be subject to illegal collection attempts;

"(5) threatening that nonpayment of an alleged debt will result in the arrest of any person or the seizure, foreclosure, garnishment or sale of any property or wages of any person without a judgment, court order or other legal authority permitting such actions;

"(6) using profane or obscene language or language the natural consequence of which is to reflect unreasonably and falsely on the character, morals or habits of the hearer or reader;

"(7) placing telephone calls without a meaningful disclosure of the identity of the caller;

"(8) causing expense to any person in the form of long distance telephone tolls, telegram fees, or other charges incurred by a medium of communication, without first disclosing the name of the person making the telephone call or transmitting the communication; or

"(9) causing a telephone to ring so repeatedly or continuously as to be unreasonable or at unusual times or at times known to be inconvenient and unreasonable.

"§ 804. False or misleading representation

"A debt collector may not collect or attempt to collect debts or obtain information concerning a consumer by any fraudulent, deceptive, or misleading representations by—

"(1) using any name while engaged in the collection of debts other than the true business or professional name or the true personal or legal name of the debt collector unless the given and correct names of the user are posted in a public area of the debt collector's office or unless otherwise authorized by law;

"(2) falsely representing that the debt collector has information in his possession or something of value for the consumer in order to solicit or discover information about the consumer;

"(3) failing to clearly disclose, in any communication with the debtor, the name of the person to whom the debt has been assigned or is owed at the time of making any demand for money;

"(4) failing to clearly disclose, in any communication with the debtor, that the debt collector is attempting to collect a debt;

"(5) using any written communication which fails to clearly indicate the name of the debt collector and the debt collector's street address, when the written notice refers to an alleged delinquent debt, provided that the foregoing shall not require disclosure of names and addresses of employees of debt collectors;

"(6) falsely representing that any debt collector is vouched for, bonded by, affiliated with, or an instrumentality, agent, or official of this state or any agency of federal, state, or local government;

"(7) using, distributing, or selling any written communication which simulates or falsely represents to be a document authorized, issued, or approved by a court, an official, a governmental agency, or any other legally constituted or authorized governmental authority, or which creates a false impression about its source, authorization, or approval; or using any seal or insignia or design which simulates that of any governmental agency;

"(8) representing that a debt may be increased by the addition of attorney's fees, investigation fees, service fees, or other charges

when there is no written contract or statute authorizing such additional fees or charges;

"(9) representing that a debt will definitely be increased by the addition of attorney's fees, investigation fees, service fees, or other charges when the award of such fee or charge is discretionary by a court of law;

"(10) falsely representing the status or true nature of the services rendered by the debt collector or his business;

"(11) using any communication which purports to be from any attorney or law firm, when in fact it is not;

"(12) representing that a debt is being collected by an attorney when it is not;

"(13) representing that a debt is being collected by an independent, bona fide organization engaged in the business of collecting past due accounts when the debt is being collected by a subterfuge organization under the control and direction of the person to whom the debt is owed; however, nothing herein shall prohibit a creditor from owning or operating its own bona fide debt collection agency; or

"(14) falsely representing that the debt collector is a credit bureau by use of the term in its corporate or trade name when in fact the debt collector is not a credit bureau or using any other term of similar impact or meaning in its corporate or trade name, or in any other manner, to create the false impression that such debt collector is a credit bureau when in fact it is not.

"§ 805. Civil Liability

"(a) Any debt collector who willfully fails to comply with any requirement imposed under this title with respect to any person is liable to that person in an amount equal to the sum of—

"(1) any actual damages sustained by such person as a result of the failure; and

"(2)(A) in an individual action, such amount of punitive damages as the court may allow, or

"(B) in the case of a class action, such amount as the court may allow, except that the total recovery in such action shall not be more than the lesser of $500,000 or 1 per centum of the net worth of the debt collector.

"(b) Any debt collector who is negligent in failing to comply with any requirement imposed under this title with respect to any person is liable to that person in an amount equal to the sum of any actual damages sustained by such person as a result of the failure.

"(c) In the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee in relation to the work expended and costs. On a finding by the court that an action under this section was brought in bad faith or for purposes of harassment, the court shall award to the defendant attorney's fees reasonable in relation to the work expended and costs.

"(d) In determining the amount of award in any class action under subsection (a)(2)(B) the court shall consider, among other relevant factors, the frequency and persistence of failures of compliance by the debt collector, the resources of the debt collector, the number of persons adversely affected, and the extent to which the debt collector's failure of compliance was intentional.

"(e) A debt collector may not be held liable in any action brought under this title if the debt collector shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to assure compliance.

"(f) An action to enforce any liability created by this title may be brought in any appropriate United States district court without regard to the amount in controversy, or in any other court of competent jurisdiction, within one year from the date on which the liability arises.

"(g) A consumer may not take any action to offset any amount for which a debt collector is potentially liable to such consumer for punitive damages against any amount allegedy owing to such debt collector by such consumer, unless the amount of the debt collector's liability to such consumer has been determined by judgment of a court of competent jurisdiction in an action to which such consumer was a party.

"§ 806. Administrative enforcement

"(a) Compliance with this title shall be enforced by the Commission. For the purposes of the exercise by the Commission of its functions and powers under the Federal Trade Commission Act, a violation of this title shall be deemed a violation of that Act. Except as provided for in subsection (b) all of the functions and powers of the Commission under the Federal Trade Commission Act are available to the Commission to enforce compliance by any person with this title, irrespective of whether that person is engaged in commerce or meets any other jurisdictional test in the Federal Trade Commission Act.

"(b) The rule making authority of the Commission for enforcement of this title shall be limited to the promulgation of procedural rules necessary to enforce compliance with this title.

"§ 807. Relation to State laws

"This title does not annul, alter, or affect, or exempt any person subject to the provisions of this title from complying with the laws of any State with respect to debt collection practices, except to the extent that those laws are inconsistent with any provision of this title, and then only to the extent of the inconsistency. The Commission is authorized to determine whether such inconsistencies exist.

"§ 808. Exemption for State regulation

"The Commission shall by regulation exempt from the requirements of this title any class of debt collection practices within any State if the Commission determines that under the law of that State that class of debt collection practices is subject to requirements substantially similar to those imposed by this title, and that there is adequate provision for enforcement.

"§ 809. Resolution of consumer controversies

"(a) The purposes of this section are to eliminate abusive debt collection practices and to assure consumers convenient access to consumer debt controversy resolution mechanisms which are effective, fair, inexpensive, and expeditious, and to facilitate better representation of consumer interests.

"(b)(1) Not later than 30 days after the effective date of this section, the Board shall establish a Bureau to be known as the Bureau of Consumer Redress. The Board shall appoint a Director of the Bureau.

"(2) The Board, through the Director shall, consistent with the purposes and goals of this section—

"(A) enter into or renew cooperative agreements with the States;

"(B) allocate and pay to the States funds appropriated for financial assistance to States under cooperative agreements;

"(C) issue, from time to time, such regulations as are necessary to carry out the provisions of this section, in accordance with the provisions of section 553 of title 5, United States Code;

"(D) encourage and assist the development and implementation of innovative concepts and approaches;

"(E) investigate and award discretionary grants;

"(F) determine whether a State plan is in accordance with this section;

"(G) review the operation and effectiveness of each State plan for the resolution of debt controversies involving consumers which has been approved under this section;

"(H) articulate and evaluate the goals for a model State system of consumer controversy resolutions, including the formulation and promotion of Model Consumer Debt Collection Fair Practices Acts and ordinances which may be adopted by the several States. The Model Acts and ordinances shall be formulated within the 12 months after the effective date of this section and shall be revised from time to time as is deemed appropriate by the Director.

In the formulation of Model Consumer Debt Collection Fair Practices Acts, there shall be taken into consideration existing Model Acts, the costs and benefits to the consumer and the public, and the impact on the judicial system;

"(I) Coordinate and integrate the functioning of both public and business sponsored mechanisms; and

"(J) take such other actions as are appropriate to fulfill the purposes of this section.

"(c)(1) in carrying out its functions under this Act, the Director and the Board shall cooperate, to the maximum extent practicable, with the States and the business and legal community. In addition to any other enumerated obligation, the Director shall consult, from time to time, with the State Administrator, if any, in each State.

"(2) The Board, through the Director, is authorized to enter into a coopeartive agreement to provide financial assistance to any State which establishes and maintains a system approved by the Board for the effective, fair, inexpensive, and expeditious resolution of controversies involving consumers or to assist any State to develop such a system. Before a State shall be deemed eligible to enter into or renew a cooperative agreement for the development or maintenance of a State system, the Director shall make, justify, and publish in the Federal Register a finding that such agreement would further the purpose of this section.

"(d)(1) The Director, in accordance with the purposes and goals of this section, shall promote, develop, encourage, and assist in the development of consumer debt controversy resolution mechanisms through research and demonstration projects or other activities that will encourage innovation or effectuation of the policies of this section.

"(2) The Director is authorized to make discretionary grants under this subsection, in a total amount each year not to exceed 25 per centum of the financial assistance appropriated under this section.

"(3) The Director shall establish criteria for awarding grants for research or demonstration projects which are consonant with the purposes and goals of this section. These grants may be made to units of local government, combinations of such units, or nonprofit organizations and foundations, under established criteria and such terms and conditions as may from time to time be established by the Director.

"(e)(1) By the end of 6 months after the effective date of this section, a State may establish and submit a plan in accordance with this section for the resolution of debt controversies involving consumers. A plan is in accordance with this section if it is designed to meet or exceed the requirements set forth in subsection (c), responds to the goals set forth in subsection (f), and represents an effective response to the Nation's need for fair, expeditious, and inexpensive resolution of such controversies. Upon the establishment of such a plan, the State administrator shall promptly transmit a certified copy to the Board.

"(2) Within 90 days after the Board receives a certified copy of a State plan established under paragraph (1), the Director shall make a determination whether (A) the State is eligible to receive financial assistance under subsection (c), and (B) such State has established a plan which is in accordance with this section. Unless the Board determines, within 30 days after the Director determines that a State plan is in accordance with this section, that such plan is not in accordance with this section, the Director shall, to the extent resources are available, enter into a cooperative agreement designed to effectuate such plan. A State may submit a revised or improved plan designed to better effectuate the goals of this section at any time.

"(3) The Director shall periodically, but not less than once every 2 years, or may at any time upon complaint of affected consumers, review any State plan or any discretionary grant for the resolution of debt controversies involving consumers which has been approved and for which there is (A) experience to determine whether such plan or grant is still in accordance with the goals of this section, and (B) to evaluate the success of such plan or grant in terms of the policies and purposes of this section. In addition to the data required under subsection (g), reports must be submitted on each mechanism showing the extent to which it has met the applicable goals of subsection (f), including results of random sample surveys of attitudes of consumers who have actually used the services of the organization. Any plan or grant which is found not to be in accordance with such goals or which has not been successful shall be terminated in accordance with the procedures set forth in paragraph (4). To facilitate such review, the State administrator in each such State shall submit to the Director, not later than March 15 of each year, an annual report containing all revelant information requested by the Director and comments of consumers, including low-income consumers, on the effectiveness of mechanisms funded under this section.

"(4) Before making any determination under paragraph (2) or (3), the Director shall cause a notice and a summary of the plan under consideration to be published in the Federal Register and shall afford the affected State and all interested parties a reasonable opportunity to present their views by oral or written submission, and to propose amendments; if any, to such plan or grant program. The Commission, through the Director, shall notify the affected State or grantee of any determinations made under this section and shall publish these determinations with reasons therefor in the Federal Register. Any final determination by the Director under this subsection shall be subject to judicial review in accordance with chapter 7 of title 5, United States Code, in the United States Court of Appeals for the circuit in which is located the State whose plan or grant is the subject to such determination or in the United States Court of Appeals for the District of Columbia. Any such review shall be instituted within 60 days from the date on which the determination of the Director is published in the Federal Register.

"(f)(1) A State is responsive to national goals if—

"(A)(1) there are sufficient numbers and types of readily available debt consumer controversy resolution mechanisms responsive to the goals set forth in paragraph (2);

"(B) a public information program is effectively communicating to potential users the availability and location of debt consumer controversy resolution mechanisms and consumer complaint offices in such State; and

"(C) each such mechanism and unit thereof files an annual report with the State administrator in such form and with such content as is prescribed by him in consultation with the Director.

"(2) A debt consumer controversy resolution mechanism is responsive to national goals if—

"(A) its forms, rules, and procedures are, so far as practicable, easy for potential users to understand, free from technicalities, and it is inexpensive to use;

"(B) it is open and available for the adjudication or resolution of controversies during hours and on days that are convenient for consumers, such as evenings and weekends, and that a fair proportion of controversies are scheduled to be resolved at such times;

"(C) it provides for adequate arrangements for translation in areas with substantial non-English-speaking populations;

"(D) it is governed by reasonable and fair rules and procedures which are approved by the State administrator. Such rules and procedures shall—

"(i) facilitate the early resolution of consumer debt controversies by means in addition to the adjudication of claims;

"(ii) encourage the fairest and most effective use of the services of attorneys in the resolution of such controversies;

"(iii) encourage the finality and conclusiveness of the resolution of such controversies;

"(iv) provide for the qualification, tenure and duties of persons charged with resolving or assisting in the resolution of such controversies;

"(v) provide for the maintenance of thorough and complete records of each grievance submitted to it and each complaint filed with it together with a notation as to and the disposition of each such grievance or complaint;

"(vi) insure that both sides to a dispute are directly involved in the resolution of such dispute;

"(vii) insure that the results of dispute settlement efforts are actually carried out;

"(viii) assure that the consumer is informed of the status of his case; and

"(xi) provide useful information about other available redress mechanisms in the event that dispute settlement efforts fail or the controversy does not come within the jurisdiction of such mechanism.

"(g)(1) Each recipient of assistance under this section shall keep such records as the Board, through the Director, shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount of that portion of the project or understanding supplied by other sources, and such other records as will facilitate an effective financial and performance audit. This provision shall apply to all recipients of assistance under this section, whether by direct grant or contract with the Board through the Director or by subgrant or subcontract from primary grantees or contractors of the Board, through the Director, or from any State Administrator receiving financial assistance under this section.

"(2) The Board or any of its designated representatives shall have access for purpose of audit and examination to any relevant books, documents, papers, and records of the recipients of grants and financial assistance under this section.

"(3) The Comptroller General of the United States, or any of his duly authorized representatives, shall, until the expiration of 3 years after the completion of the program or project with which the assistance is used, for the purpose of financial and performance audits and examinations, have access to any relevant books, documents, papers, and records of recipients of financial assistance under this section.

"(4) The Board, through the Director, shall submit an annual report to the President and the Congress simultaneously by June 15 each year. Such report shall include, but need not be limited to—

"(A) A summary of any reviews undertaken pursuant to subsection (e)(3).

"(B) The results of financial and performance audits conducted pursuant to this subsection.

"(C) An evaluation of the effectiveness of the Bureau and the Board in implementing the purposes of the section, together with any recommendations for additional legislative or other action.

"(h) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.

"§ 810. Effective date

"This title takes effect upon the expiration of one year after the date of its enactment.".

SECTION-BY-SECTION ANALYSIS OF THE FAIR DEBT COLLECTION PRACTICES ACT

The Fair Debt Collection Practices Act adds a new Title VIII to the Consumer Credit Protection Act to be cited as the Fair Debt Collection Practices Act.

Section 802 defines the various terms used in the Act.

The term "debt" is defined to make clear that the Act only covers transactions primarily for personal, family, or household purposes and not transactions involving extension of credit for busines, commercial or agricultural purposes.

The term "debt collector" is narrowly defined as a person whose principal business is that of engaging in the collection of debts in interstate commerce for another person. Specifically exempted from coverage are:

(A) creditors or assignees and their affiliates;

(B) employees of the United States;

(C) attorneys acting in a professional capacity for a client;

(D) process servers;

(E) persons enforcing a security interest in real or personal property;

(F) persons acting in a capacity of a debt collector, when they are affiliated by common ownership;

(G) employees of a creditor who are collecting a debt for another creditor under a reciprocal service agrement;

(H) members of a trade association collecting debts for other members of the trade association under agreements.

Section 803 prohibits a debt collector from attempting to collect a debt by:

(1) using or threatening to use violence or criminal means;

(2) accusing falsely or threatening to accuse falsely a person of fraud or other crimes;

(3) representing or threatening to represent to a third party that a consumer is willfully refusing to pay a non-disputed debt when the debt is in dispute;

(4) falsely representing that the sale or assignment of a debt will result in the consumer's lose of defenses;

(5) threatening that nonpayment will result in arrest or seizure of property without court order or legal authority;

(6) using profane or obscene language;

(7) placing telephone calls without a meaningful disclosure of the identity of the caller;

(8) causing expense in the form of long distance telephone calls or other charges without the person disclosing the name of the person making the telephone call;

(9) causing the telephone to ring so repeatedly or continuously as to be unreasonable or inconvenient.

Section 804 prohibits a debt collector from collecting or attempting to collect a debt by:

(1) using an alias unless the correct names of the user are posted in a public area of the debt collector's office;

(2) falsely representing that the debt collector has information or something of value for the consumer;

(3) failing to disclose the name of the per-

son to whom the debt has been assigned or is owed;

(4) failing to disclose that the debt collector is attempting to collect a debt;

(5) failing to disclose the name and address of the debt collector's firm;

(6) falsely representing that the debt collector is affiliated with an instrumentality of a governmental agency;

(7) using or distributing a communication which falsely represent that they are approved by a court or governmental body;

(8) falsely representing that a debt may be increased by additional fees when no written contract or statute authorizes the charges;

(9) representing that attorney's fees or charges will definitely be added when the matter is in the discretion of a court;

(10) falsely representing the status or true nature of the services rendered by the debt collector;

(11) falsely representing that a communications is from an attorney or law firm when it is not;

(12) representing that a debt is being collected by an attorney when it is not;

(13) representing that a debt is being collected by an independent collection agency when it is not;

(14) falsely representing that a debt collector is a credit bureau.

Section 805(a) imposes actual or punitive damages as a court may allow when a debt collector willfully fails to comply with the requirements of the Act.

In a case of a class action, the total recovery is limited to not more than the lesser of $500,000 or 1 per cent of the net worth of the debt collector.

Section 805(b) imposes liability for actual damages when a debt collector is negligent in failing to comply with the requirements of the Act.

Section 805(c) provides that attorney's fees may be awarded to a successful plaintive based on the work expended and costs. Where the court finds that an action has been brought in bad faith for the purposes of harassment, the court shall award the defendant attorney's fees.

Section 805(d) provides that in determining the amount of award in any class action the court shall consider relevant factors.

Section 805(e) provides that a debt collector may not be held liable when by preponderance of evidence, it is shown that the violation was not intentional and the result of a bona fide error.

Section 805(f) gives jurisdiction to any appropriate United States district court without regard to the amount in controversy and any other court of competent jurisdiction within one year from the date on which the liability arises.

Section 805(g) provides that a consumer may not take an offset for punitive damages until an award has been made by a court.

Section 806 vest authority for compliance with the Federal Trade Commission but restricts rulemaking authority of the Commission to the promulgation of procedural rules.

Section 807 provides that Act shall not exempt any person from complying with state laws except to the extent that those laws are inconsistent with the provision of the Act and that the Commission shall determine such inconsistencies.

Section 808 provides that the Commission shall exempt compliance with the Act in any state which the Commission determines has debt collection practices laws that are substantially similar to those imposed by the Act and where there is adequate provision for enforcement.

Section 809 establishes a grant procedure under which the Federal Reserve Board is directed to encourage the states to adopt Model Consumer Debt Collection Fair Practices Acts and debt controversy mechanisms to eliminate the abusive debt collection practices and assure a convenient forum for the out of court resolution of the controversies in a fair, inexpensive nad expeditious manner. In the formulation of Model Consumer Debt Collection Fair Practices Acts, there shall be taken into consideration existing Model Acts, their costs and benefits to the consumer and the public, and their impact on the judicial system. It is intended that the Board shall consult commissions on uniform state laws and bar associations and foundations. In addition to grants to the State governments, grants may be made to local goverments and non-profit organizations and foundations.

Section 810 provides that the title shall take effect upon the expiration of one year after the date of enactment.

Mr. TOWER. Mr. President, I am delighted to join in the introduction of amendments to the Consumer Credit Protection Act to prohibit harassment and intimidation of the consumer by debt collectors.

In our society, the harassment and intimidation of any person for the purpose of collecting a debt is abhorrent. Particularly vulnerable to abusive practices is the lower income innercity dweller. Our bill attacks this problem by prohibiting a debt collector from attempting to collect in interstate commerce any debt by the use of harassing tactics such as threats of violence, false statements, repeated telephone calls, use of obscene language, and threats of loss of employment. So as not to interfere with the important work of the States in protecting the consumer on the local level and to avoid placing unreasonable burdens on small business, our bill would encourage the States to pass Model Fair Debt Collection Practices Acts and to provide mechanisms for the resolution of debtor-creditor disputes.

In considering consumer credit protection legislation which curtails creditor's remedies, Congress should weigh the overall effect it might have on the cost and availability of credit to the consumer. Bad debt losses in this country amount to billions of dollars and must be made up by someone. If the losses are too high, the result could be business failures and loss of jobs.

In some sectors of the economy such as retailing and hospital services, these losses come out of the consumer's pocketbook in the form of higher prices. For low income groups who rely heavily on installment lending, the outcome can be a curtailment of the availability of credit. Thus, consumers have a vital interest in a proper balance which will outlaw unconscionable practices but permit legitimate debt collection methods unfettered by burdensome redtape. The bill we are introducing today is designed to properly strike that balance.

Equally important is the impact Federal legislation will have on small business. The proliferation of Federal regulation in the consumer credit area is a factor which is forcing small retailers to abandon their credit plans. This is an unwise public policy which is placing the small retailer at a competitive disadvantage with the large retailers who have inhouse credit plans. It encourages the concentration of power over credit granting in the large financial institutions. To avoid this regulatory over-kill so destructive to small business, our bill has been tightly drawn to cover only those abuses which have been demonstrated to exist and can best be treated by Federal control.

Finally, it is important that the Federal Government not needlessly encroach upon the important role of the States in providing consumer protection on the local level. Approximately 25 States, including Texas, have enacted Model Consumer Debt Collection Fair Practices Acts and some 33 States require debt collection services to be licensed. Other State legislatures are moving to fill in the gap. Our bill will encourage this experimentation by the States which is so vital to the well being of the consumer and the small businessman who both need protection from unethical operators.

In sum, the Fair Debt Collection Practices Act will protect the consumer from harassment and the ethical business firm from unfair competition in interstate commerce. Equally important, it will encourage the States to take a prominent and effective role in consumer protection on the local level.

Mr. President, I am hopeful that the Senate Consumer Affairs Subcommittee, which will soon hold hearings on debt collection legislation, will thoroughly explore the merits of this proposal.

By Mr. HART (for himself and Mr. RANDOLPH) (by request):

S. 1131. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 251 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; to the Committee on Environment and Public Works.

NUCLEAR REGULATORY COMMISSION AUTHORIZATION

Mr. HART. Mr. President, at the request of the Nuclear Regulatory Commission, I and the distinguished Senator from West Virginia, Mr. RANDOLPH, are introducing a bill authorizing appropriations to that Agency for fiscal years 1978 and 1979.

The Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works, which I chair, plans to hold hearings in the near future to explore the detailed justification for the requested funds and programs. This bill will provide a logical starting point for our deliberations. However, we intend to conduct a thorough examination of the NRC programs before reaching any final conclusions regarding the appropriateness and necessity of any given program as well as the required level of funding. With the understanding that we are in no way bound by the programs or funding levels appearing in this bill, we are privileged to introduce it at this time.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1131

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1978

SEC. 101. There is hereby authorized to be appropriated to the Nuclear Regulatory Commission in accordance with the provisions of section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1954, as amended, for Salaries and Expenses, $292,150,000 to remain available until expended.

SEC. 102. Moneys received by the Commission for the cooperative nuclear safety research programs may be retained and used for salaries and expenses associated with those programs, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and shall remain available until expended. Funds may be obligated for purposes stated in this section only to the extent provided in Appropriation Acts.

SEC. 103. Transfers of sums from salaries and expenses may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred.

SEC. 104. Public Law 94-291 is amended by adding section 105 to read as follows: "In addition to the funds authorized under section 101, there is hereby authorized an amount of $200,000 for funding of intervenors to the proceeding to determine whether widescale commercial use of mixed oxide fuel should be authorized (commonly called the "GESMO" proceeding), to remain available until expended.

TITLE II—AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

SEC. 201. There is hereby authorized to be appropriated to the Nuclear Regulatory Commission in accordance with the provisions of section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, for salaries and expenses, such sums as may be necessary.

SEC. 202. Moneys received by the Commission for the cooperative nuclear safety research programs may be retained and used for salaries and expenses associated with those programs, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and shall remain available until expended. Funds may be obligated for purposes stated in this section only to the extent provided in appropriation acts.

SEC. 203. Transfers of sums from salaries and expenses may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred.

By Mr. BIDEN:

S. 1132. A bill to amend the Equal Educational Opportunity Act of 1974 to provide for an improved standard for enforced transportation of students, and for other purposes; to the Committee on the Judiciary.

EQUAL EDUCATIONAL OPPORTUNITIES AMENDMENTS OF 1977

Mr. BIDEN. Mr. President, today I introduce the Equal Educational Opportunities Amendments of 1977 which would amend the Educational Opportunities Act of 1974 to prohibit the courts from ordering the transportation of any student unless the court first determined that a racially discriminatory purpose was a motivating factor in the constitutional violation for which the transportation is proposed as a remedy.

The bill is predicated upon a series of decisions handed down by the Supreme Court, beginning in June of last year, in which the Court fashioned a new rule in racial discrimination cases. The basic rule which the Court first applied in the employment discrimination case of *Washington* v. *Davis*, 426 U.S. 229 (1976), the *Arlington Heights* v. *Metropolitan Housing Corp.*—January 1977—housing case, and now seems prepared to apply to school cases, is that a court cannot impose a remedy for alleged discrimination based upon evidence of discriminatory effect alone. The Court now requires that there be a finding that "a discriminatory purpose was a motivating factor in the constitutional violation for which the remedy is proposed." In essence, the Equal Educational Opportunities Amendments of 1977 would legislate this rule for busing cases.

My bill strikes at the heart of the injustice of court-ordered busing. It prohibits the Federal courts from disrupting our educational system in the name of the Constitution where there is no evidence that the governmental officials intended to discriminate.

My bill is limited in several important respects. First, it is only directed at busing cases which are still in the courts and for which busing has not yet been ordered.

Second, the bill only goes as far as the Supreme Court seems to go. It only goes as far as the new "discriminatory purpose" rule recently enunciated by the Court. It only goes this far because, I believe, that except via a constitutional amendment, the Congress could not go beyond the rulings of the Supreme Court.

I believe there is a growing sentiment in the Congress to curb unnecessary busing. In September of 1975, the Senate passed my amendment to the HEW appropriations bill that prohibited HEW from ordering busing to achieve school integration. That was the first time the U.S. Senate took a firm stand in opposition to busing. The Supreme Court seems to have recognized that busing simply cannot be justified in cases where State and local officials intended no discrimination.

This legislation protects legitimate constitutional rights without permitting the extreme remedy of busing where it is not justified.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD, together with a list of questions and answers that I prepared regarding this legislation.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1132

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Equal Educational Opportunities Amendments of 1977".

SEC. 2. Section 215 of the Equal Educational Opportunity Act of 1974 (20 U.S.C. 1714) is amended by redesignating subsection (c), and all references thereto, as subsection (d), and by inserting after subsection (b) the following subsection:

"(c) No court of the United States shall order directly or indirectly the transportation of any student unless the court determines that a discriminatory purpose was a motivating factor by the school officials in the constitutional violation for which such transportation is proposed as a remedy. No court of the United States should otherwise abridge the right of any child to attend the school nearest his home except for purposes of 'special education' as defined in Section 602(16) of the Education of Handicapped Act (20 U.S.C. 1401)."

SEC. 3. The Amendment made by section 2 of this Act shall take effect with respect to any order of a court of the United States which is made after the date of enactment of this Act or which is made prior to such date but which has not been effected by such date.

SOME QUESTIONS AND ANSWERS ABOUT THE "EQUAL EDUCATIONAL OPPORTUNITIES AMENDMENTS OF 1977"

Q. 1. Is this attempt to limit the authority of the Courts to order busing by Congress constitutional?

A. 1. Yes. It is constitutional for Congress to set standards for the implementation of a constitutional right by the courts so long as those standards do not interfere with the right itself. Congress can, therefore, enact legislation limiting busing as a remedy provided it does not restrict the 14th Amendment rights of litigants as interpreted by the courts. Since this legislation is consistent with the evolving principles of 14th Amendment law as developed by the Court in recent cases, it is, thereby, constitutional.

Q. 2. Since the Supreme Court appears to be nearing a definitive ruling in busing cases consistent with this legislation, why is it necessary now?

A. 2. The Supreme Court, and indeed all Federal courts, are courts of limited jurisdiction and can decide only cases properly brought before it upon appeal. It could be months or even years before the proper case is brought before the Supreme Court providing it with a record from which to make this decision.

In this instance, Congress would be taking the initiative on a matter of immediate concern to many areas in the country by framing the issue for the courts consistent with the Constitution.

Q. 3. Would this legislation permit all busing cases previously decided by the courts to be re-opened?

A. 3. No. It would apply only to busing cases which are still in the courts and for which busing has not been ordered.

Q. 4. The Court appears ready to require that there be a finding that a "discriminatory purpose was a motivating factor" in its determination of racial discrimination cases. Does this legislation provide guidelines for determining a "discriminatory purpose"?

A. 4. No. The operative language of the legislation, "discriminatory purpose was a motivating factor", is based on the Supreme Court's decision in the case of *Arlington Heights* v. *Metropolitan Housing Corporation* (Jan. 1977). In that decision, the Court established some guidelines for implementation of the "discriminatory purpose" rule. For example, the Court said in footnote 21 of the decision:

"Proof that the decision by the Village was motivated in part by a racially discriminatory purpose would not necessarily have required invalidation of the challenged decision. Such proof would, however, have shifted to the Village the burden of establishing that the same decision would have resulted even had the impermissible purpose not been considered. If this were established, the complaining party in a case of this kind no longer fairly could attribute the injury complained of to improper consideration of a discriminatory purpose. In such circumstances, there would be no justification for judicial interference with the challenged decision. But in this case respondents failed to make the required threshold showing. See *Mt. Healthy City School Dist. Bd. of Education* v. *Doyle*, No. 75-1278, post, p. ——.

Furthermore, as stated elsewhere in the decision, the Court based this language on an earlier line of cases. The Court cited *Keyes* v. *School District No. 1*, 413 U.S. 189, 208 (1973); *Wright* v. *Rockefeller*, 376 U.S. 52, 56–57 (1964); *Akins* v. *Texas*, 325 U.S. 398, 403–404 (1975).

Therefore, the "discriminatory purpose" language has a well established meaning in 14th Amendment law.

By Mr. MATHIAS:

S. 1133. A bill to repeal section 3306 of title 5, United States Code, to eliminate the requirement of apportionment of appointments in the departmental service in the District of Columbia; to the Committee on Governmental Affairs.

REPEAL OF CIVIL SERVICE APPORTIONMENT REQUIREMENTS

Mr. MATHIAS. Mr. President, I am introducing a bill to repeal the apportionment requirements for employment with the civil service system.

This requirement of the law states that all sections of the country should have a proportionate share of Federal appointments to headquarters jobs in the Washington, D.C. metropolitan area. The concept of proportional geographic representation in the civil service dates back to 1883 in the enactment of the Civil Service Act.

Back in those days, there was little usage of a merit system. Friends and relatives of politicians and high officeholders got the civil service jobs. Forty percent of all civil service jobs were concentrated in the District of Columbia at that time.

But times have changed since 1883. The civil service system instituted a merit system which assured a modern, professional work force of dedicated Americans. Transportation and communication brought the country together both physically and psychologically. The Federal Government decentralized many of its policy making and program administration jobs to field offices outside the Washington area. Today, less than one in seven of the jobs in the competitive civil service are in Washington.

And a number of exceptions were made to the geographical apportionment law which had the effect of discriminating against minorities. For example, the "excepted service" is exempt from apportionment. These positions total about 70,000.

Veterans and those with veterans preference are not subject to apportionment. The Civil Service Commission estimates that 50 percent of all Federal appointees are veterans.

All positions at GS–13 and above are exempt from apportionment on the grounds that these positions should be based on merit alone and attract the most qualified. There are 183,867 positions at grade 13 through 18 in the civil service.

It is indeed anachronistic to believe that certain higher grade civil service jobs require none but the best while others, at lower grades, which require specialized training as well, should not also be based solely on merit.

Other exceptions from the apportionment law are field office positions located in Washington; Government Printing Office positions; apprentice positions in the recognized trades and skilled occupations; and part-time and intermittent jobs.

In sum, as a result of all these exceptions to the rule, about 50,000 Federal positions—15 percent—of the total 326,000 Federal civilian jobs in Washington are subject to apportionment.

The Civil Service Commission has long held that the apportionment requirement is outmoded, ineffective, and cumbersome to administer.

The Commission reported:

Our records show 41 States and Territories currently in arrears and 15, including the metropolitan area of the District of Columbia, in excess of their apportionment quotas. This imbalance has remained virtually unchanged for the last 25 years or more. Apportionment simply has not made a significant difference in the number of persons from States perennially in arrears who take employment in Washington, D.C. To a considerable extent this is because residents of the States in arrears who want Federal jobs find they can get them in their own States without having to uproot self and family to move to Washington.

Apportionment is based on quotas that do not take into consideration the relative qualifications of applicants and thus subverts the merit system which we all have worked hard to perfect, preserve and protect. And because of the veterans preference in civil service hiring, women have had to bear more than their fair share of the burden of apportionment.

The fact of the matter is that Federal civil service jobs are widely dispersed throughout the country. Competitive exams are held on a regular basis throughout the country for those jobs, and regional representation and equal employment opportunity in the Federal civil service are assured through this system based on merit.

A small percentage of the jobs, however, are subject to this archaic apportionment law here in Washington.

It is so outmoded at this point that nobody is sure anymore about the latest count of persons in apportioned jobs against their State of legal residence. Civil Service has a very difficult time getting agencies to report on their apportioned employees and to keep track of them.

This bill has been introduced several times in the last few years. It has received overwhelming support from the Civil Service Commission, the Office of Management and Budget, and the Comptroller General of the United States.

Our President has written a book, the title of which, I believe, applies here to the repeal of the apportionment rule: "Why Not the Best?" It is time to insure that the best are afforded equal employment opportunity to all merit positions in the civil service by removing the apportionment obstacle.

ADDITIONAL COSPONSORS

S. 14

At the request of Mr. MATHIAS, the Senator from Oregon (Mr. HATFIELD), the Senator from Montana (Mr. MELCHER), the Senator from Vermont (Mr. LEAHY), and the Senator from Minnesota (Mr. HUMPHREY) were added as cosponsors of S. 14, the Bill of Rights Procedures Act of 1977.

S. 28

At the request of Mr. MATHIAS, the Senator from Oregon (Mr. HATFIELD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 28, the Repeat Offenders Prosecution and Prison Improvement Act.

S. 35

At the request of Mr. MATHIAS, the Senator from New York (Mr. JAVITS) and the Senator from Minnesota (Mr. HUMPHREY) were added as cosponsors of S. 35, the Civil Rights Improvements Act of 1977.

S. 682

At the request of Mr. MAGNUSON, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 682, the Tanker Safety Act of 1977.

S. 685

At the request of Mr. MATHIAS, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 685, a bill to amend the Tax Reform Act of 1976 to conform the termination date for certain tax deductions for transfers of partial interests in property for preservation purposes with the termination dates of related provisions.

S. 708

At the request of Mr. CLARK, the Senator from Texas (Mr. BENTSEN) and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of S. 708, a bill to amend title XVIII of the Social Security Act to provide payment for rural health clinic services.

S. 926

At the request of Mr. CLARK, the Senator from New Jersey (Mr. CASE) was added as a cosponsor of S. 926, a bill to provide for the public financing of primary and general elections for the U.S. Senate.

S. 957

At the request of Mr. FORD, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 957, the Consumer Controversies Resolution Act.

S. 969

At his own request, the Senator from Alabama (Mr. ALLEN) was added as a cosponsor of S. 969, a bill to amend the Service Contract Act of 1965 to extend its coverage to professional employees.

S. 972

At the request of Mr. NELSON, the Senator from New Hampshire (Mr. DURKIN) was added as a cosponsor of S. 972, a bill to authorize the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development.

S. 1045

At the request of Mr. STEVENSON, the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 1045, a bill to change the name of the Indiana

Dunes National Lakeshore to the Paul H. Douglas National Lakeshore.

S. 1046

At the request of Mr. SCHWEIKER, the Senator from New Mexico (Mr. SCHMITT) and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of S. 1046, a bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it.

S. 1119

At the request of Mr. YOUNG, the Senator from South Dakota (Mr. MCGOVERN) was added as a cosponsor of S. 1119, a bill to amend the Food Stamp Act of 1964, as amended, to provided for both the continuation and tribal administration of the food stamp and commodity distribution programs on Indian reservations, and for other purposes directly related to the administration of the food stamp and commodity distribution programs on Indian reservations; to implement the Federal responsibility for the care and nutrition of the Indian people by improving services, facilities, and self-determination of Federal food assistance programs.

SENATE JOINT RESOLUTION 39

At the request of Mr. BIDEN, the Senator from Utah (Mr. GARN), the Senator from Nevada (Mr. CANNON), the Senator from Kentucky (Mr. FORD), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of Senate Joint Resolution 39, a joint resolution on the Food and Drug Administration's ban of saccharin.

SENATE JOINT RESOLUTION 34

At the request of Mr. GOLDWATER, the Senator from Oklahoma (Mr. BARTLETT) was added as a cosponsor of Senate Joint Resolution 34, a joint resolution to designate the week commencing with the third Monday in February of each year as "National Patriotism Week."

SENATE RESOLUTION 105

At the request of Mr. NELSON, the Senator from West Virginia (Mr. BYRD), the Senator from Alaska (Mr. STEVENS), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Minnesota (Mr. ANDERSON), the Senator from Kentucky (Mr. FORD), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Resolution 105, a resolution calling for a White House Conference on Small Business.

AMENDMENTS SUBMITTED FOR PRINTING

CODE OF OFFICIAL CONDUCT—SENATE RESOLUTION 110

AMENDMENT NO. 159

(Ordered to be printed and to lie on the table.)

Mr. WALLOP (for himself and Mr. DANFORTH) submitted an amendment intended to be proposed by them jointly to Senate Resolution 110, to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate, and for other purposes.

AMENDMENT NO. 160

(Ordered to be printed and to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to amendment No. 65 intended to be proposed to Senate Resolution 110, supra.

AMENDMENT NO. 161

(Ordered to be printed and to lie on the table.)

Mr. BIDEN submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

TAX REFORM ACT OF 1977—H.R. 3477

AMENDMENT NO. 162

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted an amendment intended to be offered by him to H.R. 3477, to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

AMENDMENT NO. 163

(Ordered to be printed and to lie on the table.)

Mr. NELSON submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. NELSON. Mr. President, I wish to announce that the Committee on Small Business has scheduled a hearing on Thursday, March 31, 1977, at 9:30 a.m., in room 424 of the Russell Senate Office Building, on the nomination of Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration. Persons wishing to testify or submit statements, please contact Allen Neece on 224-3794.

ADDITIONAL STATEMENTS

CONGRESSIONAL ACTION NEEDED ON PUBLIC WORKS EMPLOYMENT ACT

Mr. RANDOLPH. Mr. President, it has been more than two weeks since the Senate passed the Public Works Employment Act of 1976 (H.R. 11). Immediately after passage, the Senate appointed conferees and asked the House of Representatives to confer on this important measure. There has been no response from the other body and conferees have not been appointed.

Mr. President, I had the opportunity to confer today on this matter with Representative HAROLD T. JOHNSON, chairman of the House Public Works and Transportation Committee. I expressed to him my concern about the delay in resolving our differences on this legislation. There are differences in the two versions of the bill, but these can never be resolved until the conferees meet.

I have subsequently written to the chairman of the House committee reemphasizing my concerns and stating my belief that the Public Works Employment Act should become law without delay.

Mr. President, I ask unanimous consent that the text of my letter to Representative JOHNSON be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
March 25, 1977.

Hon. HAROLD T. "BIZZ" JOHNSON,
Chairman, Committee on Public Works and Transportation, House of Representatives, Washington, D.C.

DEAR BIZZ: I am sorry we had to cut short our conversation this afternoon but a vote in the Senate required my immediate attention. I re-emphasize the belief that a Senate-House conference should be convened early next week to consider the Public Works Employment Act of 1977. There are differences in the versions of the bill passed by the two Houses. These can be resolved only by a conference.

When the 95th Congress convened, legislation to stimulate the creation of jobs was given the highest priority. The Public Works Committees in both the Senate and House responded to this need by expediting consideration of legislation. The House bill passed on February 24 and the Senate completed action on March 10. Senate conferees were appointed immediately. The failure of the House to take similar action continues to delay resolution of differences leading to enactment of this vitally needed measure.

I understand your concern about inclusion in the Senate bill of authorizations for the construction grant program of the Water Pollution Control Act. This action was taken to relieve a serious shortage of Federal funds to build sewage treatment facilities. Approximately 34 states will have exhausted their construction capability by the end of this fiscal year. Prompt authorization and appropriation of these funds—which also have substantial job-creating ability—in no way precludes the development of legislation addressing other water pollution issues. Members of our Committee repeatedly stated their commitment to consider all water pollution issues this year. The Committee, in fact, is planning hearings in May.

I suggest, Bizz, that by failing to meet in conference, we are breaking faith with the American people to whom we made a commitment to ease unemployment. I believe it would be extremely helpful if the conference could meet to explore our concerns. This is the only way that we can ever reach agreement.

With personal regards and official esteem, I am,

Truly,

JENNINGS RANDOLPH,
Chairman.

CENTRAL ARIZONA PROJECT

Mr. GOLDWATER. Mr. President, one of the country's best informed men on Western, Indian, land, and water problems is Mr. Howard Pyle, former Governor of the State of Arizona. In a recent series of newspaper articles, Mr. Pyle has dealt expertly with current developments in these areas, especially that concerning President Carter's attempt to halt construction of the Central Arizona project. Because of their timeliness and importance I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the the articles were ordered to be printed in the RECORD, as follows:

HOWARD PYLE WRITES

This week's revelation that members of Arizona's Indian community had filed suit in U.S. District Court in Phoenix claiming they were entitled to 70 percent of the state's allocation of Central Arizona Project water was reminiscent of one of the most fantastic episodes in Arizona's history.

The facts differ in a wide variety of ways, but the impact is certainly comparable.

The earlier incident began when one James Addison Reavis, a street-car conductor from Missouri, claimed to have acquired title dating back to December 20, 1748, to a Spanish land grant embracing the largest part of what we know as the Salt and Gila River valleys. The area involved totaled some 2,000 square miles.

As history records it, the Reavis-Peralta land-grant scheme was based on titles guaranteed to Mexican land owners by the United States in the Treaty of Guadalupe Hidalgo and the Gadsden Treaty. Reavis set out to prove that the King of Spain had endowed one Miguel Peralta de Cordoba as Baron of the Colorados in 1748.

An impressive collection of documents was produced as evidence that the grant of land to the Peralta family included the water and mining rights to a tract 236 by 78 miles in size. It was alleged that a descendant of the original Baron had transferred the entire grant to an Arizona pioneer by the name of George M. Willing, and that Willing gave over the claim to Reavis in 1867.

To strengthen his claim to the property, Reavis managed to marry a Mexican girl who was said to be the only direct surviving descendant of Miguel Peralta. Reavis' claims were so plausible that he was able to torment settlers in the Gila and Salt valley by collecting tribute from them.

Since the Southern Pacific Railway's right-of-way crossed the same area, tribute was collected from the SP, too.

The Reavis family lived magnificantly once their claim was officially recognized by the United States courts. They traveled widely in Europe, maintained homes in Washington, St. Louis and Chihuahua City. Headquarters for the family business was established on the railway near the present town of Casa Grande.

The Reavis bubble of prosperity lasted until the early 90's. It was discovered that the supposed deeds to Peralta property were recorded on paper that was less than 20-years old. It was determined that some of the printing was done with type of approximately the same vintage. Gradually the older manuscripts involved were declared to be fraudulent.

Reavis' wife, supposed heiress to the Peralta wealth, was found to be from a California Indian reservation, but well trained to play her part.

In 1895, Reavis went to prison in Santa Fe. Released before his 6-year sentence was up, he and his family retired to obscure poverty in old Mexico.

It will be most interesting, and of great significance, to see what happens to the suit Arizona Indians have filed claiming 70 percent of the state's allocation of Central Arizona Project water based on conditions alleged to date from 1864.

HOWARD PYLE WRITES

When an unidentified White House aide is reported as saying—"President Carter believes the Central Arizona Project is unjustifiable, environmentally unsound and uneconomical and unnecessary"—it's strongly reminiscent of the days when national domestic policy was being manhandled by Haldeman-Ehrlichman and company.

Never having been elected to take on this much responsibility these two men and their palace guard associates could be just as brash as their whims might dictate while the head man in the White House was too preoccupied with such things as international policy to be bothered with all of the minutia involved.

We saw it happen then and we now see perhaps the first evidence of a replay of this kind of administrative performance during the regime of President Carter.

Governor Raul Castro and our Congressional delegation have expressed amazement that none of them were consulted in any way before it was abruptly announced that the CAP and x-number of comparable projects in various areas would be dropped from the federal budget.

Now we are told that it wouldn't have made any difference if these leaders had been consulted, the President's answer would have been the same. Again, a staff source, and not President Carter personally, provides the quote. As in the Nixon days when politically unsound judgments were being tossed about, you begin to wonder who is in charge.

Our new president didn't make it to the White House on the basis of what his campaign staff had to say about what he thought. He impressed those who voted for him by being his own man, by assuring the electorate over and over, that he, Jimmy Carter, would be the President.

He lost no opportunity to make it clear that he would never tolerate critical decision-making by administrative personnel who had not been elected to represent the people of this country. Instead, he, Jimmy Carter, would do the leading and that his ear would be finely tuned to the wishes and interests of those affected.

Plans are known to be under way for a two-hour, question and answer, live radio broadcast from the White House to enable Preisdent Carter to hear from the people personally and directly. Still, as this is written, the President has failed to even acknowledge Governor Castro's efforts to be in touch with him, or respond to other appeals for an audience on the subject.

The only answer so far is a staff engineered 60-day review of the questions involved with the Office of Management and Budget in charge. In all probability the curtailment recommendation originated with OMB and it is conceivable that the President's personal silence can be attributed to his having decided—OMB got us into this jam—it's up to them to get us out of it.

It's just the way things work too often in Washington, D.C.

HOWARD PYLE WRITES

As we try to comprehend the impact of what the new recruits in Washington are threatening to do to the Central Arizona Project and 18 other water projects throughout the country, we need to understand something of the historic significance of what is involved here.

One of the oldest and most essential pursuits in the history of the human race has been the conservation and beneficial use of water. Thousands of years ago, the big attraction in ancient Egypt was the River Nile.

Sustained by its life-giving flow, the land prospered and, in the Fourth Millennium before Christ, irrigation projects were launched on a grand scale under the pharaohs. As a spreading network of canals carried water to the fields, the Nile's green fringe of agriculture brought increasing wealth to Egypt.

The earliest prehistoric culture known to have thrived in what we now call Arizona and New Mexico did so because of extensive systems of dams and ditches for irrigation purposes. A combination of drought, unfriendly tribes and sickness, is believed to have driven the Hohokam from this area.

The next time an organized effort was made to give water an opportunity to encourage growth and development hereabouts was in 1867 when the Jack Swilling Ditch Company went to work restoring many of the old Hohokam waterways for irrigation use. In the 110 years since the Valley of the Sun has become world famous for its agricultural productivity.

In 1902 the Congress of the United States put its stamp of approval on water conservation and development as national policy by passing the widely acclaimed Reclamation Act. The first dam built under the Act was Arizona's Roosevelt Dam. It was the beginning of perhaps the most successful enterprise of its kind in the entire history of water conservation and flood control.

As the second half of the 20th century was well underway, the total irrigated acreage of the world had nearly tripled since 1900. Where has the most effective job been done? In the United States!

How well I remember the visits of water conservation specialists from all over the world during my years in the Governor's office. One of the most distinguished of those who came by to see how we did it was the Shah of Iran.

We have had superb leadership in this field in our country. Among the many who have worked miracles is Herbert Hoover, our 31st President and the man for whom Hoover Dam is named. Before his White House years it was Mr. Hoover who presided over the long and arduous sessions of the Santa Fe Compart Commission, the group charged with developing agreement among the states having an interest in the waters of the Colorado River.

Mr. Hoover was motivated by the conviction that our country needed—"A broad national program for the full utilization of our streams, our rivers and our lakes." It was Mr. Hoover's view that—"True conservation of water is not the prevention of its use. Every drop of water that runs to the sea wtihout yielding its full commercial returns to the nation is an economic waste."

No state has made better use of its water resources than Arizona. No state could be better prepared to continue to do the same with the completion of the Central Arizona Project.

The water involved belongs to Arizona. Let President Carter know how you feel about his administration's attempt to keep Arizona from protecting its future through the earliest possible completion of the CAP.

HOWARD PYLE WRITES

It's refreshing to feel the rising anger of our people over the Carter Administration's surprising criticism of the Central Arizona Project as one of 19 major water development programs throughout the country that can't be justified on the basis of cost benefits.

The CAP is a $1.6 billion investment in imperative protection for Arizona's future. Too seldom emphasized is the fact that 75 percent of the federal funding involved will be repaid to the federal treasury in 50 years. An examination of the record proves that Arizona has never defaulted on a reclamation obligation and the CAP will be no exception.

Anyone who has read the February 28 issue of US News & World Report will understand why it is extremely difficult to be patient with a government that talks about cost benefit formulas when the meaning of the concept has been so inconsistently applied for so long.

The particular article to which reference is made is entitled—"Budget Deficits Year After Year And No End In Sight." The substance of the statement is contained in the opening paragraphs—"You can count on another 3 years of red ink, and probably more, before the government balances its books. Besides that, one of those deficits could turn out to be the largest in history."

As Congressman John J Rhodes once put it in an address he entitled—"Inflation· Still Public Enemy No. 1"—"Four decades of def-

icits—postponement of the day of reckoning have dimmed the light of reality."

Those of us who are feeling the impact of inflation where it hurts the most—the pocketbooks of every citizen—want nothing like we want to see inflation stopped, but who believes it's going to happen? How can it happen when the pressure for more and more politically motivated programs never ends.

A federal outlay that totaled $366.5 billions in 1976 now appears to be headed for the half-trillion mark before long. No matter, demands are increasing for a national-health-insurance program costing possibly $100 billion or more annually.

Additionally, Washington continues to aid and abet an awesome growth in expenditures at state and local levels of government. From $36 billion annually 20 years ago, the cost of state and local government has multiplied 6 times, to well over $200 billion. From 4 million employes, payrolls have swelled to 11 million.

High marks should be given to consistent efforts to put cost benefit analysis to work in dealing with government budgets, but having been personally involved in the process while politically potent interests were cutting the best intentions of all concerned to ribbons, I am not encouraged by the prospect of future success.

My most recent experience is especially vivid. As chairman of the National Advisory Committee under the Occupational Safety and Health Act, better known as OSHA, we lost no opportunity to try to apply cost benefit analysis to what was projected. It was a miserable failure.

Against this backdrop of the way it is, it's hard to believe that any investment as certain to be productive of real value as the Central Arizona Project should be handcuffed to anything as unworkable as cost benefit analysis has proved to be in the administration of government fiscal policy.

HOWARD PYLE WRITES

The current controversy over the Central Arizona Project is a continuation of what has become an old, old story.

Long years after his service as chairman of the Colorado River Commission, the forum that allocated the waters of the Colorado River to the upper and lower basin states, former President Herbert Hoover wrote in his memours—"After years of labor we had untangled the legal, legislative, engineering and financial delays in the development of the Colorado River Compact."

The last formality, federal ratification of the Compact, was completed June 25, 1929. In the proclamation that followed, President Hoover said, among other things—"It is the final settlement of disputes that have extended over 25-years and which have stopped the development of the River."

Much progress has been made in the half century since, but the road to this moment in time has been anything but trouble free. In the main, this fact bears out the urgency that always pertains when water rights and use are at issue. Some of the bitterest feuds of record have involved arguments over water.

During the years that the Central Arizona Project was before the Congress it was war of the severest kind. The prize was water and none of those who were in the fight would surrender a drop of it as long as there was the slightest hope of prevailing.

Not until the United States Supreme Court had ventilated the case for what seemed like forever, and Arizona's claims had been fully validated, was the Congress persuaded to authorize the Project. With Arizona's all-time favorite Democrat, Tempe's native son and the dean of the United States Senate, Carl Hayden, leading the way, it was finally accomplished.

Next came the struggle for appropriations to underwrite the cost of the Project. Although 75 percent of the $1.6 billion plus that will be needed is to be paid back to the federal government within 50-years, it is still a major investment. Delays were inevitable and the friction never seemed to cease. Again our Congressional delegation was equal to the challenge and the funds were finally commited.

Today nearly $400 million are in the consrtuction pipeline. It is estimated that 25 percent of the work is completed. The Paradise Valley Detention System, 12 miles of dams and dykes north of Scottsdale, designed to divert water to the river by way of the Project Canal, are in place.

If the work stoppage that is now threatened is not set aside, the safety problem that will be caused by not finishing the Project, will be awesome. Without outlet works to back up what has been built, and the least expensive answer is the Canal itself, potentially destructive flood waters will have no place to go but through the City of Scottsdale.

If these and assorted other facts were some kind of top secret it might justify what the Central Arizona Project is now being subjected to, but such is not the case. Instead, it appears that there are those who are so opposed to the construction of Orme Dam, regardless of the multipurpose advantages it has to offer this water-hungry state, that they will stop at nothing to try to kill it.

Orme Dam is not essential to the Central Arizona Project, but it's safe to predict that Arizona will see the time when it would make almost any sacrifice to have the additional benefits it would help to assure.

HOWARD PYLE WRITES

What is the primary reason for the Central Arizona Project?

Sixty percent of Arizona's water supply is now being withdrawn from declining underground sources. This means it is being mined as minerals are mined. While it is true that Mother Nature replaces some of this water each year, most of it is irreplaceable.

Our only hope of reducing the rate of depletion of our underground water resources is the Central Arizona Project. Once the Project is operational it will have the potential of decreasing our groundwater imbalance by at least two-thirds.

Put even more explicitly, in some areas where pumping is going on, the underground water table is dropping as much as 10 feet each year. In the 3 central Arizona counties of Maricopa, Pinal and Pima, the estimated annual overdraught from underground is 1.8 million acre-feet of water. The estimated long-term water supply that can be imported by the Central Arizona Project is 1.2 million acre-feet annually, or approximately two-thirds of our current overdraught from underground sources.

Again, in the bluntest possible language, the facts show that Arizona is exhausting its water resources at nearly twice the replenishment rate. As our water requirements continue to increase it is clearly obvious that our present losses cannot go on forever. Without the Central Arizona Project, plus well planned and administered water conservation, realistic water law and improved watershed management, an inevitable bottom line is not far away for Arizona in terms of its water needs.

As it is being repeatedly emphasized that 75 percent of the total $1.6 billion plus cost of the CAP will be returned to the federal treasury in 50 years, questions are being asked about the other 25 percent of the investment.

This portion of the expenditure covers flood control, fish and wildlife enhancement and recreation. In the public interest nationally, because there are activities of this kind in virtually every locality in our country for which we all pay a share, federal financial participation is generally nonreimbursable. The Central Arizona Project will earn the benefits of this policy.

With jobs being a top priority in today's economy, questions are also being asked about the affect on employment if work on the CAP is stopped. On the very best authority we are advised that about 650 people will have to be terminated almost immediately. If the work is allowed to go forward, as many as 3,500 to 4,000 people will be employed during the peak stages of the construction.

Put another way, about 40,000 man-years of direct employment will be associated with the building of the Project. Additional employment will be enabled through operation and maintenance of the CAP.

These are the kinds of facts that our representatives in Washington will be using to sustain Arizona's contention that the Central Arizona Project is worthy of the support the United States Congress has authorized and in which nearly $400 million has already been invested.

We all have a responsibility to write to the President about this very urgent piece of business.

HOWARD PYLE WRITES

The news from the nation's capital is beginning to give us another taste of an imperial White House.

Jody Powell, the President's press secretary, was being questioned about the 10 water projects that had been placed in jeopardy by executive order.

Asked if the members of Congress had been involved in the process that led to the decision to recommend halting the projects, Powell replied—"There was no possibility of preconsultation with 60 members on 19 projects."

Then the prevailing White House philosophy came through loud and clear as Mr. Powell added—"To have informed members with projects in their districts would have permitted them to organize their opposition."

In spite of the uproar the exercise has caused, climaxed by Senate action overriding President Carter's decree, 38 more water projects have now been added to the list as failing administration fiscal criteria. Included are projects in 23 states.

Four days of hearings are scheduled to begin on March 21 with the Central Arizona Project first on the list for a full day of discussion. The Arizona team is in Washington in full force. Opinions vary as to the outcome of the controversy with no one willing to risk a prediction as to just what can be expected.

Next week's hearings are not likely to be conclusive in view of the fact that an administration task force is surveying all of the strategic factors involved from an interdepartmental point of view. The survey recommendations are to be completed by April 15 after which the White House will announce its conclusions.

Few there are who believe that the vast spread of details that pertain can be adequately reviewed in so short a time. It sounds simple enough to decide that the complexity of it all can be quickly reduced to a matter of pure economics and compliance with certain environmental and safety standards. Still, this appears to be the objective.

With the Congress so vitally concerned on so many different fronts, politically and otherwise, the prospect of an unruffled peace seems remote, indeed. The heavy Senate vote telling the President to get on with water and dam projects is being described as just a skirmish. While Vice President Mondale tries to calm the Congressional storm, President Carter is said to be standing pat.

Meanwhile, here at home in Arizona, the committee that Governor Castro has named to put the pressure on in every way possible,

is calling on every resource at its command to dramatize the state's imperative need for the already partially completed Central Arizona Project. The cooperation of all concerned is mounting a tremendous testimonial that may or may not be helpful, but it will be delivered just the same.

It may be hard for some to believe, and many of us would rather not believe it, but the feeling grows that we are in the throes of one of the severest tests in the entire history of the CAP, and certainly one of the most unpredictable.

JOAN MONDALE HAS LEADERSHIP ROLE IN THE ARTS

Mr. HUMPHREY. Mr. President, I always have believed that the good life, the civilized life, is more than bread, more than automobiles, more than modern conveniences—it is poetry, it is drama, it is music, and all the arts. And for this reason, effective support for the arts and humanities has been one of my primary concerns, not only during my term as Vice President, but also during my career as a U.S. Senator from Minnesota.

Over the years I have learned a special appreciation for those people who are involved in increasing public awareness of and support for the arts. And so, I am especially pleased to bring to the attention of my colleagues the efforts of a bright and gracious and intelligent woman of whom I am both proud and very fond—Joan Mondale.

Minnesota has given this Nation not only the able and intelligent leadership of the Vice President, but also the talented and knowledgeable leadership of a woman whose efforts may well permanently influence the American public's view of the arts. I am grateful for and strongly encourage these efforts.

Promotion of the arts is not a new interest for Joan Mondale. Indeed, the author of "Politics in Art," Joan has worked in art museums in Minneapolis, Washington, and Boston. Her credentials and her enthusiasm for this area are well detailed in articles by Sarah Booth Conroy and Paul Richard in the Washington Post, and Laura Foreman in the New York Times. I commend these articles to the attention of my colleagues and ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

MODERN ART DECORATES THE VICE PRESIDENT'S HOME

(By Paul Richard)

"If contemporary art can teach us anything," Joan Mondale said yesterday, "it is that context changes content."

The art she has installed in her official residence is more than decoration. The wife of the Vice President is using her position to support modern art.

The first work one encounters when one enters the front door is a lithograph of ale cans by Jasper Johns. The last thing one sees is the print by Robert Rauschenberg that made the cover of her book, "Politics in Art" three years before that artist made the cover of Time magazine. Fifty other works most borrowed for a year from Midwestern museums, have been installed between them The furnishings are bland. The color scheme is white and beige. The decor is so anonymous—and the works of art so striking—the visitor feels commanded to think about modern U.S. art.

At a press luncheon yesterday, Mondale spoke of her "commitment to all arts." She paused. "Especially the visual arts," she said.

Her uncle, Philip R. Adams, was for three decades director of the Cincinnati Art Museum. Mondale herself has worked in art museums in Minneapolis, Washington and Boston. It is wonderful," says one museum official, "to have a friend in court."

Betty Ford did it for the dance. Lady Bird Johnson did it for trees and flowers. The art world expects Joan Mondale to do as much for art. There is reason for that optimism. Already she has:

Chosen an art specialist for her staff. She is Mary Ann Tighe, 28, now an education specialist at the Hirshhorn Museum and Sculpture Garden. Tighe, whose art criticism has been published in the New Republic, The Washington Post and other periodicals, is the author of "Art America," a survey of American art which is scheduled to be published soon. At the University of Maryland, she did her master's thesis on Max Ernst.

Asked the concessionaires of the National Park Service to offer, in their gift shops, fewer plastic trinkets and more works handmade by craftsmen.

Addressed museum trustees at the National Gallery of Art. "It is important," she told them, "not only that you take pride in your achievement, but that you be recognized for it by your nation and your nation's government."

Attended the openings of the museum retrospectives of Alexander Calder (in New York) and Rauschenberg (in Washington).

Asked 40 museum directors to a reception at her house. They visited her Sunday to see the art displayed.

Mondale is expected to encourage federal departments to install works of art.

The Mondale collection ranges from the academic to the experimental. It includes a little bronze of 1933 by Paul Manship, the Minnesota native who did the shiny statutes for New York's Rockefeller Center, and a piece—of knotted rope and wood—by New York's Robert Morris.

"Isn't it enigmatic?" asked Mondale. Isn't that rope a mess?"

Among the other sculptures are a 6-foot bronze by Isamu Noguchi; "Star Cage" of 1950, a superb welded steel drawing by the late David Smith; two works by Louise Nevelson, a pivoted steel piece by Mark di Suvero, and "Alphabet in the Shape of a Good Humor Bar," 1975, by Claes Oldenburg.

The Oldenburg is displayed beside an Andy Warhol soup can. "It's our pop art corner," Mondale explained.

Some of America's best known painters are also represented. They include Edward Hopper ("Sunday," his 1926 oil, on loan from Washington's Phillips Collection, also was reproduced in Mondale's book;) Georgia O'Keefe, Roy Licthenstein, Sam Francis, Robert Motherwell, Hans Hofmann, Willem de Kooning, Richard Estes, Jacob Lawrence and Ellsworth Kelly.

Younger artists, among them Washington's Sam Gilliam, also are represented. So are Thomas A. Rose and George Morrison, Minnesota artists Mondale calls "unknown."

She was aided in her choices by Martin Friedman, director of the Walker Art Center, Minneapolis, a longtime friend. It is clear from the way the colors of the Gottlieb echo those of the Ellsworth Kelly, and from the mix of small and large works, that their intention was not just to honor modern art but to grace a home. The art looks fine.

The works were borrowed from museums in Detroit, Kansas City, Ann Arbor, Madison, Des Moines, Lincoln and other Midwestern cities. They will remain on view one year. "Next year," said Mondale, "I'll work with a Texas museum and replace these objects with Southwestern arts and crafts."

"GOOD HUMOR" RULES AT MONDALE MODERN ART SHOW

(By Laura Foreman)

WASHINGTON, March 23.—Gazing across the den of the placid and elegant Victorian mansion, the eye is jarred by a flesh-colored mass that bears a distressing resemblance to internal anatomy.

It isn't. A comforting closer look discovers that this is not viscera but Art—a three-foot-high fiberglass prototype by Claes Oldenburg entitled "Good Humor." It consists of bloated letters of the alphabet squashed together in the shape of a popsicle, complete to a realistic dollop dripping off one end.

It won mixed reviews today from reporters and critics who toured the Vice-Presidential mansion occupied by the Walter F. Mondale family. Some praised Mrs. Mondale's judgment in not placing it in the dining room.

NOT A PUBLIC SHOW

But no matter. She likes it, and the Mondale children like it, and they're the ones who, for the next year, will be living with the Oldenburg opus and 51 other works by 20th-century American artists that have been installed in the Mondale household.

The exhibition will not be open to the public, since, unlike the White House, the Vice President's house, is not divided into a private family section and a public section open to tours.

"This is our own house, we live here," Mrs. Mondale said at today's showing. "I can't go upstairs to escape the tours."

Nevertheless, she assembled the collection with the aim of spotlighting and encouraging achievement in contemporary American art.

The display is the first in a planned series to be lent for one year by museums in various parts of the country. The lenders in this case are mostly from the Middle West.

"Sometimes when we're all here in Washington," said Mrs. Mondale, "we tend to forget there's an active, deeply committed cultural life" away from the East and West Coasts.

VICE PRESIDENT'S FAVORITES

The works in this exhibit include contemporary paintings, drawings, prints, sculptures and crafts in a variety of media on loan from museums in Minnesota, Iowa, Michiga, Nebraska, Wisconsin, Kansas, New York and Washington.

The works were assembled by Mrs. Mondale in consultation with an old friend, Martin Friedman, director of the Walker Art Center in Minneapolis.

Painters represented in the collection include Willem de Kooning, Joseph Albers, Robert Motherwell, Georgia O'Keeffe, Milton Avery, Mark Tobey, Charles Sheeler and William Baziotes.

Mrs. Mondale said that her husband's two favorite works were Robert Rauschenberg's "Signs," a silkscreen montage memorializing the turmoil of the 1960's, and the martyrs that decade produced, and Edward Hopper's painting "Sunday," which depicts an old man sitting alone on a curb and expresses something of the loneliness and isolation of old age.

The two pieces are perhaps the most representational and least abstract of the collection, and Mrs. Mondale was asked whether this indicated anything about her husband's taste in modern art.

"He'll learn to relax and enjoy just the colors and the shapes and the forms and not worry about the story-telling content," she predicted, adding that appreciating abstract art devoid of narrative requires a "gigantic leap" in perception.

It's one she doubtless made long ago. Joan Adams Mondale graduated from Macalester College in St. Paul with a minor in art,

worked at the Boston Museum of Fine Arts and the Minneapolis Institute of Arts and, after moving to Washington, gave tours at the National Gallery of Art. She is the author of "Politics in Art" and is an enthusiastic and reputedly talented potter.

As for her three teen-aged children's reaction to the new collection, she said:

"The only thing I asked is that they know the name of the painting and the artist who did it, but they're picking out the ones they like. They get a big charge out of Oldenburg's 'Good Humor,' " she said, adding that she did, too, since Oldenburg "makes you look at ordinary things in a way you have never looked at them before."

Another glance at the fleshy popsicle prompted agreement.

THE HOUSE IS NOW A HOME * * *

(By Sarah Booth Conroy)

Joan Mondale is the Vice President's wife, but the problem she faced is one many people in Washington have: how to make a furnished temporary house look like home.

Her answer is the one official wives learn: the paintings on the walls, the ashtrays and vases on the table make all the difference in the atmosphere of the house. Mondale had advantages most people in furnished homes don't have—years of studying and teaching art and practicing a craft, and the ability to borrow the art she likes best from her favorite museums.

The result is that the official Vice President's house, above the newly-painted white anchors on Observatory Hill, looks quite different from the way it did when the former Vice President and Mrs. Nelson Rockefeller decorated it.

Gone are the three or four big American eagles fancied by Rockefeller, the safe, representational paintings, and the big controversial Rockefeller choice, the Max Ernest bed. Still aboard are the Kittinger Williamsburg classic traditional furniture and the several handsome Chinese and Korean pieces which belonged to Rockefeller's mother.

The 11½-feet high white walls are a shade less yellow now, to show off better the paintings and the white and beige furniture. The assertive, brilliantly colored paintings, important sculptures and handsome craft objects make the house seem lighter, brighter and more spacious. The effect moves the 1891 towers-and-turrets Victorian house into the 1970s.

All that's left of former Vice President's taste in art is a Mussolini-modern eagle from Dwight Eisenhower's inaugural stand. Wrapped in plastic, the eagle still stands in the garden, waiting to be moved in favor of something more contemporary.

Mondale showed the house yesterday at a press luncheon. Sunday, a group of museum officials previewed the installation.

The art works are lent by 13 Midwestern museums and the Phillips Collection here, chosen by Martin Friedman, director of the Walker Art Center in Minneapolis, a old friend and colleague of Mondale's. Most craft objects are from the National Collection of Fine Arts in Washington, chosen by the Smithsonian's Ralph Rinzler for a show several years ago, plus several pieces owned by the Mondales.

In place of the delicate flower painted china saucer are great pottery platters. "They'll hold lots of stubbed out cigarettes. We won't have to empty them as often," Mondale said.

Several of these pottery pieces were made by Mondale's own pottery teacher, Vally Possony. There are even one or two smaller pieces by Mondale herself.

Instead of stiff official bouquets, there are great bundles of forsythia and magnolia stuck in honeysuckle baskets by Lucy George and Lizzy Youngbird of North Carolina.

In the dining room, the massive American empire table carries a plaque marking it as once having been in the Manhattan apartment of John Rockefeller Sr., a gift of his son, Nelson. Atop it are Jugtown potter Vernon Ray Owens' earthenware, and nearby is a pot by Otto and Gertrude Natzler.

On top of the handsome Korean chest is a glazed black pot by Maria Martinez. In the living room, by the fireplace, is a garden set by Toshiko Takaezu.

The Mondale children, Eleanor, 17, Teddy, 19, and William, 15, have their own favorites: the Claes Oldenburg "Alphabet/Good Humor, 3-foot prototype," a piece as funny as the name; and James Rosenquist's "South from Horse Blinders" and "North from Horse Blinders" suite—possibly because Eleanor, with two horses, one of which she wants to sell, finds it easy to relate to.

Mondale said neither the children nor her husband has taken the "docent tour" she gave to the press at a luncheon yesterday, when she gave capsule catalog notes for several of the pictures.

The children also have had their effect on the house: Teddy's dirtbike road trophy sits on the marble sideboard in the dining room. Eleanor and her art class at Georgetown Day School are working on a mural on canvas for the third-floor hall. For another kind of educated taste, the Mondales have dug a vegetable garden on the south hillside.

Upstairs, the Mondales have used some of their own pieces and some from the Navy (the house, originally the Admiral's House, still technically belongs to the Navy). "But our Danish modern teak is rather overwhelmed by this house," said Joan Mondale. "I've had to store most of our things."

Eleanor Mondale says the house doesn't have a ghost, so far as they know. But Bess Abell, Mondale's aide, said the Mondales' dog, Bonnie, who is blind, spent some weeks bristling at things no one else could see. Joan Mondale said the great howl which whistles through the front door and down the chimney on windy days "reminds me of home. We always had a howl like that from our front doors in Minnesota."

The Mondales plan to invite people, in small groups, on an individual basis to see the house.

MILES CLAYTON ALLGOOD

Mr. SPARKMAN. Mr. President, former Congressman Miles Clayton Allgood, of Mentone, Ala., passed away recently in Mentone at the age of 99.

Miles Allgood held a variety of public offices at the local, State and national levels. Following his retirement from the House of Representatives, having served six terms, he was a member of the Farm Security Administration for 8 years.

I remember as a young lad listening to Miles Allgood's political oratory at Decatur, Ala., county seat of my native Morgan County. I told him many times that he deserved at least part of the credit for my decision to enter politics.

E. E. "Red" Cox, who many Members of Congress and staffers will remember as former Congressman Albert Raines' administrative assistant, wrote a fine tribute to Congressman Allgood in the Etowah County, Ala., News-Journal. I ask unanimous consent that Red Cox's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AN OLD FRIEND PASSES AWAY

(By Red Cox)

Alabama has lost one of its most distinguished citizens of our time. I have lost a good friend. Former United States Congressman Miles C. Allgood, age 99, of Mentone, a place he loved so much, passed away Friday, March 4. He was buried in Valley Head Cemetery on Sunday. Funeral services were held in the Chapel of the Wilson Funeral Home at 2 p.m.

As I stood by his graveside, along with my lovely wife, in the cold rain, with his wife, and many friends, I recalled some of the accomplishments and contributions he had made to our country. He served in the House of Representatives 12 years, from 1923 to 1935. I first met Congressman Allgood in 1932 at the old Gadsden Mallard Hotel, where my brother-in-law, W. H. Cummings, was Manager. I had just graduated from Etowah High School. I was a clerk there and attended the Alabama School of Trades. The Congressman would use the lobby to meet with his friends. He was handicapped by the loss of one arm. He had a gregarious personality, hearty laugh, and a heart of gold. I would listen to him tell about Washington, the Panama Canal, Muscle Shoals, and why we should develop the Tennessee Valley. I would cling to every word he would say with amazement. When everything was quiet and we were alone, I would ask him questions about Washington. Such as "Where is Washington?" And "How do you get there?" I remember him saying, "Young man, you seem to be a very fine boy. I will just get you a job up there!" And he did.

I went to Washington and found him to be a great leader, along with Senator John Bankhead and Congressman William Bankhead, who was later Speaker of the House and was also the father of the famous actress, Tallulah. Congressman Allgood was Chairman of the War Claims Committee, now known as the Veterans' Affairs Committee, also Chairman of the Reclamation and Irrigation Committee. The economic conditions of the farmer were so bad that President elect Roosevelt wanted to do something about it. In 1932, before he was inaugurated, he called Congressman Allgood and asked him to come to Warm Springs, Georgia. He was impressed with Congressman Allgood's knowledge of the conditions that existed, and in January 1933 his Secretary, Marvin McEntire, called from Albany, New York, and said President elect Roosevelt was formulating a party to visit and inspect the Muscle Shoals properties. He asked Congressman Allgood to give him a list of representatives interested in the project. Senator Norris of Arizona, some other interested Senators and Congressman Allgood, along with the Alabama Delegation, took the special train out of Washington with Mr. Roosevelt. I remember him telling how hundreds of people were gathered at the railroad stations with the hope of getting a glimpse of the President.

Later that year, Senator Norris introduced President Roosevelt's Tennessee Valley Authority Bill in the Senate. Then Congressman Lister Hill introduced it in the House. The bill was passed by a large majority. I have a picture of President Roosevelt signing it into law, and beside him is Congressman Allgood who received the Third Pen he used.

On January 15, 1968, Senator Carl Hayden of Arizona, President of the Senate and Dean of the Senate, wrote to Mr. Allgood expressing his gratitude for the help he had given when they were serving in the House of Representatives from 1923 to 1927.

Congressman Allgood joined him in sponsoring the bill which made possible the Grand Coulee Dam on the Columbia River—the greatest water power in our Nation. He also helped to bring about a just settlement of the controversy between Arizona and California over the construction of the Hoover Dam on the Colorado River.

Congressman Allgood was blessed with an excellent secretary, R. Lee Barnes, from Guntersville, and formerly Superintendent of Schools in Marshall County. Lee was one of

the best loved men that ever came from Alabama. He was President of the Little Congress (composed of secretaries of Members of Congress and, incidentally, was succeeded by Lyndon B. Johnson, who was then secretary to Congressman Richard Kleberg). Lee was responsible for my ambition to become a secretary to a Congressman. I could see the power they had when it came to dealing with the government. I got my chance when Congressman Albert Rains, one of the greatest, was elected. I worked with him as his Administrative Assistant until he retired.

President Roosevelt had great respect for Congressman Allgood and appointed him as a member of the Farm Security Administration, where he served until his retirement and return to his beautiful home in Mentone in 1943.

Congressman Allgood was a member of the Masonic Lodge of Gadsden and had just recently received the 50th Year Masonic Award.

Mr. Allgood loved to tell the story about the old man who gave his testimony in a church revival. He said he loved everybody and did not have an enemy in the world. He kept repeating this statement until, finally, the minister asked him, "How do you know you haven't an enemy in the world?" The old man replied, "I have outlived all of the old rascals!"

I prize a letter I received from Mr. Allgood when I was appointed Special Assistant to the Comptroller of the Currency of the Treasury Department. He wrote me "I wish you to know that I class you and Lee Barnes as two of my top choice of friends and appointees. No one is prouder of you than M. C. Allgood." So you see, I have lost a good friend.

Congressman Allgood is survived by his wife, Mrs. Willie Allgood of Mentone; two sons: Dr. William B. Allgood of Fort Payne and Miles C. Allgood, Jr., of Ocean City, Maryland; and one daughter: Mrs. Mary Boisseau of Lee Hall, Virginia; and seven grandchildren.

My love goes out to his fine family and his many friends. May he rest in peace.

EFFICACY OF A PERMANENT TAX CUT

Mr. LUGAR. Mr. President, by a vote of 282 to 131, the U.S. House of Representatives has adopted an economic stimulus package that includes $50 tax rebates for most low- and middle-income Americans.

The bill has now been sent to the U.S. Senate, and I will be working to substitute a better idea.

Here is why:

Americans need a permanent tax reduction, not just a one-shot tax rebate and continued high Federal rates.

A permanent tax cut would reduce the tax burden on working men and women and provide a more assured and long lasting economic stimulus than would a one-time handout scheme.

Tax reductions should be heavily weighted toward middle income taxpayers—those most heavily burdened by taxation and inflation. A permanent tax cut would allow taxpayers to commit themselves to buying more durable goods like major appliances and automobiles. This, in turn, would boost overall consumer demand and spur economic activity.

Inflation has made a permanent tax cut more advisable than ever. Inflation pushes taxpayers into higher income tax brackets and reduces the value of the exemptions and deductions they are allowed when filing their income tax returns. The result is that taxpayers must pay higher tax rates—but in the same or lower amounts of real income.

Our citizens should not be misled. The $50 rebate provision of the bill now before the Senate does not in any way mean a tax rate reduction. There is no relation at all between the rebate and tax liability. Under this legislation, taxpayers who bear more than a third of the total individual income tax burden would receive no rebate at all while millions of nontaxpayers would receive a rebate.

That is not fair. And it is not tax reduction.

Presently, nearly 40 percent of the total income of American taxpayers is taken by Federal, State and local governments and redistributed to other Americans by these various governments. I would like to see this growing stranglehold of governments loosened, and one way to do it is to provide substantial, certain, and lasting Federal tax cuts.

Many who advocate a one-time tax cut argue that tax rates should be kept high to provide future money for more Government spending programs that the new administration and the Congress may want to try. These same people feel confident that more general benefit to the Nation will come by taking money from some Americans and redistributing it to others.

But at this point in our history, it is from middle-income citizens and from business, large and small, that money is being taken—the money that might create the new jobs that many Americans need.

Mr. President, the case for permanent tax reduction is a strong one. A permanent tax cut would be more effective than a temporary rebate in stimulating economic growth, increasing investment and productivity, and decreasing unemployment.

A permanent tax cut would encourage business investment based on increased and continuing consumer demand.

A permanent tax cut would offset some of the effects of inflation and would sustain the current economic recovery.

Our choice is between a spoonful of sugar and a well-balanced diet of tax equity.

MINNESOTA FIRM RECEIVES FIRST NATIONAL ENVIRONMENTAL INDUSTRY AWARD

Mr. HUMPHREY. Mr. President, I would like to congratulate the Erie Mining Co., of Hoyt Lakes, Minn., for receiving the first National Environmental Industry Award.

The award, part of a program jointly sponsored by the President's Council on Environmental Quality, and the Environmental Industry Council of Washington, with the endorsement of the Environmental Protection Agency, was presented to the Erie Mining Co., for the work they have done in the area of revegetation of taconite tailings.

The Erie Mining Co. should be doubly commended for what it has done. It has managed after years of trial and error to develop a comprehensive revegetation program that is now an integral part of Erie's operations. But, also, its experiments in developing this program were started in 1948, long before words like environment and ecology became as important as they are today.

The Erie Mining Co., owned by Bethlehem Steet Corp., Youngstown Sheet & Tube Co., Interlake, Inc., and the Steel Co. of Canada, Ltd., can take great pride in its experimental program leading to successful revegetation of infertile iron ore tailings, and for receiving this award for outstanding achievement in solid waste management.

ECONOMIC ASSISTANCE TO VIETNAM

Mr. ROTH. Mr. President, I am disturbed that President Carter's remarks in his news conference yesterday may be interpreted by the Vietnamese as a new promise of economic assistance.

A good part of our present misunderstandings with the Vietnamese stems from an apparent promise of aid made by former President Nixon. This promise was inconsistent with the sentiments of the American people and of the Congress which, for some very good reasons, did not appropriate the aid.

I am just as opposed to economic assistance to Vietnam today, and I am confident that the vast majority in Congress would agree.

It is ironic that at the same time the President is reducing aid to some allies because of human rights conditions, he can envisage assistance to Vietnam, a country where all reports indicate massive violations of basic human rights.

I strongly support continuing negotiations with the Vietnamese in Paris. This is one means of actively pursuing our efforts to obtain a fuller accounting of the missing in action, which must be our highest priority in negotiations with Vietnam. But any changes in our posture should be predicated on hard evidence of real and vigorous Vietnamese efforts to assist us in making a satisfactory accounting of the MIA's.

The President should make it crystal clear to the Vietnamese that the United States is not prepared to provide foreign assistance, normal or otherwise. Even the vaguest references to such assistance is very unwise diplomacy.

By appearing to promise the Vietnamese something that the Congress will not deliver, the President will repeat Mr. Nixon's mistake. It would only encourage false hopes on the part of the Vietnamese and prolong a settling of the missing-in-action problem.

GENOCIDE AND AMERICAN SYMBOLISM

Mr. PROXMIRE. Mr. President, I belive most, if not all, Americans consider our Nation to be a bulwark of human freedoms. Born in the light of individual liberty, our great Nation has withstood adversity for over 200 years. We have successfully shown that government is instituted not to rule the people, but to be ruled by them.

I believe that this American image is perceived by the rest of the world, also. In countries where human dignity and rights are protected, the people appre-

ciate America for the example it put forth by its democratic government. In nations where the people are still repressed and freedom is only a cosmetic phrase, the United States serves as a ray of hope for those suffering people. The existence of our governmental system and its beliefs in the inviolability of human rights gives hope to those who have no rights.

Mr. President, our national heritage and our actions in today's world serve as a symbol of freedom for the entire human population. Whether we like it or not, our national actions are visible representations of the intangible rights of freedom. It is for this reason that I have continuously worked for the ratification of the Genocide Convention.

To ratify the Genocide Convention is to place our Nation squarely on the side of human rights. Both past and current history have too often shown that even this most basic of human rights—the right to live—has been trampled by those who would use power for their own evil designs. We, as the world's foremost symbol of human rights and decency, must place ourselves on the record as totally opposed to genocide. We must assume our responsibility as the world's symbol of freedom. I think our people want us to accept this challenge. I cannot believe we would do otherwise.

I urge immediate ratification of the Genocide Convention.

WATER DEVELOPMENT

Mr. McGOVERN. Mr. President, in its rush to terminate water projects in South Dakota and elsewhere in the country, the administration apparently has neglected to consider the human element of what the termination of these water development efforts really means.

An editorial from the Aberdeen, S. Dak., American News brings this concern into special focus with a letter from college student Scott Sperry of Bath, South Dakota.

I ask unanimous consent that the full text of this editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A YOUNG MAN'S PLEA TO THE PRESIDENT

Dear Mr. President:

I am a Junior at South Dakota State University. For many years I have planned to join my father and grandfather on our family farm. My grandfather started farming here in 1928. He struggled with the low prices of the early 1930s. Then came the drought years of the middle 30s when he had very little to sell.

My father started farming with my grandfather in 1952. Again they found themselves in the drought of the 50s with very low production. It was during these years that my grandfather began working to secure irrigation water for the arid soil of the James River Valley. Irrigation districts were formed, Congress authorized construction, repayment contracts with the U.S. government were signed and finally Congress appropriated construction funds. At last the Oahe Irrigation Project was becoming a reality.

Again our family farm is suffering a severe drought. In 1976 we had not one bushel of grain to sell. In 1977 you were sworn in as President. Within six weeks you announced that the Oahe Project would not be funded in 1978. It appears that you have decided, without consulting any of the many people in S.D. who have worked to bring water to the soil, that Oahe is a waste.

I hope you will give more consideration to this matter as there are a great many of us in S.D. whose lives will be affected by your breaking this contract for water delivery to the dry James River Valley.

SCOTT SPERRY.

BATH.

NEW PANAMA CANAL TREATY

Mr. THURMOND. Mr. President, the March 24, 1977, edition of the Washington Post contained an article by Don Oberdorfer entitled, "Panama Plans Intense Publicity Effort To Push New Treaty."

This article points out that Panama has hired an American public relations firm to mount a drive within the United States to back a new Panama Canal Treaty.

I am deeply concerned that there is a strong move to win the American people to support any new treaty without regard to whether or not it is in the best interest of this country.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PANAMA PLANS INTENSE PUBLICITY EFFORT TO PUSH NEW TREATY

(By Don Oberdorfer)

Panama has hired former presidential campaign aides of Sen. Barry Goldwater (R-Ariz.) and Sen. Hubert H. Humphrey (D-Minn.) to plan and execute a nationwide public relations drive backing a new Panama Canal treaty.

The contract between Panama's United Nations Mission and Public Affairs Analysts, a New York firm, became effective in January. F. Clifton White, who was the architect of Goldwater's 1964 bid for the White House, is president of the firm. Joseph Napolitan, who was the Humphrey campaign's media director in 1968 and has worked on many other political drives, is chief executive officer. Former Democratic National Chairman Lawrence F. O'Brien is an owner of the firm, though not active on a day-to-day basis.

Napolitan, in a telephone interview, estimated that Public Affairs Analysts would charge Panama $150,000 to $200,000 for its services over the first six months. He said the firm will send pro-treaty information to some 6,000 influential politicians, journalists, academicians and business people as well as monitor the activities of groups opposing a canal treaty. He said the firm will not engage in lobbying or "propaganda" activities.

Panama's new public relations advisers represent only one facet of growing activity by groups on all sides of the canal issue, which may well become one of the major political controversies of 1977. The Carter administration is seeking to conclude negotiations with Panama on a new treaty by this summer, hoping for Senate ratification before 1978, a congressional election year in which the controversial treaty could become an issue.

Senate Democratic Whip Alan Cranston (Calif.) has been quietly conducting a headcount since Carter identified the canal treaty as a high-priority matter in a talk with legislators before Inauguration Day. Cranston said yesterday that 22 to 25 senators are "apt to be negative" to a new treaty, 38 senators are "firmly for a sensible treaty" and up to 20 more senators appear amenable to consideration of a new treaty, with the positions of the rest unknown.

Sen. Strom Thurmond (R-S.C.) last year mustered 38 senators on an anti-treaty resolution. This is more than the one-third of the Senate, which can block ratification of a treaty by a two-thirds vote. Cranston's figures show improved chances for treaty ratification, but a tough political battle likely, is still likely.

Congressional aides report continuing heavy mail on the Panama Canal treaty issue, mostly from groups opposing what they maintain is a U.S. "giveaway." Some of the mail is generated by conservative publications, such as headlined articles in the current issues of Liberty Lobby's "Spotlight" and National States Rights Party's "Thunderbolt" attacking a new canal treaty.

The Council of the Americas, made up of 220 major U.S. corporations with investments in Latin America, asked each senator in a Jan. 28 letter to reject any resolution that would block negotiations for a new canal treaty. The letter, signed by council president Henry R. Geyelin, said successful solution of U.S.-Panamanian differences would have "a very positive impact" on U.S. relations with Latin America.

The council has established a "work group" of senior executives from 45 corporations to counter opposition to a canal treaty. Officials said an initial budget of $31,000 for year's work has been far exceeded by actual operations, including publication and distribution to 6,000 people of a 36-page phamphlet on the arguments for and against a new treaty.

The council's research arm has compiled a list of 20 organizations that have taken anti-treaty positions, ranging from the American Legion and Veterans of Foreign Wars to the Canal Zone Police Lodge.

Among the active anti-treaty groups are:

Task Force on the Panama Canal, a project of the American Council for World Freedom, a Washington-based conservative group. In a fund-raising letter for the project last September, council president Fred Schlafly claimed his organization in 1975 "spent just under $100,000 to stop the surrender of the Panama Canal."

Committee on Latin American Policy, a previously independent conservative group that last year became an "autonomous" division of the John Birch Society. It recently sent out an appeal for funds featuring a five-page pamphlet titled, "Who Owns the Panama Canal Anyhow?"

Canal Zone Non-Profit Public Information Corp. whose director of public information is Phillip Harman, a tireless anti-treaty figure who calls himself "the grandson-in-law of the founder of the Republic of Panama." Harman in 1953 married a granddaughter of Jose Aranga, a member of the junta that established the first Panamanian government.

U.S. officials expect perhaps the most important sales campaign of all to be launched within a month or two, if negotiations with Panama proceed favorably. President Carter has committed himself in private to a major drive backing the new treaty, including a televised "fireside chat" devoted to the issue.

ELECTORAL COLLEGE EDITORIAL PRESENTATION OF WSB-TV

Mr. NUNN. Mr. President, in recent days the subject of election reform has received national attention due to President Carter's message to Congress recommending major alterations in our Federal election procedures. Contained in this message was a recommendation

that the Congress adopt a constitutional amendment to provide for direct popular election of the President.

The manner in which the President and Vice President are selected has been the focus of continual debate since the Constitution Convention of 1787. Our original Constitution provided that every 4 years States should appoint electors equal to the sum of the Representatives and Senators to which that State was entitled in Congress. These electors met in the State capital to cast votes for President and these votes were transmitted to Washington and counted before a joint session of Congress. After the President-elect, the person having the greatest number of electoral votes became Vice President. In case of a tie or if no one received a majority of the electoral votes, the House was empowered to choose the President by a majority vote with each State having one vote.

As the 19th century began, several changes had evolved in this process. The role of the electors, which had originally been one of a trustee for the people, became one of an agent as their Presidential preferences became the basis for their selection. States began providing for the selection of slates of electors which resulted in all of the electoral votes of a State going to the candidate whose slate won on a statewide plurality. Presidential and Vice Presidential candidates began forming tickets, and this practice led to the only change in the system formalized by a constitutional amendment.

In June of 1804, the 12th amendment was ratified providing simply that electors must designate one of their two votes as one for President and the other for Vice President. This was implemented so as to avoid the circumstance such as arose in 1800 when Thomas Jefferson and his running mate Aaron Burr tied in the balloting due to the lack of specifying the office. Since the ratification of the 12th amendment, the only change in the system of consequence has been the evolution of popular election of the electors.

The electoral system has been subject to heated debate since its inception. Since 1789, hundreds of bills have been introduced in the Congress proposing alteration of the Presidential election process and, as you know Mr. President, Senator BAYH currently has legislation proposing direct popular election of the President.

Several arguments can be made in favor of the electoral system. It certainly has been a factor in the maintenance of our two-party system and the effect of this system should the electoral college be abolished is by no means certain. The electoral vote usually magnifies the popular margin of the winner and permits him to enter the White House with a psychological mandate even following a relatively close election. In addition, it has insured that smaller States are not totally ignored during a Presidential campaign.

On the other side of the coin, however, are some very persuasive arguments that could easily produce the conclusion that the electoral college has outlived its usefulness. The American electorate is no longer scattered around an undeveloped country with no reliable means of communication. The advent of our sophisticated media and education systems has eliminated the need for an "informed trustee" to vote on behalf of the populace. The independence of the electors presents the potential for post-election negotiations that could dramatically damage our constitutional form of government and result in an extra-constitutional balance of power. The inevitable specter of an individual being elected President by the electoral college who did not receive the most popular votes must be appreciated and this has in fact occurred twice in our history—1876 and 1888.

Several options have been suggested as potential improvements in our system of choosing a President. The most publicized of these is direct popular election. A proportional proposal involving allocation of the electoral votes in proportion to the popular votes received in the State has been suggested. A district method has also been discussed.

Mr. President, my concern regarding this issue is not a new one; however, I must admit that it was recently renewed by an outstanding editorial presentation on the subject which was broadcasted by WSB–TV in Atlanta in early December 1976. Don Elliot Heald, a good friend of mine, who is vice-president and general manager of WSB, did a tremendous amount of research on the history and development of the electoral system and then presented his findings and conclusions in an exemplary six-part series.

This editorial package was an example of thought-provoking public service broadcasting at its best. As I mentioned, it certainly caused me to reexamine the issue, and I know from my correspondence that it initiated thought on the part of many Georgians. Mr. President, because of my belief that Don Elliot Heald has done an outstanding job of recounting the background, analyzing the issues, and presenting the options, I would like to share his presentation with my colleagues. Whether we totally agree with his conclusion or not, I think the Senate will agree that Don Heald and WSB are to be commended for this series.

Mr. President, I ask unanimous consent that this editorial package be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WSB–TV,
Atlanta, Ga., March 7, 1977.

Ladies and Gentlemen of the 95th Congress:

You may well be called upon to cast a vote in the near future on a revision or repeal of our electoral college system. A recent series of WSB–TV editorials highlights some of the deficiencies and offers several alternatives to the dangerous and outmoded current system. Those editorials are included in this booklet which we hope you will find helpful in your deliberations.

If you have any comments or questions, I would be happy to hear from you.

Cordially yours,

DON ELLIOT HEALD.

EDITORIALS

THE PROBLEM

Next week, Jimmy Carter will be selected 39th President of the United States—maybe. You thought the question had already been settled? You could be wrong!

By secret ballot next Monday, the Electoral College will name the next President. When you voted last month, you voted—not for a presidential candidate—but for a group of these electors. And they will make the actual decision about the Presidency—next week.

Also, they are not obligated by your vote! Except for six states, they are not even legally bound by their own party's wishes!

There's no doubt they will elect Jimmy Carter next Monday, but the electoral college system is antiquated, unneeded and potentially dangerous. Changes need to be made.

All this week, we'll take an editorial look at the electoral system and the potential disasters it contains. For instance, the Electoral College might overturn the popular vote and name the runner-up as President. It has already happened three times!!!

Another for instance, a President could be elected under the present system, by carrying just 12 states. Incredible? It could happen.

We'll talk more about these frightening situations later in the week. Tomorrow, we'll look at the system itself and the way it works.

December 6, 1976.

THE SYSTEM

The electoral college system was first used in 1789. It provides that a few select people actually make the decision about the presidential and vice presidential candidates. These select people are usually designated by the various political parties and need have no special credentials except that they be friends of friends selected by political party committees.

When you cast your vote last month, you were voting, not for a president, but for members of the Electoral College. And a very important part of the arrangement that you should be aware of is that members of the Electoral College are not bound by law in their eventual vote, except in six states.

Also, you should know all of a state's votes go, in theory, to the candidate receiving the most votes in that state. Because of the way the system is set up, members of the Electoral College have, on three separate occasions, named a president who was not the popular choice of the American voters.

Next Monday, the electors will cast secret ballots in each of the individual states. Then the Secretary of State in each state will compile the vote and send the tally to Washington where the final tabulation will take place in January.

That's how the system is set up. And the system can, and has on three occasions, gone against the wishes of the American people.

We'll look at those elections tomorrow.

December 7, 1976.

EXAMPLES FROM THE PAST

Because of the way the electoral college is set up, it not only can, but it has, on three occasions broken down and second-runners have become presidents.

In 1824, Andrew Jackson received over 43% of the popular vote; John Quincy Adams received about 30% of the popular vote. The electoral system failed and Congress named John Quincy Adams as President.

In 1876, Samuel Tilden received over 50% of the popular vote, not only the most votes, but a clear majority of the popular vote. But a special election commission gave disputed electoral votes to Rutherford B. Hayes. He won the electoral vote with only 48% of the popular vote.

Then, in 1888, the electoral college put Benjamin Harrison in the White House despite the fact that Grover Cleveland had outpolled him in the popular vote.

Any system which can ignore the mandate of the American people should be changed or abolished. The situation that existed in 1787, when the Continental Congress decided it needed an electoral college, no longer exists. The American people are now the most educated and best-informed people in the world. And the popular vote for the nation's highest office should be held inviolate.

The voters in 12 particular states represent 20% of the nation's population and they can elect a president.

Tomorrow we'll look at that nightmare.

December 8, 1976.

A FUTURE POSSIBILITY

Yesterday we talked about the three elections when the runner-up named President, rather than the winner of the popular vote.

But a much more lopsided and terrifying possibility exists because of the electoral college system. Under the system it is possible for just 12 states to put a candidate in the White House.

If a candidate carried Massachusetts, New York, Pennsylvania, New Jersey, Illinois, Ohio, Michigan, Indiana, Missouri, North Carolina, Texas and California, that candidate would become president, no matter how many votes the candidates got in the other 38 states.

In other words, the popular vote in 38 states would have no effect on the outcome of the election. That's because the 12 states mentioned have 280 electoral votes between them. More than enough to give a candidate the Presidency. And a system that might allow this to happen should be done away with.

December 9, 1976.

WHY ELECTORAL COLLEGE?

Why an Electoral College? If we think the electoral system should be changed, we should know why we have it in the first place.

Back in 1787, when some very wise people were writing the U.S. Constitution, they wrestled with the idea of how to name a president. There was no television, no jet aircraft, many people were uneducated and only land owners were voters. The idea of the people electing a president was out of the question.

So instead, the writers of the Constitution decided some of the wisest men of the country should have that right—a special group of public men. Perhaps Congress, perhaps governors or instead: a compromise under which each state would have a few appointed to select the President and Vice President. They were electors who later became known as the Electoral College. But the electors at that time were not voted upon, that came a number of years later. For that matter, political parties were unknown to the constitutional writers.

Through the years, we have changed the system to allow the people of each state to elect a group of representatives to meet and cast their ballots for a president and vice president. It doesn't matter what the majority or even plurality of the American people want, it's what this group of electors wants.

And there is an imbalance between population and electors. For instance, Georgia and Alaska. Each Alaskan's vote has four times the weight of a Georgia ballot. It takes four votes in Georgia to equal one in Alaska. Hardly fair.

December 10, 1976.

But even though the founding fathers did not have enough faith in the people to allow them to elect their president, they did have the great wisdom to write a flexible Constitution that could be changed and has been changed many times.

Next Monday the electors will cast their ballots and we will talk about how the Constitution can be changed to instead give the people the power to elect a president.

WHAT CAN BE DONE ABOUT THE ELECTORAL COLLEGE

If about 10,000 people in Ohio and Hawaii had voted differently on November 2, the electors who voted today would have elected Gerald Ford rather than Jimmy Carter. Jimmy Carter would still have had a clear national plurality but because of the weaknesses in the present electoral system, he would not be the President-elect.

In last week's series of editorials, we pointed out that three Presidents have been elected in spite of someone else having pluralities and how in the future, a president could be elected with the approval of just 12 states.

The system is antiquated, dangerous and needs to be changed. Some possible variations:

Allow each congressional district to have one electoral vote. In that way, any candidate would have to campaign nationally and not just concentrate on heavily-populated areas. But the fallacy of this plan is the weight of the individual vote depending on the population of each district. The popular vote could still be defeated but less risk.

Another idea would be the division of electoral votes depending on the percentage of votes gained by each candidate in that state. As it is now, all votes in the state go to one candidate or the other. Disenfranchizing completely 30 or 40% of the voters who favor the second candidate. A prorata share of state electors would certainly be a safer system than we have now.

But in this day of fast communication, well-informed voters, computers, television and satellites, why not a presidential election system that gives each person an equal vote with every other voter in the nation? Isn't it time we had a true democratic election by all the people?

Though the founding fathers who wrote the Constitution did not have enough confidence in the people of the new nation to allow them such a privilege, they did have the intelligence to make a flexible Constitution that could be changed if a day of jet planes and instant communication ever arrived. That day is here and we have a system of changing the Constitution, but it is lengthy and complicated. It starts in Congress with a proposed amendment to the Constitution followed by either ratification by state legislatures or by a vote of the people. Let's hope some member of Congerss will start it in the 95th.

THE OSHA LEGAL FEES BILL

Mr. HARRY F. BYRD, JR. Mr. President, I was pleased to join yesterday with the Senator from South Carolina (Mr. THURMOND) in introducing S. 1122, a bill to grant legal fees to successful parties challenging citations under the Occupational Safety and Health Act.

I believe this legislation would curb one of the most arbitrary bureaucracies in Washington. And it would force OSHA—the agency which brought us portable toilets for cowboys and two-way intercoms for one-man mining operations—to pay for some of its mistakes.

The Occupational Safety and Health Act is perhaps the premier example of what happens when the Federal Government attempts to solve a problem by creating another bureaucracy.

The act tackles the problem of occupation safety by mandating creation of the National Advisory Committee on Occupational Safety and Health. The act defines the composition, selection, compensation, and recordkeeping procedures of the National Advisory Committee. The committee is authorized to appoint advisory committees, experts, and consultants.

In addition, the act establishes the Occupational Safety and Health Review Commission, and elaborates on its establishment, membership, location, compensation, quorums, and recordkeeping procedures. A single minor omission in the act is a statement of what all of these committees, commissions, and boards are actually to do in order to increase occupational safety and health.

Apparently, this is a question which these committees, commissions, and boards have yet to ferret out on their own.

OSHA has spent or will spend a total of a half-billion dollars in its first 5 years of operation, and the rate of accidents in the country's workplaces has not decreased.

Between 1972 and 1974, in fact, the National Safety Council has found that the injury and illness rate per 100 full-time workers has increased from 10.17 to 10.20.

The Bureau of Labor Statistics has found that the workdays lost to injuries and illness per 100 workers rose to 54.4 in 1975, compared with 53.1 in 1974. The 1975 figures, therefore, represent a dramatic increase in serious accidents, at the expense of less serious ones.

All the while, OSHA continue to publish rosy statistics concerning decreases in the number of industrial violations. But industrial accidents increase, and industrial health and safety expenditures decrease. What OSHA has done is to divert funds from serious health and safety measures to trivial ones.

Ninety-seven to ninety-eight percent of the violations found by OSHA are classified as "nonserious"—a self-admission that its activities constitute little more than harassment. Regarding ladders, for example, OSHA prescribes the following:

> The general slope of grain and that in areas of local deviations of grain, shall not be steeper than one in fifteen in rungs and cleats. For all ladders cross grain not steeper than one in twelve are permitted in lieu of one in fifteen, provided the sizes increase to afford at least 15 percent greater calculated strength for ladders built to minimum dimensions. Local deviations of grain associated with otherwise permissible regularities are permitted.

The tragedy is that, absent a Washington infrastructure, industry would make major expenditures to alleviate unhealthy and unsafe conditions. Employers do apply safety in response to market incentives, and risks sufficiently great to trigger probable employer liability will generate corrective measures.

By forcing industry to shift expenditures from serious health hazards to arcane specifications governing nonserious ones, OSHA has defeated this market mechanism. OSHA is proving itself counterproductive.

The social choice which faces us is not, therefore, one of whether we will have safe working conditions or unsafe working conditions, but rather a question of how we shall allocate our limited re-

sources for purposes of minimizing accidents resulting from unsafe job conditions.

The first step is to force OSHA to pay for the thousands of dollars of fees and expenses required to defend against frivolous and arbitrary citations. And this is the purpose of the legislation which we introduced yesterday.

PROTECTION FOR THE LAND

Mr. McGOVERN. Mr. President, I recently introduced a bill providing that the Great Plains Conservation program, which is scheduled for completion in 1981, be extended for an unlimited number of years and that the funding requirements for that program be excluded from fiscal year limitation. The purpose of this legislation is to promote greater agricultural stability through the cost sharing of conservation practices. Unfortunately, this program and other similar efforts have not been used to their full potential—and the land has suffered for it, especially during the severe drought conditions in the Midwest.

A recent newsstory carried in the Rapid City Journal confirms the need for immediate action on this legislation and quotes the agreement of Secretary of Agriculture Bob Bergland to the need for greater concentration of soil conservation technical assistance urged by a GAO report. This report included the Great Plains Conservation program in its investigation. I ask unanimous consent that this newspaper report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

DROUGHT DRAWS ATTENTION TO PROTECTION OF THE LAND

WASHINGTON.—Drought in some of the nation's richest and most important food-producing areas is helping call attention to the government's role in helping farmers protect the land.

Huge dust clouds, parched fields and dried-up mountain reservoirs are evidence that despite federal programs and pleas by conservationists, there is much to learn about protecting irreplaceable topsoil from erosion.

Drought isn't the only culprit, since heavy rains carry tons of topsoil from fields into streams and rivers. The General Accounting Office says that some programs for conserving the land simply are not being run well by the Agriculture Department.

Agriculture Secretary Bob Bergland and some top officials of the Soil Conservation Service in USDA basically agree, but they also note that Congress holds the purse strings and that there are limits to what can be done unless more spending is approved.

The GAO, an investigative agency of Congress, says in a report that more money is not the entire answer, however. It says the money and technical help given farmers "could be used more wisely" and that the Soil Conservation Service (SCS) has been dragging its feet.

The GAO said the agency takes "a passive approach" to its mission of helping farmers conserve soil and water by usually confining advice and help to farmers who request aid and who volunteer to become cooperators.

"As a result, the program has not been as effective as it could be in helping farmers to control erosion and preserve topsoil on agricultural lands," the GAO said.

"Some SCS district conservationists told us that manpower limitations and the considerable amount of time involved in developing conservation plans for farmers who visited their offices and requested such assistance had kept them from establishing a system for identifying and contacting all the farm operators in their districts who had severe soil erosion problems," the report said.

Other observations by GAO included:

"Estimates of soil losses for 283 farms GAO visited on a random basis in the Great Plains, Corn Belt and Pacific Northwest indicate that topsoil losses are threatening continued crop productivity.

"Soil scientists estimate that annual soil losses must be limited to no more than five tons an acre in the deep soils and one ton an acre in shallow soils to maintain soil fertility and productivity over time.

Bergland, responding to the GAO report, said the review was basically sound. He noted recommendations in the report for each USDA agency, including the Soil Conservation Service.

"The service concurs in the intent of the recommendations and will carry them out within the limits of its manpower, budgetary resources and institutional arrangements," Bergland said.

The report's comments on the effectiveness of the Agricultural Conservation Program (ACP), designed to help farmers pay the cost of carrying out approved projects, also were noted by Bergland as being "useful" and of future value.

"However, the report concentrates solely on the effect of the program on controlling soil erosion," Bergland said. "Congressional authority mandates use of program funds to conserve water, wildlife and woodland resources, and to combat agriculture-related pollution, as well as for soil conservation."

Bergland said he will see that the Extension Service "intensify its efforts" to carry out GAO recommendations on reaching more farmers and to coordinate more closely with other agencies.

"Extension in its education role has a responsibility to advise on practices that apply under varying local conditions and will make all reasonable efforts to coordinate with other USDA agencies to eliminate or minimize inconsistencies in advice given to farmers," he said.

A BOLD SPACE PROGRAM

Mr. GOLDWATER. Mr. President, under the reorganization program recently passed by the Senate the Aeronautical and Space Sciences Committee no longer exists. It has been absorbed into the Commerce Committee under a subcommittee on this subject chaired by that able Senator from Illinois (Mr. STEVENSON) and having as its ranking Republican member that famous astronaut and colleague, Senator HARRISON SCHMITT. The subcommittee is already at work holding hearings and absorbing the knowledge and suggestions of NASA. Dr. Allen Lovelace, who is Deputy Administrator of NASA, recently made a statement about the need for a bold space program. This appeared in Aviation Week & Space Technology of February 28th of this year, and it so quickly and completely comes to the point of what we, as Members of Congress, hold as our responsibility to the people of this country relative to space that I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

A BOLD SPACE PROGRAM

The first of these new opportunities is the one already closest to realization—the formal establishment of an operational earth resources survey program. . . . The hardware is here—but where is the commitment to a significant demonstration on a significant scale? It is still missing, despite the many new and useful applications of routinely repetitive global multispectral observations; still missing, despite a very real commitment abroad—in South America, Canada, Africa, Europe and Asia—to the continuity of this unique information service; still missing, despite its potential for crop measurement, environmental monitoring and mineral exploration. Why? It is simply because Landsat has, in one sense, too many different customers who have too many different objectives. There is no easy, cozy one-to-one relationship with a particular industry or social sector.
